Saturday, October 20, 1866.

Stock Exchange and Money Market.

An effort has been made, during the past week, and more especially within the past three days, to create the impression that there was increasing stringency in money, and less disposition manifested by lenders to grant accommodation to responsible borrowers, unless on the most unexceptionable collaterals. This effort originated with the *bear* element in the Gold Room, and at the Stock Boards. In vindication of the theory of growing scarcity and tightness in money at this centre, it has been urged that the drain of currency to move the crops is now quite serious; that the banks are imprudently expanded and must soon contract, to avoid peril; that Government has been or soon will be, a seller of gold, and a hoarder of greenbacks; that, in short, symptoms of impending stringency in the Money Market abound on all sides. Despite all this sinister croaking, it is satisfactory to us to be enabled to state that money is far more abundant here than is needed to meet the requirements of speculation and regular business; that lenders are rather less anxious about collaterals; that not only Government stocks, but prime dividend paying railway and miscellaneous share property is regarded as acceptable security; and that rates on call loans rule steady at 3@4 per cent. to the large dealers in Government bonds and notes, and 4@5 per cent. to other leading stock firms. As late as Wednesday, p. m., we were reliably informed of heavy deposits having been made with two leading private banking houses on Nassau street at 3@3½ per cent., without any other security than a certificate of deposit. Another house in the miscellaneous stock line had $600,000 left with it on call at 4 per cent., the collaterals being U. S. 5-20s of 1865, of both series, May and July. Furthermore, the Government is not now, and is not likely soon to be, a seller of gold. It is now, and for some weeks will be, a liberal disburser of gold; at present, in redemption of U. S. 6 per cent. bonds, maturing in 1867, which are being bought in at equal 96@97, and those of 1868, at 90@92; and from Nov. 1, in liquidation of the twenty four million of coin interest claims maturing on the 1st proximo. That all or nearly all the gold thus disbursed by the National Treasury will be promptly marketed by the recipients we have doubt; that such a marketing of coin must depress the premium on gold is morally certain; that the currency realized for this coin will be presently re-invested in Government and other liberal dividend paying stocks, instead of being hoarded, or otherwise profitlessly locked up, cannot be questioned; and this mere shifting of money, without absolutely retiring it from the market, can have no adverse influence on the loan and discount market, is the prevailing opinion of the great bankers and capitalists. Commercial paper, of prime to good quality, is in very moderate supply and high favor with lenders, at from 4½@6 per cent. per annum. The banks, while reporting diminished resources in the form of deposits and legal tender reserve, show an expansion in loans and circulation, which, however, is not regarded as in any legitimate sense an alarming symptom. The banks have actually near twenty-five millions of a surplus of specie and legal tender reserve over the required average, the collective reserve in this form being $88,756,424, against a required average of $64,155,032, at the rate of 25 per cent. on $256,620,127 of deposits and circulation. The increase in loans, last week, was $2,233,058, and in circulation, $874,550, while there was a loss of $2,158,857 in legal tender, $1,625,673 in deposits, and 627,691 in specie. The bank deposits are now $226,858,897, or about forty-four and a half millions more than at the same time last year. Their legal tender reserve amounts to $83,180,422, against $50,459,195 same time last year. Their circulation now stands at $30,176,908. The loans are now up to the enormous sum of $276,443,219, or forty-six millions more than at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $128,391,818 a day, against a daily average of $138,180,293 the preceding week; and $96,261,995 the week ending with Sept. 29. The current week's exchanges average about $140,000,000 a day. The falling off in the legal tender reserve about equals the week's remittances of lawful money to the interior, to be use in moving the crops, and surely an outflow of a trifle over two millions cannot be regarded as an alarming drain from the enormous accumulations of capital at this centre.

National Bank notes to the amount of $543,-436, were issued last week, making the total issue to 1,661 banks thus far $294,072,059, against $195,-000,000 same time last year. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $332,903,300; and for the public deposits, $39,171,950—making a total of $372,-075,250.

The U. S. Sub-Treasury receipts, week ending with Oct. 13, were $13,681,534, including $2,546,-362 from customs duties; payments, $7,912,487; balance at the close of the week, $96,057,650, against $90,288,601 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $5,946,557, and payments, $5,-576,093. Tuesday, receipts, $2,007,613, and payments, $287,503. The balance at the close of business on Tuesday stood at $97,698,219 against $92,058,007, a week ago.

Government revenues were not quite as heavy, last week. Excises yielded, $4,539,702 in currency; customs at the port of New York, $2,-546,362 at the outports, at least $1,050,000 (in coin) more, making the grand total income for the week equal to about $9,934,245 in currency, against disbursements of only $3,015,318 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $114,-000,000. The customs revenue at the port of Boston, last week, was $373,000, and the receipts from the same source, from Jan. 1, to Oct. 1, $13,-651,442, against $13,129,985 same time last year. The Customs revenue at New Orleans, in September, was $481,058, against $225,626 same month last year, and $279,110 same month in 1860.

There has been a marked falling off in the Gold speculation, and a strong disposition to sell *short*, or against the market, has been developed since our last. The extreme rates of the week have been 155⅞, on the 11th inst., and 147⅛ on the 16th inst. The closing price on Tuesday was 149. On Wednesday the market range was from 148 to 148⅞, and the closing figure 148⅛. The apprehension that the Government was about to become a seller of Gold has worked against the *bull* interest, which has had nothing to encourage it, save the active customs inquiry. Some gold has really been disbursed by the Treasury in redemption of the Sixes of 1867 and 1868, at a liberal discount from par value in coin, and a considerable portion of this gold has been marketed by the receivers, leading to the conclusion that the Government itself had actually begun anew to realize the handsome ruling premium on part of its heavy coin reserve, which conclusion, however, we have reason to believe is not justified by "the facts of the case." Indeed we are authorized to state that the Treasury is not now, and does not contemplate becoming, a seller of gold. It will be glad to meet its coin interest obligations promptly on maturity, but beyond this, and the redemption of its speedily maturing bonds, when offered on advantageous terms, it does not purpose to proceed in the reduction of its own absolute specie reserve, which at present cannot fall much short of eighty-three million dollarst. The customs demand last week, averaged $424,393 a day; thus far, this week, it has been equal to $530,000 a day, or equal to a weekly aggregate of $3,180,-000. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $510,-320, and from California $1,174,250. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $109,638,636, against $78,895,265 same time last year. The total receipts of California gold at this port since Jan. 1, have been $33,923,655, against $15,090,922 same time last year, showing an increase, in 1866, of $18,830,733. The exports of specie from this port, last week, were $198,050, making the total outflow of specie from the port, since Jan. 1, $54,113,933, against $23,803,975 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $52,900, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,905,489, against $29,483,020 same time last year. An effort was made on Wednesday to stimulate afresh the gold speculation, on the basis of the apparent fall of 2@2¼ per cent. of U. S. 5-20's in London the 16th inst., or to 68¼, but this effort proved abortive as on inquiry, it was discovered that this London quotation of 68¼ for U. S. 5-20s was *ex* the three per cent. November coupon, which would make the rate in London on the 16th 71¼, or really ¾ per cent. higher than on the 13th inst. The main cause of the inflation early in the week was the publication of a bogus Washington Dispatch, relative to anticipated action on the part of the President, hostile to the recognition of the Congress from which southern representatives should be excluded. This dispatch was first imposed on the proprietors of the Philadelphia *Ledger*, one of the most reliable newspapers in the country, and because of the character of the *Ledger*, the dispatch was accepted and published by most other journals. The prompt official exposure of the forgery destroyed its influence. On a careful review of all the testimony collected by the *Ledger* publishers, President Johnson has exonerated these gentlemen from all blame, or censure.

Government bonds and notes have been in quite brisk demand since our last, and prices especially of the gold-bearing bonds, have been on the advance. The 5-20s of 1862 are in renewed request for export. U. S. sixes of 1867 closed 140; U. S. sixes of 1868, at 137; U. S. sixes of 1881 closed 113; U. S. Five-twenties of 1882 at 114@114⅛; U. S. Five-twenties of 1865 at 110½; U. S. Five-twenties of 1866, 108¼@; U. S. Ten-forties at 99⅝, and U. S. Seven-thirties at 106⅛@106⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 percent. on these figures:

June, 1864	116¾	May, 1865	111½
July, 1864	116¼	August, 1865	110½
August, 1864	115¾	September, 1865	110
October, 1864	115¼	October, 1865	109½
December, 1864	113¾		

Foreign Exchanges have improved materially since our last, especially since Monday, in view of the fall in gold, and the increased demand for bills from importers. Bankers' 60 day bills on London have been quoted up to 108@108½, and on Paris to 5.25@5.23½; sight bills on London to 108¾@109¼; and on Paris to 5.22½@5.20. The offerings of produce bills are increasing. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,285,710, against $4,161,096 same week last year. The exports since January 1, have been to the value of $150,544,644, against $120,380,986 same time last year.

There has been decidedly less speculation in Railway and Miscellaneous Stocks since our last, and the temper of the market, for some days, has been unquestionably bearish, the tendency of prices having been in favor of buyers. Tuesday forenoon's dealings were all seriously against the market, which was much depressed, and panicky. The afternoon transaction were characterized by more firmness and buoyancy. Wednesday's movements were restricted, on a variable market, which, at the close, was heavy and spiritless.

Produce and merchandise have been in fair, but not active demand, since our last. Breadstuffs and Cotton have improved in price. The current week's receipts at this port average only about 925 bales a day. The receipts at this port since Oct. 1, have been 18,433 bales, against exports of 3,539 bales. The receipts since the commencement of the current cotton year, Sept. 1, have been 46 231 bales, against exports of 25,013 bales. Since Jan. 1, there have been received here 478,-375 bales, and exported hence 334,951 bales. At an average of $180 a bale, the current calendar year's receipts represent a currency value of $86,-107,500, and the exports $60,291,180. Estimates of the available supply here vary from 85,000 to 110,000 bales. A stock of even 100,000 bales would be equivalent to a currency value of at least eighteen million dollars. The week's exports of cotton have been 1,240 bales from this port, and 9,500 bales from all the shipping ports, leaving an available supply of about 100,000 bales here, and at all the shipping ports, of 270,000 bales. Dry Goods have been less buoyant, but desirable fabrics have not yielded much, as they have not been plenty, or pressed for sale. The total imports of foreign dry goods, last week, were $1,-995,336, and the total amount marketed $2,204,431. The value of foreign merchandise imported last week, was $1,938,818—making the grand total specie value of last week's imports of dry goods and merchandise, $3,934,151, and since January 1, $242,913,528, against $157,403,230 same time last year. The freight market is dull, but firm with 477 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 2.	Oct. 6.	Oct. 16.

American Dock and Improvement Co.

We invite attention to the Advertisement in another column for proposals for $1,000,000 bonds of this company. These bonds are for $1,000 each, due July 1, 1886, interest 7 per cent., payable semi-annually in this city. The punctual payment of both principal and interest is guaranteed by the Central Railroad Company of New Jersey; than which, no better security can be had. The bonds are issued for land purchases and for improvements in Communipaw Bay, under the authority of the State of New Jersey, on the extensive water front of the company, and in connection with the improvements of the said railroad company. Proposals should be sealed and indorsed "Proposals for Bonds," and directed to Samuel Knox, Treasurer, 103 Liberty street, New York. The time for receiving proposals is limited to Friday, October 26, at noon.

Erie Railway.

The annual election of directors of this company took place on the 9th inst. The following gentlemen were chosen: Robert H. Berdell, Alexander S. Diven, Samuel Marsh, John Arnot, Ambrose S. Murray, H. L. Pearson, Daniel Drew, William B. Skidmore, Dudley S. Gregory, William Evans, J. C. Bancroft, Davis D. A. Cushman, Thomas W. Gale, Isaac N. Phelps, J. F. D. Lanier, Franklin F. Randolph, Frederick A. Lane.

At a meeting of the Directors on the 16th Robert H. Berdell, Esq., was unanimously re-elected President, and Alex. S. Diven, Esq., Vice-President.

☞ It is stated that the New York Central Railroad is about to import enough steel rails from England to relay two miles of track, in order to test their durability. In Great Britain the London and Northwestern Railway has laid sixty-three miles of steel rail on their system, and the work of relaying with steel instead of iron is to be continued. On the Great Northern steel rails have also been laid at all the principal stations, and on the steepest incline of railway.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Oct. 12th, 1866, were $71,784 68
Corresponding week of 1865 ..... 91,329 89

Decrease $19,545 21

The earnings of the Grand Trunk Railway of Canada for the week ending Oct. 6th, 1866 were $144,211 00
Corresponding week of previous year.. 154,700 00

Decrease $10,489 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in Oct., 1866.... $24,366 00
Corresponding week previous year.... 25,831 80

Decrease $1,465 80

The earnings of the Western Union Railroad for the week ending Oct. 7, 1866 ..... $20,503 96
Corresponding week previous year.... 19,917 10

Increase..... $586 86

The earnings of the Chicago and Rock Island Railroad for the 1st week in Oct., 1866, were $118,191 00
Corresponding week of previous year.. 99,152 00

Increase..... $19,039 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Oct. 4th, 1866, were $46,745 00
Corresponding week of 1865..... 43,975 00

Increase..... $2,770 00

The earnings of the Chicago and Northwestern Railway for the first week in Oct., 1866, were $265,033 00
Corresponding week of previous year.. 241,343 00

Increase..... $23,690 00

The earnings of the Michigan Central Railroad for the 1st week in Oct., 1866, were... $101,191 00
Corresponding week of previous year.. 109,846 00

Decrease $8,655 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Oct. 1866, were..... $105,550 00
Corresponding week of 1865 ..... 114,944 00

Decrease $9,394 00

The earnings of the Chicago and Great Eastern Railway for 1st week in Oct. were..... $29,643 63
Same period last year..... 27,635 94

Increase in 1866. ..... $2,007 69

The earnings of the Virginia and Tennessee Railroad for the first week of Oct., were $17,712, an increase of $5,268 on the same week last year.

The receipts of the Susquehanna Canal Company for the week ending Oct. 8th, were $7,107 40; previously this season, $161,250 97—making a total of $168,358 37.

☞ We last week noticed an election of directors of the Dover and Winnipiseogee Railroad. Wm. Hill, of North Berwick, has been elected President. This road runs from Dover to Alton Bay, 28 miles, passing through Gonic, Rochester, Farmington and New Durham. It is operated under contract by the Boston and Maine. This contract is dated November 1, 1863, and is for fifty years, at an annual rental of $29,000. Paid in capital, $389,047 60; funded debt, $420,953 33; cost of road $884,000.

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg Railroad for the month of Sept., 1866, were:

From freight		$145,127 46
" passengers		67,729 45
" miscellaneous		4,500 00
" military		583 70
		$217,940 61
Sept., 1865:		
Freight, passengers, etc..	$239,925 34	
Military	3,488 06	
		243,431 40
Decrease		$25,472 79
Decrease in regular traffic		22,568 43

The earnings of the Housatonic Railroad for the month of Aug, 1866, were $49,453 06
Same time in 1865..... 47,431 72

Increase..... $2,021 34

The receipts of the European and North American Railway, for the month of Aug., 1866, were $13,092 27, and for the corresponding period the previous year $12,890 69, being an increase of $201 58.

The earnings of the McGregor Western Railway for Sept., 1866, were..... $18,472 00
Same time in 1865..... 26,153 00

Decrease $7,681 00

Erie Railway.

The earnings of the Erie Railway and Buffalo Division for the month of Sept., 1866, were:

Erie Railway.....	$1,326,415 00	
Buffalo Division....	84,931 90—	$1,411,346 90
Sept., 1865—		
Erie Railway.....	$1,336,615 27	
Buffalo Division....	98,669 42—	1,435,284 69
Decrease on Erie Railway and Buffalo Division.....		$23,937 79

The earnings of the Erie Railway (including the Buffalo Division) for the first nine months of the fiscal years 1865 and 1866, have been as follows:

	1865.	1866.		
January...	$1,070,890	$1,187,188	Inc.	$116,298
February..	1,011,735	983,855	Dec.	27,880
March	1,331,124	1,070,434	Dec.	260,690
April	1,538,313	1,153,295	Dec.	385,018
May.....	1,425,120	1,101,668	Dec.	323,452
June	1,252,370	1,243,143	Dec.	9,227
July.....	1,274,558	1,203,462	Dec.	71,095
August ...	1,418,742	1,290,330	Dec.	128,412
September.	1,435,285	1,411,347	Dec.	23,938

Total decrease $1,113,414

New Iron-Preserving Agent.

Dr. Henry Edward Francis de Brion, a Paris physician who, for many years resided in England, has discovered and patented a process for preparing from india-rubber an *enamel paint*, which is absolutely proof against the action of the atmosphere, as well as against the power of all liquids (including the most potent acids), to affect iron. The preparation is applied cold and in a liquid state, and in consistency and general appearance it resembles such common oil-paint as is ordinarily used for iron work. It may be applied with ease; but of course it is necessary that the process of application should be conducted with such care as will insure a complete covering of the surfaces to be protected. This covering may be so thin that its presence cannot be detected; while it leaves the protected surfaces in all their original sharply-defined freshness. It hardens also at once, and immediately forms a smooth and lustrous enamel-like covering, air-proof, damp-proof, water-proof, and acid-proof. Thus protected the iron is safe. Rust cannot accumulate on the surface of this enamel-paint, nor corrode beneath it. —*Art-Journal.*

Journal of Railroad Law.

NEGLIGENCE—DUTY OF ENGINEER TO SOUND THE ALARM.

The case of Besiegel *vs.* The New York Central Railroad Company, decided by the Court of Appeals of this State, is important as involving the liabilities of railway companies.

The facts of the case are fully detailed by Judge Morgan who delivered the opinion of the court.

MORGAN, J.—Upon the undisputed facts of the case, the plaintiff could have avoided the accident by exercising a little more precaution before he had stepped on to the third track. If the freight cars had not intercepted his vision, he must have seen the engine approaching from the east, in time to have avoided the collision.

It is said that common prudence required him to put himself in a position to see whether there was a train coming from the east on the third track, before he attempted to cross it. The evidence, however, tended to show that the railroad company was guilty of great negligence in backing down at so rapid a rate of speed across South at Joseph street without any flagmen to warn foot passengers of their danger, or without sounding an alarm from the engine. With their cars standing upon the track so near the crossing, the company was guilty of inexcusable negligence in omitting to take the usual and necessary precautions to prevent accidents.

As an original proposition, it seems to me, that the omission of a railroad company to sound an alarm when approaching a crossing, especially when the view is obstructed by intermediate objects, is some excuse for the inattention of a way traveller to the danger of an approaching train. The way traveller depends upon his ears as well as his eyes, and when his vision is obstructed, and he is within a few feet of the track, and hears no alarm, it ought not to be thought very hazardous to step across the track. If he hears no signal, he does not expect a train to cross his path when he has but a few feet to go to cross over, and if he for greater precaution, stops and looks both ways before he makes the last step to reach the track, he exercises more precaution than a majority of our citizens do in similar circumstances.

The doctrine which requires travellers, in all cases, to stop and look both ways, when approaching a railroad track, pre-supposes that railroad companies are guilty of violating their duties to such extent as to make it a matter of course, to expect a train to run over the streets of a city under full headway at any time, without signals or safeguards.

When the vision is obstructed, as in the case at bar, the way traveler generally listens to hear the alarm, and if none is given, it is not, or at least ought not to be, presumptuous in him to suppose that he can walk over the track with safety. He has a right to believe that the engineer will not run his engine with such dangerous speed, without ringing the bell, or sounding the whistle.

It is not sufficient to defeat this action, to say that in another case the plaintiff was non-suited, because he failed to look both ways before attempting to cross the track of a railroad. The want of caution which constitutes negligence

must in any given case depend upon the circumstances under which the plaintiff is placed at the time.

If the tracks had been clear, so that the plaintiff could have seen the approaching engine, then doubtless it would be negligence in him not to have seen it, so much must be conceded as settled by the adjudications in this State.

The evidence tended to show that the plaintiff was within a few feet of the third track, and heard nothing to give him warning of an approaching engine. He left his position, and stepped forward to cross it. He could not see the approaching engine until he had got to the very point of danger, and then on account of the rapid motion of the engine, he was unable either to cross over, or to recede and avoid it.

The court below maintains the proposition that the plaintiff, although he had waited on the second track until the train had passed, and had heard no signal of another, yet that he should have stopped again and looked down the third track before attempting to cross it. And this is put upon the ground, that it might be expected that an engine at full speed would be rushing along at that very time without giving any warning of its approach.

I cannot subscribe to such a proposition. It was I think a question for the Jury to decide, whether, under the particular circumstances of the case, the plaintiff was wanting in ordinary prudence in attempting to cross the third track when he did, without taking other precautions to discover that it was clear.

Doubtless, if the engineer gives the usual signals, and the way traveller does not hear them, it would be his misfortune if he came in collision with the engine. So if the way traveler cannot see the train with his eyes in time to avoid it, it is his folly if he venture to proceed, and comes in collision with it. But when he cannot have the use of his eyes to discover the danger, until he reaches the track upon which the train is approaching, and upon stopping a few feet short to listen, he hears no signal, can it be said as an abstract proposition, that the plaintiff is guilty of negligence, because he trusts his ears, and comes to the conclusion that it is safe to take the few steps necessary to pass over it? If he has listened while standing within a convenient distance of the track, and has heard no signal of an approaching train, if he has but a few steps to go to cross it, and if acting on this belief, that it was safe (as nine men out of ten would do in a similar situation), he started on, and was met by an engine running almost noiselessly and at great speed, can it be said with propriety, that he should have expected such a thing to occur as did occur in this case?

It is not necessary to decide that the plaintiff was not guilty of negligence. All I claim is, that considering the peculiar position this plaintiff was placed in, as may be gathered from his own statement; his proximity to the track; the few moments it would take to clear it; his obstructed vision, and the noise and confusion at the time; that no signals were sounded from the approaching engine to put him on his guard, and the unusual speed with which the engine approached him; I say, considering all these circumstances, it should have been left to the Jury as a question of fact to determine whether or not the plaintiff was guilty of negligence in attempting to cross the tracks without taking further and additional precautions against the danger of a collision.

If, however, the evidence should disclose that the plaintiff was heedless or careless, and neglected to avail himself of the usual precautions which men of common prudence would use in like circumstances, he cannot recover, under the well settled rule that his own neglect contributed to procure the injury.

The degree of care which a way traveler should observe, when about to cross a railroad track, has been discussed in several adjudicated cases. In Pennsylvania R. R. *vs.* Ogier (35 Penn. R., 160), it was held that negligence was a relative term when applied to a traveller in such a case, and consisted in the absence of that ordinary care which a party ought to observe under the peculiar circumstances in which he is placed; and that a different degree of care is required, when there is reason to apprehend danger, from that which is necessary when none is to be expected.

The duty of a railroad company to exercise more caution and a higher degree of care when running their cars through a village or city, than in the country, as was held in Fargo *vs.* The Buffalo and State Line R. R. Co., (22 N. Y. 207), concedes that the company would be liable in not exercising it, when by so doing ordinary prudence on the part of the way traveler would save him from a collision.

The good sense of the rule may be thus expressed, ordinary care requires the way traveler to look for a train when approaching a railroad track. If he cannot see by reason of obstructions it requires him to stop just short of the track and listen. If he does more than this, it is extraordinary caution, and what is not required on the part of the plaintiff to entitle him to recover against a railroad company, which has culpably omitted to sound an alarm before reaching the crossing, if the Jury believe that the accident would not have occurred provided the usual signals had been given.

I distinguish the case at bar from those in this State, where it has been held that the plaintiff could not recover in consequence of his own want of caution in attempting to cross a railroad track. In Dascomb *vs.* The State L. and B. R. R. Co., (27 Barb. 221), the plaintiff drove along upon the track without taking the slightest precaution to ascertain whether or not a locomotive was approaching.

It is not unusual for empty cars and freight cars to stand upon the tracks near the crossings in our cities, some have engines attached to them, and are waiting some signal to start, some have no engines attached. In the meantime passenger trains are running in and out, and a person who wishes to cross the track is necessarily in some doubt as to the exact condition of things. His observation of the tracks is necessarily very limited, and the view he obtains quite unsatisfactory.

There is often a curve in the track at a short distance from the crossing, so that he cannot see an approaching train without going quite a distance out of his way.

In this condition of things ought we to establish the rule, that a foot traveler is guilty of want of ordinary care and caution by attempting to cross without first obtaining an observation of the track at a distance sufficient to insure his safety against a locomotive advancing towards him at the rate of thirty or forty miles an hour?

In my opinion, we ought to hold the railroad company responsible in such a case, if they run at too great a rate of speed to allow a man to clear the track who has approached it, without being warned of the danger by the usual signals. When a man on foot reaches a point near the crossing, and listens and hears no signal or warning, I think he is not guilty of negligence for attempting to cross over the track in a case where he cannot see up and down the track by reason of obstructions. But I would not make the railroad company liable for a collision in such a case, when they run their locomotives with moderate speed and make the usual signals before reaching the crossing.

We are to look at the case at bar as it appeared from the plaintiff's statement, and we must assume that the defendants run their engine at a dangerous rate of speed, without giving any signals of danger; that the plaintiff listened when standing upon the second track and heard no alarm; that he could not see the engine until he was about to stop upon the third track, when it struck him before he could get out of the way. In this view of the facts, I think the court below erred in holding as a matter of law, that the plaintiff was guilty of negligence.

The judgment should be reversed and a new trial granted, costs to abide the event.

Strait's Suspension Car Truck.

We give in another part of our present issue, a description, with engravings, of STRAIT'S IMPROVED SUSPENSION CAR TRUCK, Patented May 1, 1866, the main features and objects of which are:

1st. Lowering and suspending the weight as near as possible to the rails.

2d. The independent motion of each wheel and the disuse of long axles.

3d. The clearance of the track of all obstructions and preventing the wheels running over persons or obstacles of any kind.

4th. Allowing the cars to be greatly increased in height and width.

5th. The use of much larger car wheels and increased speed and safety.

6th. Trucking the cars where they couple, instead of more immediately under their bodies.

7th. Allowing a free and uninterrupted passage through a whole train and as low down as possible to escape from, in need.

8th. Working the wheels in wheel-houses, inside, or in wheel-recesses, outside, if desirable.

9th. The easier entrance or exit of passengers or freight.

10th. The stronger hold of the wheels on the rails, from the use of the rubbers and partial flanges.

The plan of bracketing the wheels so as to suspend the weight as low as possible, applies both to short and long axles and to all kinds of cars, carriages or vehicles. The short axles require double (or in and outside) brackets, while long axles require only one bracket, and it may be either in or outside the wheel or wheels. The two main objects in bracketing wheels of all kinds, are to suspend the weight as low as possible and to prevent their running over any thing in their way,

by sweeping every thing to one side. The entire wheel, only where it rests on the rail, may be enclosed by the brackets. For further information, address H. STRAIT, 66 East Pearl street, Cincinnati, Ohio.

Chicago, Rock Island and Pacific Railroad.

The work of grading the Railroad from Newton to Kellogg is progressing with commendable rapidity, considering the roughness of the route and the number of hands at work. A sufficient number of shanties are now erected to accommodate a large number of hands, and Mr. Casey is making exertions to secure 3,000 hands to push the road right through to Newton. Hands are arriving daily, and our streets are alive with laborers going to the railroad. On Saturday 17 teams, with their complement of wheelbarrows, shovels and railroad hands, passed through Newton to the railroad, having left the North Western Railroad to work on this line. Some 40 hands, with teams, are also at work west of town. The work of preparing for the depot is going forward, houses are being removed and everything cleared out of the way of the locomotive.—*Newton Free Press.*

National Railroad Convention.

The adjourned Convention of Railroad Presidents, Superintendents and Chief Engineers, will meet at the St. Nicholas Hotel, in this city October 24th, at 12 M., in accordance with the Circular and Reports of the Executive Committee. President, J. Edgar Thomson; Vice-President, Isaac H. Sturgeon; Secretaries, S. L. Tremont and B. T. Hasell; Executive Committee, T. J. Carter and L. J. Fleming.

Finances of Vermont.

From the message of Gov. Dillingham, to the Legislature, which was delivered on the 12th inst., we learn that the receipts into the State Treasury from Sept. 5, 1865, to Sept. 10, 1866, amounted to $996,558, and the expenses to $967,981, leaving a balance of $28,576 in the treasury. The current liabilities of the State amount to $63,340, the current resources to $35,554 and the estimated expenses for the current year to $416,000. The State bonds now outstanding amount to $1,625,000, and they are due in 1871, 1874, 1876 and 1878.

☞ The Koshkonong Valley Union Railroad Company was organized at Edgarton, Rock Co., Wisconsin, on the 22d ult., by the election of Hon. S. J. Conkling, President, Caspar Krogh, Esq., Vice President, C. P. Mead, Secretary, and W. D. Potter, of Cambridge, Treasurer. The object of this company is the construction of a railroad to connect Portage City or Columbus with Milton or Janesville. Meetings are soon to be held at various points on the line.

☞ The survey for the new railroad and carriage bridge over the Mississippi, at Davenport, Iowa, was commenced on the 6th inst. This survey is ordered by the War Department, and will be made by E. H. Johnson, Esq., Chief Engineer of the C., R. I. & P. R. R. assisted by Edward Powers, Esq., a distinguished civil engineer of this city, and brother of Rev. H. N. Powers, of Davenport.

☞ The Brandywine Railroad has had $280,000 subscribed to it, and only $20,000 more are quired to justify a commencement.

☞ Work on the second railroad track between Springfield and Chicopee is progressing rapidly. The grading is completed, and the laying of the rails begun.

Ottawa and Prescott Railroad.

We learn that very important improvements are in progress on this road. In the first place two new engines have just been built for it at Kingston, one of which, the "Thomas Reynolds," named after the enterprising managing director, was placed on the road on Friday last, and the other will probably commence work to-day. Besides these, two cars, first and second class, have been finished and put on. The first class car is a very beautiful affair in structure, painting, interior decoration and upholstery. The company also advertise for 20,000 ties, and will complete certain fencing which they have undertaken in about a month. Those who look at this road and its affairs to-day will not fail to perceive that vast improvements have been introduced by the present management.—*Ottawa Times.*

☞ A second track is to be laid on the Eastern Railroad between Salem and Beverly, from the northern entrance to the tunnel. This improvement will be commenced the present Fall.

PROPOSALS FOR
$1,000,000
American Dock and Improvement Company Bonds,
GUARANTEED BY

The Central R. R. Co., of New Jersey.

Sealed proposals will be received at the office of the Central Railroad Company of New Jersey until Friday, October 26th, at noon, for the whole or any part of One Million Dollars of bonds of the American Dock and Improvement Company,

The bonds are for $1,000 each, due July 1st, 1886; interest 7 per cent., payable January 1st and July 1st, in the city of New York.

The bonds have coupons attached, and can be held either as registered bonds or bearer bonds, as the holder may from time to time elect.

These bonds are issued for land purchases and for improvements in Communipaw Bay, under the authority of the State of New Jersey, on the extensive water front of the company and in connection with the improvements of the Central Railroad Company of New Jersey.

The punctual payment of the principal and interest of the bonds is guaranteed by the Central Railroad Company of New Jersey.

Proposals should be sealed and indorsed "Proposals for Bonds," and directed to Samuel Knox, Treasurer, 103 Liberty Street, New York.

Any further information desired can be obtained on application at the same place, where also a copy of the bond can be seen.

Payments to be made 50 per cent. on the allotment of the bonds, 25 per cent. on the 15th November, and 25 per cent. on the 15th December, or the whole can be paid at once. The interest will be adjusted on the first coupon.

The Committee reserve the right to reject any of the bids not satisfactory to the company.

JOHN TAYLOR JOHNSTON,
JOHN C. GREEN,
MOSES TAYLOR,
ADAM NORRIE,
} Finance Committee.

Railway Purchasing Agent.

A PERSON of experience, thoroughly acquainted with the business and markets, desires to form an arrangement with some RAIL ROAD CORPORATION of standing, to act in the capacity of Purchasing Agent. References unexceptionable.

Address, "H," P. O. Box 5,314, New York City.

Car Covering or Roofing

KINGMAN'S CEMENT WITH HEAVY CAN VASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.

Policy of the Trunk Lines.

The acceptance by the Grand Trunk Railway of Canada of the agreements and stipulations adopted by the trunk lines in May last, with a view to secure concert of action and the submission of all questions of dispute that may arise to the arbitrament of a Commissioner of acknowledged experience and impartiality, places the five great trunk lines between the seaboard and the West in a position to adopt and carry out a uniform and definite policy in reference to rates of transportation and general management, that, while increasing their own revenues, must, in its immediate results, very greatly enhance the value of the great bulk of the railway property of the country. The numerous railroads that apron the northern half of the United States from Boston Bay to the Kansas border with an iron net work, evidence a spirit of enterprise and progress strikingly illustrative of the American character; but at the same time, no fact is more apparent to the commonest observer than that railroad transportation among us is yet wanting in that system and regularity so essential to the highest prosperity of trade between widely separated sections of country; and without which even moderate success in railroad management is unattainable. One half the capital invested in railroads has never yet, and is not to-day, yielding a compensating return; and that such is the case, is in a much larger degree ascribable to the prevalence of inadequate and very often ruinous rates, against which individual boards of direction are powerless to contend, than to the absence of sagacity and care in executive management, peculiar as are the intellectual requisites of successful railroading. There are doubtless many local roads that can never attain a paying position; but in the main, our railroads have been located with careful judgment and commendable foresight in estimating the sources and elements of trade and the requirements of communities; while in construction they give evidence of the highest engineering ability and skill. The cost of but few has been excessive; very few indeed require more than ordinary outlay in operating, and no sufficient reason exists why the principal lines at least, and all their more important connections, should not be brought under a system complete in all the details of transportation, and in all respects compensating, the rates being graduated to the service and the wear and tear of track and rolling stock involved in its performance. No locomotive need necessarily be run a mile, or a pound of freight moved, at a loss. Every class of service should be made to meet both immediate and every contingent expense. No one has a right to demand of any road anything for which he is not prepared to pay; but if disposed to meet any established rate of charges, it should be his privilege to command any legitimate and proper service that will expedite the delivery of his goods and property at the point of their destination; and it is manifestly the true policy of all railroad companies, and particularly the great lines of trade and travel between the East and West, to provide and maintain the very best possible facilities for the reception, forwarding and delivery of all property offered them for transportation.

We know that serious objections have heretofore existed to express and fast freight lines, as expensive to railroads; and that even now efforts are being made to excite hostility to them, on the ground that they absorb the legitimate revenues of the roads over which they operate. The first of these objections disappear with the establishment of remunerative rates for express and fast freight transportation; while the last is in point of fact without foundation—the natural tendency of these organizations being to increase rather than diminish the revenues of railroad companies; and that such has been the case on many of the principal roads where these organizations exist under proper regulations, we have the most positive and unquestioned testimony. Hon. Thos. A. Scott, Vice President of the Pennsylvania Railroad Company, than whom there is no more experienced and far-seeing railroad manager in the country, unequivocally declares that these lines have increased the net revenues of that road without any outlay of money by the company; while at the same time they have been of most essential aid to some of its connecting lines in furnishing the business public facilities these roads would otherwise have been unable to provide. And yet it was only after years of opposition, and when it was found that Philadelphia trade was going West *via* New York, that the Pennsylvania Company assented to the introduction of these lines on its road, and under regulations subjecting them and their business to the complete control of the railroad company. The result—the large addition to the revenues of the road—unmistakably indicates what it is in the power of the trunk lines to accomplish. In vindicating the policy of the Pennsylvania Railroad Company, Mr. Scott, at the meeting of the trunk lines in May last, said that, "Believing the system of fast freight lines to be fastened upon the railway economy of the country, and to meet the policy as established for years by the New York lines, the Pennsylvania Railroad Company had procured the organization of a line that now extends over nearly two thousand miles of connecting roads, and is managed by some of the most experienced transportation men of the country, upon principles which give to the railroad company the closest supervision and control as to rates and the manner of conducting the entire business, while entailing upon the company the smallest possible tax." In point of fact these organizations have become a necessary adjunct to the business of the country. They provide their

own cars, and maintaining agents on all the principal lines and at all important points in the West and Northwest to personally superintend the delivery of freights, and adjust all claims that may arise for damages or delays, a directness of responsibility and satisfactory method of redress is at once secured. In many cases a large share of the equipment of connecting roads is provided by these organizations, and if their profits are sometimes enormous, the fact shows nothing more clearly than their importance to the business public, and the estimate placed upon the facilities they offer for the transportation of merchandise to its destination without transhipment.

In no respect can fast freight organizations under proper regulations and restrictions be regarded as antagonistic to railroads. Their tendency is to improve and economize the freighting business between distant sections of country. Nor does the business which they carry on come properly within the proviuce of any single railway corporation. No road, whatever may be its means and its transportation facilities, can wisely undertake the establishment and superintendence of the numerous agencies at every available point of trade which give to these organizations their efficiency; and indeed were such the case, such company would assume towards every other road it might use in its operations the precise position which it is sought to make a ground of complaint against existing fast freight lines. The first duty of every road and of every board of management is rather to provide the best possible means for all business they may be able to command, devoting their own brains and energies to the development of the local traffic upon their respective lines of road. They will thus fulfil the true object of their incorporation, and derive a just and equitable profit from every service they may perform; and if those using their roads, in consequence of extended business connections and the peculiar character of the service rendered, derive greater profits, it can only be to ultimately invite competition which must even further advantage the railroad shareholder. This assumed antagonism, however, does not exist. These lines are the natural auxiliaries of railroads, needful to the business community, and largely promotive of trade between the principal commercial marts of the country.

The present great need in railroad management is system. The trunk lines are looked to to inaugurate and successfully carry out such system, securing not only remunerative rates, but the utmost promptness and safety in the transportation of freight. Their traffic, large as it now is, is destined to vastly increase as the great West and the Mississippi Valley fill up with manufactures, and the trade of the Pacific comes pouring in upon us. We need system now, that we may have system then.

Russo-American Telegraph.

The Western Union Telegraph Company's bark Clara Bell, from Ochotsk Sea, arrived at San Francisco on the 22d inst., and reports the arrival of Col. Bulkley, Engineer-in-Chief of the Russian American telegraph expedition, and party at Petropaulovski, about the end of July. All well.

The Russian steamer Sagalan arrived at Ochotsk, Sept. 10, with 10,000 roubles for the use of the West Union Telegraph Company. Capt. Manhood, Mr. Robinson and party were well.

Hartford and New Haven Railroad.

The earnings and expenses of this road for the years ending August 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers....	$944,627 39	$909,352 21
" freight.....	456,742 62	630,911 69
" other sources..	58,341 30	51,540 23
Totals	$1,459,711 31	$1,591,804 13
Expenses, viz:		
Repairs of road and bridges, including new bridges	$242,377 12	$297,885 93
Material and labor on engines and cars, and new cars.....	180,308 57	189,118 75
Station repairs and improvements, including new buildings	56,883 60	31,889 35
Transportation and general expenses..	264,913 37	281,156 27
Wood, coal and oil..	168,880 60	151,517 81
Lost and damaged goods, gratuities, etc.....	4,013 81	6,753 91
	$912,377 07	$958,321 52
Balance of interest..	53,996 99	52,480 92
Taxes, state and national.....	133,806 55	121,805 08
	$1,100,180 61	$1,132,607 52
Net receipts	$359,530 70	$459,196 61

The gross earnings of the past compared with those of the preceding year, show an increase of $132,092 82; with an increase in operating expenses of only $40,944 45. The net receipts, after payment of interest and taxes, are $99,665 91 in excess of those of the previous year.

The number of miles run by passenger trains during the year was 295,394; by freight trains, 161,928; by other trains, 40,080—total, 498,002, which is 45,764 in excess of the previous year, the increase being principally in freight trains. The total number of passengers carried during the year was 929,457; tons of freight transported, 352,921—showing an increase in the former of 4,956, and in the latter of 114,668.

The receipts from passengers are less than in the previous year, by $35,275 18; while the receipts trom the transportation of freight are $174,169 07 more. The Report says:

The very large increase of our freighting business, (equal to 38 per cent. upon the business of last year), has brought with it the necessity of further additions to our equipment, and to the ground and tracks at some of the stations. There have been built, during the year, at our own shops, one first class Locomotive, one first class passenger car, and thirty freight cars, the cost of which is included in the accounts of current expenses of operating the road. We have also purchased twenty additional freight cars, recently delivered, which will be included in the accounts for the coming year.

There has been paid during the year, for real estate, at Springfield, Hartford, Meriden and North Haven, for necessary onlargement of station grounds, the sum of $40,157 72.

The Iron Bridge, over the Connecticut River, has been completed, with the exception of the erection of a hand railing on the north side, the materials for which are provided. It exhibits satisfactory evidence of permanence and stability. There has been paid, on account of this structure, since our last report, $58,493 67. This added to the amount stated in that report, and including $35,000 previously charged to current expenses, makes the whole cost of the bridge, as appears in our accounts, to be $272,463 47. The amount expended during the year just past, is included in the current charges for the year.

A new bridge over the Farmington River, at Windsor, to be composed of seven stone arches, of 54 feet clear span each, was commenced early in the present season, and would have been completed this season, if the stone for the arches could have been procured in time. All the most difficult and perplexing portion of the work is done. All the foundations are finished. All the piers and one abutment are ready to commence the arches; the other abutment will be brought to the same condition within a few days, and the construction of the arches will be postponed till the next spring. There has been expended on this work, to the present time, $31,269 65, which is included in the current expenses of the year. It is estimated by the superintendent, that $15,000 will cover all the additional expenditure necessary to its entire completion. When this is done, there will be no bridge on the road, of any importance, composed of perishable material.

It will be observed that in the account of gross earnings for the year, no credit is given for receipts for mail service. Nothing has been received from the Government on that account, since the commencement of the present contract term, July 1st, 1865, for the reason that we have as yet been unable to make any contract for the service for the current term. The only offer made to the company, is at a less rate than has been heretofere paid for similar service, while the expenses of operating the road, have increased from 50 to 75 per cent. We have continued to carry the mails, in the hope that upon a more careful consideration of the matter, the Department would yet take a more reasonable view of the subject, and feeling unwilling to subject the public to the embarrassment and inconvenience which would result from an interruption of the regularity of mail transportation, so long as any chance remains of a proper recognition on the part of the Post Office authorities, of the value of the services rendered by the company.

But little progress has been made in our suits with the New York and New Haven Railroad Company. The judgment recovered in the Superior Court in favor of this company, has been carried to the General Term and there affirmed, and has now been taken by appeal, to the Court of Appeals, where it awaits the determination of the court of last resort. The second suit is awaiting the decision of the Court of Appeals, upon the questions in dispute, which are substantially the same in both cases.

The steamer "Orient," heretofore mentioned as built by this company, has not yet been put to active service, and is lying at a wharf at New York.

In the early part of the year just past, the officers of the New Britain and Middletown Railroad Company, representing the road mentioned in our last report, extending from Berlin to New Britain, proposed that this company should, in some proper form, become the proprietors of that road, and after a careful consideration of the subject by this Board, being satisfied that the road could be purchased at a rate which would pay a reasonable profit upon its cost, and in addition would become a large contributor to the business of the main line and Middletown Branch of this road, a negotiation was made by which this company should advance funds for the payment of the indebtedness of that, and also for the purchase of its stock by certain officers of this company in trust, at a rate which would make the cost of that road, including certain assessments and purchases of real estate, a little over One Hundred Thousand Dollars. These arrangements have been carried out, as will appear by the Secretary's report, to the extent of $89,385 19. About Twenty Thousand Dollars more will be required to complete the arrangement, when the entire stock of that road will be held in trust by the officers of this company. It is proposed to increase that stock

to an amount sufficient to cover the advances made for its indebtedness, and then merge it in the stock of this company. The new stock of this company, thus created will be held by its officers in trust, and can be disposed of as the stockholders or Board of Directors shall determine.

Resolutions authorizing this merger, will be offered for the consideration and action of the stockholders, as indicated in the notice for the meeting.

A dividend of three dollars per share, free of Government Tax, was declared, payable on the 1st day of October.

INCOME ACCOUNT.

The income account of the company for the past year has been as follows:

Cash on hand September 1, 1865...	$137,138 29
Receipts from passengers	909,352 21
" expresses	47,401 39
" freight.....	630,911 69

Wood, stock and tools.....	212,129 70
Debts due the company, including account due from N. Y. & N. H. R.R. Co., unadjusted, and funds in the hands of agents	299,718 70
Balance due from N. B. & M.R.R.Co.	60,835 19
New Connecticut River Bridge.....	178,964 80
Steamboat "Orient"	185,528 84
N. B. & M. R. R. stock	28,500 00
Cash on hand.....	115,992 76
	$4,794,564 87

The office of the company is at Hartford, Conn. The directors chosen September 19th, 1866, are as follows:

President.—C. F. POND.

Directors.—Charles F. Pond, Julius Catlin, H. C. Robinson, Cornelius Vanderbilt, John A. Robinson, Ezra C. Read, Chester W. Chapin, A. G. Hazard, Samuel H. Parsons.

Vice President.—W. P. BURRALL.

Treasurer.—C. M. POND.

Secretary.—S. P. CONNER.

Superintendent.—E. M. REED.

Railroads in Kansas.

A correspondent of the *N. Y. Times*, writing from Leavenworth under date of Oct. 10, 1866, says: "Kansas is about to become gridironed with railroads, if the many proposed routes are ever completed. The Union Pacific is now in running order to Fort Riley, a distance of a hundred and thirty-five miles, and in another year will be completed for a distance of four hundred miles from the Missouri River. The Atchison road is in running order a distance of twenty miles, with twenty more under completion, but so rapid is the advancement of the two great Pacific routes that the smaller branches now in progress of construction will be left almost entirely unnoticed until they reach some prominent point. Lawrence is striving to become a railroad centre. One of the most important roads yet projected is the Leavenworth, Lawrence and Galveston road, from Leavenworth to Lawrence. The road is completed, or rather the branch that will be used. It is a straight road, seven hundred miles in length, and reaching salt water (Galveston on the Gulf) in that distance. It has more advantages and resources than any road now in contemplation, and has Government subsidy of 64,000 acres to the mile, besides a State land grant of 125,000 acres. Three out of the five counties have voted aid in the shape of bonds, and it will fail only for lack of enterprise, of which there is little probability. I do not suppose that there is any portion of the country that is so determined upon the railroad question as Kansas."

Baltimore and Ohio Railroad.

The Baltimore and Ohio Railroad Company have established a Fast Freight Line to the West, to be run at unprecedented speed. It is called the "Baltimore and Ohio Lightning Express," and is designed especially, if not exclusively, for the Oyster and Dry Goods trades. Nearly all the great cities of the West, Northwest and Southwest receive their supplies of oysters from Baltimore—which is the great oyster mart of the country. To accommodate these businesses fifty new and substantial cars have been constructed by the company. Each car is built upon passenger trucks, thus ensuring both speed and safety, while the cars themselves are constructed in the strongest possible manner, and handsomely painted and lettered. We learn that arrangements have been fully effected by the Baltimore and Ohio Company, with all its connecting lines in the West, to push this business through with all possible speed. The time, on oysters, to Cincinnati, will be less than thirty hours from the hour of departure from Baltimore, and to Chicago fifty hours, to Columbus twenty-four, Indianapolis thirty-six, Parkersburg and Wheeling nineteen, while to Dayton, Toledo, Detroit, St. Louis, Louisville and other points West, Northwest and Southwest, the transit will be proportionately rapid.

In addition to the requirements of the oyster business, the necessity for these extraordinary facilities has been increased by the large importations of fine French and English goods by the Liverpool steamers. The increased sales of these descriptions of goods in Baltimore make their rapid transportation to the principal Western cities highly desirable, and it is hoped that this additional advantage will materially aid in attracting new buyers and increased business to the enterprising city of Baltimore. It must of necessity prove, as in the case of the company's other great enterprise—the Liverpool line—a decided success. The new arrangement went into operation on the 22d inst.

Blue Ridge Railroad.

The stockholders of the Louisville and Nashville Railroad, at their annual meeting on the 1st October, determined upon the extension of their Lebanon Branch Road from Crab Orchard, its present terminus, to the Tennessee line, at a point to which the Knoxville and Kentucky Railroad is now being built. This fact in itself would be an unimportant event but for its ultimate bearing on the prospects of the Blue Ridge Road, where the great Northwest crosses the Ohio River, on a permanent iron bridge, which is now being constructed at Louisville, and journeys Southward to Knoxville over an unbroken line of first class railroads. It will not be for the purpose of making Knoxville its depot, far from it. The stream of travel, the gigantic tonnage, from the valleys of the Ohio and Mississippi, and from the shores of the great lakes, are seeking an outlet on the South Atlantic coast, and the connecting link is the Blue Ridge Railroad.—*Charleston Courier, 16th.*

North Missouri Railroad.

For the last few months the construction of the road from Macon, on the Hannibal and St. Joseph Railroad, to the Iowa State line, and of a branch to the Missouri River at Brunswick, has been rapidly progressing. The first secures at no distant day a connection with a road building south from St. Paul; and the extension of the latter to a junction with the Platte County Railroad, near Leavenworth, insures a line to Omaha. The importance of this last named line is so manifest that the North Missouri Railroad Company have just put the balance of their West Branch, from Brunswick to Leavenworth City, under contract, binding the contractor to complete the work within one year from the first of next January.—*St. Louis Republican.*

Manassas Gap Railroad.

Mr. Marshall, the President of this company, contradicts in the Lynchburg *Virginian*, the statement of the Harrisonburg *Commonwealth*, published in our last issue, and says he made two distinct proposals in writing to the Baltimore and Ohio Company. The first was a short loan of $45,000, for the purpose of immediately finishing the road from Strasburg to Kratzers. The other proposal was a loan of $100,000, which, with the means at the command of the Manassas Company, were to be used in the construction of the road between Winchester and Strasburg.

☞ The Poughkeepsie and Eastern Dutchess County people are exhibiting considerable interest in the projected railroad east from Poughkeepsie to intersect the New-England lines. A meeting was held at Washington Hollow on the 19th, to forward the matter. One of the speakers stated as an argument in its favor that a connection could be made with the Walkill Valley Road at New Paltz, by building a line of nine miles on the west side of the river, and thus the coal fields of Pennsylvania, as well as the Great West, would be opened up to them by a direct line.

☞ The North Bridgewater (Mass.) *Gazette*, says the capital stock of the Hanover Branch Railroad has been subscribed, the first assessment of twenty per cent. paid in, the road staked out, and the grading will shortly be commenced. The road extends from North Abington, through East Abington, West and South Hanover to Hanover Four Corners.

Staten Island Railroad.

This road is 13 miles in length, extending from Vanderbilt Landing to Tottenville. The length of double track, including sidings, is 0.33 mile. Weight of rail per yard, 56 lbs. The equipment consists of 2 locomotives, 6 passenger, and 6 baggage, mail and express cars.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$46,450 34	$62,098 32
" freight	1,357 75	2,511 20
" rents, mails, ferry receipts, &c	136,052 36	210,378 41
Totals	$183,860 45	$274,987 93

Payments, other than for construction:

Transportat'n expenses —ferry and road	$98,307 79	$163,956 98
Interest	14,282 03	23,637 55
Dividends on stock, 8 per cent	.....	50,264 00
Totals	$112,589 82	$237,858 53

The earnings of the company in the years named were as follows:

	1864.	1865.
From passengers	$46,450 34	$62,098 32
" freight	1,357 75	2,511 20
" other sources	136,052 36	210,378 41
	$183,860 45	$274,987 93

The Expenses, of maintaining and operating the road were:

Repairs of road	$3,487 44	$4,798 84
Repairs of buildings	170 89	80 94
Taxes	137 90	143 85

Floating debt	140,000 00	120,000 00
Totals	$968,100 00	$948,500 00

The number of miles run by passenger trains in 1865, was 47,098; against 45,229 in 1864—an increase of 1,869. Number of passengers carried in 1865, 273,588; do., carried one mile, 2,188,724. In 1864, the number carried was 222,391, and the mileage of do., 1,556,737—an increase in passengers of 51,197, and in mileage of 631,987.

Grand Trunk Railway of Canada.

The following is the report of the directors for the half year ended June 30, 1866, presented at the meeting of the proprietors in London on the 4th inst.:

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines, have been	£637,425	8	9
Deduct the ordinary working expenses (being 63.29 per cent.	403,419	0	0
Leaving a balance of	£234,006	8	9
Deduct the renewals of the permanent way and works in the half year (all debited to revenue)	26,286	0	0
Leaving an available net balance of	£207,720	8	9

This balance is thus distributed:

To amount of postal and military revenue for half year due to the holders of postal and military bonds	£28,286	5	7
To discount on American currency	14,264	6	2
To interest, &c., paid on lands	2,258	14	9
To interest on mortgage to Bank of Upper Canada	4,423	16	1
To interest on loans, bankers' balances, promissory notes, European exchange, &c	3,159	13	10
To interest on British American Land Company's debentures	616	8	9
To interest on Montreal Seminary debentures	616	8	9
To interest on Island Pond debentures	2,700	0	0
To half yearly instalment on Portland sinking fund	2,311	12	10
To Atlantic and St. Lawrence lease (in full)	32,785	14	0
To Detroit line lease (in full)	11,250	0	0
To equipment bond interest	10,524	0	0
To Montreal and Champlain Railway Company's proportion	10,273	19	5
To Buffalo and Lake Huron proportion	25,646	7	8
To the full interest on first preference on bonds and stocks	58,354	11	7
To second do. do. (short charged in previous accounts)	47	16	10
Balance carried to next account	200	12	6
	£207,720	8	9

The gross receipts and the net balance in the half year are in each case the largest ever earned in the June half of the year. The gross receipts (637,425*l.*) exhibit an increase over the gross receipts of the corresponding half of 1865, (614,876*l.*) of 22,549*l.*, or 3.65 per cent. The increase consists of 43,612*l.*, passenger traffic, including mails and express freight receipts, or a rate of increase of no less than 21.03 per cent.; but from these figures must be deducted 22,346*l.* decrease in the merchandise traffic, or 5.87 per cent., the decrease being in the "foreign" or "traffic interchanged with other (chiefly United States) companies," and also in cattle traffic receipts and smaller items of traffic, reducing the net increase to 3.65 per cent., as before stated.

A considerable portion of the above increase, viz., 18,810*l.*, is payable to the holders of postal and military bonds and does not augment the net revenue available for preference bonds and stock interest, but it is satisfactory to know that so much revenue has been earned, notwithstanding the serious loss, and disturbance, and suspension of all business caused by the threatened Fenian invasion of March, and the actual violation of the soil of her Majesty's dominions which took place in June last.

The Reciprocity Treaty expired on the 17th of March last, and the directors watched with anxiety the results upon your traffic and net revenue following so large a change in the course of Canadian trade. It is satisfactory to state that, notwithstanding the Fenian raids, the traffic of the fifteen weeks from 17th March to 30th June, 1866, showed only a small decrease under that of the corresponding period of last year, whilst the receipts in the nine weeks from 30th June to September 1, show an increase of 8,224*l.* over the corresponding period of 1865, when the treaty was in full operation. The results of the "fall" or autumn trade will further show how far internal can supply the want of an international interchange of the products of the soil, and will also exhibit the results of the new demand from the lower provinces for the flour and grain of Upper Canada.

The ordinary working expenses show an increase of 6,393*l.*, or at the rate of 1.61 per cent., as the cost of earning the increase of traffic of 3.65 per cent.

The loss on American currency has again been large, no less than 14,264*l.*, but it contrasts favorably with the corresponding half of 1865, in which the loss was 35,849*l.*

The losses on American currency from 1862 have been 228,556*l.*, divided as follows:—

Half year ended June, 1862	£887	8	5
" Dec., 1862	13,671	14	4
" June, 1863	6,588	19	5
" Dec., 1863	20,032	17	4
" June, 1864	.....	.....	
" Dec., 1864	78,413	3	6
" June, 1865	35,849	7	10
" Dec., 1865	58,848	3	4
" June, 1866	14,264	6	2
	£228,556	0	4

The price of gold during the half year has fluctuated between the rates of 125 and 166, the price of June 30, having been 153.

The net debit to capital account in the half year is only 4,000*l.*, the particulars of which are given in the accounts.

The directors propose—after providing for all bankers' charges, interest on loans, land rents, the lease rents of the Atlantic and St. Lawrence and Detroit lines, the equipment mortgage interest, and the proportions due to the Buffalo and Champlain Companies—to pay a cash dividend upon the 1st preference bonds, which will absorb 58,334*l.* 11*s.* 7*d.*, and leave 200*l.* 12*s.* 6*d.* to be carried over to next account. The interest on the 1st preference bonds and stocks will be payable on after the 15th of October.

By the "Arrangements Act, 1862," the interest not paid in cash for the June half year remains undealt with until the close of the December half year.

Her Majesty's provinces on the American continent having concurred through their Legislatures in the basis of a general confederation, there can be little doubt that early next session this great measure will be completed by the legislation of the Imperial Parliament.

The bill for enabling the fusion of net receipts between the Grand Trunk and Buffalo and Lake Huron Companies received the assent of the Governor General in Council on the 15th August. The bill will be submitted to the proprietors at a future special meeting.

It will be satisfactory to those who have waited so long and patiently for a return on the large capital invested in the Grand Trunk Railway to know that despite every cause, political and other, of embarrassment and anxiety, the undertaking is steadily improving in stability and income, and has now fully demonstrated its necessity and value to British North America as a great highway of communication both in times of peace and war.

On behalf of the Board,

Edward W. Watkin, President.

Northern (Canada) Railway.

At a general meeting of the proprietors of this road held at Toronto, Ca., on the 8th ult., the report of the directors for the half-year ending 30th June, 1866, was presented. From this we learn that the gross traffic receipts from all sources have amounted to $252,999 33 (51,986*l.* 3*s.* 2*d.* stg.), as against $247,451 25 (50,846*l.* 2*s.* 11*d.* stg.) for the corresponding period of 1865, and showing an increase in favor of 1866 of 2.24 per cent.

The ordinary working expenses of the half-year have amounted to $150,218 70 (30,866*l.* 17*s.* 2*d.* stg.), or at the rate of 59.38 per cent. of the earnings, as against $143,143 91 (26,413*l.* 2*s.* 7*d.* stg.), or 57.81 per cent. for the corresponding period of 1865, showing an increase of 1.56 per cent. against 1866.

The additional outlay from revenue for services not embraced in ordinary working expenses has amounted to $13,018 62 (2,675*l.* 1*s.* 1*d.* sterling) —making a total revenue expenditure for the half-year of $163,237 32 (33,541*l.* 18*s.* 3*d.* sterling), as against $177,777 62 (36,529*l.* 12*s.* 11*d.* sterling) for the corresponding period of 1865.

The net revenue applicable to dividend has amounted to $89,752 1 (18,444*l.* 5*s.* sterling), as against $82,641 71 (16,981*l.* 3*s.* 6*d.* sterling) for the corresponding period of 1865, showing an increase of 8.32 per cent. in favor of 1866.

These results have enabled the directors, in addition to the payment of the current interest dividends of three per cent. upon the first and second preference bonds, to pay a further dividend of 1½ per cent. on account of arrears, thus reduced to one dividend of three per cent., the equivalent of which is very nearly represented by the reserve in hand.

The directors continue to pursue the policy of a liberal and watchful maintenance of the property, and making such improvements and additions thereto as may secure continued efficiency and completeness and meet the growing demands of the traffic. In this connection, and in view of the probability of another bountiful harvest, the appliances of the line for that description of traffic may again be overtaxed. The insufficiency and unfitness of the storage end elevating capacity of the grain-houses, and especially of that at Toronto, is a source of much embarrassment and anxiety, and it would be highly advantageous to the trade, as well as to every interest connected with the company, if early measures could be devised and the means found for supplying this great and serious want.

A lease has been completed with the corporation of Toronto for the site of an eastern passenger station in rear of the City Hall and in close proximity to the markets and business centre of the city. The necessary buildings will be immediately constructed and the station put in operation with the least possible delay.

The extension of railway service to the counties of Grey and Bruce has recently attracted renewed attention, and the directors have been called upon to consider various propositions having that important and necessary object in view.

Foremost amongst these are the Grey and Simcoe Railway from Angus to Durham, and the Collingwood and Owen Sound line projected between those towns.

Both of these extensions would be tributary to this railway, and would seem to be admirably devised in local interest, and for the efficient and economical service of the north-western district; and to both the directors have not hesitated to afford their cordial concurrence and support; and although, as the capital account of the Northern is closed and its revenues appropriated by law to specific and limited purposes, the fulfilment of these projects must in the main depend upon local and independent effort, yet the directors will continue to contribute whatever assistance the good offices and influence of this company may command.

Rensselaer and Saratoga Railroad.

This road is 25.22 miles in length, extending from Troy to Ballston. The length of double track, including sidings is 4 miles. The weight of rail per yard, 58 to 62 lbs. The equipment consists of 27 locomotives, 41 first class and 6 second class and emigrant, 17 baggage, mail and express, and 491 freight cars. In 1864 this company also operated the Albany and Vermont, 12 miles, and the Saratoga and Schenectady, 21 miles—making a total in that year of 58.22 miles. In 1865, in addition to these roads, the company operated, from April 1st, the Saratoga and Whitehall, 47.52 miles, and the Rutland and Whitehall, 7 miles; and from June 19th, the Troy, Salem and Rutland, 62 miles—making the total length of line operated, 174.75 miles.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending September 30, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$249,976 97	$429,072 30
" freight	154,005 67	324,319 10

The number of miles run by passenger trains in 1865, was 186,805; by freight trains, 116,900—total, 303,705; against 129,084 in 1864—an increase of 174,621. Number of passengers carried in 1865, 383,101; do., carried one mile, 11,441,928. In 1864, the number carried was 305,905, and the mileage of do., 6,904,126—an increase in passengers in 1865, of 77,196, and in mileage of 4,537,802. The number of tons of freight carried in 1865, was 139,097; and the mileage of do., 4,702,143. In 1864 the tonnage was 108,186; and the mileage of do., 2,232,550—an increase in tonnage of 30,911, and in mileage of 2,469,593.

St. Petersburg and Moscow Railway.

A correspondent of the Baltimore *Sun*, writing from Moscow, says that the railway stations between that city and Petersburg are "all large, roomy and well arranged. On no road in America can you find stations equalling those on the road from St. Petersburg to Moscow, nor will you often find a better or more substantially constructed road than the one built by American contractors, the Messrs. Winans, of Baltimore, Md. It has a double track throughout, magnificently graded, and possessing exceedingly fine bridges, almost all on the American plan. I may observe, *en passant*, that now that the road has been entrusted entirely to the management of the Messrs. Winans, the income derived by the State has nearly doubly increased. The emperor is exceedingly gratified at the result, and it has not at the same time been detrimental to the interests of the gentlemen who have it in charge. All the principal men engaged in working the road are Americans, who make the machinery, rolling stock, and attend to the running of the road, under a Government control never exercised. At several stations we were greeted by the American employees, who were greatly gratified to see so many of their countrymen abroad."

☞ The Stockholders of the Louisville and Nashville Railroad, at their meeting on the 1st inst., voted to extend their Lebanon Branch from Crab Orchard, its present terminus, to the northern line of Tennessee, there to form a Junction with the Knoxville and Kentucky Railroad.

American Railroad Journal.

Saturday, October 27, 1866.

Stock Exchange and Money Market.

Money at this centre continues easy, through the steady accumulation of capital, released from permanent, and seeking temporary employment, in reasonably secure channels. The main reliance of lenders of all classes is the demand from the Stock firms, as well as from the Produce Exchange, for speculative purposes. Responsible borrowers on strictly prime collaterals experience no difficulty in negotiating call loans at 4 to 5 per cent. The large dealers in Government Securities are adequately provided with funds at 3@4, generally at 3½@4 per cent. The moderate degree of animation in ligitimate trade circles calls for very little pecuniary aid. Prime short date mercantile paper is offered remarkably sparingly, and is in good request at 5 to 6, and good to fair at 6@7½ per cent. per annum. The West and South West are making some drafts for currency on this point, but thus in insufficient amounts to sensibly affect the local supply. The bank expansion has been spoken of as inordinate, and alarming in its progress. It has not, however, thus far reached, not to say transcended the legal limits. The bank managers anticipating continued ease in the market, are doing their utmost to find profitable employment for their means, but are not, by any means, indifferent to the security of their funds. The city banks, last week, gained $1,795,485 in their specie reserve, chiefly from receipts for maturing gold-bearing bonds of 1867 and 1868, sold to the Treasury. They increased their loans, $2,692,577 and their circulation, $238,332. Their deposits fell off $1,775,044, mainly from the withdrawal of country bank balances, needed by the owners, for local use. Their legal tender reserve was reduced $4,554,953. chiefly by conversions of idle compound interest notes of 1864 and 1865, into the new issue of the U. S. Five-Twenties of 1865 (July and January). The bonds thus obtained will doubtless be deposited with the U. S. Treasurer at Washington, as security for additional circulation. The excess of Legal Tender reserve, as against Deposits and Circulation is still about twenty-three and a half millions over the required *pro rata* of 25 per cent. The bank deposits are now $225,083,853, against $174,132,110 same time last year. Their legal tender reserve amounts to $78,625,469, against $46,169,855 same time last year. Their circulation now stands at $30,415,240 against $12,338,441 same time last year. The loans are now up to $279,135,793, against $224,030,679 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $137,453,666 a day, against a daily average of $128,391,818 the preceding week; and $138,180,293 the week ending with Oct. 6. The current week's exchanges average about $124,000 a day.

National Bank notes to the amount of $251,245, were issued last week, making the total issue to 1,661 banks thus far $294,377,304, against $282,555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $332,903,300; and for the public deposits, $39,171,950 —making a total of $372,075,250. The Treasury Department, last week, destroyed $239,800 of worn and mutilated fractional currency, and issued $511,600 worth of new.

The U. S. Sub-Treasury receipts, week ending with Oct. 20, were $13,703,774, including $2,629,829 from customs duties; payments, $8,470,789; balance at the close of the week, $101,290,635. against $96,057,650 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $6,184,734, and payments, $6,987,804. Tuesday, receipts, $1,246,351, and payments, $394,072. The balance at the close of business on Tuesday stood at $101,339,845 against $97,698,219, a week ago. The balance in the U. S. Sub-Treasury, Boston, at the close of last week, was $13,373,041, or $4,271,572 less than at the close of the preceding week.

Government revenues keep up handsomely, despite the comparative dullness in business, outside of speculative circles. Excises yielded, last week, $4,651,808; customs at the port of New York, $2,629,829 at the outports, at least $940,000 (in coin) more, making the grand total income for the week equal to about $9,828,060 in currency, against disbursements of $4,586,243 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $119,-

200,000. The customs revenue at the port of Boston, last week, was $321,141; at Philadelphia and Baltimore, about $210,000.

Gold is nearly two per cent. cheaper than at the date of our last review. It then stood at 149; it closed on Wednesday at 147¼. The extremes of the week were 149 on the 19th inst., and 145⅜ on the 23rd inst. The depression was most marked on Monday and Tuesday and was caused mainly by *short* sales, subsequent efforts to cover which led to a fresh inflation. The Customs demand has been quite active for the season, and has kept "cash gold" rather scarce in the open market. After Thursday next, Nov. 1, the payment of the November gold interest on the Public Debt will release about $24,000,000 from the Treasury; thus affording an ample supply of gold for export should the demand for Bills of Exchange from the importers and for Bills to cover the collection of interest for foreign account seem to require it. The tendency of the market at the close on Wednesday was again downward as most of the *short* contracts had been protected, and the *bulls* were disposed to let the price decline sufficiently to develop another *short* interest, for their own benefit. The customs demand last week, averaged $438,305 a day; thus far, this week, it has been equal to $483,174 a day, or equal to a weekly aggregate of $2,899,044. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $12,753, and from California $1,433,358. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $112,390,636, against $81,456,845 same time last year. The total receipts of California gold at this port since Jan. 1, have been $53,357,013, against $15,090,922 same time last year, showing an increase, in 1866, of $20,266,091. The exports of specie from this port, last week, were $66,202, making the total outflow of specie from the port, since Jan. 1, $54,180,135, against $24,253,204 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest, on the public debt, chiefly on the Ten-Forty Loan, $46,500, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,951,989, against $29,994,766 same time last year. The specie exports from San Francisco from Jan. 1, to Sept. 25, reached $33,650,433, against $33,111,515 same time last year.

Notwithstanding the increased offering of bankers' and commercial bills, the foreign exchange market shows a further material improvement. The demand for prime bills is steadily growing, enabling the leading drawers to advance their asking prices. Last week's exports of U. S. bonds were over four million dollars, and of produce and miscellaneous goods, near four and three quarter millions. Bankers' 60 day bills on London closed at 109¼@109½, and on Paris to 5.17½@5.16; sight bills on London to 110⅛@110⅜; and on Paris to 5.15@5.13½. The offerings of produce bills are much more liberal. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $4,680,159, against $3,402,121 same week last year. The exports since January 1, have been to the value of $155,224,803, against $127,783,107 same time last year.

Government gold bearing bonds have been in decidedly more active demand, chiefly for home and foreign investment, and prices have again advanced. The market closing buoyantly. Some four millions of the 5-20s of 1862 went to Europe during the week, and preparations are making for further considerable shipments. The home demand has been mainly for the long Sixes of 1881, the later issues of the 5-20s, and the Ten-Forties. The $500 and $1000 bonds of the latest issue of 1865 Five-twenties have been very freely purchased, by home buyers, at the going rates. The $50 and $100 bonds of this issue have begun to arrive from Washington in small lots, and are promptly taken from the dealers. These new Five-twenties, henceforward to be issued by the Treasury Department in exchange for Seven-thirty Treasury Notes, are dated July 1, 1865, and bear six per cent. gold interest, payable January 1, and July 1. They carry interest from 1st July last. Coupon bonds are in denominations of $50, $100, $500, and $1,000. The registered bonds in $50, $100, $500, $1,000, $5,000, and $10,000. The Seven-thirties have been more freely offered for sale, especially the issues of June and July, (second and third series,) and have been in less favor with buyers, closing rather heavily. The first, or August issue of these notes, being immediately convertible into the new Five-twenties of 1865, July and January coupons, are in fair request and comparatively firm. The conversion can be made by local holders at the Treasury office in this city, free of commission, delay or risk for sending the notes to the department at Washington. No difference, therefore, need be paid to brokers for effecting the exchange of the currency bearing for the gold bearing security. We are, however, authorized to remind holders that their notes must be indorsed, "*Payable to the Secretary of the Treasury for conversion,*" in order to identify ownership, whether the notes have been previously filled in with a name and indorsed or not. Attention to this preliminary will save trouble and delay in making the exchange. The difference in the interest accumulated is promptly adjusted at the same time. U. S. sixes of 1867 closed 137½; U. S. sixes of 1868, at 136; U. S. sixes of 1881 closed 113½; U. S. Five-twenties of 1882 at 114¾; U. S. Five-twenties of 1865 at 110⅞; U. S. Five-twenties of 1866, 108⅜@108½; U. S. Ten-forties at 100@100⅛, and U. S. Seven-thirties at 105¾@106½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116¾	May, 1865	111¾
July, 1864	116¼	August, 1865	110¾
August, 1864	115¾	September, 1865	110¼
October, 1864	115¼	October, 1865	109¾
December, 1864	113¾		

In the railway and miscellaneous stocks, there has been quite a vigorous speculation all through the week, the favorites having been Northwestern Common, and Michigan Southern shares. Prices have been buoyant, and toward the close, strongly in favor of a further rise. The *bear* element evinces less confidence in impending stringency in money, and consequently less inclination to operate at the Stock Boards, against the buoyancy of the market. Nearly all the good dividend paying stocks are held for investment, and are in very moderate supply. The worthless fancies are made artificially scarce by the cornering processes of the bulls, but the great bulk of the public treat them with commendable indifference. Mining property is looking up again. It has been in respectable demand, during the week, at rising figures for all other than the absolutely fraudulent enterprises.

In general business, the main feature is the renewed speculative activity in domestic produce, especially in breadstuffs, which have rapidly advanced in price. Cotton has fluctuated considerably, but closes tamely and heavily at 39@41 for middlings per lb., under more liberal receipts, averaging this week, over 3,000 bales a day. The receipts at this port since Oct. 1, have been 34,000 bales, against exports of 8,383 bales. The receipts since the commencement of the current cotton year, Sept. 1, have been 61,500 bales, against exports of 30,000 bales. Since Jan. 1, there have been received here 492,009 bales, and exported hence 341,000 bales. There has been less activity in imported goods, the trade being confined, for the most part, to the current wants of regular buyers, usually very moderate at this season. Prices have favored purchasers, in sympathy with the depression in gold. The imports of the week have been liberal. The total imports of foreign dry goods, last week, were $2,100,437, and the total amount marketed $2,204,431. The value of foreign merchandise imported last week, was $2,961,544—making the grand total specie value of last week's imports of dry goods and merchandise, $5,061,981, and since January 1, $247,975,509, against $163,516,107 same time last year. The freight market continues dull, but firm with 462 vessels of all classes in port.

The Steam Siphon Pump.

An exhibition of the capabilities of Lansdell's Patent Steam Siphon Pump was given on Thursday of last week, at the works of the company, Jersey City, in the presence of a number of gentlemen identified with the commercial and marine interests of the city. The result of the experiment made was most satisfactory. We understand that the Navy Department after a thorough examination of the Siphon, has ordered its introduction into Government steamers. The Pacific Mail, and other steamship companies, have also decided to adopt it in their steamers. It is also being introduced upon many new railroads, and upon old ones whose tank apparatus has been destroyed. We propose to give a more extended notice in our next, together with a description of the pump, and the experiment recently made with it.

☞ We invite attention to the Card of J. Van Schaick, Esq., Banker and Broker, in our advertising columns. His office is at 38 Broad street, N. Y.

☞ We invite attention to the Card, in another column, of L. S. Watkins, Esq., Dealer in all Classes of Government Securities and Gold. Office 11 Broad street, N. Y.

☞ The "National Railroad Convention," composed of delegates from all the great lines of the country, commenced its sittings at the St. Nicholas Hotel, in this city, on the 24th inst.

☞ Messrs. Clark, Dodge & Co., 51 Wall street, have for sale a portion of the 1st mortgage 7 per cent. bonds of the Chicago, Rock Island and Pacific Railroad Company.

☞ The Junction and Breakwater Railroad has been finished as far as the new village of Lincoln, and the cars were to have been running to Lincoln last week.

☞ CONTRACTORS will find notices of interest to them in our Advertising columns.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Oct. 19th, 1866, were $68,051 10
Corresponding week of 1865 ..... 86,929 95

Decrease $18,878 85

The earnings of the Grand Trunk Railway of Canada for the week ending Oct. 13th, 1866 were $162,683 00
Corresponding week of previous year.. 151,820 00

Increase $10,863 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Oct., 1866..... $22,067 00
Corresponding week previous year..... 24,031 50

Decrease $1,964 50

The earnings of the Western Union Railroad for the week ending Oct. 14, 1866 ..... $22,495 63
Corresponding week previous year..... 24,128 15

Decrease $1,632 52

The earnings of the Michigan Central Railroad for the 2d week in Oct., 1866, were $119,883 72
Corresponding week of previous year.. 116,430 59

Increase $3,453 13

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Oct. 1866, were $108,631 00
Corresponding week of 1865 ..... 117,897 00

Decrease $9,266 00

The earnings of the Chicago and Northwestern Railway for the second week in Oct., 1866, were $279,412 04
Corresponding week of previous year,. 247,292 09

Increase $32,119 95

The earnings of the Chicago and Rock Island Railroad for the 2d week in Oct., 1866, were $102,110 00
Corresponding week of previous year.. 94,849 00

Increase $7,261 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Oct. 11th, 1866, were $46,123 00
Corresponding week of 1865..... 44,166 00

Increase $1,957 00

The earnings of the Virginia and Tennessee Railroad for the second week of Oct., were $20,270, an increase of $7,826 on the same week last year.

The receipts of the Susquehanna Canal Company for week ending Oct. 15th, were $7,988 19; previously this season, $168,358 37—making a total of $176,346 56.

The receipts of the Delaware Division Canal Company for the week ending Oct. 13, 1866, were $9,170 89; corresponding week of previous year, $8,238 85—increase, $832 54. Total receipts to date, $269,611 06; corresponding period previous year, $186,405 27—increase, $83,105 79.

☞ The construction of a railroad from Wiscasset to the Kennebec River, to connect with the Portland and Kennebec Railroad at Richmond, is contemplated. The distance is about 11 miles. Recent surveys have demonstrated the feasibility of the route connecting at Richmond instead of between that village and Bowdoinham—making a saving of some seventy-five thousand dollars on the estimate cost of the road by shortening the distance, avoiding deep cuts, &c. The citizens of Wiscasset have subscribed liberally to secure the building of it.

Journal of Railroad Law.

KILLING ANIMALS.—DUTY TO KEEP UP FENCES.

The Indianapolis and Cincinnati Railroad Company *vs.* McKinney, lately decided in the Courts of Indiana, hold that where an animal passes upon a railroad track at the crossing of a public street or highway, or other place where, from any cause, it would be improper that the railroad should be fenced, and is killed by the locomotive or cars, the company is not liable, except for the negligence or misconduct of those having charge of the train.

The fact that a public highway runs along the side of a railroad track does not of itself, show a valid reason why a fence could not be maintained between the highway and the track, but rather shows the stronger reason why the railroad should be fenced.

The owner of an animal killed or injured by the cars of a railroad company may recover therefor, if the road is not fenced, though he be not an adjoining proprietor and has been guilty of negligence in permitting the animal to stray upon the railroad.

These decisions arose upon an appeal from Dearborn Circuit Court.

The opinion of the Court was written and delivered by Chief Justice Elliot, in which all the facts necessary for understanding the legal conclusions arrived at, are detailed with sufficient fullness.

Elliott, C. J.—McKinney sued and recovered a judgment against the Indianapolis and Cincinnati Railroad Company, for the value of a mule killed by the locomotive and train of the defendant, while being run on said road, in Dearborn County, the railroad not being fenced in as required by the statute. The defendant answered in three paragraphs, to the third of which the Court sustained a demurrer, which presents the first question raised by the appellant.

That paragraph alleges that along the west side of said railroad there is a public highway, or turnpike road leading from Lawrenceburgh to Brookville, and that at the time of killing said mule, the plaintiff permitted it to escape from his inclosure, adjoining to said public highway, and that it went from said highway upon the defendants' railroad track, and was there struck by the defendant's train, "Wherefore the defendant says that said mule was killed by the carelessness and negligence of the plaintiff, and not by any fault of the defendant."

Section 5 of the act of 1863, under which this suit is brought provides that, "On the hearing of any such cause the Court or jury trying the same shall give judgment for the plaintiff, or plaintiffs, for the value of the animal or animals killed, or injury done, without regard to the question whether such killing, or injury was the result of accident." Acts of 1863, p. 26. And the seventh section of the same act provides that, "This act shall not apply to any railroad securely fenced in, and such fence properly maintained by said company."

The answer under consideration contains no averment that the railroad was securely fenced. Nor is it aided by the averment that a public highway runs along the west side of the railroad, and the mule passed from said highway upon the track, and was thereby killed.

This Court has repeatedly held that if the animal passes upon the railroad track at the crossing of a public street, or highway, or other place where, from any cause, it would be improper that the railroad should be fenced in, the company is not liable, except for negligence, or the misconduct of those having charge of the train. But this case is not brought within that rule by the averments in the third paragraph of the answer.

The fact that a public highway runs along the west side of the railroad does not, of itself, show a valid reason why a fence could not properly be run between the highway and railroad, but on the contrary, would seem rather to show the greater necessity that the railroad should be fenced at such place.

It is insisted by the appellant's counsel that the statute was only intended as a protection to the owner of animals through whose land the railroad passes, and not to persons who reside at a distance from the railroad, and who negligently permit their animals to stray from home and get upon the railroad track. And we are urged to review the former decisions of this Court upon that point.

The act of 1853 contained, substantially, if not literally, the same provision on this subject as the act of 1863. Under the former act, this Court held, in the case of the Indianapolis and Cincinnati Railroad Company *vs.* Townsend, 10 Ind., 38, decided at the November Term, 1857, that though the owner of the animal is not an adjoining proprietor, and is guilty of negligence in permitting it to stray upon the railroad, and it is thereby killed, he may recover, if the company has failed to comply with the requirements of the statute. This decision was followed in numerous other cases, prior to 1863, when the Legislature re-enacted the same provision, with a knowledge of the construction that had been given to it by repeated decisions of this Court. We must therefore, presume that the Legislature, in re-enacting the provisions sanctioned and adopted that construction. Under these circumstances, we think the question should be regarded as finally settled, and no longer open to discussion. See also, I. & C. R. R. Co. *vs.* Guard, Ante p., 222.

It is further insisted that the judgment below is erroneous, for the reason—that the complaint does not state facts sufficient to constitute a cause of action, and that the Court below erred in not overruling the demurrer to the answer, and sustaining it to the complaint.

The first objection urged to the complaint is that it does not show that the mule was killed in Dearborn County, where the suit was brought. In this, however, the appellant's counsel is in error.

The complaint avers that the defendant is indebted to the plaintiff, "in the sum of two hundred and sixty dollars, for a brown mule killed by the cars and locomotive of the defendant, run," &c., "and passing through the said county of Dearborn, State of Indiana, at said county of Dearborn." The latter words "at said county of Dearborn," clearly refer to the place where the act complained of occurred, and are an unequivocal averment of the venue.

It is further objected to the complaint that it does not sufficiently aver that the railroad was not securely fenced in. The averment in the complaint on this point is as follows, viz: "The road of said defendant not being fenced, at the place where the said mule was killed." This is in effect an averment that the road was not fenced in at all, at the particular place named. If no fence existed at such place, the road was certainly not securely fenced at that point, and in such case it would be impossible to state the kind of fence, as the counsel urges should be done, as none of any kind existed. We think the averment is sufficient. We find nothing in the record to justify a reversal of the judgment below.

The judgment is affirmed, with 3 per cent. damages and costs.

The Tariff as Affecting the Railroads.

Editor of the Railroad Journal:

SIR:—The tariff comes up for revision in December next. The Treasury Department is now engaged in getting up data upon the subject. When the present one was drawn, the use of steel material, rails, axles, tires, wheels, &c., had scarcely been thought of in this country, and its bearing upon the railroad interest through these articles was not considered. As they are now in general use, it behoves the leading officers to give their views to the department and their Congressmen so as to secure intelligent action in the matter.

The proposed bill as it now stands levies upon puddled, blister, and other than cast steel, and manufacture, thereof 3½ cents (gold) per lb. On cast steel and manufactures costing 7 cents or less per lb., 4½ cents.

If over 7 cents, 5 cents per lb. and ten per cent. advalorem.

Railroad bars 2½ cents per lb.

These rates vary from 65 to 85 per cent., instead of 45 as at present.

If the roads are content to pay this, well and good; but let them not excuse themselves from using the best material on account of high cost, when so large a portion of said cost will be tax, which they might by proper action have reduced.

Respectfully,

WALL STREET.

N. Y., OCT., 24, 1866.

☞ We learn from the Augusta (Ga.) *Chronicle* that work on the Augusta and Milledgeville railroad is progressing vigorously. Several hundred tons of iron are on the way, which will be laid down immediately after its arrival. The heavy rock excavation between Culverton and Sparta has been completed, and the rock work beyond the latter place will be finished before the track-layers are ready to proceed with their work in that section.

☞ At a meeting in London on the 9th, of holders of Alabama State stock, it was unanimously agreed to accept the proposition of the Treasurer of the State, offering to renew the overdue bonds of the State and to give bonds of a similar description, payable in twenty years, in lieu thereof.

☞ Overdue coupons of the State of Tennessee will be exchanged for New Bonds of the State when presented at Nashville in sums of one thousand dollars.

The Russo-American Telegraph.

The Russian papers publish a detailed account of the proceedings of the Russian Engineer-in-Chief, M, Abaza, and three American engineers, Captain Meyhood, Lieutenant Busch and Lieutenant Kennan, who were instructed to survey the line of country through which the Russo-American telegraph is to be constructed. The party started from Petropaulovsk on the 8th of August last year, and succeeded, after many difficulties, in tracing the exact course of the future telegraph.

At last, says a letter in the *Porte du Nord*, the surveys have been completed from Anadyrsk to the Amour, a distance of six thousand versts, and the direction of the line has been determined. This immense task has been executed by the chief of the expedition and three engineers in the course of a dreadful winter, during which they had to contend against incredible difficulties, traversing day by day vast deserts, sometimes mounted on reindeer, sometimes drawn by dogs, but more frequently traveling on foot with the aid of snow shoes, and always accompanied by fierce hurricanes and dreadful frosts.

As soon as the Sea of Ohkhotsk shall be free, vessels belonging to the Telegraph Company are expected to arrive at Guigiga from America with the necessary materials for commencing the works immediately. These ships will also bring a number of Yakoute laborers, who are already hired for the works, which will be actively pushed on from the Amour to Behring's Straits. Already between Ohkhotsk and Anadyrsk the works have been commenced with the assistance of the inhabitants of the country, who are engaged in constructing houses and trimming trees to serve as telegraph poles. Considering the persevering and indefatigable activity of the chiefs of the expedition, there is reason to expect that within three years from the present time the works will be finished, and this difficult but noble undertaking will be entirely and successfully completed.

Telegraph in New Zealand.

Although for some time past one or two short lines of telegraph have been in operation in the Middle Island, chiefly used for the transmission of shipping and occasionally of mail intelligence—such as the Port Calmers and Dunedin line of seven miles, and the Bluff and Invercargill line of nineteen miles—it is only within the last few months that anything like a general system of telegraphic communication has been established throughout the Middle Island of New Zealand. At the present moment there is a total stretch of wire—connecting Nelson, at the northern extremity of the island, with the Bluff Harbor, the southern point nearest to the Australian colonies—of 1,042 miles. This line passed through all the principal towns of the Middle-Island, and messages are published daily in the papers from the most extreme point when any matters of interest occur to report. Powerful and fast steamers ply regularly between Melbourne and Hokitika, affording additional facilities for the transmission of news. The telegraphic cable to connect the Middle and North Islands is expected to be laid and communication established about the beginning of 1867. In the North Island the only telegraph in existence is the military electric telegraph, connecting Auckland and Onehunga with Te Awamutu, one of the military depots on the Waikato, about 120 miles from Auckland, and is under the management of the Royal Engineers.—*Iron Trade Circular.*

South Side (L. I.) Railroad.

A meeting of the Railroad Committee of the Common Council was held in the City Hall, Brooklyn, on the 17th inst., the subject being to consider the propriety of granting the request of the South-Side Railroad Company to lay a track on piles over Smith's pond, at Rockville Centre, four miles south of Hempstead. The pond and the immediate surroundings are owned by the City of Brooklyn, and the company desire to run their track over it. By crossing the pond, which is about five hundred feet in width, the Railroad Company will avoid a detour which would delay them from a completion of the work on the road. The road, which extends from Jamaica to Islip, has been graded to the extent of twenty miles, and by December it is expected that the entire distance of thirty-one miles will be ready for laying the rails.

Cincinnati, Dayton and Eastern Railway.

The organization under the name of the Cincinnati, Dayton and Eastern Railroad Company, which was formed last year, has at length perfected its arrangements for building a new road from Cincinnati to Dayton, to join the Sandusky and Dayton Railroad, making a continuous line from Cincinnati to the lake, and opening an additional railway route from Cincinnati to the East.

The new organization has taken a perpetual lease of the Sandusky and Dayton Railroad, which will be entirely in its possession and control as if the purchase had been final. It has secured the right of way from Cincinnati to Dayton by purchase from the Short Line Railroad Company, and it has provided the means, and will immediately proceed to the construction of the road. The papers making the lease of the road were delivered on the 18th inst.

New Orleans and Texas Railroad.

The completion of the Railroad connecting New Orleans with Texas is at present eliciting considerable attention in the city mentioned. Texas, regarding this as a most important project for her interests, some time ago constructed a railroad from Houston to Orange, on the Sabine river. Louisiana, or rather New Orleans, did little more than to carry forward the Opelousas road to Berwick's bay, and there the work stopped, with the exception of a survey of the rest of the route, and the grading of about sixty miles to New Iberia. It is time now to take up this neglected enterprise, and carry it forward to completion, which work can, and we doubt not, will be accomplished within two years, if proper efforts be made.—*N. O. Crescent.*

Railroad from Erie to Oil City.

A meeting of the business men of Erie, Penn., was held in that city on the 12th inst., for the purpose of considering the subject of the proposed direct route from Erie to Oil City, by way of the Union and Titusville Railroad and its connections. P. G. Finn, Esq., was selected as Chairman, and Col. John Bliss as Secretary. Mr. Galbraith made a statement of the present condition and prospects of the work; and the Chairman, on motion, appointed Messrs. John Clemens, O. Noble and L. A. Morrison, a committee to present the subject to the people with a view of obtaining further subscriptions.

Western Pennsylvania Railroad.

The formal opening of the Western Pennsylvania Railroad was celebrated on the 13th inst. This road is about 28 miles in length, extending from Allegheny City to Freeport, where it connects with the original road running thence to Blairsville, in Indiana Co., Penn., a point on the Indiana Branch of the Pennsylvania Railroad, three miles from its intersection with the main line. Among the excursionists were G. B. Roberts, President, N. J. Howard, Chief Solicitor, Antes Snyder, Chief Engineer, and C. Davis, Assistant Engineer of the road.

Railroads in Alabama.

The Legislature of Alabama, during its last session, granted a charter to the Mobile and Alabama Grand Trunk Railroad Company, an organization having for its object the construction of a railroad from Mobile northwardly through the coal and mineral regions of the State, and by intersecting the various lines of railway in operation and projected in North and Central Alabama, through a system of short branches, to form a main trunk into which the traffic of these lines should converge and find an outlet at Mobile Bay. The length of the main line and branches required to be built for the purpose of connection are estimated at about 252 miles.

The Coosa and Tennessee Rivers Railroad extending from Gadsden on the Coosa river to Gunter's Landing on the Tennessee, a distance of thirty-three miles, and which was nearly all graded before the war, has recently, we are informed, been put in way of early completion, a Pennsylvania company agreeing to complete the road within two years—the company to receive the State bonds appropriated to this road, amounting to about $400,000 and the alternate sections of public land donated by the general government, allowing to the present stockholders the amounts they have actually paid, in stock of the road when completed. This road will unite the Tennessee and Coosa rivers, and by the building of a branch road of eighteen miles, will tap the Selma and Rome Railroad at Jacksonville.

Another Railroad Outlet from the Lackawanna.

We have referred, hitherto, to the railroad plans of the Delaware and Hudson Canal Company in the northern coal field, including a link of road between Wilkesbarre and Providence, also a road between Carbondale and Lanesboro', and a connection thence with the Albany and Susquehanna Railroad, whereby there will be opened out a new route from the northern coal field to Albany.

But, as we are informed, it is also intended to build a railroad from the present terminus of the Delaware and Hudson Canal Company's Railroad at Honesdale, (where their canal begins,) along side their canal down the Laxawaxen to the Delaware and along the Delaware to Port Jervis; thence to deflect southward, mounting up the side of the Blue Mountain to pass through the gap occupied years ago by a line surveyed by the Pennsylvania Coal Company, (whose route struck the Delaware River about twenty-five miles below Port Jervis.)

Whether the Port Jervis route will, after crossing the Blue Mountain at the place referred to, continue on east to the Morris and Essex Railroad, or to be continued on by independent location to the Hudson River at Hoboken, is not determined.—*U. S. R. R. & Mining Register, Sept.* 15.

Iowa and Missouri State Line Railroad.

The grading of the first 100 miles of this road west of Farmington has been finished. One of our exchanges says of it that the distance by railroad line from Nebraska City to Keokuk is 248 miles. Forty miles, from Keokuk to Farmington, are upon the Des Moines Valley road, which has been running for several years. Eleven miles, from Nebraska City to Hamburg, will be running in three months. From Farmington 100 miles westward will be ready for the iron by April next. This will leave a gap of 47 miles between Hamburg and the west line of Wayne County for construction next summer. The company have proposed to Otoe County to take $200,000 of her bonds, and, by expending them at the rate of $2,000 per mile, insure the building of 100 miles east from the Nebraska City terminus. The county commissioners have used $40,000 of the bonds ordered by the people, and have $160,000 unexpended. The opinion is that the Iowa and Missouri State Line Railroad Company will accept the $160,000, and carry out their proposition upon 80 miles eastward from Hamburg.

Minnesota Railroads.

The Governor of Minnesota has filed in the General Land Office a map of the located line of route of the Mississippi and Lake Superior Railroad from St. Paul to Duluth, in that State, for which a grant of land was made by act of Congress, approved May 7th, 1864. The Commissioner is taking the necessary steps for the withdrawal of the land granted by the act in conformity to the line of route filed. The Governor has also filed a map of the first division of the St. Paul and Pacific Railroad, showing the location and construction of sixty miles of the branch line of railroad from St. Anthony to a point near St. Cloud, in that State.

Darien Ship Canal.

On the proposition of President Mosquera to Congress, a concession has been granted for establishing a maritime canal across the Isthmus of Darien. The concessionaires are Messrs. Dewsbury, Thomas Page, C. E., and Vice-Admiral G. Elliot. Among other stipulations the concessionaires are to solicit that the British Government will guarantee the neutrality of the territory, on which the canal will be established; while the Government of the United States of Colombia, will on their side obtain the same guarantees from the French, American, Prussian, Dutch, and other Governments. The application made by the concessionaries is based on the most careful investigation of all the preliminary surveys and reports that from time to time have been directed to this important question.—*Panama Star.*

Roman Railways.

It appears that at the close of August, 1866, there were 983¾ miles in operation on this system, as compared with 743¾ miles at the close of August, 1865. About 304 miles still remain to be completed of the concessions made to the company. The £20 shares are now quoted in England at £2 12s., three months since they were at £1 12s.

Sandusky and Cincinnati Railroad.

At the annual meeting of this company on the 15th inst., the following gentlemen were chosen directors for the ensuing year: J. W. Pierce, I. M. Spelman, T.A. Neal, R.R. Sloane, L.H. Latham, O. Follett, W. G. Lane, Elisha C. Litchfield, and Wm. Wilshire; and at a subsequent meeting of the Board, O. Follett was elected President; L. H. Latham, Secretary and Treasurer; and J. H. Potter, Superintendent.

☞ Joseph E. Sheffield, of New Haven, and Charles N. Yeamens, of Westfield, have examined the route for the proposed extension of the New Haven and Northampton Railroad from Williamsburg (Mass.) to North Adams, through Goshen, Cummington and Windsor, Mass. They report favorably as to its practicability.

☞ The cable across the Straits of Northumberland, connecting New Brunswick with Prince Edward's Island, was successfully laid by the steamer Medway on the 2d inst.

Albany Railway.

At the annual meeting of the stockholders of this company held on the 8th inst., the following gentlemen were elected directors for the ensuing year: Theodore M. Amsdell, C. W. Armstrong, James Kidd, Henry Crandell, John K. Porter, Hugh J. Hastings, M. Delehanty, P. Cushman, Thomas Kearney, John Tracey, Abraham Van Vechten, Eli Perry, John Kennedy, Jr. At a meeting of the directors on the 11th instant, Abraham Van Vechten was elected President; Henry Crandell, Vice President; J. W. McNamara, Secretary; C. Ten Broeck, Treasurer.

Steel Rails.

The Springfield (Mass.) *Union* says that the Western Railroad has had for some time, on the worst portion of the road, a mile and a half of steel rails laid, and with very good results. They have recently ordered another lot. The Connecticut River Railroad is also laying steel rails on the new double track from Springfield to Chicopee.

Rutland and Burlington Railroad.

An arrangement has been effected between the first and second mortgage bondholders of the Rutland and Burlington railroad, by which both parties will surrender their claims to a board of trustees and put an end to the present course of expensive and profitless litigation. Thirty gentlemen representing several hundred thousand dollars of the bonds have already signed the agreement—*Boston Journal.*

Lynchburg and Danville Railroad.

The Danville (Va.) *Register*, of recent date stated that there only remained the sum of $10,400 to be subscribed to the stock of this road, in order to secure the charter granted by the Legislature. The *Register* now says that half this sum has been taken in Danville, and that there will be little difficulty in procuring the remainder.

☞ The Lehigh Canal Company's new railroad, extending from the head of the canal, two miles above Mauch Chunk, to Easton, a distance of 48 miles, is stated to be progressing rapidly. Steel rails are to be used. The road will connect at Easton with the Morris and Essex, and also with the New-Jersey Central Road for New-York, and at Bethlehem with the North Pennsylvania Road for Philadelphia.

☞ We learn from Toronto that the million and a half suit between the Commercial Bank and the Great Western Railway that has been at issue for six years, has been closed by direct negotiations satisfactory to both parties.

☞ The railroad from Fayetteville, N. C., to the coal fields located in Egypt, Chatham county, is to be extended from the latter point, so as to connect with the North Carolina Railroad.

☞ The Concord, Manchester and Lawrence Railroad has recently been divided into two divisions, and two roadmasters appointed, viz., A. F. Morse of Concord, and A. D. Spaulding of Manchester.

☞ The Jeffersonville, Madison and Indianapolis railroad company have in contemplation the extension of the Rushville branch of their road to Cambridge City, and a meeting of the stockholders is to be held at Jeffersonville on the 13th of November, to consider and determine the proposition, and to ratify the contract made for that purpose.

International Ocean Telegraph.

The preliminary steps toward building the International Ocean Telegraph Line are being taken, and the work will be pushed forward as rapidly as possible. Mr. Wm. H. Heiss, one of the oldest telegraph superintendents in the country, has accepted the position of Superintendent. Mr. Heiss sailed from this city on the 20th inst., for Florida, through a portion of which State the line is to be built. He will make surveys, and determine upon the route to be adopted. Several leading citizens and public men of Florida have suggested that the line be built from Fernandina to Cedar Keys on the west side of the State; thence by cable to Havana. This will be determined upon by Mr. Heiss, if the practicability of the suggested route is made manifest by personal inspection and survey. It will not be many months ere the cities of New York and Havana will be in telegraphic communication.

☞ At a recent meeting of the Memphis and Charleston Railroad Company, a resolution was passed to inquire into the feasibility of building a direct line from a point in North Alabama, connecting with the Memphis and Charleston Railroad, to Atlanta, Georgia, and the procuration of a charter for that purpose. Such a line would bring Memphis between 80 and 100 miles nearer the seaboard than by the existing line *via* Chattanooga.

☞ A meeting of the Connecticut and Passumpsic Rivers Railroad Company will be held at White River Junction on the 7th of November, to act upon the vote of the recent annual meeting authorizing the issue of 400 shares of new stock to the old stockholders at $75 per share. Some of the company, who were opposed to this action, have procured an injunction on the proceeding, and hence the next meeting.

☞ The Fond du Lac *Commonwealth* says that the work of grading the Sheboygan and Fond du Lac road west of Glenbeulah and towards Fond du Lac is steadily progressing, and over a mile has already been graded this fall. It is hoped that the road may be completed within the coming year.

☞ A general meeting of the stockholders of the Baltimore and Ohio Railroad Company will be held in Baltimore on the 19th of November, for the election of directors for the ensuing year.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS, directed to the undersigned, and endorsed "Proposals," will be received at the office of J. W. Allen, in Bordentown, New Jersey, until Wednesday night, the 14th November prox., for grading and masonry on the PEMBERTON AND HIGHTSTOWN RAILROAD. Profiles, specifications and blanks will be shown at Mr. Allen's office on and after the 29th inst.

ASHBEL WELCH,
Engineer P. & H. R. R.

October 19th, 1866. 3t42

TO CONTRACTORS.

SEALED Proposals will be received by the undersigned until Saturday, November 17th, for the Graduation, Bridge and Culvert Masonry on forty-three miles of the Lebanon Branch Extension of the Louisville and Nashville Railroad, between Crab Orchard, in Lincoln county, and London, in Laurel county, Kentucky.

The work is of the very heaviest character of Earth and Rock Cuttings Tunneling and Masonry, in value about one million of dollars.

Specifications and profiles can be seen at the Company's Office, in Crab Orchard, on and after November 1st.

GEORGE MACLEOD, Chief Engineer.

NOTICE TO BIDDERS

FOR THE

ST. LOUIS AND IRON MOUNTAIN

OR

CAIRO AND FULTON RAILROADS

OF MISSOURI.

THE PROPOSALS shall each state the price bid for the respective Roads, and that they are based upon the following terms and conditions, viz:

First. The price or consideration bid shall be payable as follows: One-fourth on closing the contract, and the balance in five equal annual instalments; the first payable in one year, the second in two, the third in three, the fourth in four, and the fifth in five years thereafter, with six per cent. interest on deferred payments, payable annually: *Provided*, that all sums bid may be paid at any time prior to maturity, in either cash or the bonds or other liabilities of the State of Missouri.

Second. The Roads and all Rolling Stock belonging thereto, shall be kept in good serviceable condition during the progress of said Roads (respectively) to completion.

Third. Bidders for the St. Louis and Iron Mountain Railroad must agree to finish that Road to a point south of Pilot Knob, to connect with the Cairo and Fulton Railroad of Missouri, in three years, and to the Mississippi river, opposite to or below Columbus, Kentucky, in five years from the date of the sale; and they must also agree to expend in each and every year, in case they become the purchasers, the sum of five hundred thousand dollars in the work of graduation, masonry, or superstructure on said extension.

Bidders for the Cairo and Fulton Railroad of Missouri must agree to complete said Road from the Mississippi river, opposite the town of Cairo, Illinois, or Columbus, Kentucky, to the intersection of the St. Louis and Iron Mountain Railroad line, within three years after the date of sale thereof.

Bids for the Roads must be separate. Those for the St. Louis and Iron Mountain Railroad should be addressed to ROBERT A. WATT, President Board of Commissioners of that Road; and those for the Cairo and Fulton Railroad of Missouri to CHARLES S. RANKIN, President Board of Commissioners Cairo and Fulton Railroad of Missouri, St. Louis, Mo.

Proposals will be received until NOVEMBER 8TH 1866.

By order of the Board,

CHESTER HARDING, Jr.
Att'y for Commissioners.

4141

SALE OF

CAIRO AND FULTON RAILROAD

OF MISSOURI

BY COMMISSIONERS.

Steam Siphon Pump.

We give elsewhere an engraving and description of this pump, as promised in our last issue. The Steam Siphon, will raise water at water stations, directly from the well or stream into the tender by using steam from the locomotive boiler, thus dispensing with tanks, tankhouses, pumping engines, and men to attend them. A locomotive will thus fill its tender in the time usually required to fill it from an ordinary tank, and by keeping the damper open and turning on the blower, it will not reduce the pressure of steam in the boiler.

When tanks and steam power are already provided, the Steam Siphon has decided advantages over all other pumps from its simplicity, cheapness, durability and certainty of action. It has no movable parts to get out of order, and will not freeze up. As soon as the steam is shut off all the water in the pipes falls back into the reservoir.

It is also used to great advantage upon construction or other trains where regular water stations have not been established, or cannot conveniently be reached. A Steam Siphon, is attached by a flexible tube to a cock in the boiler, and then dropped into any body of water within reach, as a stream, spring, well or ditch.

Steam is turned on, and water is forced through another flexible tube into the tender, which is thus filled in a few minutes.

It can be used in this way by any engine where the water stations are out of order, or too far apart, thereby saving the time, labor and trouble of bailing by hand.

It frequently occurs that water is required at certain points on a railroad at rare intervals, and it is not deemed worth the expense to keep a set of men for the purpose, but the duty of filling the tank is imposed upon the section or track hands. For all such cases the Steam Siphon is specially adapted. The cost of tanks and buildings, and the expense of keeping them in repair, is avoided, together with taking the track hands from their proper work. Each locomotive fills its own tender without delay, expense or detention.

Great Western Railway of Canada.

We stated last week that the long-pending suit between the Commercial Bank and the Great Western Railway Company, had been amicably arranged. The precise details of the settlement have not been officially made known; but the main features are pretty well understood to be as follows: The bank is to receive the full amount of its claim, principal and interest, amounting, we believe, to nearly a million and a half of dollars. It gets this in the shape of twenty-year bonds of the Detroit and Milwaukee Railroad Company. An instalment of $100,000 is to be paid annually out of the earnings of the road towards the redemption of the bonds, and interest at the rate of seven per cent. paid on the balance. It appears that the Great Western Railway Company have a very large claim against the Michigan road; but they agree to give the Commercial Bank precedence, so that until the latter is paid off, the Great Western will get nothing, except interest, as to which that company will stand on an equal footing with the bank, payment to both being in proportion to the respective amounts of their claims. The net profits of the Detroit and Milwaukee last year amounted to between $300,000 and $400,000, and there is every reason to expect that the traffic will continue to increase. With the continued prosperity of the Michigan line, its bonds will soon command a good market value; but whether they do or not, the earnings of the road are pledged to the bank.

Finances of Virginia.

In accordance with the act of the Virginia Legislature of March 2, 1866, for funding the interest of State bonds, registered and coupon, in new bonds, about $2,000,000 have already been funded. There have been issued 1,019 coupons of $500 each, amounting to $509,500, and of registered certificates about $1,150,000. The process of funding is still going on.

The whole debt of the State of Virginia, including accrued interest to Jan. 1, 1866, amounts to $42,125,218, and its liabilities on guarantee, beyond the liabilities already become absolute debt, amount to several millions more.

The amount of debt outstanding July 1, 1865, is thus stated by Gov. Peirpoint in his last message to the Legislature:

State bonds 6 per cent., registered....	$21,888,398
State bonds 5 per cent., registered....	108,000
Total registered (or home) debt .	$21,996,398
State bonds 6 per cent., coupons, payable in New York....	11,108,000
State bonds 5 per cent., coupons, payable in London....	1,865,000
Total coupon debt....	$12,973,000
Aggregate amount....	$34,369,398
Interest unpaid July 1, 1865....	5,071,337
Guaranteed bonds, for which the State is liable....	822,855
Interest thereon to July 1, 1865....	197,726
Aggregate to July 1, 1865	$41,061,316

The interest for the last half of 1865 would be $1,063,902, which brings up the total liabilities to $42,125,218.

The State Legislature passed a bill, dated March 2, 1866, providing that holders of registered bonds, issued before April 17, 1861, shall receive, in lieu of over due interest upon the same, registered bonds bearing the same rate of interest as the principal, and payable at ten or thirty years from date, as the holder may elect, and, further, that holders of coupon bonds may re-

ceive in liquidation of over due coupons, either coupon or registered bonds of the same character and bearing the same rate of interest as the principal.

North Carolina Railroad.

The earnings of this road for the years ending May 31, 1861 and 1866, have been as follows:

	1860–'61.	1865–'66.
From passengers	$182,884 49	$280,183 52
" freight	215,477 40	510,214 23
" mails	22,300 00	7,993 81
Totals	$420,661 89	$798,391 56

This shows an increase over the year 1860–'61, of $377,729 67. Included in the earnings of 1865–'66, are $131,238 64 for U. S. Government transportation, and $47,657 29 for express.

The income of the company during the past year has been as follows:

From transportation, as above		$798,391 56
" sale of old iron and steel		45,038 17
" " supplies		41,841 17
" rent		3,740 42
" shop account		1,468 72
Total		$890,480 04

Expenses, viz:

Transportation expenses	$185,554 81	
Maintenance of road	169,930 89	
Maintenance of cars and machinery	182,957 59	
Salary account	39,782 91	
Loss and damage	19,309 37	
Supply account	75,604 94	
Rent of cars and engines	7,931 58	
Tax account	7,604 89	
Interest account	32,440 30	
Maintenance of buildings	25,048 24	
Maintenance of bridges	35,093 63	
Purchase of R. R. iron	137,290 44	
Purchase of engines and cars	65,826 20	
		984,375 79
Expenses more than income		$93,895 75

To meet this, the company have damaged iron worth $39,200; and 484 bales of cotton, less an advance of $37,768 50.

The above expenses are divided as follows:

Ordinary expenses	$435,783 05
Extraordinary repairs, or construction	548,592 74
Total as above	$984,375 79

The ordinary expenses of the road were 49 per cent. of the whole earnings. They were as follows:

Maintenance of road	$143,806 89
" cars and machinery	118,904 13
Transportation	173,072 03
Total	$435,783 05

The extraordinary expenses were:

Purchase of new railroad iron	$137,290 44
" transportation and road	63,153 52
" cross ties	59,031 56
" supplies	85,002 39
New warehouses and water stations	25,048 24
Bridges	35,093 63
Cars and machinery	51,026 76
Purchase of cars and engines	65,826 20
Interest on coupons	27,120 00
Total	$548,592 74

Owing to the large supply of material on hand, which at the close of the year, amounted to $245,587 59, the expenses for supplies during the current year will be light.

The following is a condensed exhibit of the business of the company for the fiscal year ending May 31, 1866:

Balance, May 31, 1865		$2,497,333 11
Amount of slave property account	139,237 00	
" Chatham Railroad stock	200,000 00	
" sinking fund	215,000 00	
" income, as above	890,480 04	
Total		$3,942,050 15
Expenses, as above		$984,375 79
Right of way, etc		630 00
Decrease of company's debt		170,102 58
Passed to profit and loss		2,092,918 23
Due from bad debts		24,469 85
" North Carolina, war debt		209,556 92
" Virginia "		382 18
N. C. and Va. Treasury notes		1,507 25
In hands of supply agents		7,529 01
Due from agents, U. S. Government, individuals, etc.		27,368 42
Cost of railroad iron for sale		14,790 13
Amount of cotton account		149,885 41
" Chatham Railroad stock		44,444 44
" sinking fund		204,000 00
Cash on hand		10,089 94
Total		$3,942,050 15

The damaged iron and cotton will about relay the road with new iron, and pay for all engines bought, and other extraordinary expenses. Through tickets have been arranged to be sold at all important points north and south; also through baggage checks. Sleeping cars have been placed upon the line, and every facility afforded to make the traveling public comfortable. Freight has been moved with expedition, and the tariff made to conform to that existing before the war—taking into account the depreciation in the currency. Through rates have been made with the Atlantic and North Carolina, Wilmington and Weldon, Raleigh and Gaston, Seaboard and Roanoke, and the Petersburg Railroads; also with steamers to Baltimore, Philadelphia, New York and Boston—giving shippers the advantage of through receipts by the different routes, viz: Portsmouth, Newbern, Morehead City and Wilmington. The cars of this company run over all connecting roads, a fair rate of mileage for the mutual use of them having been arranged. Particular attention is called to the fact that the freighting of the road has been done almost entirely by the accommodation train, thus reducing the time from 48 to 22 hours, and giving a quick return of cars. A larger amount of freight, is thus moved with fewer cars than has been done in former years. The Southern and National Express Companies both run over the road. The freight taken by them pays over first class rates, and relieves the company of the responsibility of the care of costly freight.

At the date of the Report of the Superintendent, June 30, 1866, the road was in fine condition. Upwards of 96,000 cross ties had been put in the track, 26 miles of road gravelled, and nearly 17 miles relaid with new iron. By December the road will be thoroughly ditched, and made safe for winter service. The company had an ample supply of iron for six months, and cross ties, spikes, etc., for a year.

Much work had been, and was being done upon the bridges, culverts and buildings. A large number of bridges had been repaired and new ones constructed. The bridges over Walnut Creek, Lower Eno, Back Creek, Haw River, Big Buffalo, Jimmie's Creek, North Potts, South Potts, Irish Buffalo and Caudle Creeks, are all in good order. The bridges at Yadkin River and Rocky River are also in good condition. A substantial "Howe Truss" has been built over Deep River. This bridge is yet to cover. A *fac simile* of the superstructure is framed and ready to raise over Neuse River, where they are at present crossing on rough tressel. Little River, Stone's Creek, Cates' Creek, Richfork and Abbott's Creek are all crossed on tresseling. The two first are built with rough, sap timber, the three latter with square timber of better quality. They are all perfectly safe for trains passing, at the present time, but will rapidly decay, and several of them liable to be swept away by freshets; they ought to be rebuilt as early as possible. Iron and timber are ready on hand for rebuilding Little River and Richfork Bridges, and timber is now being sawed for Abbott's Creek Bridge. Crabtree Creek and Swearing Creek Bridges are in good order. Leonard's Creek Bridge will never be good until rebuilt. It is strengthened by bents of tressel, which make it at present quite safe for trains passing. The tressels at Sugar Creek and Swearing Creek, substituted in place of washed out embankments, are in good condition. Little Buffalo is at present crossed by heavy stringers extending from abutment to abutment, and perfectly safe, though not a permanent superstructure. All permanent deck bridges should be covered with sheet iron as soon as practicable.

A plan of connection between this road and the Richmond and Danville Railroad at Greensboro' had been determined upon. The change of tracks was to have taken place about the 15th of August. The construction of joint buildings at that place for the interchange of passengers and freight had been proposed. A new joint warehouse had been built at Goldsboro', in connection with the Wilmington and Weldon Railroad. The depots at Goldsboro', High Point and Salisbury have been rebuilt, and the old depot at Raleigh has been partially repaired for the accommodation of passengers. The old engine stable at that point has been fitted up and makes a good freight depot. A force of hands was engaged in repairing the depots, water stations, &c., along the line. They commenced at Goldsboro, and taking them in the order as they came up, had reached Hillsboro station at the date of the report.

Five new engines have been bought; four from the Government, and one from the N. J. Locomotive Works. There have been thirteen of the engines overhauled during the year, and one rebuilt. The whole number of engines on hand is twenty-five, nineteen of these are in good order, two in fair order, and four need repairs.

There are eleven first class, and six second class passenger cars, fifteen of which have been overhauled during the year. There are four mail and second class cars, three of which have been overhauled during the year. The whole number of box and shanty cars is one hundred and eight. Six of these have been built, and eighty-five have been re-built during the year. The whole number of platform cars on hand is sixty. Ten of these have been rebuilt and thirty of them repaired during the year. Many of the freight cars on hand last year were found to be not worth repairing; some of these have been turned into

quarters for the use of employees, and the others entirely broken up. New trucks and running gear have been put under every car used on passenger service. Six freight, nine baggage and twenty-two pole cars have been built complete. Thirty flat cars were purchased from the Government, and ten re-built—leaving thirty-three to be overhauled. No new passenger cars have been bought. Number of miles run by engines, 361,046. Passengers carried, 45,332. The President, in his report, says:

In submitting to you the seventeenth annual report of the operations of the road for the year ending the 31st day of May, 1866, I deem it unnecessary to do little more than refer you to the report of our energetic Superintendent, E. Wilkes, Esq., and to the reports of our Finance and Inspection Committees, as these three reports will contain all the information in my possession as to the operation of the road during the last fiscal year.

An examination of these three reports will also furnish all the necessary information, as to the present condition of the road bed, station houses, depots, engines, cars, rolling stock, &c., and the material and supplies on hand; and likewise the condition of the machinery and work performed for the road, at the company's shops, during the year.

The condition of our road, and of all the Southern roads in July, 1865, is well known to you all. The severe service to which our road had been subjected during the war, and the difficulty of obtaining materials and supplies for necessary repairs, had greatly impaired the efficiency of the road. There was but one or two passenger cars fit for use, and all our freight cars were in a dilapidated and bad condition, so that all our passenger cars but two, and all our freight cars required a thorough overhauling, at great expense. Nearly all of which labor has already been completed; so that, at this time, our passenger cars are of a superior quality, and our freight cars in excellent order, so that our road, at this time, will compare, in all respects, favorably with the best roads in this country. I think I can safely say, that there is no road in the Southern country that has been improved more rapidly than the North Carolina Railroad.

It will be recollected, that such was the condition of our passenger cars, at the last annual meeting, that the President felt bound to recommend the purchase of at least four first class new coaches. These coaches would have cost from four to five thousand dollars each; but, by the energy of our Superintendent, and the skill of our workmen at the shops, this heavy expense has been saved, and we now have upon the road, as all will attest who have seen them—as fine and commodious passenger cars as can be found on any road in the country; all turned out from our own shops, and at a cost, little if any more than one-half we would have been compelled to pay, had we made the purchase on as good terms as could be had at any shop in the country; and I cannot too highly recommend to your favorable notice the taste, and energy, and skill manifested by our Superintendent, and the principal employees at the shops, who have performed this labor. It is to the Superintendent, and the skillful workmen at the shops, and not to the President, that the company are indebted for the excellent condition of our road, and the improvements in our cars and rolling stock, &c.

The receipts of the road, for the last fiscal year, have been very large; much larger than we had any right to expect, when we consider the dilapidated condition of our road, together with the impoverished condition of the country.

The receipts have reached the large sum of seven hundred and ninety-eight thousand, three hundred and ninety-one dollars and fifty-six cents, being an increase over the receipts of 1860 and 1861 of three hundred and seventy-seven thousand, seven hundred and twenty-nine dollars and sixty-seven cents.

It is well known to you that there has been some complaints about high charges, and especially as to our charges for the transportation of cotton; but it was thought that the high price of cotton, and the bad and impoverished condition of our road fully justified the high charges about which these complaints have been made.

It also becomes my duty to state that our expenditures have been unusually large; but these expenditures were deemed absolutely necessary. And, besides, it was believed that true economy, as well as good policy, required that our road, and all our rolling stock, should be put in first rate order, as in this way alone could we secure the confidence of the public.

We have now on hand a large amount of material and supplies of the very best kind, amounting in all to two hundred and forty-five thousand five hundred and eighty-seven dollars, estimating them at a moderate price; so that very little additional will be required for the current year. The report of the Superintendent will show these in detail.

The debt of the company is $350,000, which will fall due in March next, and some action of the stockholders may become necessary, at the annual meeting, to provide for its payment.

The financial condition of the company May 31, 1866, is exhibited in the annexed statement:

Cost of road and equipment	$4,947,374 33	
Stock of Chatham R. R. Co.	444,444 44	
" North Carolina R. R. Co.	21,500 00	
Sinking fund	204,000 00	
Due from bad debt	24,469 85	
" war debts	209,939 10	
N. C. and Va. Treasury notes	1,507 25	
In hands of supply agents	7,529 01	
Debts due the company	27,368 42	
Railroad iron for sale	14,790 13	
Cotton account	149,885 41	
Cash on hand	10,089 94	
	$5,662,897 88

	$5,662,897 88	

President.—Nathaniel Boyden.
Superintendent.—E. Wilkes.
Secretary and Auditor.—F. A. Stagg.

Maryland and Delaware Railroad.

This road has reached Goldsborough, Caroline county, and is expected to be completed to Greensborough in a few weeks. Goldsborough is three and a-half miles from Greensborough, and trains leaving there reach Smyrna in one hour and a-half. The time from Goldsborough to Philadelphia is 6 hours 40 minutes, and to Baltimore 8 hours 45 minutes. A meeting was recently held at Hillsborough to ascertain what could be done towards raising the necessary funds to finish the road to that place. Several thousand dollars of stock was subscribed, and committee appointed to enlarge the subscriptions. It requires only $20,000 to insure the completion of the work to Hillsborough.

☞ The earnings of the Richmond and Danville (Va.) Railroad for the fiscal year ending Sept. 30th, were $672,043 42—average earnings per month $56,003 62.

The Union Pacific Railroad.

A telegram has been received by the Secretary of the Interior, from General J. H. Simpson, United States Army, President of the Board of Government Commissioners, appointed by the President of the United States to examine and report upon the Union Pacific Railroad, dated at Plum Creek Station, on that road, October 26, stating that the Commissioners had just examined the eighth section of thirty miles of said road and found the same in an acceptable condition, and that the road is now in running order two hundred and seventy-five miles west from Omaha, or to a point twenty-eight miles west of the one hundredth meridan of west longitude.

The Erie Railway.

Buffalo, October 24.—The President and Directors of the Erie Railroad arrived here yesterday evening for the purpose, it is understood, of holding a consultation with reference to the proposed extension of the Bradford and Carrollton Branch to some point on the Philadelphia and Erie Road.

☞ The State Treasurer of Missouri gives the following as a correct statement of the receipts and expenditures of the Missouri State Treasury during the quarter ending September 30, 1866, as taken from the books of the Treasurer's office: Receipts on account of revenue fund $215,300 14. Union military fund $160,791 83, redemption of lands $851 80, county revenue $1,537 40, executors and administrators $694 15, State interest fund $140,639 97, school fund $102 05, sale of bank stock $967,655 60—total $1,487,571 84. Of this amount there were paid in defense warrants $10,950; bonds and coupons of the State $1,108,295 47; Union military bonds $149,495 68, and the balance in currency. The total expenditures were $128,672.

☞ The following gentlemen have been elected directors of the Vermont and Canada Railroad for the ensuing year: Lucius B. Peck, Edward Blake, John Porter, W. C. Smith, B. P. Cheney, and Samuel Atherten.

☞ The terminus of the Delaware Railroad is at Summer's Cove, on the Pocomoke Sound. The track has been finished about three weeks, but the wharf had not been finished at last accounts.

☞ It is stated that the railroad from Lake Superior to Hudson, on the St. Croix River, and thence to St. Paul, Minnesota, is to be built immediately.

☞ The Charleston (S. C.) *News* says that the capital stock has been subscribed for an Air Line Railroad from Atlanta, Ga., to Charlotte, N. C., *via* Anderson and Yorkville, S. C.

☞ The City of Ottawa, Illinois, has voted an appropriation of one hundred thousand dollars to aid in the construction of the Fox River Valley Railroad.

☞ The Clinton and Port Hudson Railroad was to have been completed to within two miles of the river by the first of November.

☞ The receipts of the Virginia Central Railroad for the past fiscal year were $486,319 98.

Tioga Railroad.

This road is 30.6 miles in length, extending from State line (near Lawrenceville) to Morris Run. It has 4.42 miles of sidings. The gauge of the road is 6 feet. Weight of rail per yard, 45 to 57 lbs. The equipment consists of 7 locomotives, 3 passenger, 1 baggage, mail and express, 27 freight, and 200 coal cars. The value of real estate held by the company, exclusive of roadway, is $21,251 39.

The following is a comparative statement of the receipts and expenditures for the fiscal years ending October 31, 1864 and 1865:

Receipts:	1864.	1865.
From passengers	$15,895 12	$19,695 88
" freight	135,538 66	148,525 34
" mails	1,268 30	1,268 30
" use of freight cars	24,852 69	37,741 51
" interest	2,106 21	202 19
" miscellaneous	113,677 73	32,176 33
Totals	$293,338 71	$239,609 55
Summary of payments:		
For construction and equipment	$130,616 89	$65,850 86
Telegraph from Lawrenceville to Blossburg	2,880 00	1,941 82
Maintaining and operating the road	82,019 89	136,895 69
Dividends	32,132 94	17,258 00
Interest	20,932 71	22,606 73
Miscellaneous	13,030 61	3,327 43
State tax on capital t'ck and tonnage	2'244 34	6,719 01
United States tax		4,049 55
Surplus fund	9,481 33	
Totals	$293,338 71	$258,640 09

The expenses of operating and maintaining the road, buildings and equipment, in the years named have been as follows:

	1864.	1865.
Maintenance of way and buildings	$33,181 36	$64,008 37
Taxes		88 13
Repairs of engines	4,488 79	17,626 07
" cars	9,788 62	6,646 21
" tools, etc.	2,721 85	4,650 57
Incidental expenses	793 65	2,197 58
Office expenses	698 80	1,139 45
Agents and clerks	1,785 12	2,169 22
Conductors, etc.	7,019 03	9,339 87
Engine and firemen	7,441 19	9,287 96
Fuel and preparing	3,438 35	4,127 41
Oil and waste	4,638 35	7,222 61
Loss and damage	176 00	207 00
General superintend'ce	4,299 96	7,558 29
Contingencies	1,549 32	583 20
	$82,199 89	$136,895 69

Cost of Road and Equipment.

	1864.	1865.
Construction	$802,253 60	$821,200 07
Equipment	165,883 83	212,788 22
Totals	$968,137 43	$1,033,988 29

Stock and Debts.

	1864.	1865.
Capital stock	$391,800 00	$437,800 00
Funded debt	372,000 00	326,000 00
Floating debt	1,343 12	26,292 22
Totals	$765,147 12	$790,092 12

The dividends declared have been as follows: December 1, 1863, 4 per cent.; July 1, 1864, 4 per cent.; and December 1, 1864, 4 per cent.

	1864.	1865.
Miles run by mixed trains	95,566	107,296
Number of passengers carried	77,069	82,007
Tons of freight carried	377,687	401,975

Great Russian Railway.

It appears that the net profits realised last year upon this company's Nijni, Novgorod, and Warsaw lines amounted to 3,621,195 roubles, as compared with 3,055,666 roubles in 1864. Certain deductions, however, reduce the available net profit of last year to 3,384,630 roubles (or £578,541). The amount raised by shares and loans to the close of 1865 was 112,359,625 roubles. A further sum of 71,691,550 roubles was due to the State at the same date, of which 26,036,910 roubles referred to advances made in fulfilment of the guarantee of 5 per cent. given on the shares and obligations. The company has also other debts, &c., outstanding to the amount of 4,261,419 roubles, making an aggregate of 188,312,594 roubles, or £30,130,015. It will be seen that the profits realised last year were sufficient to pay about 3 per cent. upon the capital actually raised. If account were taken, however, of the interest accruing on the debt due to the State, the average return falls to something less than 2 per cent.—*Herapath.*

Delaware, Lackawanna and Western R.R.

This road is 113 miles in length, extending from Great Bend to the Delaware River. The length of double track is 20 miles; and of sidings (including tracks to and at mines) 39 miles. The weight of rail per yard is 65 to 75 lbs. Length of branch roads owned by the company, 4, viz: Keyser Valley Branch, 3 miles, and Diamond Mine Branch, 1 mile. The company have 85 locomotives, 17 passenger, 5 baggage, mail and express, 572 freight, and 4,788 coal cars.

The receipts from operations of this road for the fiscal years ending October 31, 1864 and 1865, have been as follows:

Receipts:	1864.	1865.
From passengers	$185,232 05	$235,380 71
" freight	1,788,658 13	1,485,832 27
" mails	8,506 87	8,528 24
" use of freight cars	534 00	1,158 04
" miscellaneous	2,017 06	2,420 72
Totals	$1,984,948 11	$1,733,319 98
Summary of payments:		
For construction and equipment	$441,507 90	$631,433 91
Maintaining and operating the road	1,263,166 75	1,694,548 62
Dividends	1,196,385 00	1,527,057 50
Interest	430,784 85	378,850 85
State tax on capital stock and tonnage	41,142 07	76,563 91
United States tax	100,796 09	83,603 83
Totals	$3,482,782 16	$4,400,158 62

The expenses of operating and maintaining the road, buildings and equipment in the years named have been as follows:

	1864.	1865.
Maintenance of way and buildings	$292,847 09	$482,016 53
Taxes	6,329 87	11,882 20
Repairs of engines	164,830 72	242,222 18
" cars	246,462 13	334,854 91
Office expenses	23,465 46	52,537 10
Agents and clerks	15,072 02	21,202 23
Labor, handling freight	2,014 21	4,743 66
Porters, watchmen and switch tenders	2,525 97	3,637 99
Wood and water station attendance	7,104 54	10,797 68
Conductors, etc.	98,827 08	111,362 11
Engine and firemen	85,779 72	105,210 76
Fuel and preparing	236,201 75	210,834 02
Oil and waste	58,767 27	69,799 11
Loss and damage	9,472 62	11,606 64
Gen'l superintendence	2,708 32	4,833 31
Contingencies	10,757 98	17,108 19
Totals	$1,263,166 75	$2,188,547 35

Cost of Road and Equipment.

	1864.	1865.
Construction	$7,295,895 20	$7,583,706 06
Equipment	2,324,490 44	2,668,113 49
Totals	$9,620,385 64	$10,251,819 55

Stocks and Debts.

	1864.	1865.
Capital stock	$6,832,950 00	$10,247,050 00
Funded debt	3,491,500 00	3,491,500 00
Floating debt	606,321 07	742,585 48
Totals	$10,930,771 07	$14,481,135 48

The dividends declared have been as follows: October 31, 1863, 15 per cent. on $5,698,250—being profits on coal sales; July 15, 1864, 5 per cent. on $6,832,950—being earnings of road; November 14, 1864, 10 per cent.; and January 20, 1865, 5 per cent. on $10,247,050.

	1864.	1865.
Miles run by passenger trains.	87,799	120,762
" freight "	206,027	234,043
" coal "	1,328,501	1,082,548
Totals	1,622,327	1,437,353
Number of passengers carried	158,756	199,755
Tons of freight	1,621,360	1,200,097

Peat for Locomotives.

We recently gave an account of the trial of peat fuel on the Grand Trunk Railway of Canada, when one tender-load of peat carried the heaviest passenger train of the season a distance of one hundred and two miles, within the ordinary running time. We learn that a second trial was made on the 13th ult., in which the results obtained were still more striking than on the first occasion. The locomotive of the express passenger train running from Point St. Charles to Kingston was supplied with one hundred and twenty-eight baskets of peat. The results of the trial are briefly stated as follows:

Total distance run, 177 miles.

Consumption of fuel, 3½ tons, less 62 pounds.

Average consumption of fuel per mile, 45 pounds.

Maximum consumption of fuel between stations, 60 pounds per mile.

Minimum consumption of fuel between stations, 30 pounds per mile.

Time made up in running entire distance, 52 minutes.

Average distance for each ton of fuel, 50½ miles.

Value of fuel consumed—3½ tons at $3 50 per ton—$12 25.

Cost per mile run 7 cents.

Average speed of train, including stoppages, 25½ miles per hour.

How these results compare with those obtained from coal and wood will be seen from the following statement derived from experiments on the Boston and Worcester railway during last August:

Average miles run to one ton of coal.....59.91
Average miles run to one cord of wood.....40.09
Average miles run with one ton of Mr. Hodge's peat.....50.50

The value of these results will be better appreciated from a comparison of cost of the several fuels. For the amount of coal, wood and peat required to run a locomotive the distance of one hundred and seventy-seven miles the cost is stated as follows:

1st. Coal—2.95 tons at $10.....$29 50
2d. Wood—4.41 cords at $7.....30 87
3d. Peat—3½ tons at $4 50.....15 75

The country at large, as well as the railroad interest, is concerned in these developments in reference to an article of fuel, which has lately attracted so much attention.

A Steam Siphon Pump.

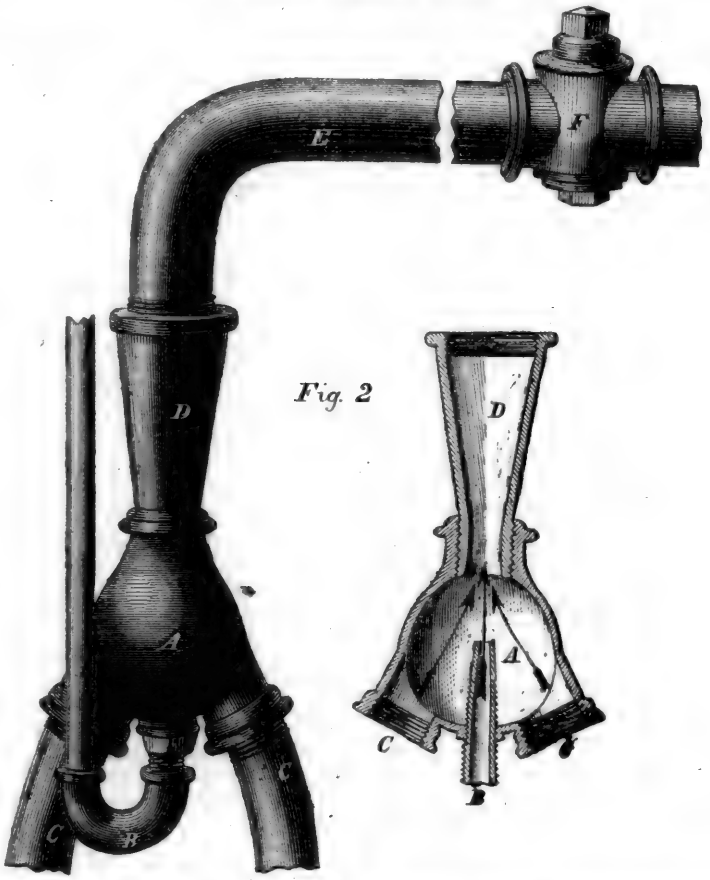

Fig. 2

On Thursday, the 18th ult., a committee from the Chamber of Commerce, and a select party of other scientific gentlemen, were present by invitation at the works of the Steam Siphon company, Jersey City, to witness the working of the company's newly invented Steam Siphon Pump—illustrations of which appear on this page. The exhibition was very satisfactory. Its construction and mode of operation are notably simple. When steam is turned on it rushes from the steampipe B across the globular chamber A into D, carrying the air in A or D before it, thereby exhausting the air from A. Water rushes through the suction pipes C, C, from atmospheric pressure (as in ordinary suction pumps), and the steam-jet drives it forward through the discharge pipe D, E, with velocity proportioned to the pressure in the boiler. It is an independent lift and force pump, without piston, plunger, valve or movable parts of any kind, and is therefore less liable to wear and tear, breakage and chokage, than other pumps, and cannot freeze up. Even lumps of coal can pass freely through it. It must prove invaluable on board steam vessels. A trial was recently made at the Brooklyn Navy Yard, and the Board of Examining Engineers end their report by saying: "The Siphon Pump raises in a given time 41.7 per cent. more water than the (steam) pump having the same area of discharge, and in doing so consumes 48 per cent. more coal, therefore, in economy of fuel, the two kinds pumps are nearly equal, but the Siphon Pump has superiority in the large bodies of water it can discharge in a given time; in its cost, in occupying less room in a vessel, in its not being liable to get out of order, its certainty of action, and unusual simplicity, there being no valves nor pistons to get deranged or choked by chips or dirt. We unhesitatingly recommend it for relieving the holds of vessels from bilge water, and for discharging ashes from the fire rooms." For railroad service and as a fire pump it is also well adapted. See page 10 of Company's pamphlet. Those of our readers desiring more information on the subject, can get it at No. 48 Dey street, New York.

☞ The telegraphic communication of Canada is carried on by two Canadian Companies and one American Company, the Vermont and Boston Company having forty-three miles of telegraph line and one station in Canada. The total returns of the three companies are as follows:

	1863.	1865.
Length of miles of lines	3,130	4,978
Miles of wire used	4,045	4,978
Stations open to the public...	146	369
Instruments	208	414
Number of messages	332,779	479,331

☞ A connection between the main line of the Illinois Central Railroad and the Chicago Branch about midway between Chicago and Centralia, is in contemplation. One plan is for a road from Urbana, to Decatur; another from Paxton to Heyworth, and another from Bloomington to Kankakee.

☞ The Common Council of Fort Wayne, Ind., have voted $100,000 to aid the Grand Rapids and Indiana Railroad, all to be expended north of Grand Rapids. It is also said that negotiations are going on in Europe for iron for the entire line of road.

Georgia State Bonds.

By reference to the annexed notices of the Governor and Treasurer of the State of Georgia, it will be seen that all over-due bonds, with interest to July 1, 1866, the date of their maturity, may now be exchanged for new bonds of the State, having twenty years to run from July 1, 1866, with interest at the rate of seven per cent. per annum, payable semi-annually, and secured by a mortgage on the Western and Atlantic Railroad, which is the property of the State:

EXECUTIVE DEPARTMENT,
MILLEDGEVILLE, Ga., Oct. 13, 1866.

In conformity with an Act of the General Assembly, approved 12th of March, 1866, numbered 10, it is ordered:

1. That all bonds and coupons of the State of Georgia now due, and which were not issued in aid of the late war, wheresover made payable, may be funded on presentation at the Treasury of the State, in mortgage bonds of the State, bearing seven per cent. interest from the 1st day of July, 1866, that being the day of their date.

2. That all coupons payable in New York, or in London, now due, and embraced in the descriptive list furnished the agency by the Treasurer, may be funded in bonds described above, on presentation at the National Bank of the Republic, New York.

3. That all coupons funded in New York be marked paid, and returned to the Treasury, with a descriptive list of bonds issued in funding them.

4. That the Treasurer indorse, or cause to be indorsed, on each bond funded, the name of the person presenting it, and that a registry of all bonds issued in the funding process be kept in the Treasurer's office.

5. No interest is allowed on bonds or coupons after maturity.

CHARLES J. JENKINS, Governor.

TREASURY OF GEORGIA,
MILLEDGEVILLE, Oct. 13, 1866.

Holders of over-due bonds and coupons of the State of Georgia are hereby notified that, in accordance with the above order, they can receive for them, on presentation at this Department, new bonds of the State, dated 1st of July, 1866, due twenty years after date, bearing interest at 7 per cent. per annum, payable semi-annually, in January and July, and secured by mortgage on the Western and Atlantic Railroad.

The bonds being in sizes of $500 and $1,000, holders must present their bonds and coupons in multiples of these sums, or make up their deficiency in currency.

No provision for payment of interest after maturity of bonds or coupons having been made by the Legislature, it cannot, of course, be allowed at this Department.

Persons sending bonds in under the above order are requested to write their names legibly on the margin, to guard against mistakes in their entry on the records, as ordered above.

JNO. JONES, Treasurer.

Sandusky and Cincinnati Railroad.

At the annual meeting of this company on the 15th ult., the following gentlemen were chosen directors for the ensuing year: J. W. Pierce, I. M. Spelman, T.A. Neal, R.R. Sloane, L.H. Latham, O. Follett, W. G. Lane, Elisha C. Litchfield, and Wm. Wilshire; and at a subsequent meeting of the Board, O. Follett was elected President; L. H. Latham, Secretary and Treasurer; and J. H. Potter, Superintendent.

☞ A convention is to be held at Okalona, Miss., on the 12th inst., for the purpose of making arrangements for building a railroad from Memphis to that place, and thence in the direction of Selma, Alabama.

American Railroad Journal.

Saturday, November 3, 1866.

Stock Exchange and Money Market.

There is a steady accumulation of capital at this centre available to borrowers on call at remarkably uniform rates of interest. There is less speculative activity at the Stock Boards, calling for a diminished volume of loans. Speculation at the produce exchange has burst forth with renewed vigor, chiefly on Western account, fostered by the unexpected relaxation in money in the interior, whence the reports, since our last, have all been of a comparative abundance of currency. Call loans here are quoted at 3@4 per cent. on Government securities, and 4@5 per cent. on railroad collaterals. Lenders are less partial to commercial paper, evincing no disposition to discount other than strictly prime to good short date obligations, which are done at the old rates of 5@6 per cent. to the full extent of the offerings of such notes, which are very moderate indeed. The last weekly local bank statement is regarded as an unexpectedly strong one, and is interpreted as indicative of a tendency to greater ease in the loan and discount market. A loss of $1,243,281 of deposits, and of $560,544 of the legal tender reserve is offset by an increase of $476,752 in specie, a reduction $4,410,340 in the item of loans, and of $171,803 in the circulation. The reduction in the loans has resulted from the falling off in the demand for accommodation, and not from voluntary contraction on the part of the banks. The surplus of legal tender over and above the required 25 per cent. to liabilities is still about twenty-three millions of dollars. The gain in specie is due mainly to the disbursement of the Treasury, toward the close of last week, of a million dollars in coin, for the purchase of foreign exchange for diplomatic purposes. The dry goods houses are making more long date paper, which the banks, as well as private lenders, commendably treat with very little favor. An expansion of credits in this direction is regarded as imprudent, and likely to prove injurious to all interested parties, by fostering a disposition to allow stocks of produce and merchandise to accumulate beyond the requirements and absorbing power of the market, and to an extent sure to end in a disastrous revulsion and depression of values. The city bank deposits are now $223,840,572, against $173,624,711 same time last year. Their legal tender reserve amounts to $78,064,925, against $46,427,027 same time last year. Their circulation now stands at $30,243,437, against $12,923,725 same time last year. The loans are now $274,725,456, against $219,965,639 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $127,044,006 a day, against a daily average of $137,453,666 the preceding week; and $128,180,293 the week ending with Oct. 13. The current week's exchanges average about $126,352,667 a day.

National Bank notes to the amount of $459,385, were issued last week, making the total issue to 1,662 banks thus far $294,836,689, against $282,555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $336,883,550; and for the public deposits, $39,238,950—making a total of $376,122,580. The Treasury Department, last week, destroyed $370,386 of worn and mutilated fractional currency, and issued $586,500 worth of new. The National Bank of the State of Missouri, at St. Louis, capital $3,410,300, was authorized on Tuesday. This bank waives the right to circulation. The National banks of the country, in their quarterly statement to Oct. 1, make their loans and discounts, $601,238,808. U. S. bonds and securities, $426,657,350. Specie on hand, $8,170,835. Legal tenders, $205,770,641. Capital stock, $415,278,969. Surplus paid, $53,359,277. National circulation, $280,129,558. Individual deposits, $563,510,570. United States deposits, $30,420,819.

The U. S. Sub-Treasury receipts, week ending with Oct. 27, were $18,575,927, including $2,460,886 from customs duties; payments, $19,082,536; balance at the close of the week, $100,784,027, against $101,290,635 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $5,641,219, and payments, $5,995,147. Tuesday, receipts, $2,539,329, and payments, $507,662. The balance at the close of business on Tuesday stood at $102,461,766 against $101,339,845, a week ago. The balance in the U

S. Sub-Treasury, Boston, at the close of last week, was $14,512,173, including $11,566,271, against a total of $13,373,041 at the close of the preceding week.

Government received from excises, last week, about $4,000,000; customs at the port of New York, $2,460,886 at the outports, at least $750,000 (in coin) more, making the grand total income for the week equal to about $8,656,000 in currency, against disbursements of $3,190,880 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $123,000,000.

The extremes of Gold, the past week, have been 147⅞ and 145⅜, and the closing price on Wednesday, 146½, or nearly one per cent. lower than on the preceding Wednesday. The speculation, throughout the week, has been essentially a weak one, in view of the liberal receipts from Europe and California, and of the impending heavy disbursements from the National Treasury, on account of the November coin interest on the public debt. The demand from importers for exchange and Custom House purposes has been the main reliance of the speculation. The customs demand last week, averaged $410,144 a day; thus far, this week, it has been equal to $411,500 a day, or equal to a weekly aggregate of $2,469,000. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $126,330, and from California $1,259,372. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $114,827,636, against $83,390,517 same time last year. The total receipts of California gold at this port since Jan. 1, have been $36,616,885, against $16,209,234 same time last year, showing an increase, in 1866, of $20,407,151. The exports of specie from this port, last week, were $458,198, and thus far this week 163,425, making the total outflow of specie from the port, since Jan. 1, $54,638,333, against $25,184,118 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the September coin interest on the public debt, chiefly on the Ten-Forty Loan, $25,019, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $31,977,008, against $32,473,604 same time last year. The specie exports from San Francisco from Jan. 1, to Oct. 5, reached $35,041,896, against $34,625,11[illegible] same time last year.

From San Francisco the combined exports of treasure and merchandise during the past nine months, compared with the same period of 1865 were as follows:

	1865.	1866.
Mdse exports	$10,105,919 31	$12,171,631 00
Treasure exports.	33,111,365 37	34,688,432 85
Totals	$43,217,284 68	$46,860,063 85

The receipts of treasure from all sources at San Francisco, through regular public channels, during the past nine months have been as follows:

From California, Northern Mines	$18,711,783
From California, Southern Mines	3,418,436
From Nevada	11,063,218
From Coastwise Ports, Oregon, etc	4,416,010
Imports Foreign, British Columbia, etc	2,031,801
Total	$39,641,248

During most of the week, business operations in Foreign Exchange indicated a growing demand and strengthening market for prime bills, the supply of which has been comparatively moderate. There was less buoyancy apparent toward the close, and the turn of prices was slightly in favor of buyers, though this symptom was regarded as merely temporary. There have been lighter shipments made during the week, both of Government bonds, and domestic produce. Bankers' 60 day bills on London closed at 109⅜@109¾, and on Paris to 5.17½@5.13¾; sight bills on London to 110¼@110⅝; and on Paris to 5.12½@5.10. The offerings of produce bills are restricted. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $4,043,866, against $5,008,602 same week last year. The exports since January 1, have been to the value of $158,268,667, against $132,791,709 same time last year.

Government securities have been in very good demand, since our last, chiefly for home investment, and the gold-bearing bonds, especially the various issues of the Five-Twenties, have been advancing, leading to greater buoyancy also in the currency interest obligations, particularly the first of August series of the Seven-Thirties, which are immediately convertible at the option of the holder, into the latest issue of the Five-Twenties of 1865, July and January. The conversion of this series of the Seven-Thirties is progressing at a satisfactory rate, through the U. S. Sub-Treasury in this city. The conversions are made in the following manner: Interest on the 7-30 notes is credited from August 15, 1866, to date of conversion, at 7 3-10 per cent., and the interest on the 5-20 bonds is charged from July 1, 1866, to date of conversion, at 6 per cent.—difference in interest received in currency. All notes must be indorsed "Pay Secretary of the Treasury for redemption," and indorsed by the depositor. Notes made payable to order must have indorsement verified. The Five-Twenties of 1862 were selling on Wednesday at 114½, or equal to about 110⅛ ex-coupon; and the May and November Five-Twenties of 1865, at 111⅜@111½, which was equal to 107⅛ ex-coupon. On Thursday, they were quoted ex-coupon, and thus dealt in at the Stock Boards, and in the street. U. S. sixes of 1867 closed on Wednesday at 138½; U. S. sixes of 1868, at 136½; U. S. sixes of 1881 114@114¼; U. S. Five-twenties of 1862 at 114½; U. S. Five-twenties of 1865 at 111½; U. S. Five-twenties of 1866, 108⅞@109; U. S. Ten-forties at 100@100⅛, and U. S. Seven-thirties at 105¾@106⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116⅞	May, 1865	111⅝
July, 1864	116⅞	August, 1865	110⅝
August, 1864	115⅞	September, 1865	110⅛
October, 1864	115⅜	October, 1865	109⅝
December, 1864	113⅞		

In railway and miscellaneous property, the week opened tamely, and with symptoms of depressed, which disappeared under the influence of the favorable bank exhibit, and the encouraging monetary advices from the interior, in addition to the advices of continued prosperity in railway traffic, despite the comparative dullness in general business. The speculative temper gained strength towards the close, the market generally leaving off buoyantly, with indications of a further upward movement resulting in part from the increasing volume of speculative ventures by mercantile men, who resort to Wall street operations, hoping thus to make up for the inactivity and heaviness in their legitimate business.

In general merchandise, there is a noticeable increase of activity in Domestic Produce, especially in Breadstuffs, which have advanced very rapidly, on extensive speculative purchases, chiefly on Western account. In the Provision line, there was a sharp corner on the *short* operators in Mess Pork, for October delivery, which resulted in a marked rise in the price of "cash pork;" while all other articles in the line were much depressed. The Cotton interest exhibited more steadiness, with a fair average business, the closing rates for Middlings being from 39@41½ cents per lb. The receipts at the port this week, have averaged over 3,000 bales a day, making the receipts at the port since Oct. 1, 51,688 bales, against exports of 11,153 bales. The receipts since the commencement of the current cotton year, Sept. 1, have been 104,486 bales, against exports of 32,629 bales. Since Jan. 1, there have been received here 511,630 bales, and exported hence 342,565 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 115,000 bales against 300,000 bales same time last year; exports, 59,000 bales, against 137,000 bales same time last year, estimated stock at latest dates, 257,000 bales, against 366,000 bales same time last year. In foreign merchandise, there has been a very moderate movement, and considerable depression in prices. The dry goods trade, is most injuriously affected by the current electioneering excitement, and dullness is the order of the day. Some of the less confident houses are realizing on their supplies through the auction rooms at low figures. The total imports of foreign dry goods, last week, were $3,049,937, and the total amount marketed $2,148,910. The value of foreign merchandise imported last week, was $2,507,840—making the grand total specie value of last week's imports of dry goods and merchandise, $5,557,977, and since January 1, $253,533,286, against $168,539,477 same time last year. The freight market is very quiet, yet steady with 522 vessels of all classes in port. The extraordinary inflation of produce values by speculative operations checks export movements.

The balance in the Sub-Treasury on Wednesday was $92,688,737 92.

The New York exports, exclusive of specie, for the week ending Oct. 30, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$5,008,602	$3,043,864
Prev. reported	127,783,107	155,224,803
Since January 1	$132,791,709	$158,268,667

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$3,403,652	$3,049,937
Gen. merchandise	2,709,225	2,507,840
Total for the week	$6,112,877	$5,557,777
Prev. reported	155,111,710	249,863,403
Since January 1	$161,224,587	$255,421,180

The latest quotations at the London Stock Exchange compare as follows with former returns:

Great Western Railway of Canada.

At the annual meeting of this company, held in London on the 10th ult., it was resolved:

That the report and accounts for the half year ending 31st July, 1866, this day submitted, be received and adopted, and that a dividend at the rate of 5 per cent. per annum, free of income tax, be now declared payable in London on 25th October.

It was also resolved:

That the Detroit and Milwaukee Railroad Company be authorized to borrow for a limited period a sum not exceeding $350,000, the security to be given for which loan shall for that period take precedence for interest over the claim of the Great Western Company upon the Detroit and Milwaukee Railroad.

The retiring auditors and directors, having been put in nomination, were re-elected. It was also resolved:

That the thanks of this meeting be given to the Chairman and his colleagues for their attention to the interests of the company.

Lynchburg and Danville Railroad.

We learn from the Lynchburg *News* that the entire amount of $100,000 required to secure the charter of this company has been subscribed; and that a meeting of the stockholders, for the purpose of organizing the company, is to be held in that city on the 15th inst. Only two dollars per share is required to be paid in when the organization can be perfected. There seems now a strong probability of the road being completed at an early day.

☞ The Texas Central railroad will be extended eighteen miles this year. The company are placing the road in good running order, and in a few weeks it will be supplied with everything requisite for a first-class southern railroad.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Oct. 26th, 1866, were $68,231 55
Corresponding week of 1865 ..... 87,282 20

Decrease $19,050 65

The earnings of the Grand Trunk Railway of Canada for the week ending Oct. 20th, 1866 were $151,604 00
Corresponding week of previous year.. 147,107 00

Increase $4,497 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in Oct., 1866..... $25,439 00
Corresponding week previous year..... 27,708 50

Decrease $2,269 50

The earnings of the Western Union Railroad for the week ending Oct. 21, 1866 ..... $23,623 45
Corresponding week previous year..... 24,214 63

Decrease $591 18

The earnings of the Michigan Central Railroad for the 3d week in Oct., 1866, were... $106,970 76
Corresponding week of previous year.. 100,215 96

Increase $6,754 80

The earnings of the Chicago and Rock Island Railroad for the 3d week in Oct., 1866, were $106,327 00
Corresponding week of previous year.. 95,490 00

Increase $10,837 00

The earnings of the Chicago and Great Eastern Railway for 3d week in Oct. were $33,650 90
Same period last year 26,299 95

Increase in 1866 ..... $7,350 95

The earnings of the Detroit and Milwaukee Railroad for the week ending Oct. 18th, 1866, were $48,498 00
Corresponding week of 1865..... 47,854 00

Increase $644 00

The earnings of the Chicago and Northwestern Railway for the third week in Oct., 1866, were $282,236 15
Corresponding week of previous year.. 223,829 83

Increase $58,406 32

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Oct. 1866, were $113,436 00
Corresponding week of 1865 ..... 122,601 00

Decrease $9,165 00

The earnings of the Virginia and Tennessee Railroad for the third week of Oct., were $18,922, an increase of $6,478 on the same week last year. Total for the fiscal year commencing 1st of July, 242 843, an increase of $135,627 on same time of 1865.

The receipts of the Susquehanna Canal Company for week ending Oct. 22d, were $7,173 61; previously this season, $176,346 56—making a total of $183,520 17.

☞ The proposed railroad, connecting Wiscasset, Me., with the Kennebec and Portland Railroad, will be eleven miles in length, and its construction, it is estimated, will cost $380,000—two-thirds of which sum is already subscribed. As soon as the full sum is secured, the work of construction will be begun. A charter covering the route from the K. & P. R. R. to Rockland, passing through Newcastle, Damariscotta, Waldoboro', Warren and Thomaston, has been secured, and these towns are authorized, when $300,000 is raised, to issue thirty-year bonds equal to the amount required for building the road to Rockland.

Journal of Railroad Law.

LIABILITY OF COMMON CARRIERS—HOW FAR IT MAY BE LIMITED BY CONTRACT.

In the case of Heineman *vs.* The Grand Trunk Railway Co., lately decided in the superior court of Buffalo,it was decided that the common carriers, though they cannot by contract shield themselves from liability for their own fraud or their own wilful act or negligence, yet they may contract against liability for that low degree of negligence which is not equivalent to wilful or wanton neglect of duty or recklessness.

The action was brought to recover damages for injuries sustained by a car load of horses while being transported by the defendant for the plaintiff from Stratford, in Canada West, to Buffalo, in this State, under a special agreement. It is charged in the complaint that the defendant "carelessly, negligently, wrongfully and wilfully," run the car containing the horses in question on to a side track of its road, and kept them locked up for four days and nights without food or drink, and by its station agent (no other person representing the company being present), refused to permit them to be unloaded so that they could be fed, it being impossible to feed them while in the car. The conditions were:

"I. The owner of the within mentioned animals undertake all risk of loss, injury, damage and other contingencies, in loading, unloading, conveyance and otherwise.

II. The railway company do not undertake to forward the animals by any particular train, or at any specified hour; neither are they responsible for the delivery of the animals within any certain time, or for any particular market.

III. When free passes are given to persons in charge of animals, it is only on the express condition that the railway company are not responsible for any negligence, default, misconduct or otherwise, on the part of the company or their servants, or of any other person or persons whomsoever, causing or tending to the cause of the death, injury or detention of persons with such free passes, and that whether such passes are used in traveling by any regular passenger train, or by any other train whatever.

I agree to the above conditions.

A. J. Heineman,
Owner or on the owners behalf."

It was also proved that simultaneously with the execution thereof, and about 4 o'clock P. M., plaintiff delivered to the defendant, a common carrier, on board the car mentioned therein, thirteen horses, the property of the plaintiff, also mentioned in said agreement, in good condition, and paid the sum as freight thereon charged, on said horses, from Stratford aforesaid, to Buffalo, in the State of New York, and defendant accepted said freight and received said horses.

The car in which the plaintiff's horses were loaded, was, as soon as they were put into it, locked up by the defendant's agent, who took the key thereof, and said car remained locked, and the key thereof, in the possession of defendant's agents, until it arrived at Buffalo. On the same day, after the usual and declared time for said train to leave Stratford aforesaid, the train of which this car constituted a part, started from Stratford and arrived at Brantford, Canada West, on its way to Buffalo aforesaid, at about five o'clock in the morning of the 16th day of March. The train, when it so arrived at Brantford, was composed of cars, some of which were loaded with produce and dead freight, and others with live stock, including plaintiff's horses. At Brantford aforesaid, said train was broken up by the servants of the defendant, and the cars containing the live stock, including the one containing the plaintiff's horses, were placed upon a switch, or side track, while the cars containing produce and dead freight were made up into a new train, to which the engine, after being detached from the stock cars, was hitched, and proceeded to Buffalo, leaving the cars laden with live stock, including the car containing plaintiff's horses, standing upon the switch or side track, at Brantford aforesaid, until between 10 and 11 o'clock on the morning of the 18th March, when the cars laden with stock, including the car containing plaintiff's horses, were sent by defendant to Buffalo, arriving at that place on the 19th day of March, about noon, when defendant delivered said horses to plaintiff--they having been without food or drink since they were loaded at Stratford aforesaid. While the car, containing plaintiff's horses, remained standing on the side track at Brantford, and soon after the arrival of the train from Stratford, all the employees of defendant, who had been connected with the train departed, none of them remaining in charge of the live stock, except that there remained at Brantford a local yard master, and a local station agent, employees of defendant.

Other trains afterwards arrived at Brantford, from points west of Brantford, composed of cars loaded with produce, and others loaded with live stock, all of which trains, on their arrival, were broken up by defendant's employees, and the cars containing live stock were placed on side tracks of defendant's road, while the cars containing dead freight and produce were made up into new trains and sent on from Brantford to Buffalo by defendant's employees. That while the cars conplaintiffs horses, remained at Brantford, a large number of trains loaded with dead freight and produce estimated at from ten to fifteen trains, came from points west of Brantford, on defendant's road, and passed by the car containing plaintiffs horses while standing on the side track, and went on towards Buffalo.

While thus detained at Brantford, plaintiff frequently, on the 17th and 18th days of March, applied to the yard Master at Brantford aforesaid, and to Mr. Evans, the station agent at Brantford, to have the car containing plaintiff's horses unlocked and unloaded, to the end that the horses could be properly fed and watered, as they could not be fed and watered while in the car, which the said agents of defendant declined to do, or permit to be done. It was proved that plaintiff could have no access to his horses while locked in the car, and until they were delivered in Buffalo.

The usual time of running stock cars from Stratford to Buffalo over defendant's road was from 24 to 26 hours.

The plaintiff having rested his case, the defendant's counsel moved the court for a non-suit.

The court decided that the liability of the defendant must be determined by the laws of the State of New York, and granted the motion, and plaintiff's counsel duly excepted.

The following opinion was delivered by

MASTEN, J.—I understand it to be settled law in this state, at the present day, that railroad corporations engaged in the transportation of property are subject to the absolute responsibility which by the common law, rests upon common carriers; they are except as against loss or injury occasioned by the act of God or of a public enemy, insurers of the safe transportation and delivery of the property entrusted to them for carriage.

In the carriage of living animals, except as to those injuries which result from the vitality of the freight, and could not by care and diligence be prevented, they are bound to the same responsibility as in the carriage of inanimate property.

Common carriers cannot, by contract, shield themselves from liability for their own fraud, or their own wilful act or negligence, but they may contract against liability for that low degree of negligence or want of care on their part, which is not equivalent to wilful or wanton neglect of duty or recklessness.

They may also, by special contract, relieve themselves from all responsibility for injury to or loss of the property entrusted to them occasioned by the negligence, misconduct, fraud or felony of their employees or servants.

When the carrier is a corporation, whose affairs are entrusted to the mangement of a board of directors, it cannot extend to its surbordinate agents or servants, and the weight of opinion seems to be that it does not extend to any officer or agent of the corporation other than the directors. (Dorr *vs.* The New Jersey Steam Navigation Co. 1 Kern. 485; Clark *vs.* Rochester and Syracuse Railroad Company, 14 N. Y. 570; Wells *vs.* The N. Y. C. R. R. Co. 24 N. Y. 180; Perkins *vs.* The N. Y. C. R. R. Co. 24 N. Y. 196, 214; Bissell *vs.* same, 26 N. Y. 442.)

The right of common carriers to restrict their liability to the extent above stated was, after some controversy, finally established in England, and it was the abuse of that right by carriers which led to the passage of "the railway and canal traffic act," by which this right was limited. (Peck *vs.* N. S. Railway Co. 16 Eng. Com. Law R. 1006; Id. 96 Eng. Com. Law R. 958,986.)

As early as Lord Coke's time, it would seem that a common carrier could, by contract, restrict to a certain extent his common law liability (Note, Southcoate's case, R. par 4, p. 88.

But until within the last quarter of a century, the weight of authority in England and in this country, was that "the salutary policy of the common law" did not allow a common carrier, even by special contract, to shield himself from responsibility for the fraud, misconduct or gross negligence of his servants. And the law is so laid down by Chancellor Kent and Judge Story in their commentaries. (2 Kent's Com. 608; Story on Bailments, § 549.)

But as I have already said, it was finally established by the decisions of the courts in England and in this state, that the policy of the common law did not prevent the carrier from exonerating himself by agreement from liability for the negligence of his servants.

In view of the great extent to which the carrying business is monopolized in this country by corporations and combinations, and the power that they possess to dictate terms, it is quite probable that legislative interference will be successfully demanded, as has been done in England.

Indeed I see in the Civil code, which has been reported by the commissioners, a provision that "a common carrier cannot be exonerated by any agreement made in anticipation thereof, from liability for the gross negligence, fraud or wilful wrong of himself or his servants."

The commissioners have I think divided negligence into degrees too refined for practical purposes.

The injury to the plaintiff's property, for which this action is brought, was occasioned by the wilful misconduct of the defendant's servants and against responsibilities for which it was lawful for the defendant to contract.

This brings us to the construction of the special contract of carriage between the parties.

The law being settled, the contract is to be construed according to the intent of the parties to be gathered from the language used, giving, if possible some force and effect to every word made use of as evidence to some extent of their interest.

The contract is, "the owner of the within mentioned animals undertakes all risk of loss, injury, damage and other contingencies in loading, unloading, conveyance and otherwise."

These words are very general and comprehensive. I do not see how we can say that they do not embrace all (every) risk (hazard, danger, peril, chance) of loss, injury, damage and other contingencies (casualities, accidents, occurrences), in loading, unloading, conveyance and otherwise (other manner or way) which the plaintiff might lawfully take upon himself and the defendant lawfully throw of itself. If we undertake to limit these general and comprehensive terms, I do not see where we are to draw the line. What have we to draw it by? If I knew of any way upon the principles by which courts must be governed to secure certainty or safety to suitors, to draw the line which the plaintiff contends it should be, I would be pleased to do so.

If we go outside of the writing to ascertain the intent of the parties as an independent fact, I think we would find that the defendant intended to get rid of all responsibility it lawfully could; that to avoid responsibility for the carelessness, negligence and misconduct of its servants was prominently in view, and that the plaintiff was compelled to accept the terms dictated.

Judgment ordered for the defendant upon the exceptions.

☞ The authorities of the State of Wisconsin having filed in the General Land Office a list of lands enuring to the State under the act of Congress, approved April 10, 1866, to aid in constructing a ship canal to connect the waters of Green Bay with Lake Michigan, the Secretary of the Interior has directed that the lands be prepared for approval to the State for that purpose. The commission is now engaged in examining and adjusting the lists of selections, which amount to 200,000 acres.

Interest and Dividends.

The Housatonic Railroad Company have declared a dividend of four dollars per share, free from Government tax, on the preferred capital stock, payable November 1, 1866.

The Toledo, Wabash and Western Railroad Company have declared a semi-annual dividend of 3½ per cent. on the preferred stock, less U. S. tax, payable November 1.

Interest on the Equipment Loan Notes of the Vermont Central and Vermont and Canada Railroad Company, due Nov. 1, 1866, will be paid at the Treasurer's office, St. Albans, Vt.

Holders of the 1st mortgage 7 per cent. bonds of the Indiana Central Railroad Company are requested to present them for payment at the office of Messrs. Winslow, Lanier & Co., 27 and 29 Pine street, November 1, 1866, after which date interest will cease.

The Manchester and Lawrence Railroad Company have declared a semi-annual dividend of 4 per cent., payable November 1.

Central Pacific Railroad.

Upon the completion of the Central Pacific Railroad from Sacramento to the California State line, 156 miles, the entire bonded debt of the company, on which they will have to pay interest, will be as follows:—$1,500,000 7 per cent. convertible bonds, annual interest $105,000; $7,336,000 6 per cent. 1st mortgage bonds, annual interest $440,160, making the total interest obligations, with road completed and equipped to State line, $545,160.

Steel Rails.

The Boston and Providence Railroad have lately laid three or four miles of steel rails on their road beyond Roxbury, and the officers think they are a great improvement on iron rails. In the Spring about ten miles more will be laid. They are pretty expensive, as will be seen from the fact that they cost $170 per ton (landed in Boston,) the same being more than twice the price of iron rails.—*Boston Traveler.*

☞ The report of the President of the James River and Kanawha Canal, just rendered, shows that the receipts of the company have been $415,324 from all sources up to September 30, 1866, and disbursements $296,505—leaving on hand at that date $118,819, of which $18,961 is in bank and agents' hands; $40,000 is in Virginia State stock, and $59,858 is in unavailable drafts, notes, &c., chiefly confederate currency.

☞ Work on the Knoxville and Kentucky Railroad is being pushed forward with energy. When the road is finished, and the Lebanon Branch Extension of the Louisville and Nashville Railroad constructed, there will be a direct through route from Louisville to Knoxville.

☞ An excursion party has started for Fort Riley, Kansas, to celebrate the opening of the Union Pacific Railway (Eastern Division) to that point.

☞ About 120 miles of the third rail on the Great Western Railway of Canada is now laid; the whole to be completed by the 1st of January.

☞ G. Jordan, Esq., has been appointed Engineer and Superintendent of the Alabama and Florida Railroad, vice S. G. Jones, Esq., resigned.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JULY 31, 1866.

The receipts on capital account during the half year amounted to £12,950 0s. 3d., and the total receipts to 31st July to £5,168,681 8s. 5d. The aggregate expenditure to same date amounted to £5,207,569 5s. 9d., leaving a balance to the debit of capital account of £38,887 17s. 4d. The outlay on capital account for the half year was £55,675 19s. 3d. This embraced new sidings laid down at Hamilton; new sidings to accommodate the increased oil business at Bothwell; proportion of expenditure chargeable to capital on rebuilding in stone and iron the bridge over the Twenty Mile Creek at Jordan, and completion of the abutments of the Nith Bridge; six new fifteen ton cranes to accommodate the heavy machinery business going to the oil districts; new station at Paris, leased to the Grand Trunk Company, and extensions at various platforms to accommodate increased local business; iron tanks at Hamilton for storage of oil; cost of completion of Yonge street station, Toronto; difference in cost of 75 lb. rails, laid on the Copetown incline in place of the old 66 lb. rails taken up; cost of fish jointing ten miles of main line track, &c., &c.; outlay for new car ferry boat and slip dock for same at Windsor, together with the expenditure on new third rail account. The receipts and expenditure on revenue account were as follows:

Gross receipts		£343,162
Working expenses, including maintenance of way, taxes, insurance, and rent of suspension bridge		150,406
		£192,756
From which there has to be deducted—		
Interest on Government loan	£17,498	
Interest on bonds, &c	31,562	
Loss on conversion of American money	39,806	
Renewal of rails, sleepers, bridges, &c., and plant of rolling mill.	25,341	
Amount paid for losses by the fire at Detroit station	941	
		115,148
Profit on half year's operation		77,608
Add surplus from last half year		11,000
Amounting to		£88,608

From this amount the directors recommend a dividend at the rate of 5 per cent. per annum, free of income tax, which will absorb £85,959 16s., leaving a sum of £2,648 12s. to be carried to the credit of the current half year. The loss on the conversion of American funds for the half year was £39,806 7s. 6d., as against a sum of £54,937 6s. 7d. for the corresponding half year of 1865. The minimum price of gold during the half year was 125⅛, the maximum 166¼, and the average cost at which purchases have been made 135⅛. The following is a comparative table of the receipts and expenses during the last five corresponding half years:

	Receipts.				Expenses.	
Half year.	Passen. mails & sundries.	Freight. and live stock.	Rents.	Total.	Including taxes, insr. & suspension bridge rent.	Per cent-age of gross rcpts.
July,	£	£	£	£	£	£
1862.	93,918	151,607	704	246,229	129,051	52.41
1863.	111,671	180,722	625	293,067	136,270	46.50
1864.	125,282	189,081	577	314,940	140,189	44.51
1865.	139,821	144,028	716	284,565	132,487	46.56
1866.	172,731	169,577	854	343,162	150,406	43.33

The gross receipts for the half year amount to £343,162 7s. 5d., against £284,565 7s. 7d., showing an increase of £58,596 19s. 10d., while the working expenses, exclusive of taxes, insurance, and suspension bridge rent, are 41.47 per cent., against 43.98, showing a decrease of 2.51 per cent. The receipts show an increase in all branches of traffic, but more especially in local passenger and local freight. The through freight would undoubtedly have been larger, but for the efforts which have been made to secure traffic between the Eastern and Western States by the running of freight cars through without change between Chicago, New York and Boston, *via* the Lake Shore, New York Central and Pennsylvania routes. The through business, moreover, has been generally light, and this rendered competition more active and produced lower rates than those obtained the previous half year. Having in view the termination of the Reciprocity Treaty on the 17th March last, and the disturbance to business consequent upon the Fenian raid at the commencement of June, the satisfactory results of the past half year's traffic and the economical manner in which the railway has been managed are especially gratifying. The whole of the rails, fish plates and fastenings required for the narrow gauge track have been shipped to Canada. The iron car ferry boat has been launched. The completion of the narrow gauge track between suspension bridge and Windsor, and of the iron ferry boat for the transport of cars across the Detroit River, will undoubtedly place the Great Western Company in a most advantageous position. It is also obvious that while it will promote the through traffic between the Western and Eastern States of America, it will likewise be the means of affording facilities for trade between the States and Canada and the Lower Provinces. The matters so long in dispute between the Commercial Bank of Canada and this company have not yet been finally adjusted, but the main points of the arrangement have been concluded. All litigation has ceased, and this company's cash account has been reopened at that bank. The Directors regret to announce that a disastrous fire consumed the Detroit terminus of the Detroit and Milwaukee Railroad, on the night of the 26th of April last, by which buildings, rolling stock and merchandise, to a considerable amount, were destroyed. The portion to be borne by this company, after a careful inquiry, is estimated at £19,520, of which about £7,200 will be repaid the Great Western Company by the insurance companies with whom policies were open, and there has also been applied thereto the sum of about £3,700, which stood at the credit of insurance fund account. The sum of £940 19s., being the amount of claims which have been made and settled during the half year, in addition to the above, appears in the revenue accounts, and the balance, when adjusted and paid, will have to be dealt with in a similar manner. The loss to the Detroit and Milwaukee Railroad from this fire is estimated at £30,000, and to prevent inconvenience from this loss, as well as to provide funds for further outlay on capital account for the purposes of the line, a resolution will be proposed to authorize the Detroit and Milwaukee Company to borrow in America and for a limited period a sum not exceeding $350,000, or £70,000 on security, which will take precedence for interest of the Great Western claim upon the Detroit and Milwaukee revenue. It is hoped that the sum thus borrowed will be repaid out of the revenue earnings of that company at an early date. The traffic receipts of the Detroit and Milwaukee Railroad for the half year ending June 30th last, amounted to £150,653, against £147,870 for the corresponding period of 1865, and against £119,567 for 1864.

Signed on behalf of the Board of Directors,

THOMAS DAKIN, President.

London, September 28, 1866.

☞ We learn from the Columbus (Ga.) *Sun*, that iron enough to extend the Girard Railroad twelve or thirteen miles below Union Springs is on the way to that city, and the reasonable probability is that the road will be completed below Union Springs by the last of December. The grading is already completed and cross ties ready, or soon will be for the reception of the iron.

Rutland and Burlington Railroad.

We have before alluded to a proposition to unite the conflicting interests of the 1st and 2d mortgage bondholders of the Rutland and Burlington Railroad. The proposition, as we are informed, is to convert the 1st mortgage bonds, principal and interest, into a guaranteed preferred 7 per cent. stock, which would amount to about $3,200,000, and give each holder of a bond of $1000 seventeen hundred and seventy-seven dollars in a 7 per cent. stock.

For the 2d mortgage bonds, principal and interest, common stock to be issued, amounting to about $2,200,000, giving to each bond of $1000 eighteen hundred and eighty-five dollars in stock. The property is now in the hands of the Trustees of the 2d mortgage, who claim to have a first lien on a portion of the property.

TO CONTRACTORS.

THE PLANS, Profiles and Estimates for the construction of Thirty Miles of the DETROIT AND HOWELL RAILROAD, between Plymouth and Howell, will be completed about the first of November next, and will be open to the examination of those proposing to contract, at the office of the Company at Plymouth Michigan, where proposals will be received for the construction of the earth work, timber work and fencing.

T. T. LYON, President.

Plymouth, Michigan, Oct., 15th, 1866.

CONTRACTORS, TAKE NOTICE.

THE PHILADELPHIA AND BALTIMORE CENTRAL RAILROAD COMPANY have extended the time to Saturday, November 10th, 1866, for receiving proposals for the Grading, Masonry and Bridge Superstructure and furnishing the Cross-Ties, and laying the track upon six miles of the said Company's road, extending from near the Rising Sun village, Cecil county, Md., to the Susquehanna river.

Plans and Specifications of the work can be examined at the office of the Engineer, JOHN M. HOOD, at Port Deposit, Cecil county, Md., and a guide will be furnished to show the work to those desiring to look at the same.

The Engineer purposes to be at the Rising Sun village, on Tuesday, November 6th, and Friday, November 9th.

JOSEPH HUDDELL,
Secretary and Treasurer.

Philadelphia, Oct. 22d, 1866.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS, directed to the undersigned, and endorsed "Proposals," will be received at the office of J. W. Allen, in Bordentown, New Jersey, until Wednesday night, the 14th November prox., for grading and masonry on the PEMBERTON AND HIGHTSTOWN RAILROAD. Profiles, specifications and blanks will be shown at Mr. Allen's office on and after the 29th inst.

ASHBEL WELCH,
Engineer P. & H. R. R.

October 19th, 1866. 3t42

TO CONTRACTORS.

SEALED Proposals will be received by the undersigned until Saturday, November 17th, for the Graduation, Bridge and Culvert Masonry on forty-three miles of the Lebanon Branch Extension of the Louisville and Nashville Railroad, between Crab Orchard, in Lincoln county, and Loudon, in Laurel county, Kentucky.

The work is of the very heaviest character of Earth and Rock Cuttings Tunneling and Masonry, in value about one million of dollars.

Specifications and profiles can be seen at the Company's Office, in Crab Orchard, on and after November 1st.

GEORGE MACLEOD, Chief Engineer.

Louisville, Ky., October 17th.

BARSTOW, EDEY & CO.,

BANKERS and BROKERS,

Samples and prices on application. Lots made to order of any pattern or stamp required.

CAUTION.

These Pens are of genuine American manufacture, and equal in finish, elasticity, and fineness of point to the best imported. They are, therefore, sure to gain the confidence of the American public. The fac-simile of our signature is sufficient security against foreign imitation.

R. ESTERBROOK & CO.

WOOLWORTH & GRAHAM,
Sole Agents.

WANTED—By a Railway Commission House in the City of New York, a thoroughly Competent Salesman. With one having a good trade and acquaintance liberal arrangements will be made. Address P. O. Box 4,955, New York P. O.

BORDEN & LOVELL,

70 and 71 West Street, New York.

GENERAL AGENTS

Borden Mining Company's

CUMBERLAND COAL.

Orders from Railroad Companies, Manufacturers and others are respectfully solicited.

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

EDW. F. DAVISON, 138 Pearl St.

Railway Purchasing Agent.

A PERSON of experience, thoroughly acquainted with the business and markets, desires to form an arrangement with some RAIL ROAD CORPORATION of standing, to act in the capacity of Purchasing Agent.

References unexceptionable.

Address, "H." P. O. Box 5,314, New York City.

Car Covering or Roofing

KINGMAN'S CEMENT WITH HEAVY CANVASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.

July 19th, 1865.

NOTICE TO BIDDERS

FOR THE

ST. LOUIS AND IRON MOUNTAIN

OR

CAIRO AND FULTON RAILROADS

OF MISSOURI.

THE PROPOSALS shall each state the price bid for the respective Roads, and that they are based upon the following terms and conditions, viz:

First. The price or consideration bid shall be payable as follows: One-fourth on closing the contract, and the balance in five equal annual instalments; the first payable in one year, the second in two, the third in three, the fourth in four, and the fifth in five years thereafter, with six per cent. interest on deferred payments, payable annually: *Provided*, that all sums bid may be paid at any time prior to maturity, in either cash or the bonds or other liabilities of the State of Missouri.

Second. The Roads and all Rolling Stock belonging thereto, shall be kept in good serviceable condition during the progress of said Roads (respectively) to completion.

Third. Bidders for the St. Louis and Iron Mountain Railroad must agree to finish that Road to a point south of Pilot Knob, to connect with the Cairo and Fulton Railroad of Missouri, in three years, and to the Mississippi river, opposite to or below Columbus, Kentucky, in five years from the date of the sale; and they must also agree to expend in each and every year, in case they become the purchasers, the sum of five hundred thousand dollars in the work of graduation, masonry, or superstructure on said extension.

Bidders for the Cairo and Fulton Railroad of Missouri must agree to complete said Road from the Mississippi river, opposite the town of Cairo, Illinois, or Columbus, Kentucky, to the intersection of the St. Louis and Iron Mountain Railroad line, within three years after the date of sale thereof.

Bids for the Roads must be separate. Those for the St. Louis and Iron Mountain Railroad should be addressed to ROBERT A. WATT, President Board of Commissioners of that Road; and those for the Cairo and Fulton Railroad of Missouri to CHARLES S. RANKIN, President Board of Commissioners Cairo and Fulton Railroad of Missouri, St. Louis, Mo.

Proposals will be received until NOVEMBER 8TH 1866.

By order of the Board.

CHESTER HARDING, JR.
Atty for Commissioners

Railroads of Vermont.

The railroads of Vermont are as described in the following list:

	Miles.
Atlantic and St. Lawrence (part)—New Hampshire Line to Canada Line	30.50
Bennington and Rutland—Rutland to N. Bennington (N. Y. State Line)	59.00
Bennington Br.—North Bennington to Bennington	5.50
Connecticut and Passumpsic Rivers—White River Junction to Canada Line	105.00
Rutland and Burlington—Bellows Falls to Burlington	119.60
Rutland and Washington (part)—Rutland to N. Y. State Line	33.55
Rutland and Whitehall—Castleton to N. Y. State Line	6.88
Hydeville Branch—(to Marble Quarries)	1.57
Southern Vermont—Mass. Line to N. Y. State Line	8.00
Vermont and Canada—Essex Junction to Rouse's Point	47.00
Burlington Branch—Colchester to Burlington	8.50
Swanton Branch—Swanton to Canada Line	10.00
Vermont Central—Windsor to Burlington	117.00
Montpelier Branch—(to Montpelier)	2.00
Vermont and Massachusetts (part)—Brattleboro' to Mass. State Line	10.50
Vermont Valley—Bellows' Falls to Brattleboro'	23.69
Total length of railroad in State	588,29

The leading object of the railroads of Vermont is the connection of the seaboard at Boston and New York with Canada. Hence with one exception they converge on the northwest corner of the State, where they unite directly with the lines from Montreal. These roads also connect with the Ogdensburg line to the Upper St. Lawrence. The Connecticut and Passumpsic Rivers Railroad is the exception. This road follows the valleys of the Connecticut and Passumpsic Rivers to the Province Line where it seeks prospective connection with the Stanstead, Shefford and Chambly road now in progress. This route also has its ultimate terminus at Montreal, but it will also have the large trade which the Eastern Townships of Canada are capable of yielding. The table above given will show the general direction of the roads severally. The Southern Vermont Railroad is a link in the great tunnel line which in connection with the Troy and Boston Railroad in New York and the Vermont and Massachusetts and Fitchburg Railroads in Massachusetts will give to Boston a second direct route to the northern interior and lake regions. With these preliminary remarks we now proceed to say a few words on each of the works within the State, basing our statistics on the State Railroad Commissioner's Report, (so far as it goes,) for the year 1864-'65, and presented to the Legislature in October of the same year.

ATLANTIC AND ST. LAWRENCE RAILROAD.

About one half of this road belongs absolutely to the Grand Trunk (Can.) Company and the remainder to the Atlantic and St. Lawrence Company of Maine, Island Pond being the dividing point between the two properties. The latter half is, however, leased to the Canada Company, and together these portions form the Vermont section of the great Montreal and Portland line 295 miles in length, of which 30½ are in this State. The Report to the Legislature of Vermont applies only to the Atlantic and St. Lawrence Railroad 149 miles from Island Pond to Portland. The cost is stated at $6,788,354 72 which gives an average cost of $45,560 per mile. A large part of this cost has been paid by the Grand Trunk Company in improvements since the date of the lease. The actual capital of the Atlantic and St. Lawrence Company, amounts to $5,966,900, of which $2,494,900 is in shares, and $3,472,000 in 6 per cent. bonds. The number of locomotives on this road is 45, and the number of cars 565, viz., passenger 17, baggage, express and mail 7, and freight 541. The number of miles run by trains in 1864 was 859,835 miles, viz: passenger 147,692, freight 498,828, and gravel, wood and construction trains 213,315 miles. The earnings for the year amounted to $1,008,304 51, and the expenses to $703,397 48, leaving net earnings $304,907 03. Dividends January and July, less Government tax, 4 per cent. each.

BENNINGTON AND RUTLAND RAILROAD.

This road commencing at Rutland runs in a southwesterly direction to the State Line of New York at North Bennington where it connects with the Troy and Boston Railroad, furnishing a direct route to Troy, Albany and New York City. It was formerly named the Western Vermont Railroad. At Rutland it connects with the Rutland and Burlington Railroad, and through it with the Canada lines to Montreal. The State Report for 1865 gives no information regarding the doings of this company. It is leased to the Troy and Boston Railroad Company.

CONNECTICUT AND PASSUMPSIC RAILROAD.

This road was not finished to the Canada line at the date of the State Report. Its operations and earnings for the year 1864-'65, were on the finished section from White River Junction to Newport, 105 miles. The whole length of the road is 110½ miles. On the 31st May, 1865, the capital and debt stood as follows:

6 per cent. preferred stock		$1,514,300
Stock not preferred		163.700
Guaranteed stock		1,600
Total capital stock paid in		$1,679,600
Bonded debt, 6 per cents		638,500
Notes payable		94,000
Total stock and debt		$2,412,100
Cost of construction	$2,842,741	
Cost of equipment	236,425	
		3,079,166
Expended from earnings, &c.		$667,066

The number of cars owned by the company May 31, 1865, was 288, viz: passenger 8, mail, baggage and express 6, freight 23 4, and others 40.

The number of miles run by trains during the year then ending was 164,794 miles, and the earnings and expenses were as follows:

Total earnings	$428,180 34
Total expenses	243,710 10
	$184,470 24
Dividends $100,278 36, and interest $53,341 00	153,619 36
Balance to credit	$30,850 88

The results of the year 1865–'66 have already been published in the JOURNAL.

RUTLAND AND BURLINGTON RAILROAD.

The returns of this road are wanting in the State Report. It extends from Windsor to Burlington, a distance of nearly 120 miles, forming with its connections a through route from Boston to Burlington and Montreal. Its cost has been about $4,600,000.

RUTLAND AND WASHINGTON RAILROAD.

This line is partly in Vermont and partly in New York, and is leased in perpetuity to the Rensselaer and Saratoga Company who pay 6 per cent. on its capital and interest on its bonds. No mention is made of it in the State Report.

RUTLAND AND WHITEHALL RAILROAD.

This is a short line connecting with the Rutland and Washington Railroad at Castleton, and extending west to a junction at the State Line of New York with the Saratoga and Whitehall Railroad, with a branch from Hydeville to the Marble Quarries. Its capital is $255,700, which receives from the lessees (the S. and W. R. R. Co.) 6 per cent. per annum. An extension of the road by an independent line from Castleton to Rutland has been authorized by the Legislature, and will probably be constructed.

SOUTHERN VERMONT RAILROAD.

This is a short road crossing the southwest corner of the State, and is the Vermont section of the Troy and Boston Railroad by which it is operated. Its length is 8 miles, the construction of which cost $200,000. It is owned by the Troy and Greenfield (tunnel) Company.

VERMONT AND CANADA RAILROAD.

In connection with the Vermont Central and the Rutland and Burlington Railroads, this line forms the trunk towards Canada. The capital is fixed at $2,000,000, and for the Swanton Branch $250,000. It is leased to the Vermont Central Company in perpetuity at an annual rent of 8 per cent. The amounts above stated as capital include the back rents due before the recent settlement.

VERMONT CENTRAL RAILROAD.

The Vermont Central Railroad commences at Windsor on the Connecticut River, and there connects with the Sullivan Railroad, which with its southern connections carries the line to Boston. Its northern terminus is Burlington, where and at Essex Junction it connects with the Vermont and Canada Railroad, which carries the route to the Canada line, and ultimately to Ogdensburg and Montreal. Its length is 117 miles, with a branch of 2 miles from the main line to Montpelier. It is at the same time one of the most important and unfortunate lines of the State. Its construction and equipment has cost too much, and hence its capital has never reached proper compensation. The cost of the line is stated at $8,402,055, or $71,812 per mile. By a recent adjustment of its financial status its capital was fixed at 100,000 shares, and its debt at $3,500,000 at 7 per cent., of which $2,000,000 are first, and $1,500,000 second mortgage bonds. The company own 54 locomotive engines, 40 passenger cars, 9 baggage, express and mail cars, 828 covered freight and cattle cars, and 200 platform cars; also 40 gravel cars. The mileage of trains in the year ending May 31, 1865, was 1,032,304 miles, viz., passenger trains 362,418, freight trains 647,647, other trains 22,239 miles. The number of through passengers carried was 129,556½, and of way passengers 202,732½—total, 332,289, together carried a total distance of 13,140,362 miles. The quantity of freight carried in the year was—through 142,715¾ tons, and way 175,706¼ tons—total, 318,422 tons, together carried a total distance of 33,094,173 miles. These operations cover both the Vermont Central and the Vermont and Canada lines, together a length of 184½ miles. The earnings and expenses of operations were as follows:

Gross earnings	$1,477,782 26
Operating expenses	1,143,455 74
Earnings less expenses	$334,326 52

from which must be deducted $180,000 rent of the Vermont and Canada Railroad.

VERMONT AND MASSACHUSETTS RAILROAD.

Only a small section of this road is in Vermont. This extends from Brattleboro' to the Massachusetts State Line, a distance of 10½ miles. The Massachusetts' Annual Statements recently given in the JOURNAL furnish all necessary information in regard to this company.

VERMONT VALLEY RAILROAD.

This road extending from Brattleboro' to Bellows Falls forms a connecting link between the Vermont and Canada and the Rutland and Burlington Railroads. It is 23.69 miles long, and cost $1,212,274 40; the equipment owned by the company consists of 4 locomotives, which are accounted for at $9,611 79. The paid in capital amounts to $516,163 82, and the bonded debt to $793,200, viz., 1st mortgage bonds $336,000 at 7 per cent., and $114,000 at 6 per cent., and 2d mortgage bonds $293,200 at 7 per cent., interest payable annually April 1, and October 1. Both series are past due, the first since April 1, 1860, and the second since October 1, 1859. Since the 1st June, 1865, the road has been leased to the Rutland and Burlington Company. The report brings matters down to June 30, 1865. The number of passengers carried one mile during the year was 1,569,749, and the number of tons 1,023,359. The total earnings were $90,272 84, and expenses $55,915 52—profits $34,357 32, not sufficient to paid interest on the bonded debt.

The State Report from which we have gathered the principal statements given above is prefaced by a serio-comic disquisition on railroad economy and management, evidently written by a party whose knowledge of the world is very limited. It is eminently *local*, but probably broad enough to satisfy the farmer Legislature of the *green* State. There is nothing in it, however, that would bear transcription or abbreviation. The reports themselves are very loose and unsatisfactory, and several of the principal lines omit to report at all. Formerly the Vermont Reports were decent—they are now as worthless for all statistical purposes as those of the great anti-liquor State of Maine, or those of the Arab State of New Jersey. We hope for better things in future.

Louisville and Nashville Railroad.

The annual meeting of the stockholders of this company was held in Louisville on the 1st of October, 1866. The annual Reports of the President, Directers, Secretary, and General Superintendent were read, adopted, and ordered to be printed. We have been favored with a copy of this report, from which we learn that the receipts from transportation, etc., during the year ending June 30, 1866, were:

	Memphis Branch.	Lebanon Branch.	Main Stem.
Passengers	$62,474 07	$64,616 38	$1,375,425 42
Freight	33,376 13	52,635 88	1,333,932 43
Express	5,279 26	1 905 79	114,069 49
Mails	3,772 49	2,137 80	36,848 70

Total Main Stem	$2,860,276 04
" Lebanon Branch	121,295 85
" Memphis Branch	104,901 95
" Bardstown Branch	19,593 50
Freight carried in the Company's service	10,162 75
Hire of cars from foreign roads, rents, and other sources	26,959 38

Total Main Stem and Branches, viz:

From passengers	$1,518,725 35	
" freight	1,426,890 44	
" express	121,192 56	
" mails	43,658 99	
" hire of cars, rents, etc	37,122 13	
		$3,143,189 47

And the expenses were:

Repairs of road	$339,279 14	
" bridges	24,700 09	
" buildings	34,738 11	
" cars	101,929 41

Reconstruction	47,018 79	
Improvement account	36,024 73	
General expenses	28,680 12	
Discount	2,042 19	
Miscellaneous	7,923 06	
		1,551,134 70

Net earnings (50.65 per cent.)	$1,592,054 77
Interest account	177,076 33
Balance	$1,414,978 44

The gross earnings, as given above, include $2,592 48, derived from rents and other sources, $360,290 14 from Government transportation, and $10,162 75 from transportation of material used in the company's service, and charged to operating and construction expenses—making a total of $373,045 37; leaving the revenue derived from general business $2,770,211 10.

The length of the Main Line is 185 miles; sidings 18.83 miles—total, 203.83 miles. Length of Lebanon Branch, 85 miles; sidings, 4.47 miles—total 89.47 miles. Length of Memphis Branch, 46 miles; sidings 2.96 miles—total, 48.96 miles. Length of Bardstown Branch 18 miles; sidings, 0.69 miles—total, 18.69 miles. Total length of road and branches, 360.95 miles; of which 334 miles are main lines, and 26.95 are sidings.

The results of the operation of the Main Stem and branches are shown separately in the annexed statement:

	Main Stem.	Lebanon Branch.	Memphis Branch.	Bardstown Branch.	Total.
Gross earnings	$2,883,974 04	$121,673 85	$105,255 85	$19,593 50	$3,130,497 24
Operating expenses	1,289,755 97	116,927 36	115,350 82	29,100 55	1,551,134 70
Net earnings	$1,594,218 07	$4,746 49	.....	.....	$1,579,362 54
Loss	.....	.....	$10,094 97	$9,507 05	.....
Proportion of expenses to earnings	44.7 per ct.	96.1 per ct.	109.0 per ct.	148.0 pr ct.	49.5 per ct.

Loss	....	....	$0.19	$0.84	....
Earnings per mile of road	$16,589 04	$2,217 00	$2,218 17	$1,132 70	$10,336 07
Expense per mile of road	6,971 65	2,132 00	2,507 62	1,682 20	5,122 07
Net earnings per mile of road	$8,617 39	$85 00	.....	.....	$5,214 00
Loss	.....	.....	$2,119 45	$549 50	.....

Heretofore the Lebanon Branch has been operated at a loss; this is the first year in which the income exceeds the operating expenses, a result which is in a great measure owing to the extension of the road beyond Lebanon.

The following table shows the cost of road repairs per mile of road, and per revenue train mile, on the Main Stem, during the past seven years:

	Ordinary repairs.	Renewal of iron and ties.	Total per mile of road.	Per revenue train mile
1859–'60.	$470 73	$135 00	$605 73	26.03 cts.
1860–'61.	339 54	48 93	388 47	14.84
1861–'62.	321 28	219 78	541 06	38.18
1862–'63.	382 29	389 56	771 85	38.30
1863–'64.	616 94	2,547 12	3,164 06	102.30
1864–'65.	1,012 28	2,782 03	3,794 31	99.08
1865–'66.	708 98	628 03	1,337 01	28.10
Average..	$550 29	964 35	1,514 64	49.54 cts.

An account has been taken of the old iron now on hand (2,980 tons), and credit has been given to road repairs for all that had not heretofore been credited, making the average cost of road repairs per year for the last seven years, as shown by the above table, $1,514 64 per mile of road, and 45½ cents per mile of revenue train.

During the past year 1,716¼ tons of new iron, 362½ tons of re-rolled iron, and 105,619 cross-ties have been put in the track. There are now 84½ miles of road relaid with new iron, 27 miles of which were re-laid during the past year; 1.4 miles have received new iron for a second time.

The following table shows the quantity of new iron and ties put in the road since it was built:

	Number of cross ties.	Tons of new iron.	Tons of re-rolled iron.	Tons of repaired iron.
1858–'59	1,500	.....	.....	.....
1859–'60	16,672	109.0	.....	113.0
1860–'61	10,082	.....	.....	516.0
1861–'62	27,752	463.0	32.50	143.5
1862–'63	16,871	433.0	95.25	558.5
1863–'64	96,709	2,936.5	471.10	1,104.0
1864–'65	112,179	2,268.0	491.05	1,000.0
1865–'66	105,619	1,716.4	462.17	687.0
Total	387,384	7,925.9	1,452.07	4,121.5

Estimating the quantity of iron required for the whole road at 16,050 tons, and the number of ties at 518,000, it will be seen from the above table that 56-100ths of the road has been relaid with new iron, and 78-100ths with new cross-ties.

The road bed and track are now in better condition than at any previous time. The expenses of keeping the road in repair during the coming year will therefore be comparatively light.

The Lebanon Branch has been extended during the year to Crab Orchard; its total length is now 85 miles. On the 18th of September, 1865, it was opened for business to Brumfield, 16.5 miles from Lebanon; on the 19th of February, 1866, to Parksville, 21.8 miles; on the 9th of April to Danville, 28.5 miles; on the 17th of May to Stanford, 36.5 miles, and on the 1st of July to Crab Orchard, 48 miles. The average number of miles operated during the year beyond Lebanon was 17.55, being 54.55 miles of the entire Branch. Although the net earnings of this branch amount only to $4,746 49, the additional business contributed by it to the Main Stem must not be overlooked. According to tables which accompany the Report, the earnings for freight received and forwarded at stations on the branch were $101,205 64; of which only $52,635 88 are due the branch—leaving $48,569 76 as earnings of the Main Stem from business which originated on the the branch. The passenger earnings of the Lebanon Branch were $1,258 per mile. The trains of this branch pass over 29.7 miles of the Main Stem, increasing the receipts of the Main Stem, at the same rate, by $37,362 60—making a total of $85,932 36—of which 55.3 per cent., or $47,520 59, is profit, making the total net revenue derived from the branch $52,266 08, or 3½ per cent. of the cost of the road. It is believed that the coming year will show better results. The cost of repair and renewals of this branch during the year was $922.77 per mile, or 90.70 cents per revenue train mile; 10,002 cross-ties, 212 tons of new iron and 76 tons of repaired iron have been used in the track this year. There have been used since the completion of the road 76.225 cross-ties, 430.25 tons new iron, and 173.5 tons of repaired iron.

The cost of the Lebanon Branch Extension to Crab Orchard, which is not included in the annexed statement, is given at $1,550,202 83. The liabilities are:

Mortgage bonds	$600,000 00
City of Louisville bonds borrowed..	600,000 00
Due Main Stem	337,106 21
Due sundry contractors	13,096 62
Total, as above	$1,550,202 83

The earnings of the Memphis Branch were $10,094 97 less than the operating expenses; the same arguments, however, which were adduced in the case of the Lebanon Branch are applicable to this branch also. The freight business alone amounted to $133,163 41, of which only $33,376 13 were due the branch, leaving $99,787 28, as earnings from freight on the Main Stem which came from the branch, of which $53,484 66 were net revenue. The cost of repair on the Memphis Branch per mile of road has been $885.97; and per revenue train mile 76.30 cents, 16,743 new ties were put in the track, and at least 30,000 more will be required during the coming year, 20 tons of new iron have been used.

The operating expenses of the Bardstown Branch exceed the earnings $9,507 05. But the profits realized on the Main Stem from business originating on the branch amounted to $12,503 80. The passenger trains of this branch run over 22.1 miles of the Main Stem. The cost of repairs on the Bardstown Branch per mile of road has been $691.60; and per revenue train mile, 105.84 cents. This is nearly double the cost of repairs in the preceding year. Eighteen tons of iron and 3,634 new ties were put in the track. Extensive renewals of cross-ties will be required during the coming year.

From the above it will be seen that the branches of this road, although in themselves not a paying investment, are profitable as feeders to the Main Stem.

The Memphis, Clarksville and Louisville railroad, from State Line to Clarksville, Tenn., was operated by the L. & N. R. R. Co. until November 27, 1865, when it passed into the hands a receiver appointed by the Governor of Tennessee. Since that time the trains of this company have run only to State Line. The earnings of the road were $13,875 82; and the expenditures $5,925 27—leaving $7,950 55, which deducted from amount due L. & N. R. R. Co., July 1, 1865, ($14,008 51) leaves a balance still due the company of $6,059 96. This is the result of four years' operations.

In the Annual Report of 1864–65, the bonded debt of the company was stated at $3,297,000, exclusive of debt due State of Tennessee. In the present Report that debt is stated at $3,105,000; $192,000 of the debt having been redeemed out of the earnings during the year. The monthly earnings from passengers and freight for the first six months were $1,976,189 33, and for the last six months $964,426 46, exhibiting a decrease of $1,011,762 87. The gross earnings for the year were $3,143,189 47, and the running expenses, $1,551,134 70, being 49.35 per cent. of the earnings. The President, in his report, says:

The first six months' receipts were greatly influenced by the transportation of Government troops and freights. The last six months but little business was done for the Government, which brings the receipts of the road very near what they may be expected hereafter. It is estimated they will not be less than an average of $150,000 per month, and that the expenses of operating will be about 50 per cent. of the earnings, which would give a clear profit of $900,000. This would allow a dividend to the stockholders of 4 per cent. each six months, pay the Sinking Fund the required $400,000 to pay interest and redeem $200,000 of the bonded debt, and something for the completion of the road.

The Superintendent's Report estimates the amount required fully to complete the road at $380,506 82, of which arching the tunnels, double track from Nashville to Edgefield Junction, and depot at Louisville may be postponed for the pre-

sent, leaving $204,296 52 of work that remains to be done; $100,000 of which he recommends be done during the coming year. It also appears from the Superintendent's Report that $36,024 73, under the head of "Improvement Account," was expended during the year, and charged to operating expenses. Also, that $47,018 79 was expended for repairing damage done by Confederate forces during the war, and that the estimated cost of the remaining work of that kind to be done after July 1, 1866, is $53,900. The amount expended prior to July 1, 1865, was $588,593 60; and the total damage sustained, $689,512 39.

In the Report for 1864–65 the condition of the Sinking Fund is stated, with the application of the fund to the date of the report; also, the stock and stock liabilities and bonded debt of the company, exclusive of the debt to Tennessee, at $8,824,870. By the present Report, the stock, stock liabilities, and bonded debt is stated at $8,595,106. The interest falling due between June 30, 1865, and June 30, 1866, on the bonded debt, has been paid, and the bonded debt reduced $192,000, and the stock of the company $37,764.

The aggregate cost of the road to June 30, 1866, is $10,062,763 94. The difference between that and the stock, stock liabilities, and bonded debt of the company is $1,467,657 46, excluding the cost and debt of the Lebanon Branch extension.

In the month of November, 1865, a settlement was obtained of the debt due by the company to the State of Tennessee, of $560,500, and the interest which had accumulated during the war. This debt was discharged by the surrender of Tennessee State bonds and coupons. This left in the hands of the company 309 Tennessee bonds with unpaid coupons. The coupons were subsequently capitalized, making, with the original bonds, 402, which we now hold. The company had claims against the State for seizing the road in Tennessee, and engines, cars, and materials of the company, and for the use of the road operated by them, which the State authorities declined to allow.

The Lebanon Branch extension was completed to Crab Orchard, and the operation to that place commenced July 1, 1866. The cost to June 30th is $1,550,202 83; but something more will be added to it when all accounts are settled, and the track ballasted. In the prosecution of the work, the mortgage bonds of the company on the branch and extension, not being sold, were taken to account, and the company advanced the money. The same course was taken with the city bonds loaned the company and secured in the mortgage. The mortgage bonds to the amount of $31,000, and the city bonds to the amount of $219,000, have been sold, and the company, on June 30, 1866, held $569,000 of the mortgage bonds and $381,000 of the city bonds, and had advanced $337,106 21 over and above the bonds toward the work. The branch, as far as extended, has proved profitable, and is likely to prove more so, by adding to the business to and from Louisville to Lebanon.

The company, in order to get the railroads opened from Louisville to Memphis, agreed—to enable the Memphis, Clarksville and Louisville Railroad to rebuild the Tennessee River bridge, to repair the Cumberland River bridge, and put the track in running order, to advance on the Tennessee State bonds they obtained for that purpose, and to purchase some from the contractors to build the Tennessee River bridge, which they had to take. This has been done, and the bridges and road put in order, and is now being operated in connection with our branch and the Memphis and Ohio Railroad. The opening of the railroad communication with Memphis promises to be profitable to us by adding to our business both in passengers and freight. The terms on which the advance and purchase was made, are such that no material loss is to be apprehended, while we gain the advantage of having the route opened.

During the year much work has been done in restoring the damaged bridges and culverts, in ballasting the road, and keeping them in good condition to operate for the safety of passengers and freight and the rolling stock of the company. The road is in most excellent condition. It is intended to prosecute the work during the coming year, with the hope in another year we may close the construction accounts. It has been operated with but little damage to persons or property, and with great safety to the rolling stock of the company.

The engines have run in the service of the transportation department, on the Main Stem and branches, 842,850 miles; and in the service of the road department, inclusive of the mileage made on the M., C. & L. R. R., 117,097—making a total mileage of engines 959,947. The cost of repairs per mile run by engines has been 10.22 cents. Total cost per mile run by engines, 38.57 cents, against 42.06 cents in 1864–'65. Average cost per mile of all trains 41.77 cents.

The equipment of the road July 1, 1865, consisted of 60 locomotives; 42 passenger, 9 baggage, 8 express, 245 box, 98 rack, 17 gondola, 94 flat, 70 gravel and stone, 12 boarding and 1 wrecking car. There have been added during the year, 5 locomotives; 2 passenger 1 baggage, 63 box, 26 gondola, 25 flat, and 12 gravel and stone cars. There have been destroyed 2 passenger, 1 box and 1 boarding car—leaving on the road July 1, 1866, 65 locomotives; 44 passenger, 10 baggage, 8 express, 308 box, 98 rack, 43 gondola, 119 flat, 82 gravel and stone, 12 boarding and 1 wrecking car.

Number of local passengers carried northward, 183,447; do., carried southward 182,702—total local passengers 366,149. Number of through passengers carried northward, 115,053; do., carried southward 52,476—total through passengers 167,529—total local and through passengers 533,678. Mileage of through passengers or passengers carried one mile 30,992,865; do., local passengers 15,070,844—total mileage of local and through passengers 46,063,709. Miles traveled by each passenger 86.3; do., by local passengers 40.9. Tons of freight carried one mile north, 7,128,951; do., south, 19,831,898—total tons carried one mile, 26,960,849.

President.—JAMES GUTHRIE.

Directors.—H. D. Newcomb, James B. Wilder, R. A. Robinson, W. B. Hamilton, W. H. Smith, Russell Houston, Joseph C. Guild.

Secretary.—WILLIS RANNEY.

Gen'l Superintendent.—ALBERT FINK.

Wilmington, Charlotte & Rutherford R.R.

A meeting of the stockholders of this company was held at Wilmington, N. C., on the 25th ult. The report of the President and Directors, read to the meeting, makes a flattering exhibit of the earnings of their unfinished road. The road has never yet been able to reach either of its termini, or even the rich producing country which it was designed to develop. It starts on the bank of the river, and ends in the woods. It was left, by the results of the war, in a condition of almost total destruction. The little rolling stock which had escaped seizure or conflagration, was worn down by long and hard usage; and yet, without the slightest outside assistance, it is enabled to exhibit a clear profit of $59,000 from the operations of the past twelve months. The financial condition of the road, and the means recommended to raise the amount necessary to complete the work, is given in the report as follows:—

"The total amount of currency required will be as follows:—

To pay the debt due the State	$1,000,000
To pay all other debts	300,000
To complete the entire road	2,000,000
Making a total of	$3,300,000

Which we propose to raise by an issue of bonds to the amount of four millions of dollars, secured by a first and only mortgage upon a road, worth in present currency, over eight millions of dollars, and all of its rights, privileges and property. We have reason to believe that the company's bonds, thus secured, will readily sell for more than eighty cents on the dollar, payable in currency and material; and this would effect a saving of eight hundred thousand dollars to the company, and secure the early completion of the road. But to accomplish this, we must approach the capitalists of the North with perfectly clean hands. The State must therefore consent to assume the position of second mortgagee, until such time as the money can be realized to pay our indebtedness to her. We recommend that an application to this end be made to the next General Assembly."

☞ The bridge over the lake on the Connecticut and Passumpsic Rivers Railroad, north from Newport, is completed, and the gravel train now runs into Derby. The grading of the road is being finished, the iron for the track is bought, and the design of the company seems to be to complete the road to the Canada line as soon as possible.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of October, were:

ENTERED FOR CONSUMPTION.

	1865.	1866.
Manufactures of wool	$3,874,894	$2,494,378

Railroad Farm Mortgages.

In the Circuit Court of the United States for the Northern district of Illinois, Judge Drummond presiding, a case to test the validity of a mortgage given on a farm to secure the payment of a note given to the Racine and Mississippi Railroad Company, and by them used to raise means to assist in building the road, was recently tried before a jury. The verdict was in favor of the plaintiff, sustaining the validity of the mortgage. As this decision is the reverse of that given in the State courts, it will create some consternation among the farmers along the line of that road. We hope a test case will be taken to the Supreme Court of the United States, and have the question settled.—*Cin. Gazette.*

Commerce of New York.

The foreign imports at New York for the month of September, are officially stated as follows:

	1865.	1866.
Entered for consumpt'n.	$16,748,595	$13,228,489
Entered for warehousing	4,936,209	7,817,045
Free goods	795,468	840,082
Specie and bullion	194,224	5,193,473
Total entered at port	$22,674,496	$27,079,089
Withd'n from warehouse	8,042,603	11,091,194

The foreign imports at New York for nine months from January 1st, were:

	1865.	1866.
Entered for consumpt'n.	$80,953,556	$130,852,815
Do. for warehousing	58,146,535	93,668,192
Free goods	7,542,144	9,708,103
Specie and bullion	1,681,759	6,988,841
Total entered at port	$148,323,994	$241,217,951
Withd'n from wareh'se.	67,942,971	80,699,883

The revenue from Customs at New York for nine months has been as follows:

	1865.	1866.
In September	$12,929,615 64	$12,248,144 66
Previous 8 mos.	59,587,543 22	91,405,137 20
Total 9 months	$71,517,158 86	$103,653,281 86

The exports from New York to foreign ports in the month of September, were:

	1865.	1866.
Domestic produce	$12,768,484	$12,635,610
Foreign merchandise free	64,003	29,373
Do. dutiable	200,854	306,240
Specie and bullion	2,494,973	834,550
Total exports	$15,523,314	12,805,773
Do. exclusive of specie.	13,028,314	11,971,223

The exports from New York to foreign ports for the nine months from January 1st, have been:

	1865.	1866.
Domestic produce	$107,934,357	$141,593,226
Foreign mdse free	772,180	566,156
Do. dutiable	2,741,641	3,960,737
Specie and bullion	22,689,116	54,026,290
Total exports	$134,137,294	$200,146,409
Do. exclusive of specie.	111,448,178	146,120,119

Finances of Georgia.

The Governor of this State, in his recent annual message to the Legislature, states that when all of the bonds authorized by the act of the General Assembly, approved 12th of March, 1866, (except those intended for the assumption of the Federal tax,) shall have been disposed of as contemplated, the funded debt of the State will stand thus:

Bonds issued anterior to 1861, and not yet due	$2,676,500
Mortgage bonds issued in 1866, above mentioned	3,030,000
Bonds issued to the Atlantic and Gulf Railroad in 1856	134,500
Total	$5,840,000

Of this amount $176,500 will mature in 1868; $334,500 in 1869; $164,500 in 1870—making a total of $675,500. The latter sum, therefore, must be provided for within four years from this time. I recommend that the bonds before mentioned, prepared to meet the Federal tax, but as yet unexecuted, be placed at the disposal of the Governor, with authority to use them as occasion may be presented by sale or exchange if deemed advisable, in redemption of the bonds to mature in and before the year 1870. The public debt will not thus be increased in amount and may be somewhat diminished.

Bonds amounting to $154,000 will mature in 1871, and others amounting to $721,500 in 1872, the aggregate being $875,500 to be provided for in six years.

To meet this and subsequently accruing liabilities I recommend that the sum of $120,000 be annually set apart as a sinking fund accumulative.

If the first class of bonds (to mature within four years,) be provided for in the manner suggested, and the sinking fund proposed be allowed to accumulate until 1872, at 6 per cent. interest, it will be adequate to the payment of the bonds maturing in 1871 and 1872. But if in the then existing financial condition of the State, it should be deemed advisable by your successors to meet the liabilities of 1871 and 1872 by sale of the State stock in the Atlantic and Gulf Railroad, or by applying any other resource available at that time, and permit the sinking fund to go on accumulating, the entire debt of the State may, in the progress of time, be easily provided for, and her credit maintained.

Lawrence Railroad.

The object of the construction of this road is to make a continuous line from Pittsburg to Cleveland, *via* the New Castle and Beaver Valley Railroad. We learn from the Youngstown *Courier* that the work is being pushed forward vigorously, and that by the 1st of January next, the entire distance between that place and Pittsburg will be in running order. Between Lowell and Youngstown the road is divided into sections, and ten gangs of men are employed, numbering about two hundred and fifty laborers and seventy-five stone masons. From Lowell to the Mahoning River, the heavy grading is pretty much all done, and will require but a month or six weeks longer to complete it. Between the Mahoning and the junction with the A. & G. W. Railway, at Powers' coal shutes, a distance of nearly three-fourths of a mile the grading has been but recently commenced, and the work to be done is considerable. The road bridges three streams—Panther Run, Yellow Creek, Mahoning River, and the canal. The first two bridges are about completed; the span between the abutments at Panther Run is forty-five, and that of Yellow Creek one hundred feet. The Mahoning is crossed in two spans of one hundred and four feet each; the abutment on one side and the pier in the centre of the river, are finished, the abutment on the other side will require a week or ten days yet to complete it. The timbers are framed and ready to be put in position as soon as the masons have finished their work. About one and a half miles of the road, near Lowell, is ready for the track; the laying of which was to have begun about the 1st inst. We learn that arrangements have been made to run two through express trains daily, each way, between Cleveland and Pittsburg; and between Youngstown and Cleveland, one, or perhaps both trains already running, will be continued for local accommodation.

☞ The track on the Richmond and York River Railroad has been laid as far as Chickahominy Bridge, twelve miles from Richmond. The work on the bridge at the White House is progressing rapidly. The Richmond *Dispatch* says that the contractor for the work of rebuilding the road is manufacturing his own construction cars in that city, instead of bringing them from the North. He expects to finish the road this year.

Saturday, November 10, 1866.

Stock Exchange and Money Market.

There has been a rather more urgent inquiry for Money, for speculative use, chiefly at the Stock Boards, since our last, and on miscellaneous collaterals, lenders have been exacting firmer rates. But on Government securities, an ample supply has been available on the basis of about previous terms, while the demand from the leading dealers in the public funds, though fair, has not been active. The rates on call loans have been from 5@6 per cent on miscellaneous stocks, and 3@4, chiefly 4 per cent., on national bonds and notes. Very respectable sums have been invested in the Government gold-bearing stock, especially the new issue of the Five-Twenties of 1865, as affording the most secure and lucrative temporary employment for idle balances, pending the revival of activity in general business, which is now extremely dull, in nearly all branches. Indeed the past week's trade was of the narrowest dimensions, as the business of electioneering monopolized an unusual share of the attention of bankers, brokers, and merchants, lessening the average attendance at the various commercial centres. Prime short date commercial paper has been in moderate supply and demand at 5@6 per cent. per annum. Less desirable grades have been in small favor, and very irregular in price. The banks show less disposition to give extended credits; indeed, they evince a commendable inclination to curtail the volume of accommodation to other than the most unexceptionable houses. Last week, the city banks reduced their loans $2,935,021, making a total contraction in this line of $7,345,361 in two weeks. They lost $3,074,083 of legal tender, part of which amount was doubtless in compound interest notes, and accounted for by conversions of these notes into the latest issue of Five-Twenty bonds. In their deposits, there was a gain of $1,001,123; and in their specie reserve, of $1,338,384, the latter due mainly to the disbursements of coin interest from the U. S. Sub-Treasury. Their circulation increased $222,-770. Altogether, the last weekly statement of the local banks, was regarded an encouraging one. The *pro rata* of lawful Money to Circulation and Deposits is 33 per cent. as against 33½ per cent. last week. The present surplus of lawful Money over the required legal average of 25 per cent, is $20,342,000. The city bank deposits are now $224,841,695, against $178,538,674 same time last year. Their legal tender reserve amounts to $74,990,842, against $47,778,719 same time last year. Their circulation now stands at $30,466,207, against $13,289,381 same time last year. The loans are now $271,790,435, against $220,124,961 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $126,972,408 a day, against a daily average of $127,044,006 the preceding week; and $137,-453,666 the week ending with Oct. 20. The current week's exchanges average about $143,000,000 a day. The exchanges at the Clearing House on Monday, Nov. 5, were unprecedentedly large, having amounted to $167,000,000.

National Bank notes to the amount of $518,-165, were issued last week, making the total issue to 1,662 banks thus far $295,354,854, against $282,-555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $338,-690,650; and for the public deposits, $39,288,950 —making a total of $377,979,600. The Treasury Department, last week, destroyed $262,300 of worn and mutilated fractional currency, and issued $517,689 worth of new.

The following will be of interest to those who have monetary matters with the Government: The First Auditor audits court and marshal accounts; Second Auditor, armor accounts, pensions, bounties, &c.; Third Auditor, quartermasters' and commissary accounts, and all claims arising under those departments; Fourth Auditor, naval accounts, prize money, &c.; Fifth Auditor, foreign accounts, ministers, consuls; Sixth Auditor, post office accounts.

The U. S. Sub-Treasury receipts, week ending with Nov. 3, were $20,133,229, including $2,262,-775 from customs duties; payments, $34,527,538; balance at the close of the week, $86,380,713. against $100,784,027 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $5,191,475, and payments, $6,-066,915. Tuesday, receipts, $17,209,812, and payments, $16,527,042. The balance at the close of

business on Tuesday stood at $86,197,048 against $102,461,766, a week ago. The receipts of the U. S. Sub-Treasury, Philadelphia, during October, were $10,676,690; payments, $11,528,425; balance, at the close of the month, $11,214,596.

Gold ranged during the week from 146½ to 148⅞ to 147, the latter being the closing rate, on a dull and heavy market. The speculative element has been less rampant, in view of the very liberal coin-interest disbursements of the Treasury Department, and the falling off in the Customs demand. There has been a heavier export movement, partly accounted for by shipments on account of November coin-interest due foreign holders of our gold-bearing public funds. There have, however, been considerable imports of specie from Europe, though no fresh arrival from California. The total imports of specie from Europe, since January 1, have been $8,461,738. The customs demand for Gold last week, averaged $377,129 a day; thus far, this week, it has been equal to $317,855 a day, or equal to a weekly aggregate of $1,907,130. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $69,489, and thus far this week $76,902. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $117,353,333, against $86,049,042 same time last year. The total receipts of California gold at this port since Jan. 1, have been $36,616,385, against $16,209,234 same time last year, showing an increase, in 1866, of $20,407,151. The exports of specie from this port, last week, were $974,944, making the total outflow of specie from the port, since Jan. 1, $55,585,777, against $25,288,218 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $8,285,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $40,309,710, against $34,050,120 same time last year. The specie exports from San Francisco from Jan. 1, to Oct. 5, reached $35,041,896, against $34,625,110 same time last year.

Government revenues increased considerably last week. Excises, yielded, $7,115,442, against $3,000,000 the preceding week; customs at the port of New York, $2,262,775 and at the outports, at least $800,000 (in coin) more, making the grand total income for the week equal to about $11,633,035 in currency, against disbursements of $4,668,806 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $131,000,000, or equal to an average of more than seven millions a week, which would give a yearly aggregate of over three hundred and sixty five millions.

Foreign exchange has been in more liberal supply, in view of the increased exports of domestic produce, especially of cotton, and the steady outflow of U. S. securities. The prices of prime bills have accordingly yielded a fraction, and at the close, the tendency was decidedly in favor of purchasers. Bankers' 60 day bills on London closed at 109@109⅜, and on Paris to 5.18¾@5.12½; sight bills on London to 110@110¼; and on Paris to 5.15@5.10. The offerings of produce bills are rather more extensive. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,093,780, against $6,608,467 same week last year. The exports since January 1, have been to the value of $161,362,447, against $139,400,176 same time last year.

Government securities have been in decidedly more active investment demand, since our last, and there has been a steady appreciation of the gold bearing bonds, the offerings of which have been unusually moderate. The Sixes of 1881, and the Five-twenties of 1862 have been positively scarce in the open market. The German houses have been in eager quest of the latter at the ruling figures, but have not been very successful in their hunt for round lots. The Five-twenties of 1865 have been in great favor with home buyers, especially the later issue (July and January coupon,) which have been marketed at rapidly advancing prices, as promptly as they were issued to the dealers by the department, in exchange for and redemption of the short date obligations of the Government, more particularly the first series of Seven-Thirties, and the earlier issues of the compound interest notes, all of which will mature in the course of the coming Summer or early autumn, and which Secretary McCulloch is making strenuous and commendable effort—thus far with encouraging success—to fund in advance of maturity, on terms advantageous alike to the Government and its creditors. U. S. sixes of 1867 closed on Wednesday at 140½; U. S. sixes of 1868, at 137½; U. S. sixes of 1881 114½@114¾; U. S. Five-twenties of 1862 at 110½, ex-coupon; U. S. Five-twenties of 1865 at 107¾@108; U. S. Five-twenties of 1866, 110¼@110⅝; U. S. Ten-forties at 100⅛@100⅝, and U. S. Seven-thirties at 106@108¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116⅞	May, 1865	112
July, 1864	116⅝	August, 1865	110¾
August, 1864	115⅞	September, 1865	110¼
October, 1864	115⅜	October, 1865	109¾
December, 1864	113⅞		

There has been a less buoyant movement in railway and miscellaneous share propefty, owing in part to the interference of an unusually exciting election, and in part to the apprehensions of an adverse influence to result from unfavorable changes in the Money Market. On Wednesday, however, there was a more confident feeling, fostered by the steadiness of the market, in the face of an advance in the price of money accommodation to the Stock houses. At the close, there was a renewed disposition to purchuse for a rise, and the tendency of the leading stocks was upward.

General business was very injuriously affected by the electioneering excitement of the week. There were less firmness and buoyancy in domestic produce, especially in flour, grain and pork, the speculation in which has partly collapsed. In pork, especially, there has been a bad break equal to $8 per bbl., since the 31st ult., the market closing very heavily. In cotton, transactions have been on a restricted scale, in the face of liberal receipts, and accumulating supplies. The market closed slightly in favor of purchasers, the closing rates for Middlings being from 38@41 cents per lb. The receipts at the port this week, have averaged over 3,200 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 118,654 bales, against exports of 39,461 bales. Since Jan. 1, there have been received here 482,563 bales, and exported hence 327,767 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 156,000 bales against 365,000 bales same time last year; exports, 63,000 bales, against 166,000 bales same time last year, estimated stock at latest dates, 270,000 bales, against 377,000 bales same time last year. There has been no considerable movement in foreign merchandise, the market closing heavily and irregularly therefor. The total imports of foreign dry goods, last week, were $1,339,840, and the total amount marketed $1,138,151. The value of foreign merchandise imported last week, was $2,607,216—making the grand total specie value of last week's imports of dry goods and merchandise, $3,947,056, and since January 1, $257,137,710, against $173,570,209 same time last year. The freight market continues quiet, yet steady with 518 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 23.	Oct. 27.	Nov. 6.
Consols	—@89½	89½	89½

Collins Iron.

We invite attention to the advertisement of the COLLINS IRON COMPANY, in another column. This is a very superior Charcoal Pig Iron, adapted to Car Wheels, Chilled Rolls, Malleable purposes, Ordnance, and other purposes for which an extra quality of Iron is required. It is also admirably adapted for fine Wire and Horse Nails, when worked into Rods. We desire to call particular attention to the comparative statement of results given in the advertisement of the various experiments of Prof. Walter R. Johnson, on the tensity of bar iron, from localities both at home and abroad. The Collins Iron Works are located near Marquette, on Lake Superior. The office of the Company is at 48 Pine street, New York. Address C. A. Trowbridge, Secretary and General Agent.

San Francisco Central Pacific Railroad.

The object of this company is the construction of a railroad from Benicia to Sacramento. We learn that $110,000 have been subscribed to the capital stock, and that the company propose to commence operations immediately. As soon as the surveys can be completed between Benicia and Fairfield, the grading will be commenced. Fairfield is the county seat of Solano County. The company was organized on the 29th of September by the election of the following Board of Directors to serve during the ensuing year: Jabez Hatch, E. Danforth, C. B. Houghton, L. B. Mizner, Jno. Ruegar, C. J. Platt, Benicia; W. S. Watson, Stockton; S. C. Hastings, W. F. Swasey, San Francisco; Thomas A. Brown, Pane Shirley, Martinez. At a subsequent meeting of the board, L. B. Mizner was elected President; Jabez Hatch, Treasurer; S. C. Gray, Secretary; W. S. Watson, Chief Engineer.

The Atchison and Pike's Peak Railroad.

The Secretary of the Interior has received from the President of the Atchison and Pike's Peak Railroad Company an affidavit showing the completion of the second section of twenty miles of said road. The Government commissioners will, probably, within a few days, proceed to the lines of the road to examine the section.

☞ It is proposed to build a railroad from Shelburne Falls to Wilmington, Vt., connecting the new line to New Haven with the Western Vermont line, thus making the most direct route to the Sound. A meeting of those interested in the scheme will be held at Shelburne Falls on the 9th.

☞ A Troy paper states that the Susquehanna Railroad is to be extended to Troy *via* Schenectady, and that this will make a continuous line for the transportation of coal from the carboniferous regions of Pennsylvania to Montreal.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Nov. 2d, 1866, were $70,066 67
Corresponding week of 1865 ..... 80,851 88

Decrease $10,785 21

The earnings of the Grand Trunk Railway of Canada for the week ending Oct. 27th, 1866 were $150,873 00
Corresponding week of previous year.. 147,393 00

Increase $3,480 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Oct., 1866.... $39,568 00
Corresponding week previous year.... 40,032 50

Decrease $464 50

The earnings of the Western Union Railroad for the week ending Oct. 31, 1866 .... $33,690 59
Corresponding week previous year.... 24,455 50

Decrease $9,235 09

The earnings of the Chicago and Great Eastern Railway for 4th week in Oct. were..... $38,408 76
Same period last year 32,516 70

Increase in 1866. ..... $5,892 06

The earnings of the Chicago and Northwestern Railway for the fourth week in Oct., 1866, were $383,972 00
Corresponding week of previous year.. 303,960 00

Increase..... $80,012 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in Oct., 1866. were $95,495 00
Corresponding week of previous year.. 76,771 00

Increase..... $18,724 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Oct, 1866, were $169,766 00
Corresponding week of 1865 ..... 164,193 00

Decrease $5,573 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Oct. 25th, 1866, were $45,697 00
Corresponding week of 1865..... 44,401 00

Increase..... $1,296 00

The receipts of the Susquehanna Canal Company for week ending Oct. 29th, were $8,998 10; previously this season, $183,520 17—making a total of $192,518 27.

New Haven and Derby Railroad.

A charter for a new railroad connecting New Haven with Derby, Ct., has been granted by the Legislature of that State, by the provisions of which $100,000 must be expended on its construction before July next, on penalty of forfeiture. After much delay the enterprise has been started and subscription books opened, and there is now a fair prospect of the road being built. New Haven is taking great interest in the proposed road. Jas. Brewster, Esq., a prominent man, has offered a subscription, under certain conditions, of $10,000, and the business men of New Haven are expected to contribute to its support.

☞ Joseph S. Gitt, Esq., has been appointed Chief Engineer of the Western Maryland Railroad, vice Col. Taylor, resigned. The Hagerstown *Herald* says that Mr. Gitt "is engaged upon the work of locating the line. He has established the tunnel, and is now working in the direction of this place. It is supposed that he will have the survey completed as far as Smithsburg this week. When done on this side of the mountain he proposes to commence at the summit and locate the line to Mechanicstown."

Railway Statutes of New York.

We continue our digest of the miscellaneous sections of the statutes of this State relating to railroads, which are deemed to be of especial importance. Most of the Western States have modeled their railway system upon the statutes of this State, and the decisions of our Courts upon our statutes are therefore of value in other States. We begin with Chapter 282 of the laws of 1854.

Bell or Whistle—Failure to Sound—Penalties.—Section 7, of the act of 1854, chap. 282, provides that every locomotive run on any railroad shall be provided with a bell or steam whistle, which shall be sounded 80 rods from the place where such railroad crosses any public road on the same level. Any corporation violating this provision is subject to a fine of twenty dollars.

Engineers violating it are liable to a fine of fifty dollars, or imprisonment in county jail not exceeding sixty days.

Fences—Gates and Cattle Guards—Damages.—Section 8, of the same act, provides that every railroad corporation shall erect and maintain fences on the sides of their roads, with gates at farm crossings, and cattle guards at all road crossings. So long as such fences and cattle guards shall not be made, such corporation shall be liable for all damages to cattle, horses, sheep, or hogs, which shall be done by the agents or servants of such corporation; after such fences and cattle guards are erected, such corporation shall not be liable for damages unless negligently or wilfully done. A sufficient post and wire fence of the requisite height shall be deemed a lawful fence, but no railroad corporation shall be required to erect fences, etc., where the same are not necessary to keep animals from adjoining lands off the track of such railroad.

Sale of Unclaimed Freight.—Section 10, of the same act, provides that freight which has remained unclaimed in the possession of the railroad company for one year, may be sold at auction upon a publication of four weeks before the time of sale, in the State newspaper, and in a newspaper published at or nearest the place at which such freight was to be left, and also at the place where such sale is to be made; such notice shall contain a description of the freight, the place where and the time when left, with the name of the owner or consignee when known.

Section 11, provides that perishable property may be sold at once, on giving the notice required in section 10.

Section 12, provides that the balance of the proceeds of such sale (after paying charges and expenses,) shall be retained for the owner or consignee of such freight, and refunded at any time within five years, on satisfactory proof of ownership.

Stealing Tickets—Forgery of Same—Penalties.—By Chapter 499 of the laws of 1855, it is provided that every person who shall be convicted of stealing, taking and carrying away any railroad passenger ticket or tickets, prepared for sale to passengers, previous to or after the sale thereof, being the personal property of any railroad company, or of any person or persons, shall be adjudged guilty of grand or petit larceny as prescribed in the next following section.

If the price or prices authorized to be charged for such ticket or tickets on a sale thereof, shall exceed the sum of twenty-five dollars, such price or prices shall be deemed the value of such ticket or tickets, and the offence of stealing, taking and carrying away the same, shall be adjudged grand larceny, and the person convicted of the same, shall be imprisoned in a State prison for a term not exceeding five years; but if such price or prices shall only amount to twenty-five dollars or under, the offence of stealing, taking and carrying away such ticket or tickets shall be adjudged to be petit larceny, and the person convicted of the same shall be punished by imprisonment in the county jail not exceeding six months, or by a fine not exceeding one hundred dollars, or by both such fine and imprisonment. (Sec. 2.)

Railroad passenger tickets of any railroad company, as well before the same shall have been issued to its receivers or other agents or not, are to be deemed railroad tickets within the meaning of this act. (Sec. 3.)

Every person who shall be convicted of having forged, counterfeited, or falsely altered any railroad ticket mentioned or referred to in either of the preceding sections of this act, or of having sold, exchanged or delivered for any consideration, any such forged or counterfeited railroad ticket, knowing the same to be forged or counterfeited, with intent to injure or defraud, or of having offered any such forged or counterfeited railroad ticket for sale, exchange or delivery for any consideration, with the like knowledge and intent, or of having received any such forged or counterfeited railroad ticket upon a sale, exchange or delivery for any consideration, shall be adjudged guilty of forgery in the third degree, and shall be punished in like manner as prescribed by law in cases of conviction or forgery in the third degree. (Sec. 4.)

Every person who shall have in his possession any such forged or counterfeited railroad ticket, as mentioned or referred to in the next preceding section, knowing the same to be forged, counterfeited or falsely altered, with intention to injure or defraud by uttering the same as true, or by causing the same to be uttered, or by the use of the same to procure a passage in the cars of the railroad company by which such ticket purports to have been issued, shall be subject to the punishment provided by law for forgery in the fourth degree. (Sec. 5.)

Extortion of Excessive Fare—Penalty.—By Chapter 185 of the laws of 1857, (§ 39) it is provided that any railroad company which shall ask and receive a greater rate of fare than that allowed by law, shall forfeit fifty dollars, which sum may be recovered, together with the excess so received by the party paying the same; but it shall be lawful and not construed as extortion, for any railroad company to take the legal rate of fare for one mile for any fractional distance less than a mile.

New York Central Railroad Ticket Offices.—Section 1, of Chapter 228 of the laws of 1857, pro-

vides that the New York Central Railroad Company shall keep its ticket offices open at every station on its road for at least one hour previous to the starting of each passenger train from such station; provided, that such offices shall not be required to be kept open between the hours of nine o'clock p. m., and five o'clock a. m., except at Albany, Schenectady, Utica, Syracuse, Rochester, Buffalo and Suspension Bridge.

Higher Rate for not Purchasing Ticket.—By § 2 of the same act, if any person shall, at any station where a ticket office is established and open, enter the cars of said company as a passenger thereon, without having first purchased a ticket for that purpose, it shall be lawful for said company to demand and receive from such person, a sum not exceeding five cents, in addition to the usual rate of fare for the distance such person may desire to be transported.

Sale of Unclaimed Freight or Baggage.—Every railroad company which shall have had unclaimed freight or baggage, not perishable, in its possession for the period of at least one year, may proceed and sell the same at public auction, after giving notice to that effect in the State paper once a week for not less than four weeks, and for a like period in a newspaper other than the State paper, published at the place designated for the sale, and also in one published in the City of New York, (said notice shall contain as near as practicable, a description of such freight or baggage, the place and time when left, together with the name of the owner of the freight or person to whom consigned, if the same be known.) All moneys arising from the sale of freight or baggage as aforesaid, after deducting therefrom charges and expenses for transportation, storage, advertising, commissions for selling the property, and the amount previously paid for the loss or non-delivery of freight or baggage, shall be deposited by the company making such sales accompanied with a report thereof, and proofs of advertisement, with the comptroller, for the benefit of the general fund of the State, and shall be held by him in trust for reclamation by the persons entitled, or who may become entitled to receive the same. No sale as herein provided, shall be served upon the comptroller for at least two weeks prior to the time designated for such sale. (Sec. 3, Chapter 440 of laws of 1857.)

In case such unclaimed freight or baggage shall, in its nature, be perishable, then the same may be sold as soon as it may be, at the best terms that can be obtained. (Sec. 4.)

Western (Mass.) Railroad.

This company commenced operating their double track between Springfield and Westfield on the 23d ult. Probably no road in the country is adding so rapidly to its rolling stock as the Western, the great thoroughfare for freight and travel between Boston and Albany and the West. New engines and new cars are constantly in process of construction, new tracks are being put down, new buildings are going up, and at all points on the road activity is the motto. The corporation now own 90 engines, between 2,000 and 3,000 freight besides a sufficient complement of passenger and baggage cars, some of them as fine as are in use on any other road. To accommodate the extra number of engines already purchased or now in the works, the corporation is erecting a fine new engine house, near the Connecticut River, between the old engine house and the Connecticut River Railroad shops. The corporation cannot get new engines as fast as it needs them, although sending in all directions.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Oct. 1, 1866.	Nov. 1, 1866.
Debt bearing int. in coin.	$1,310,065,941 80	$1,333,558,841 80
Debt bearing interest in currency..	930,930,190 00	882,408,440 00
Matured debt not presented	23,302,372 14	36,988,909 21
Debt bearing no interest.	437,252,205 33	428,680,775 33
Total...	$2,701,550,709 27	$2,681,636,966 34

Currency....	41,953,858 24	30,913,942 07
	$128,213,767 59	$130,326,960 62
Debt less cash in the Treasury.....	$2,573,336,941 68	$2,551,310,005 72

The total debt shows a decrease since the 1st of October of $19,913,742 93. The balance in the Treasury shows an increase, as compared with October 1st, of $2,113,193 03. Deducting the amount on hand from the aggregate debt, both on the 1st of October and the 1st of November, the decrease of debt would be $22,026,935 96. The total debt on the 31st of August, 1865, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August, 1865, and 1st of November, 1866, and the actual decrease in the Public Debt since that period has been $206,379,565 71.

Western Maryland Railroad.

The annual meeting of the stockholders of this company was held at Westminster, Md., on the 31st ult. The annual report of the directors, which was presented, shows the gross earnings of the road the past year to have been $110,785; gross receipts $81,931; leaving unrealized $28,855. There is an increase of earnings of $5,655, and an increase of expenses of $11,408. The report speaks of difficulties encountered in consequence of the high price of labor and materials, notwithstanding it shows a flattering condition of the company, and promising prospects for the future. It urges strongly the completion of the extension to Hagerstown, and the extension to the Potomac, at Williamsport, and also, when opportunity is offered, to push the work through to the Ohio River, and thereby secure an independent route to the great West. The delay in not pushing the extension to Hagerstown is shown to be in consequence of an injunction laid in the Superior Court of Baltimore, at the instance of Mayor Chapman, to prevent the contract from being given out. The difficulties are now obviated, and the work put under contract, to be commenced in a few days. An independent connection with Baltimore, either by the Gwynn's Falls or Canton route, is strongly urged as an absolute necessity. The reports of Mr. P. H. Irwin, Superintendent, and Mr. Boyle, Treasurer, were adopted, after which the following directors for the ensuing year were elected: John M. Stevenson, Gravilles Haines, David Seeler, Samuel H. Seigler, Jas. McDougal. Messrs. McCubbin and John W. Randolph are directors on the part of Baltimore, and are appointed by the city council. The President, Capt. Robert Irwin, announced his intention of retiring from the Board. An election for President will take place in Baltimore at the first meeting of the new Board, which will be held in a few days.

Interest and Dividends.

The Pennsylvania Railroad Company have declared a semi-annual dividend of four per cent. on the capital stock of the company, clear of National and State taxes, payable on and after November 30, 1866.

The Cleveland and Mahoning Railroad Company has declared a dividend of 4 per cent., free of Government tax, payable on the 10th inst.

The Hanover Branch (Pa.) Railroad Company has declared a dividend of 5 per cent.

The Nashua and Lowell Railroad Company have declared a dividend of four per cent.

The Flint and Holly Railroad Company of Michigan, a dividend of four per cent.

The Northern Central Railroad Company has declared a quarterly dividend of 2 per cent., clear of National and State taxes, payable on the 26th inst.

The transfer books of the New York Central Railroad Company will be closed at the close of business on Saturday, the tenth day of November instant, preparatory to the annual election for Directors of the company, appointed to be held on the twelfth day of December next, and will be re-opened on the morning of Thursday, the thirteenth day of December next.

☞ The Macon, Ga., *Telegraph*, referring to the completion of the Branch road, which connects the entire railroad system of Georgia with those of Florida, says—"Besides its convenience to the public, and especially to the planters of Florida, this new improvement is destined to advance greatly the interest of the Gulf road and the city of Savannah. It also completes the Atlantic and Gulf connection, from Savannah to St. Marks."

☞ The President of the Cincinnati and Fort Wayne Railroad, states in a recent report to the citizens of Fort Wayne, that about six hundred men are engaged on the grading between Richmond and Winchester, and that local subscriptions have been made sufficient to prepare the road for the iron thence to Bluffton.

☞ Only six miles of the Lawrence (Ohio) Railroad remain to be built to complete the connection between Pittsburg and Cleveland. The route is by the way of Youngstown and Lowell Furnace to a point on the New Castle and Beaver Valley Railway forty-seven miles from Pittsburg.

☞ The grading on the Sheboygan and Fond du Lac Railroad is completed three or four miles west from Glen Bulah, and will be finished to Marshfield before the close of the season.

☞ The Florida Branch of the Savannah, Albany and Gulf Railroad was opened to passengers on Monday last.

New Brunswick and Canada Railway.

A correspondent of the *Canadian News*, writing from St. Andrew's, N. B., on the proposed railway extension to the seaboard, says:—

The desirability of a railway to connect the cities of Montreal and Quebec with a seaport in British territory has long been felt by the leading public men of Canada.

We find that on the 19th December, 1835, the Legislative Council at Quebec passed the following resolution:—

"*Resolved*,—That a railroad between the port of St. Andrew, in the Bay of Fundy, and the port of Quebec would greatly diminish the disadvantages under which the province labors from the severity of its climate, and the consequent periodical interruption of the navigation of the River St. Lawrence."

This resolution, with others, received the cordial support of the Governments both of Canada and New Brunswick.

All the reasons then advanced for undertaking the enterprise, together with others developed by subsequent events, now exist in still greater force by reason of the unparalleled progress since made by railways both in the provinces and the adjacent States.

"To secure these unlimited and legitimate resources," says another resolution, "it will be only necessary to construct a railroad from Quebec and Montreal to Lake Huron, in connection with that from St. Andrew's to Quebec."

Not only has the extension to Lake Huron been completed, but railway communication exists also with Chicago, the greatest grain market in the world, and the entire railroad system of the western states. In fact, our railways now constructed, together with the St. Lawrence, are as important to the entire north-west as is the Mississippi to the south-western states of the American union.

In furtherance of this design, the Grank Trunk is already extended easterly to Riviere du Loup, a distance of 114 miles, and the New Brunswick and Canada is now open from St. Andrew's (88 miles) to Woodstock on the River St. John, the natural highway of New Brunswick. During August the traffic receipts of this last mentioned portion exceeds those of August of the previous year (1865) by nearly $2,000—being in the ratio of 3 to 2, and might have been double had there been sufficient rolling-stock. Let it be borne in mind that this length of 88 miles reaches only to the verge of an agricultural and well-timbered country. The construction of the remaining portion of 188 miles would form the connecting link between the navigation of the River St. Lawrence and St. John, passing through one of the finest timbered regions in the world, abounding in mineral wealth, which by geological examination is constantly being developed.

In the annual report of the Ottawa Board of Trade by the Hon. Mr. Skead, it appears that Canada possesses a tract of timbered country extending through 5 degrees of latitude and 11 of longitude, yielding annually from 70 to 80 millions of cubic feet of timber and employing 10,000 men. By statistics he shows the agricultural products have during the last seven years greatly exceeded the products of the forest.

A railway, to be of any use for the transportation of all this produce, to be sent during the suspension of navigation, should be short and direct as possible. At $30,000 per mile, which, it is believed, is a fair average, this connecting link of 188 miles would cost about five and a half million dollars, a little more than one-fourth of the proposed Imperial subsidy for the Intercolonial. With the port of St. Andrew's accessible by rail, what sane man would think of sending his produce to Halifax through a country yielding in abundance similar articles for exportation, at a ruinous competition and disparity of distance?

United by rail with the lower provinces, Upper Canada becomes to them what the western states are to the northern and eastern, receiving in return their fish and articles of manufacture. As a matter of economy, heavy articles of merchandise will seek the shortest possible conveyance by land. With increased facilities for transportation, an immense trade would spring up along the frontier of Canada, New Brunswick, and Maine.

This line once completed, or vigorously commenced with a certainty of completion, western extension would become a *sine qua non* to the merchants of St. John, in order to retain a portion of the up-river trade.

Eastern extension to Truro is common to any route that may be selected, and is sure to be built.

Quebec then becomes connected not only with Halifax, but also with St. John, the commercial emporium of New Brunswick, and with St. Andrew's with much less cost than by direct line with Halifax alone.

Illinois Central Railroad.

The statement of this Company for the month ending October 31, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	24,842.67 for	$233,981 74
Acres Int. Fund Lands sold	484.08 for	6,591 79
Acres Free Lands sold	1,718.33 for	21,261 00
Total sales during month of Oct., 1866	27,045.08 for	$261,834 53
To which add Town Lot Sales		199 00
Total of all		$262,033 53
Cash collected in Sept		$276,742 88

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$163,167 34
do.	Freight	415,669 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	50,000 00
Total Receipts in Oct., 1866		$639,194 67
Total Receipts in Oct., 1865		$621,848 89

Dorchester and Delaware Railroad.

At a recent meeting of the President and Directors of this company, held at Cambridge, Md., the several routes surveyed by Mr. Hessey, Engineer in charge, were presented. The route by Aireys, Salem, Donohoe's, Federalsburg and Horsey's to Bridgeville—its entire length being thirty-eight miles—has been the favorite route of the company. But the amount of subscription to the stock failing to justify the board in adopting it, they finally determined upon the route last surveyed, which runs north of the route formerly laid out from Horsey's and Bridgeville to Federalsburg, crossing the Nanticoke at M. L. Smith's residence; thence to Yellow Bridge; thence a little west of Williamsburg—being a straight line from Bridgeville; thence within three-quarters of a mile of Washington and a half mile of New Market. The engineer reports that with twenty-five thousand dollars more, the road from Bridgeville to New Market can be completed by next peach season.

☞ The million dollars of bonds of the American Dock and Improvement Company, guarantied by the Central Railroad Company of New Jersey, were taken at prices ranging from 97½@100 per cent. The amount of the bids reached nearly $2,500,000.

☞ The ceremony of breaking ground at Battle Creek, Mich., for the Battle Creek and Lansing Railroad, took place on the 29th ult. The work of grading the line will be at once pushed forward.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st Oct., inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu
1865	650,700	6,707,800	14,397,200	2,864,900
1866	213,700	3,893,900	22,135,900	3,210,600
Dec.	437,000	2,813,900	*7,738,700	345,700

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 999,780 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of Oct., in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1.
Flour, bbls	920,100	650,700	213,700
Wheat, bush	13,026,000	6,707,800	3,893,900
Corn, bush	8,930,700	14,397,200	22,136,900
Barley, bush	1,837,100	2,364,900	3,210,600
Oats, bush	8,872,900	8,071,480	7,786,400
Rye, bush	503,200	612,600	857,500
Malt, bush	.....	444,900	368,900
Beef, bbls	6,850	8,563	100
Pork, bbls	56,500	15,050	18
Bacon, lbs	561,500	1,273,100	.....
Butter, lbs	404,800	366,400	410,600
Lard, lbs	1,896,300	1,991,400	70,400
Cheese, lbs	1,393,600	9,915,000	3,818,800
Wool	1,101,760	527,600	441,600

Chartiers Valley Railroad.

The Chartiers Valley Railroad, extending from the point of Junction with the Pittsburgh and Steubenville Railroad, to the borough of Washington, in Washington county, Pa., with all its privileges, appurtenances, etc., together with all the rights and benefits of the agreement of said company with the Pittsburgh and Steubenville Railroad Company, was sold by auction on the 30th ult., under foreclosure of mortgage, and purchased by the Pennsylvania Railroad Company for $45,100. According to the terms of the sale, $21,500 of the purchase money is to be paid in cash at the time of sale, and if bought by a bondholder secured by the mortgage under which the sale was effected, the balance of the amount may be liquidated by the transfer of bonds, interest warrants or coupons.

The Charties Valley Railroad has been graded its entire length, about twenty-five miles, and is in such condition that a few weeks' labor would prepare it for the reception of the rails. It is estimated that less than half a million of dollars would place the road in first-class running order. It traverses a rich agricultural and mineral region, inhabited by an industrious, thrifty and progressive people, and when finished and in complete running order would do a large and lucrative passenger and freight traffic. The opening up of new coal mines along its line would doubtless alone furnish business enough to pay a good per centage on its cost of construction.

☞ The Delaware and Eastern Shore Railroad was opened for through travel on the 5th inst. An express train leaves Wilmington, Del., at 12 o'clock each night, passing through Princess Anne, and arriving at Crisfield (Somer's Cove,) at 7 A. M., connecting with steamers to Norfolk and all points South.

Richmond and York River Railroad.

The work on the York River Railroad, which had been interrupted by the non-arrival of a steamer loaded with rails, has been resumed. The track has been completed to the Chickahominy, and the bridge on that stream is almost finished, as is also the one over the Pamunkey River at the White House. The contract calls for the completion of the road by the 12th of December; but owing to unforseen and unfavorable difficulties, it will not probably be ready for use to West Point before the 1st of January.

Valuation of Chicago.

Division.	Real.	Personal.	Total.
South.....	$749,200	$299,824	$1,049,024
West.....	172,577	33,875	206,452
North.....	488,124	55,463	463,587
Total.....	$1,329,901	$389,162	$1,719,063

This is about $8 57¾ for man, woman and child in the city, the population being 200,419.

☞ A new telegraph line is to be built between Pittsburg and Oil City by a company just organized under the title of the Merchants' National Telegraph Company.

☞ Joseph E. Sheffield, Esq., has been elected President, and A. L. Kidston Secretary of the Canal Railroad Company.

Collins Iron Company,

MANUFACTURERS OF

CHARCOAL PIG IRON,

At MARQUETTE, Michigan.

Numbers one and two are a soft "Gray Iron," strong in the Pig, and when "puddled" for Boiler Plate, Sheet Iron, or Merchant Bar, is equal to Swedes, Russia or Norway Irons.

Number Three, a fine close grain Iron, particularly adapted for "Malleable Castings." Numbers four and five, "Mottled" and "White," when mixed with the "Gray Iron," make superior Car Wheels.

TENSILE STRENGTH,

As Compared with other Irons.

FOSTER & WHITNEY, in their Geological Report, published in the United States Senate Documents, Special Session, March, 1851, page 80, say: "To show the comparative quality of this Iron, we give the results of the various experiments of Professor Walter R. Johnson, on the tensity of Bar Iron, from localities both at home and abroad.

TO CONTRATORS.

THE PLANS, Profiles and Estimates for the construction of Thirty Miles of the DETROIT AND HOWELL RAILROAD, between Plymouth and Howell, will be completed about the first of November next, and will be open to the examination of those proposing to contract, at the office of the Company at Plymouth Michigan, where proposals will be received for the construction of the earth work, timber work and fencing.

T. T. LYON, President.

Plymouth, Michigan, Oct., 15th, 1866.

CONTRACTORS, TAKE NOTICE.

THE PHILADELPHIA AND BALTIMORE CENTRAL RAILROAD COMPANY have extended the time to Saturday, November 10th, 1866, for receiving proposals for the Grading, Masonry and Bridge Superstructure and furnishing the Cross-Ties, and laying the track upon six miles of the said Company's road, extending from near the Rising Sun village, Cecil county, Md., to the Susquehanna river.

Plans and Specifications of the work can be examined at the office of the Engineer, JOHN M. HOOD, at Port Deposit, Cecil county, Md., and a guide will be furnished to show the work to those desiring to look at the same.

The Engineer purposes to be at the Rising Sun village, on Tuesday, November 6th, and Friday, November 9th.

JOSEPH HUDDELL, Secretary and Treasurer.

Philadelphia, Oct. 22d, 1866.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS, directed to the undersigned, and endorsed "Proposals," will be received at the office of J. W. Allen, in Bordentown, New Jersey, until Wednesday night, the 14th November prox., for grading and masonry on the PEMBERTON AND HIGHTSTOWN RAILROAD. Profiles, specifications and blanks will be shown at Mr. Allen's office on and after the 29th inst.

ASHBEL WELCH, Engineer P. & H. R. R.

October 19th, 1866. 3t42

TO CONTRACTORS.

SEALED Proposals will be received by the undersigned until Saturday, November 17th, for the Graduation, Bridge and Culvert Masonry on forty-three miles of the Lebanon Branch Extension of the Louisville and Nashville Railroad, between Crab Orchard, in Lincoln county, and London, in Laurel county, Kentucky.

The work is of the very heaviest character of Earth and Rock Cuttings Tunneling and Masonry, in value about one million of dollars.

Specifications and profiles can be seen at the Company's Office, in Crab Orchard, on and after November 1st.

GEORGE MACLEOD, Chief Engineer.

American Railroad Journal.

New York, Saturday, November 17, 1866.

The New Orleans, Opelousas and Great Western Railroad.

The commercial community now turn their eyes toward the Opelousas Railroad and its branches radiating out into Western Louisiana and Southeastern Texas for a complete system of inter-communication with the sugar, cotton, grain and grazing lands of our great border State.

The New Orleans, Opelousas and Great Western Railroad was chartered to be built from Algiers—opposite New Orleans—by way of Bayou Lafourche, Berwick Bay, Pattersonville, Franklin, New Iberia, Lafayette and Opelousas, to the Sabine River, or eastern boundary of Texas.

The line has been located throughout, and this location fixed by act of the Legislature. The total length of the road, as projected and located is 258 miles. The projected terminus is at Thompson's Bluff, on the Sabine River, about 4½ miles below the point where the 31st parallel of latitude crosses the Sabine.

The first division of 80 miles, extending to Berwick Bay—Brashear City—was completed in 1857, and has been regularly operated since. The first 24 miles extends up the right bank of the Mississippi River, to Boutte station, in the parish of St. Charles; thence the line follows a ridge of high and fertile land—now settled throughout—for 8 miles to the Bayou Des Allemands, the natural drain of the basin between the Mississippi and Bayou Lafourche. From Des Allemands, at the 32d mile, the line crosses a marshy prairie, containing islands of cypress timber, for 6 miles, and then reaches the high lands of Bayou Lafourche. At Raceland station, 40 miles from Algiers, a branch track of 2 miles in length extends to the bank of the Lafourche. Thence the line runs up the left bank of the Bayou Lafourche 12 miles further, to the Lafourche crossing, 52 miles. Between the Lafourche and Terrebonne the line crosses the Lafourche and Devil's Swamp and the Bayou L'Eau Bleueridge. From Terrebonne station, lines of omnibuses or carriages run to Thibodaux and Houma. After leaving the Terrebonne highlands, the line crosses a cypress swamp 4 miles wide to the Chacahoula ridge; follows said ridge about 2 miles; crosses the Tiger swamp and reaches the Bayou Black at Tigerville. The Bayou Black is navigable for steamboats and schooners thence to the Gulf at Atchafalaya Bay. From Tigerville the line runs down the right bank of the Black about 8 miles, crosses the L'Ourse ridge and the Bœuf Swamp, 3 miles wide, to the Bayou Bœuf, 73 miles.

From the Bœuf the line, after crossing a swamp, follows the Tiger Island high lands to Brashear, 80 miles.

At Brashear the company have extensive cattle pens, warehouses and wharves, which, fortunately, were not burned during the war.

Extensive repairs have been made here, amounting almost to the entire rebuilding of the cattle pens and wharves, since the road was returned to the company.

The railroad company have, at their own expense, cleared out the channel in Atchafalaya Bay, (which was filled with live oak logs in 1862 by the Confederate military authorities and the parish of St. Mary) at a cost of several thousand dollars. Nearly three thousand logs were fished up out of and removed from said channel.

Since the clearing out of the Atchafalaya Bay channel, the steamship line from Berwick Bay to Galveston has been re-established, and is now in successful operation, making three trips to Galveston and one to Sabine Pass, each way, weekly.

Quite a fleet of steamboats are running now from Berwick Bay up the Bayou Teche, carrying passengers, freight and cattle.

Before the war this railroad did a large and lucrative business with the populous and rich agricultural sections of country traversed by it. The Lafourche, Terrebonne, Black, Chacahoula, lower Bayou Black, L'Ourse, Bœuf and Teche constitute the best sugar lands in the State. There is hope that something like the old prosperity will soon revive, for even now business is improving, the gross receipts for passengers and freight being fully equal to those of 1860 and 1861.

The re-establishment of that old and favorite route by way of the railroad and Berwick Bay to Galveston and Indianola has given much satisfaction. Nearly all of the travel between New Orleans and Texas now takes this route. The time through, one day, is only about one-half of that by the river and Gulf.

Passengers going to Texas take the 7½ o'clock ferry boat from Jackson Square on Monday, Wednesday and Friday mornings for Galveston, and Sunday mornings for Sabine Pass. They leave Algiers at 8 o'clock and arrive at Brashear at 12, noon.

The steamship leaves immediately afterward and arrives in Galveston the next morning about 9 or 10 o'clock. In Galveston connection is made with the trains on the Galveston and Houston Railroad, so that passengers reach Houston the same day.

The N. O., O. and G. W. R. R. is a land grant road, and some 705,000 acres of land were selected, listed and approved to the company to aid in its construction. Owing to the war, the road was not completed within the specified time, and the grant lapsed on the 3d of June last, but it is confidently expected to be renewed at the next session of Congress. Similar grants were renewed, at the last session of Congress, in favor of railroads in Iowa.

The renewal of this grant will be but an act of justice, for a loss of five years' time was caused by the war. But for the war it is probable that the N. O., O. and G. W. R. R. would have been completed to the Sabine River before the expiration of the grant. The grading and preparation of the road bed for the track, from Berwick Bay

Efforts are now being made by the managers of the New Orleans and Texas Railroad Company to construct and complete as soon as possible, their road from New Iberia to Orange, on the Sabine River, the present terminus of the Texas and New Orleans Railroad, now built from Houston to Orange. This gap of 117 miles, across a level prairie country, can be soon built. Berwick Bay and New Iberia, 45 miles, already cleared, graded and ready for the track, could also be completed and put into operation in a short time.

The distance from New Orleans to Houston, by this route, are as follows, to wit: To Berwick Bay, Brashear Station, already completed and in operation, 80 miles, Berwick Bay to New Iberia, cleared and graded ready for track-laying, 45 miles, or 125 from New Orleans; New Iberia to Orange, on the Sabine River, 117 miles, about to be built by the New Orleans and Texas Railroad Company. New Orleans to Orange, 242 miles; Orange to Houston, already built and in operation, 106 miles; total distance from New Oreleans to Houston, 348 miles.

From Houston, a railroad is built to Columbus, on the Colorado River, about 80 miles; thence, to San Antonio is about 125 miles. Distance from New Orleans to San Antonio, 553 miles; 266 miles of which are already built and in operation, and the remaining distance in progress.

Railroads are in operation in several other directions from Houston, and all will be extended before long.

When the gaps between Berwick's Bay and New Iberia, and between New Iberia and Orange are filled, the Opelousas Road will have the accumulated business of several hundred miles of railway, extending into Texas in various directions. Its earnings then will be amply sufficient to complete it to its own terminus, at Thompson's Bluff, and to pay off all its debts.

The Avery Island on Petit Anse Salt Company, already organized, with a capital stock of $2,500 000, are anxious to have the road completed to New Iberia; from which point they intend to build a branch road of nine miles to their mine. This company declare their intention to mine and ship salt on a grand scale—not less than 1,000 tons per day, *via* New Orleans, to St. Louis and other cities.

From the character of the men engaged in this scheme, there can be but little if any doubt of their ability to accomplish this result. The mine itself is well nigh inexhaustible, and it would require many years to make any appreciable difference in quantity, even at this rate. The quality of this salt is said to be superior to any known in the world; it is pure as crystal, and contains 99 per cent. of pure salt.

The salt business alone would yield a large revenue to the railroad company, for 1,000 tons of salt at two cents per ton per mile would pay for the transportation $2,500 per day, or $75,000 per month, equal to $900,000 per annum.

With a railway connection established with Houston, and with the Avery salt mine, it will be conceded that the way and through business of the Opelousas Railroad will compare favorably with that of any other road South.

As before remarked the roadway of this road is nearly completed, ready for the track, to Opelousas, 165 miles from Algiers. From Opelousas to Pine Prairie, 25 miles, (or 190 miles from Algiers,) the line traverses [redacted] prairie country.

From [redacted] branch road is contemplated, 35 miles, or 225 miles from Algiers.

Before the war, a railroad was in contemplation from the Falls of Red River, at Alexandria, to Shreveport; and, when we remember the troubles and losses experienced in Red River, at low water season, every year, the necessity of such a rail road is apparent. It would be an important feeder to the Opelousas Road. By and bye another road will be built from Alexandria to Little Rock, in Arkansas, and, before many years, passengers will go by rail from New Orleans to St. Louis, west of the Mississippi River.

From Pine Prairie to Thompson's Bluff, 68 miles, the Opelousas Railroad line traverses the splendid pine forests and fertile valleys of Western Louisiana.

Here we find good cotton lands, capable of producing from ¾ to 1 bale per acre; inexhaustible forests of the best yellow pine; clear, gravelly-bottomed streams full of trout, and plenty of game in the woods.

The Sabine River is navigable (except at low water,) for steamboats for several hundred miles above the railroad terminus, or to Smith, Wood and Upshur counties, in North-eastern Texas. The business of this section of country, developed and increased by railway communication with New Orleans, will be very important.

From the terminus on the Sabine River, a railway must necessarily be extended *via* San Augustine, Nacogdoches, Rusk and Athens to Dallas, Texas.

Dallas is the centre of the great wheat region of Texas, and would be distant from New Orleans by this route, about 500 miles. The Texas wheat weighs about 5 pounds per bushel more than Western wheat, and its quality is inferior to none in the world. It ripens one month earlier than Western wheat, and were Dallas connected with New Orleans, Texas flour and Texas wheat, in bulk, could be distributed from New Orleans one month ahead of St. Louis and Chicago. Grain elevators would then be as common here as in Western cities. It has been estimated that the Texas wheat region is capable of producing from 50 to 100 millions of bushels annually.

Dallas, by the Opelousas Railroad line, will be about 100 miles nearer to New Orleans than by any other route, consequently the wheat trade would take this route.

It will, therefore, be seen that the N. O., O. and G. W. R. R. will, when completed, have connection with the northern half of Texas by the line to Dallas; with the valley of Red River and Northwestern Louisiana, by the Alexandria branch; with the southern and western portions of Texas by the line from New Iberia to Houston, and with all Southwestern Louisiana.

It now has connection with the Gulf ports of Texas by the steamship line from Berwick's Bay.

The best and shortest route for a Pacific railroad yet proposed, is from New Orleans *via* the Opelousas Road to San Antonio, Texas, and thence to Guaymas, on, or Mazatlan at the mouth of, the Gulf of California. To San Antonio, 553 miles, a railroad will soon be in operation. From San Antonio to Guaymas, or Mazatlan, the distance is about 750 miles, and to the city of Mexico about 700 miles. Such a Pacific Railroad would have the mineral and agricultural wealth of Mexico for its way business, and it would terminate at the great commercial emporium of the South, where steamboats from all parts of the Mississippi Valley, and the shipping from the Atlantic ports of the United States and Europe, would meet and exchange cargoes. Such a Pacific Railroad, and system of railroads penetrating Western Louisiana, Texas and Mexico, will certainly be built; how soon, depends upon the enterprise, in a great measure, of the citizens of New Orleans.

G. W. R. BAYLEY, *Sup't.*

Algiers, La., Oct. 15, 1866.

Peninsular (Mich.) Railroad.

As stated by us last week, the ceremony of breaking ground on that portion of this road lying between Lansing and Battle Creek took place at Battle Creek on the 29th ult. The object is to complete a portion of a new route from Chicago that will connect with the roads leading to the East from Port Huron. That part of the line from Port Huron to Lansing is well under way. From Lansing to Battle Creek, the Peninsular Railway Company proposed to build. From Battle Creek *via* Cassopolis and Edwardsburg to the Indiana State line, the Peninsular Railway Extension Company proposed to construct, and the Indiana Peninsular Railway Company proposed to construct the line through the State of Indiana. All these companies have been properly organized, and are at work to make the grand enterprise a success.

Memphis and Charleston Railroad.

The earnings of this road for the fiscal year ending June 30, 1866, have been as follows:

From passengers	$582,157 64
" freight	589,916 62
" mail	20,506 43
" express	51,092 50
" rents and privileges	30,633 91
	$1,274,307 10

Expenses, viz:

Conducting transp	$303,488 08	
Motive power	379,866 51	
Maintenance of way	577,681 37	
Maintenance of cars	92,078 30	
		1,353,064 26
Expenses more than earnings		$78,757 16

Of the above expenses, $650,164 93 are ordinary, and $702,899 33 extraordinary. Of the extraordinary expenditures, $87,229 74 were incurred in operating the road, $233,343 05 for road materials on hand, and $382,326 54 for extraordinary expenditures of the Engineer Department, viz:

Bridges and trestles	$136,473 42
Road cars	1,768 75
Iron rails, chairs, etc	68,480 21
Depot buildings	44,016 91
Water stations	15,617 53
Cross ties	18,700 00
Track laying	81,641 79
Division houses	15,688 70
Contingent expenses	59 28
Total, as above	$382,326 54

The extraordinary expenditures in the transportation department are thus accounted for:

One locomotive and tender purchased.	$4,150 00
Repairs and improvements on engines.	44,500 00
Do., passenger cars	16,040 00
Do., freight cars	10,960 00
Expenses on rolling stock, etc., from Nashville and from the South	3,253 35
Iron safes, depot scales, trucks, copying presses, and machinery for shops	8,326 35
Total, as above	$87,229 74

Deducting only the ordinary operation expenses of the road from the gross receipts, the net earnings would be $624,142 17.

At the date of the last annual report, June 30, 1861, the county was engaged in a civil war of the most gigantic proportions, changing and disturbing every channel of trade and commerce in the southern section of the country, utterly destroying all natural and healthy elements of business, and leaving this company, among many others, dependent upon the elements of war for its business, and subject in its operations to the whims and caprices of military rule. This state of things continued, growing worse daily, as the two great armies pressed nearer together, concentrating, as they did, upon this line of road at Corinth; and before the close of the year 1861–'62 it had been taken possession of by the Federal army, thereby preventing the annual meeting of the company and the Report for that year.

The report now before us gives a brief history of the operations of the company for the past five years, during a considerable portion of which time—at least three years—the operations of the contending armies were confined to the immediate vicinity of the road. It was practically the picket line of both—each seeming to vie with each other to see which could produce the greatest amount of destruction to the property of the company. The road was, however, operated as usual until April 11, 1862, though subject to serious interference of military officers, who frequently assumed control of the trains.

During the nine months thus operated, two cash dividends of four per cent. each were paid, viz:

September 30, 1861	$152,501 00
February 2, 1862	212,509 00
January 9, 1862, a stock dividend of 33⅓ per cent.	1,330,841 67
Total	$1,695,851 67

Besides this, a dividend was declared March 31, 1863, payable in Confederate money, on which $143,789 was paid, leaving $68,720 uncalled for.

On the 11th of April, 1862, a large Federal army suddenly appeared at Huntsville, a point on the road, 60 miles from Stevenson, capturing the road with all the rolling stock, materials, etc., on the line of the road between Decatur and Stevenson. Only five days previous to this, the battle of Shiloh had been fought near the line north of Corinth, and the western division fell into the hands of the Confederate army. The seige of Corinth succeeded and continued through the remainder of April, and to May 30, when on the withdrawal of the Confederate forces all the movable property of the company within their reach was ordered to be taken down the Mobile and Ohio and Mississippi Central Railroads. The destruction of property in these migrations was immense. Locating at Marion, Miss., temporary shops were erected for putting the machinery in order; but as fast as an engine and car was completed it was ordered away by the military authorities. This enterprise was, on this account, soon abandoned, and the agents of the company were then allowed to hire out their rolling stock to needy roads, and receive therefor stipulated rents, which during 1863–'64–'65 constituted the chief source of income to the company. In the fall of 1862 the eastern division of the road between Stevenson and Decatur was evacuated by the Federals, and the company resuming possession, rebuilt, and operated the road until July 1, 1863, when the Confederate commander again forced the company to evacuate the line and carry the rolling stock South. From this time until the close of the war, the property, or most of it, remained in the hands of the Federal army, but subject to frequent raids by the Confederates. The contest over this section of the country, indeed, was so hot that neither party had been able to operate the road through after it was first cut in April, 1862.

After the close of the war, application was made to the President at Washington for a restoration of the road to the company. As a preliminary requisite, a meeting of the stockholders was held in July, 1865, and the company reorganized by the election of a board of directors. This proceedure receiving the approval of the President, orders were issued for the surrender of the road to the company, and on the 3d of September the Eastern Division, Stevenson to Decatur, 84 miles was turned over to the board, and on the 11th of September the Western Division, Decatur to Memphis, 188 miles—only 74 miles of which (Memphis to Pocahontas) were in running order, the remainder 114 miles (Pocahontas to Decatur) being almost entirely destroyed, except the road bed and iron rails, and these in a very bad condition. What little machinery the war had left was scattered over the South, and had been run for four years with little or no repairs. The prospect before the board at this time was not very flattering. Extensive repairs were required to make the machinery available for use. Over 100 miles of road were to be rebuilt. All the buildings to renew, and nearly 300 miles of road to equip and run, with little cash means and less credit. The company therefore decided to avail themselves of the benefits of the President's order of August 8th, under which they purchased of the U. S. Government 10 locomotives, 14 passenger, and 230 freight cars, together with a large amount of road and shop material, for which they gave bond to pay $491,920 68 on the 1st of January, 1867, without interest—this bond to be credited with all service performed by the company for the Government. The Government also turned over to the company 18 locomotives that had been captured during the war, 10 of which were in good order.

The work of construction, equipping and reorganizing the road, was prosecuted with all the vigor and energy that the means of the company, and the condition of the country and its labor would admit. It was operated as fast as repaired, and on the 6th of November, 1865, trains were run over the entire main line, with but one break; the bridge at Decatur, across the Tennessee River, over 1,700 feet long, having been destroyed. This bridge was not completed until the 7th of July, 1866. The completion of this bridge gives an all-rail connection from Memphis to Stevenson, and under contract of lease the cars are run through to Chattanooga over the Nashville and Chattanooga Railroad, with close connections to New York and all points on the Atlantic Coast.

The rolling stock on the 1st of July consisted of 52 locomotives, 24 first class and 15 second class passenger and mail, 4 baggage, 229 box, 111 platform, 9 stock, 1 wrecking and 79 road and hand cars. There had been purchased and added to the equipment during the year 10 locomotives, 3 first class and 10 second class passenger cars, 155 box, 71 platform, 1 pay, 1 wrecking, and 35 road and hand cars. Six 1st class passenger, and 50 box freight cars had been contracted for to be added to the equipments of the road at an early day. There were yet on the roads south 5 locomotives, 1 first class passenger, 3 second class, 1 baggage and about 20 freight cars, which were to have been returned to the road during the month of August.

From the report of the Superintendent it appears that the road was operated from Memphis to Iuka, 115 miles, from Sept. 11, 1865, and from Stevenson to Decatur, 84 miles, from September 3d; and the entire road from Nov. 6th. This will give an average of operating the whole road about nine months, not including the branches.

The following condensed statement of profit and loss from the books of the Treasurer, will give the operations of each year, showing the receipts and disbursements of each separately, from July 1, 1861, to June 30, 1866:

	1861–'62.	1862–'63.	1863–'64.	1864–'65.	1865–'66.
Receipts:					
Passenger	$931,305 11	$76,810 18	$	$8,307 65	$582,157 64
Freight	946,696 70	79,825 81		27,590 55	589,916 63
Mails	43,358 11	4,703 35			20,506 42

Interest paid the State of Tennessee in Confederate money, which she repudiated, and interest accruing 1st Jan. 1866, in present liabilities, paid in currency	162,330 00	
Losses to construction accounts, road materials and equipments by the war, and charged off so as to show the value of the property at the close of the war	1,195,166 79	
		$2,367,271 72
Balance against account July 1, 1866.		$111,914 23

The loss and damage to roadway, materials, rolling stock and other property of the company, by the war from April 11, 1862, to July 1, 1865, is exhibited in detail in the following statement:

12,651 feet bridging and trestles	$223,683 00
34 depot buildings	58,700 00
Division houses, sheds & tank houses.	42,000 00
Tools	4,000 00
Gravel, wrecking, road and hand cars	23,250 00
Wood, iron rails, ties, etc	245,941 79
593 freight cars	299,450 00
35 passenger and baggage cars	81,500 00
Shop machinery	36,642 00
48 locomotives	150,000 00
Railroad materials	30,000 00
Total, as above	$1,195,166 79

The total cost of road and equipment July 1, 1861, was $7,016,625 03, which was increased during the year ending June 30, 1862, for permanent work and equipment, to $7,058,568 89. The damage done to road and equipment from July 1, 1861, to June 30, 1865, amounted to $1,087,166 79, thus reducing the value to $5,971,401 60; the expenditures in rebuilding and equipping have been $839,087 23—making the present value, July 1, 1866, $6,810,488 83.

The road is 272 miles in length, commencing at Memphis, and running thence via Moscow and Grand Junction, in Tenn., Corinth, Miss., Tuscumbia, Decatur and Huntsville, Alabama, to Stevenson, where it connects with the Nashville and Chattanooga, and through that road with the Western and Atlantic and East Tennessee and Georgia roads. At Memphis it connects with the Memphis and Ohio, and Mississippi and Tennessee Railroads, at Moscow with the Somerville Branch, at Grand Junction with the Mississippi Central, at Corinth with the Mobile and Ohio, at Tuscumbia with the branch to Florence, and at Decatur with the Nashville and Decatur Railroad.

The number of miles run by engines with passenger trains was 137,670; with freight trains, 166,562, with other trains 100,819—total 405,051. Average cost per mile run: for repairs, 21.6; wood, 9.9; oil, waste, etc., 1.8; enginemen and firemen, 12.8—total 46.1. Total cost for repairs, wood and stores, engineers and firemen $186,824 85.

The number of passengers carried eastward was 81,469; do., westward, 82,441; commuters, 300—total, 405,051.

The number of bales of cotton transported over the road was 47,323, of which there were received at Memphis 45,825; at Corinth, Florence and Tuscumbia, 116; at Decatur, 968; and at Stevenson, 419.

CONDENSED BALANCE SHEET, JUNE 30, 1866.

Construction proper	$5,643,561 74

The amount to debit of profit and loss, $804,031 52, was reduced by the entries for 1865-'66, made July 1, to $111,914 28, as shown in the account previously given.

President.—SAMUEL TATE.

Directors.—Samuel Tate, George P. Beirne, James J. Donegan, Joseph C. Bradley, Samuel D. Weakley, James Robb, Pitser Miller, John W. Leftwich, Henry S. McComb, Archibald Campbell, John C. Humphreys, and F. S. Richards.

Gen'l Superintendent.—W. J. ROSS.

Chief Engineer.—JAMES L. MEIGS.

Scinde, Punjaub and Delhi (India) Railway.

The half-yearly meeting of this company was recently held in London, at which the following report of the directors was presented:

In regard to the Scinde line the report stated that during the six months ending 30th June last the traffic has been conducted without accident to any passenger, and practically without damage or loss of goods, the entire amount paid as compensation during the half-year having been under £17. During the half-year ending the 30th June, 1865, the gross receipts amounted to £38,823. In the corresponding part of the second year they were £53,166. The average weekly receipts were about £2,044, or nearly £19 per mile of railway. The increase in the receipts is attributable entirely to the goods traffic, the passenger traffic having yielded a smaller sum than in the corresponding half of the previous year, owing to the number of troops conveyed over the line having been considerably less. The gross expenses during the half-year are estimated at £48,083, leaving a balance of £10,083. An addition to the capital of the Scinde Railway being required for the completion of the permanent station buildings, and for other purposes connected with the equipment of the line, a resolution will be submitted to the proprietors to authorise the raising of a further sum of £250,000 by the issue of 12,500 shares of £20 each, upon which the Secretary of State for India has guaranteed interest at the rate of 5 per cent. per annum.

It was stated as regards the Punjaub line that during the six months ending the 30th June last the traffic has been conducted with regularity and without accident. The receipts bear a favorable comparison with those of the preceding half-year, having reached in the aggregate the sum of £52,664, or about £15,059 more than was realised in the six months ending December 31, 1865. The average weekly receipts were £2,025 11s., or about £580 more than in the previous half-year; per mile of railway they were £7 19s. 9d.; and the gross earnings per train mile were 5s. 5½d., the train mileage during the half-year having amounted to 192,540. The terminal station at Umritsur, a handsome and commodious building,

was formally opened on the 10th of February last, in presence of a large concourse of Europeans and natives interested in the commercial prosperity of the Punjaub. The connection of Mooltan and Kotree by railway, important as it is in the several undertakings of this company, is, the directors are assured, incalculably more important in its relation to the prosperity of the vast territorities of the Punjaub and Scinde, and the security of the north-western frontier of the empire; and the directors trust that these considerations will induce the authorities before long to accord their sanction to the proposed line. Public attention has of late been frequently directed to the project for extending the Punjaub Railway from Lahore to Peshawur, which has been strongly advocated by the press throughout India both on political and commercial grounds. Although it is chiefly to its political advantages that this line owes its importance, the traffic already existing on the route is of considerable extent; and there is no doubt that it is susceptible of great expansion, and would assume vast proportions on the establishment of railway communication with the sea. It is estimated that the proposed railway, which would be 260 miles in length, would cost £19,000 per mile, the provision of the requisite rolling stock being included in that sum. The directors have now under consideration the propriety of constructing a branch to the Sutlej near Ferozepore.

In reference to the Delhi line the report stated that the board continue to receive from the chief engineer satisfactory accounts of the progress of the works, and there is every reason to believe that an early opening of portions of the line at both extremities will be realised. The Ghazeeabad and Meerut section, 30 miles in length, is expected to be ready for traffic in the month of December next. The traffic on this section, it is anticipated, will be very great, as also on that from Meerut to Moozuffernugger, a further distance of about 30 miles, the country traversed by these sections being very rich and highly cultivated. By the end of March last the permanent way between Ghazeeabad and Meerut had been linked in for a distance of about twelve miles. The fencing also had been completed on both sides of the railway of about 20 miles, and materials for about 10 miles further deposited along the line. It is also expected that from Umritsur, at the other extremity of the railway, as far as the River Beas, a distance of 27 miles, the line will be open for traffic before the close of 1866. Plate-laying was commenced on this section in the month of May last, the earth-works having been finished some time before; and the permanent way materials for several miles have been laid along the line. The works at the Beas, Sutlej, Jumna, and other rivers, crossed by the railway are being pushed forward vigorously, it being important that the bridges should be finished at as early a date as possible, as the advantage of a rapid completion of the other works on the line would be otherwise in a great measure neutralised by the greater cost of working isolated sections. It having recently become necessary to make a call upon the shares in order to enable the directors to meet current expenditure, a call of £3 per share was accordingly made, payable on the 28th August. The directors have the satisfaction to state that, notwithstanding the unfavorable aspect of the money-market, this call was promptly responded to by the proprietors. It is proposed to make a further call about the close of the present year, but as the directors are prepared to receive payments in full anticipation of calls, and as it is probable that numerous proprietors will avail themselves of this option in the course of the next few months, the directors may possibly be enabled to defer making the call for a further period. The Secretary of State for India in Council having sanctioned an addition of £2,500,000 to the capital of the undertaking, under the guarantee of 5 per cent. per annum, a resolution will be submitted to the proprietors for the purpose of authorising the raising of that amount by the issue of shares of £20 each, with power to raise £800,000 part of such an additional capital, by the issue of bonds or debentures with the option to the holders of such bond or debentures of converting the same into Delhi Railway Capital Stock. The directors continue to receive every support and furtherance from the Government, both in England and India; and they have the satisfaction to state that the conduct of the officers engaged in the several undertakings of the company has merited throughout the past half-year their cordial approval.

Mont Cenis Railway.

The first general meeting of the shareholders of this company was recently held in London, at which the following report of the directors was presented:

The Directors, in submitting their first half yearly Report, have the pleasure of congratulating the shareholders on the very encouraging prospects of the undertaking. The statements, as regards the traffic upon which the calculations of profit were based, have been fully borne out by additional investigations. The board, after a very careful revision of the estimates made by their chief engineer, have good reason to believe that the total cost of the construction of the line and rolling stock, as well as interest on the capital expended, will fall very considerably within the sum named in the prospectus. This saving will arise from the works being constructed, and the material purchased, under the direct superintendence of the company's agents. The latest accounts from Mr. Fell, the managing Director at the Mont Cenis, fully confirm this statement. The works are in an active state of progression, and have been started along the whole line. The number of men employed up to the latest dates amounted to 1,456, which will be shortly increased to 2,100. The rails on the French side are now being delivered at St. Michel at the rate of from 30 to 40 tons per diem. Two steamers and several sailing vessels have left England for Genoa, freighted with rails and iron work, and it is expected, should the quarantine now established at Genoa offer no impediment, that the delivery will commence on the Italian side at Susa not later than the 15th of this month, and continue as rapidly as the road can be laid. After arrangements had been made for the construction of the engines in England, the Directors were informed that the French law absolutely prohibits the importation of all foreign machinery, subject to a French patent; they have therefore given the order for their supply to a French manufacturer. The progress of the works has suffered no interruption from the war in Italy, but in consequence of the traffic over the mountain having for the moment decreased, the Managing Director expects that the necessary transport for material can be obtained at considerably reduced rates. Should no unforseen accident or delay occur, the line will open for traffic on the 1st of May, 1867, as stated in the prospectus. The rapid progress of the works, however, necessarily entails a large expenditure, the board therefore invite the cordial co operation of the shareholders in obtaining subscriptions to the proposed issue of debentures.—*Herapath.*

☞ The Union Pacific Railroad, Eastern Division, is graded sixty miles beyond Fort Riley, and the company has iron for one hundred and twenty miles of the road. The extension of two hundred and fifty miles west of Fort Riley will be completed a year from now. The present terminus of the road is at Junction City.

☞ The Susquehanna Canal Company gives notice that it will resume the payment of the coupons on its bonds on the 15th of January next. The coupons not already funded are requested to be brought in, to be funded before that date in bonds of the same class and priority. That being done, the coupons of July, 1867, will be anticipated and paid in cash.

Contemplated Texas Railroads.

The people of Texas are endeavoring to launch out upon a new career of prosperity for their State, by encouraging, through legislative action, the building of numerous lines of railway connecting the remote portions of her territory with her seaboard. The large resources which she possesses in public lands render it probable that this course will prove of great advantage to her own interests and to those of her citizens. The movement, however, is calculated to affect disadvantageously the business of New Orleans, and the *Times* of that city sounds the note of warning thus:

Unless our people move soon on this subject they will find the commerce of our port very soon seriously crippled by causes now being inaugurated, if not with that view, certainly with that prospective effect. A glance at the recent action of the Texas Legislature will give reason for apprehending injurious consequences to the prosperity of New Orleans. It is proposed to build a series of railroads connecting with the lines which already centre in Galveston, and which are designed to penetrate the interior counties of the State in such a manner as to attract most of the surplus products of the State to the chief Texas port.

The first of the contemplated roads, known as the "Central Railroad," is to run north from Galveston to Preston, far above the Red River raft; at which point it is to connect with a railroad now in process of construction through the Indian Territory west of Arkansas, and through Southwestern Missouri to St. Louis. This road, when completed, will reduce the time between Galveston and St. Louis, to about thirty-six hours, and will open the most fertile districts of Texas, both to Galveston and to St. Louis.

A second road has been chartered and is partially graded, which is to connect the Central road, *via* Tyler and Dallas, with Sabine Pass.

A third road is to connect Houston, *via* Marshall and Jefferson, with Fulton, Ark., at which point it will intersect the railroad from that place, *via* Little Rock to Memphis. It is further contemplated by St. Louis to tap this road between Little Rock and Memphis by an extension of her Iron Mountain Railroad, thus availing herself of two routes to the interior of Texas.

While the enterprise of others is effecting so much, New Orleans must be reduced to unequal competition for the valuable trade of Texas unless she arouse herself to like energetic action.

Bridge Across the Ohio at Louisville.

Gen. I. M. St. John and an able corps of engineers, Major P. Randolph, Chief Assistant, have completed their surveys for the great railroad bridge over the Ohio River at Louisville. Estimates of the cost of constructing the bridge will soon be prepared, and the site determined upon. There is every probability that the building of the structure will be commenced in the Spring.

North Carolina State Stocks.

The bids for railroad stocks of the State of North Carolina were opened on the 2d inst., at Raleigh, by Kemp P. Battle, Esq., State Treasurer, in presence of the Governor and Comptroller. The bids varied from par to 8⅛ per cent. premium.

☞ The bridge of the Philadelphia, Wilmington and Baltimore Railroad Company, over the Susquehanna river at Havre de Grace is nearly complete, with the exception of the draw and one end span on the east side of the river. The company intend to run trains over the bridge by the 20th of November.

Saturday, November 17, 1866.

Stock Exchange and Money Market.

Money has been working easier for first class borrowers, since our last, owing in part to the dimunition of the speculative demand, which operated against the efforts of some banks and capitalists to establish higher loan and discount rates than those recently current here. There has been an abundant supply available to responsible parties on call, on the basis of 4@5 per cent. on Government, and 5@6 per cent. on other prime collaterals. In the discount line, there has been rather more inquiry for accommodation, and rates on best to good mercantile paper have been ranging from 5½@7 per cent. per annum. There has been no considerable demand from the West, and only a very moderate inquiry from the South, for currency to be used in the moving of the crops. The Southern demand is supplied, in part, by Treasury transfer drafts on the National depositaries at New Orleans, Mobile, Memphis, &c. These drafts are paid for at the Treasury Office in New York, the currency for this object being temporarily withdrawn from the City Banks. The U. S. Sub-Treasury here has gained nearly ten million dollars in its cash reserve during the week. The City Banks, while reporting an increase of $3,907,853 in loans and discounts, $3,958,768 in specie, $502,738 in circulation, and $1,483,622 in net deposits, show an decrease of $3,478,347 in legal tenders, which decrease, however, is more apparent than real, and is accounted for, as the result of manipulations by the *bear* interest in stocks. The banks have been debarred, or have not used the right to make any explanation of the change, while the brokers, who are represented as having brought it about, are careful to ascribe it in part to an outflow of funds from the city, and in part to further conversions of compound interest legal tender notes into the new issue of the Five-twenties of 1865. We have already stated, on reliable authority, that there has not been any serious country demand for currency. We are also informed that there have been few or no conversions of compound notes made into U. S. bonds, during the week. Indeed, we are assured that the process of converting the compound interest notes substantially ceased before the first of November. The Treasury has not been able to supply the new 5-20 bonds faster than required by the holders of First Series of 7-30s, who, of course, have the preference; beside which the Secretary is not disposed, with the constant advance in the new bonds, to offer the same terms for compound notes as when the bonds were selling at 108 per cent. The city bank deposits are now $226,325,317, against $174,199,442 same time last year. Their legal tender reserve amounts to $71,512,495, against $47,913,888 same time last year. Their circulation now stands at $30,968,940, against $13,825,209 same time last year. The loans are now $275,-698,288, against $279,135,796 four weeks ago, and $224,005,572 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $129,434,056 a day, against a daily average of $126,972,408 the preceding week; and $127,044,006 the week ending with Oct. 27. The current week's exchanges average about $142,000,000 a day.

National Bank notes to the amount of $731,-250, were issued last week, making the total issue to 1,662 banks thus far $296,080,104, against $282,-555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $339,-858,150; and for the public deposits, $39,438,950 —making a total of $379,297,100. The Treasury Department, last week, destroyed $238,300 of worn and mutilated fractional currency, and issued $336,535 worth of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 10, were $34,167,947, including $2,055,-292 from customs duties; payments, $28,749,896; balance at the close of the week, $91,807,769, against $86,389,718 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $7,878,901, and payments, $5,-488,823. Tuesday, receipts, $3,811,320 and payments, $1,861,031. The balance at the close of business on Tuesday stood at $96,148,136 against $86,197,048 a week ago. The balance in the U. S. Sub-Treasury, Boston, at the close of last week, was $12,471,656, showing a decrease of $2,-213,324 31, as compared with the close of the previous week.

Secretary McCulloch is at present engaged in the completion of his annual report on the National finances, which is to be presented to Congress early in December. It is given out by the Washington correspondents of the city press that the Secretary will ask for further legislation, to enable him to make more determined headway in the direction of a resumption of specie payments, looking rather to an early than a sudden restoration of the hard money basis. Secretary McCulloch, while earnestly desiring, and as earnestly striving for the restoration of the specie standard, is studious to avoid any line of conduct which would be likely to bring about a sudden monetary crisis, which would paralyze the industry and commerce of the country, sweep away the chief sources of revenue, force the department back again into the market as a borrower, and thus destroy not only the good work already accomplished, but the brightening prospects before us. He holds that commercial values, based on depreciated paper currency, must adjust themselves to the inevitable hard money standard, and thus facilitate the onward march to the resumption of specie payments. The more gradual this change is made, the more assured will be the progress from inflation to complete solvency, and the more thoroughly beneficially will be the results. In the way of redeeming the outstanding legal tender notes, he has used all his authority to its fullest extent. During the past month, alone, there were nearly nine millions of plain legal tender withdrawn and canceled, leaving the outstanding volume of lawful money $390,195,785, against $399,165,292 a month previous. The aggregate legal tender circulation (including compound interest notes,) is now $538,707,925, against $554,-677,432 on the 1st ult., showing a decrease of $15,969,507.

Government revenues were to a fair average, last week. Excises yielded, $4,768,645, against $7,115,442 the preceding week; customs at the port of New York, $2,055,292, and at the outports, at least $650,000 (in coin) more, making the grand total income for the week equal to about $8,791,-500 in currency, against disbursements of only $1,263,000 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $137,000,000, or equal to an average of about seven millions a week.

Gold fell from 147, as at the close of our last to 143¾, on Monday, rallying since to 145½, receding again 144¼, and closing @144⅝. The speculative demand has been more animated, bnt the disbursements of coin from the Sub-Treasury on interest account have been so liberal (nearly thirteen millions in two weeks) that gold has been sufficiently plenty for immediate delivery, and the *bull* element has had "a hard road to travel" in its efforts to bolster up the premium. It would have been less successful, had it not been aided by the extensive *short* interest created by sales on mercantile account, which affords the main present support to the inflation. The *Australasian* took out $160,500 in specie, to-day, for Liverpool, an amount about equal to the current arrivals from foreign ports. The total imports of specie from Europe, and other ports since January 1, have been $9,018,582. The customs demand for Gold last week, averaged $342,215 a day; thus far, this week, it has been equal to $377,199 a day, or equal to a weekly aggregate of $2,263,194. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $556,844. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $119,-447,333, against $88,512,154 same time last year. The total receipts of California gold at this port since Jan. 1, have been $37,175,953, against $17,-456,355 same time last year, showing an increase, in 1866, of $19,719,598. The exports of specie from this port, last week, were $1,037,850, making the total outflow of specie from the port, since Jan. 1, $56,623,627, against $25,484,618 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $3,712,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $44,-021,710, against $35,050,420 same time last year. The specie exports from San Francisco from Jan. 1, to Oct. 17, reached $36,620,184, against $34,852,-469 same time last year.

There has been increased heaviness in the foreign exchange market, occasioned mainly by the more liberal offerings of bills, especially those made against export purchases of the U. S. Five Twenty bonds, which continue in marked favor with foreign investment buyers. Bankers' 60 day bills on London closed at 108¾@109⅛, and on Paris to 5.18¾@5.15; sight bills on London to 109⅝@110; and on Paris to 5.15@5.12½. The offerings of produce bills are moderate, this week. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2.954,821, against $6,127,156 same week last year. The exports since January 1, have been to the value of $164,317,268, against $145,527,332 same time last year.

Government securities have been more freely purchased for home investment and for export, since our last. The demand has been stimulated by the encouraging November debt statement, and the favorable foreign advices. The sharp decline in gold, however, has tended to depress prices of the gold-bearing bonds, the outstanding amount of which is $1,333,558,842. There has been, less partiality shown for the Seven-Thirties, than for the gold-bearing bonds, especially the Five-Twenties, but prices have been very well supported in view of the rapid progress making in the conversion of these notes into the new Five-Twenties of 1865. U. S. sixes of 1867 closed on Wednesday at 138; U. S. sixes of 1868, at 135; U. S. sixes of 1881 114@114⅛; U. S. Five-twenties of 1862 at 110@110⅛, ex-coupon; U. S. Five-twenties of 1865 at 107½@107¾; U. S. Five-twenties of 1866, 109¾@110; U. S. Ten-forties at 100⅝, and U. S. Seven-thirties at 105¾@107⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116¾	May, 1865	112
July, 1864	116¼	August, 1865	110½
August, 1864	115¾	September, 1865	110
October, 1864	114¾	October, 1865	109½
December, 1864	113¾		

Railway and miscellaneous stock values have been decidedly variable, since our last, the tendency, in the main, however, having been against sellers, under the vigorous hammering process, to which the market has been subjected by the bear interest. Since Monday, speculation has been quite fitful, and prices have been unquestionably on the decline. The early dealings on Wednesday were the worst. The market subsequently rallied a fraction, closing with a fresh influx of orders to buy, which may develop some new life in the business.

Produce and merchandise have been decidedly less active and unsettled in price. Breadstuffs have been less freely dealt in at lower and irregular figures, closing rather more steadily. Provisions have been further seriously depressed, and close in favor of buyers. There has been less inquiry for Cotton which has fallen to 36@37 for middlings, per lb., influenced by the liberal receipts, and the adverse market reports received from Liverpool. The receipts at the port this week, have averaged over 4,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 138,000 bales, against exports of 47,674 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 228,555 bales against 471,-360 bales same time last year; exports, 87,230 bales, against 215,062 bales same time last year, estimated stock at latest dates, 285,636 bales, against 358,012 bales same time last year. Foreign merchandise has been very lightly dealt in, though buyers, especially of dry goods, have had any existing advantage. The total imports of foreign dry goods, last week, were $1,851,683, and the total amount marketed $1,418,340. The value of foreign merchandise imported last week, was $3,394,741—making the grand total specie value of last week's imports of dry goods and merchandise, $5,246,434, and since January 1, $262,584,-144, against $179,744,864 same time last year. The freight market is rather more active and steady with 514 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 27.	Nov. 6.	Nov. 13.
Consols	—@89½	89½	89¾
U. S. 5-20's	—@68¼	68¼	69½
Erie	—@50½	50½	51¾
Ill. Central	—@77¼	76¾	78

The New York exports, exclusive of specie, for the week ending Nov. 13, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$6,127,156	$2,954,821
Prev. reported	139,400,176	161,362,447
Since January 1	$145,527,332	$164,317,268

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$2,015,405	$1,851,683
Gen. merchandise	3,359,733	3,394,741
Total for the week	$5,375,138	$5,246,424
Prev. reported	166,247,957	259,368,236
Since January 1	$171,623,095	$264,614,660

The balance in the Sub-Treasury on Wednesday was $96,255,348 54.

Fast Freight Lines to the West.

We mentioned some time since an arrangement which had been effected by the Baltimore and Ohio Railroad Company for the transportation of freight to the West *via* Benwood and the Central Ohio Railroad and connections. We now learn that arrangements have been made with the Marietta and Cincinnati Railroad Company, by which freights leaving Baltimore by the "Lightning Express," at nine o'clock every night, except Sunday, are taken through to Cincinnati, *via* Parkersburg, in about thirty hours, both running their trains on prompt passenger schedule time, in both directions. Similar arrangements, we understand, are being effected with connecting lines west of Cincinnati, so that shipments to Indianapolis, Chicago, St. Louis and other points are sent forward with great promptness. The mercantile and manufacturing interests of Baltimore, as well as shippers generally, will find these improved facilities of immense advantage in their operations.

Memphis and Little Rock Railroad.

The second division of this road, extending from Madison to Duvall's Bluff, 45 miles, is now under construction, to be completed by January 1, 1868. The contract includes the masonry for the bridge across White River. The estimated cost of the work is $400,000. The railroad company furnishes the iron. That portion of the road between Memphis and the St. Francis River, forty miles, will be in perfect order by the first of January next; that between Duvall's Bluff and Little Rock is finished, trains passing over it daily.

Railway Purchasing Agent.

A person of experience, thoroughly acquainted with the business and markets, desires to form an arrangement with some Railroad Corporation of standing, to act in the capacity of Purchasing Agent. References unexceptionable. Address, "H." P. O. Box 5,314, New York City.

Manassas Gap Railroad.

This road, which connects with the Orange and Alexandria at Manassas Junction, twenty-seven miles from the city of Alexandria, is rapidly approaching completion, and is expected to be in running order by January. Two locomotives, tenders, and twelve freight and one passenger car were received from North Carolina the other day. This road towards the close of the war was completely destroyed by the Government, the rails and ties being all removed.

☞ The following gentlemen have been elected directors of the Washington County (Md.) Railroad for the ensuing year: P. B. Small. E. Mealey, Geo. S. Kennedy, and Jacob A. Miller, of Washington County, and Galloway Cheston, Johns Hopkins, and R. Fowler, of Baltimore City.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Nov. 9th, 1866, were $73,050 69
Corresponding week of 1865 ..... 82,648 52

Decrease $9,597 83

The earnings of the Grand Trunk Railway of Canada for the week ending Nov. 3d, 1866, were $147,905 00
Corresponding week of previous year.. 141,446 00

Increase $6,459 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in Nov., 1866... $22,566 00
Corresponding week previous year.... 26,535 20

Decrease $3,969 20

The earnings of the Western Union Railroad for the week ending Nov. 7, 1866 ..... $20,655 00
Corresponding week previous year.... 13,840 04

Increase $6,814 96

The earnings of the Chicago and Great Eastern Railway for 1st week in Nov. were..... $33,703 89
Same period last year 27,672 79

Increase in 1866. ..... $6,031 10

The earnings of the Chicago and Northwestern Railway for the first week in Nov., 1866, were $246,342 36
Corresponding week of previous year,. 198,298 93

Increase..... $48,043 43

The earnings of the Chicago and Rock Island Railroad for the 1st week in Nov., 1866, were $104,400 00
Corresponding week of previous year.. 86,021 00

Increase..... $18,379 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Nov. 1866, were $100,076 00
Corresponding week of 1865 ..... 118,777 00

Decrease $18,701 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Nov. 1st, 1866, were $42,045 00
Corresponding week of 1865..... 42,378 00

Decrease..... $333 00

The earnings of the Michigan Central Railroad for the 1st week in Nov., 1866, were.. $97,142 28
Corresponding week of previous year.. 104,130 16

Decrease..... $6,987 88

South Carolina Bonds.

The State of South Carolina having passed an act to fund its debt, interest and principal past due, a new series of bonds of $100, $500 and $1,000, have been prepared, payable at Columbia in 1887 and 1897, with half yearly 6 per cent. interest, commencing July 1st, 1867, and the Governor has issued his proclamation in regard to the matter. The holders of past due bonds and stocks are required to come forward and fund the same in the new bonds, above described, or else receive certificates for the amount bearing 6 per cent. interest. The past due debt thus provided for includes the following: $310,000 bonds of 1859, with interest; the interest on $1,000,000 of bonds issued under act of 1854; interest on $500,000 of bonds issued under act of 1853 for building the new State House, and the interest on $1,755,000 of State House bonds under several subsequent acts.

Movements of Produce.

The receipts of certain articles of domestic produce at New York during the first ten months from Jan. 1st, were:

	1865.	1866.
Ashes, bbls.	14,624	4,726
Breadstuffs—		
Wheat flour, bbls.	2,633,032	2,022,481
Corn meal, bbls.	261,701	233,747
Wheat, bush.	5,413,602	2,861,886
Rye, bush.	314,776	646,033
Oats, bush.	7,722,596	6,370,400
Barley, bush.	2,146,156	2,384,382
Peas, bush.	119,894	301,148
Corn, bush	12,146,130	19,483,009
Cotton bales	505,899	499,752
Naval Stores—		
Crude turp., bbls.	24,800	31,555
Spirits turp., bbls	13,826	47,171
Rosin, bbls	103,871	319,629

☞ At a meeting of the Connecticut and Passumpsic Rivers Railroad Company on the 7th inst., it was voted to issue bonds for $200,000, to run ten years, at 7 per cent. interest, free from government tax.

Right of Telegraph Companies to Limit their Liability for Errors in a Message.

The case of Breese *vs.* The U. S. Telegraph Co. decided an important question of law involving the liability of telegraph companies. It decides tnat where a telegraph company furnishes printed headings for the transmission of messages, containing certain terms and conditions upon which such messages will be sent, and an agreement that the same shall become binding upon both parties when signed by the person sending the message, the person who writes his message under such a heading and signs and delivers it, accepts such printed proposition, and it therefore becomes an agreement binding upon the company only according to its terms and conditions.

The following opinion was delivered by

JOHNSON, J.—It must be held I think, that the printed heading to the paper on which the message delivered to the defendant for transmission was written, was, under the circumstances, something more than a mere notice to the plaintiff's assignor, by whom such message was written, signed and delivered. Before the message was written under it, and signed and delivered to the defendant, it was a general proposition to all persons desiring to send messages by the defendant's peculiar means of transmission or conveyance of the terms and conditions upon which such messages would be sent, and the defendant became liable in case of error or accident in the transmission or conveyance. By writing the message under it, and signing and delivering the same for transmission, the party accepted the proposition and it became an agreement, binding upon the defendant only according to the terms and conditions specified in the proposition.

That such is the legal effect of the agreement under which the message in this case was received for transmission by the defendant, seems to me extremely clear. Under the date of the message, and the name of the place from which it was sent, was printed in large clear type: "Send the following message, subject to the above conditions and agreement." Directly under this the message was written and signed by the plaintiff's assignor. There is no pretence that the "conditions and agreement" thus referred to, were not plainly printed, or that there was the least difficulty in reading and understanding the terms proposed by the defendant. There they stood, in clear, plain print. First a general statement, that "in order to guard against errors or delays in the transmission or delivery of messages, every message of importance ought to be repeated by being sent back from the station to which it is directed to the station from which it was sent, and compared with the original messages." Following this list is the tariff or rate charged for such repetition and comparison, as follows: "Half the tariff price will be charged for thus repeating and comparing." Then follow the terms and conditions in this language:

"And it is hereby agreed between the signer or signers of this message and this company, that this company shall not be held responsible for errors or delays in transmission or delivery of this message, if repeated, beyond the amount of fifty dollars, unless special agreement for insurance be made and paid for at the time of sending the message, and the amount of risk specified on

this agreement, and that in case this message is not repeated, this company shall not be held responsible for any error or delay in the transmission or delivery of the same beyond the amount paid for transmission; unless specifically issued, and the amount of risk paid for and specified on this agreement at the time." Here is no ambiguity whatever, but on the contrary, the language is well chosen, and the meaning and import perfectly clear and obvious to the most indifferent and careless reader. The price for transmission only was paid. There was no request to have the message repeated, and nothing was paid or offered therefor, and no insurance. The defendant is therefore exempt from all liability for the mistake or error complained of, by the express terms of the agreement.

It is stated in the case made, that neither the person who signed the message nor the plaintiffs ever read the printed "condition and agreement" thus subscribed. But it does not follow from this by any means, that they are not bound by the conditions. They might and should have been read. It was very gross carelessness and negligence not to read them before signing and delivering the message. No notice was given to the agents of the defendant that the conditions and agreement to which the author and signer of the message had in terms agreed that the same should be subject, he had in fact neglected to read, and inform himself as to their import. The presumption, in the absence of any notice was that he had read and understood the proposition he had thus accepted; and the defendant's agents had the right to take it for granted that he had, and will be presumed to have done so, and to have sent in good faith the message upon the terms thus proposed and apparently accepted. The plaintiffs should not now be permitted to allege that the assignor either wilfully shut his eyes and refused to see what was so plainly before him, or that he negligently omitted to use them for that purpose. To allow them now to do this, would operate as a fraud upon the defendant. It would enable one party, through his own gross negligence and inattention, to create a liability against another in his own favor, where none was bargained for, or would have been, and which was expressly stipulated against. The principle of *estoppel in pais* applies in full force against the plaintiff's claim. Their assignor by his conduct, led the agents of the defendant's to suppose and believe that he had agreed to the defendant's propositions, and they cannot now gainsay the apparent agreement.

In Lewis *vs.* The Great Western Railway Company (5 H. & N. 967), which was a case where the person delivering goods to a carrier filled up and signed a receiving note under a printed head of conditions, and which the party afterwards, in an action for the loss of the goods, claimed not to have read, Baron Bramwell said: It would be absurd to say that the document which is partly in writing and partly in print, and which was filled up, signed and made sensible by the plaintiff, was not binding upon him. A person who signs a paper like this, must know that he signs it for some purpose, and when he gives it to the company, must understand that it is to regulate the rights which it explains."

I cannot refrain from observing here, that the business in which the defendant is engaged, of transmitting ideas only, from one point to another by means of electricity operating upon an extended and insulated wire, and giving them expression at the remote point of delivery by certain mechanical sounds, or by marks or signs indented, which represent words or single letters of the alphabet, is so radically and essentially different, not only in its nature and character, but in all its methods and agencies, from the business of transporting merchandise and material substances from place to place, by common carriers, that the peculiar and stringent rules, by which the latter is controlled and regulated, can have very little just and proper application to the former; and all attempts heretofore made by courts to subject the two kinds of business to the same legal rules and liabilities, will, in my judgment, sooner or later, have to be abandoned, as clumsy and indiscriminating efforts and contrivances to assimilate things which have no natural relation or affinity whatever, and at best but a loose or mere fanciful resemblance. The bearer of written or printed documents and messages, from one to another, if such was his business or employment, might very properly be called and held a common carrier, while it would be little short of an absurdity to give that designation or character to the bearer of mere verbal messages delivered to him by mere signs or speech, to be communicated in like manner. The former would have something which is or might be the subject of property, capable of being lost or stolen and wrongfully appropriated; while the latter would have nothing in the nature of property which could be converted or destroyed, or form the subject of larceny, or of tortions caption and appropriation, even by the "King's enemies." But even if the defendant is held to be an ordinary common carrier, it had the right to limit its liability by express contract, as is now well settled. (Bissell *vs.* New York Central Railroad Company, 25 N. Y. 442; Dorr *vs.* N. I. Steam Navigation Co. 1 Kern. 485).

In MacAndrew *vs.* The Electric Company (17 Com. B. 3; 84 E. C. L. R.) it has held that a mere regulation of the corporation, similar to the one here in question, was a reasonable regulation under the act 16 and 17 Victoria, and shielded the corporation from liability for the mistake of sending the message to Soulhampton instead of Hull; and so in Camp *vs.* The Western Union Telegraph Company (1 Metcalfe, Ky., 164), it was held that a printed notice similar to the conditions here, not in the form of an agreement, was a reasonable regulation on behalf of the company, and binding upon the person delivering the message to be transmitted. Our statute providing "for the incorporation and regulation of telegraph companies" Sess. Laws of 1848, chap. 265., § 11), makes it the duty of the owner of any telegraph line doing business within this State, to receive dis patches, and on payment of their usual charges for transmittting dispatches, "as established by the rules and regulations of such telegraph line, to transmit the same with impartiality and good faith," under a certian prescribed penalty. Thus the statute, it will be seen, recognizes the right of the owners of these lines of communication, to "establish rules and regulations" for the transmission of communications, delivered to be forwarded, in nearly the same terms as the act of 16 and 17 Victoria. The legislature obviously never intended that these corporations, or persons engaged in this novel, interesting and extraordinary business, should be placed upon the same footing in respect to liability with ordinary carriers of goods.

There is no question here of gross negligence, against which defendant could not, as carrier even, shield himself by contract. The case states that the message was duly transmitted from the office at Palmyra, as written and delivered, "but by error of some of defendant's operators working between Palmyra and New York, the precise cause of which is unknown," it was received in New York and delivered as an order to purchase $7,000 in gold instead of $700, according to the message delivered and duly transmitted at Palmyra.

In view of the nature of this business, and of the peculiarly delicate and subtle agencies and forces employed in carrying it on, it is impossible for the court to say, from the statement, that the error complained of was the result of any negligence or inattention whatever on the part of the agents employed by the defendant. For aught we can see it may have been produced by causes over which no person had any control. And these considerations show most forcibly the importance and necessity of allowing those carrying on this business the right to make rules and regulations and contracts, limiting and controlling, to a reasonable extent, the grounds and measures of their liability.

For the foregoing reasons, I am of the opinion that the facts stated in the case made do not entitle the plaintiffs to any recovery. The defendant must, therefore, have judgment for its costs.

Judgment accordingly.

☞ The Columbus (Ga.) *Enquirer* says that trains are now run directly through from Montgomery to Savannah, and return the same way. Cotton appears to be seeking the Atlantic coast, and it comes from as far West as Selma, Ala. The demand for the shipment over the Montgomery and West Point road is now greater than the capacity of the transportation.

☞ The Florida Railroad was sold on the 30th ult., at auction, and purchased by Marshall O. Roberts, of this city, for $320,000. It is announced that the road will very soon be in running order the whole distance from Fernandina to Cedar Key, with connecting lines of steamers between Fernandina and New York, and Cedar Key and New Orleans.

Interest and Dividends.

The Georgia Railroad Company have declared a dividend of 3½ per cent., payable Nov. 15.

The Vermont and Canada Railroad Company have declared a dividend of four per cent., payable December 1.

☞ Nearly all the preliminary arrangements necessary for commencing the work on the new railroad between Camden, N. J., and Mount Holly have been perfected, such as locating and securing the right of way. It is understood to be the intention of the company to have it in running order within another year.

☞ The Oregon Legislature have appropriated one million seven per cent. twenty year bonds in aid of the Oregon Central Railroad, to be built from Portland to the California State Line.

The Railway Spine.

This may be a new term to some of our readers, and we therefore give its meaning before proceeding with any remarks on the subject itself. "Railway spine" means a concussion or violent jar of the spine, caused by railroad collision. It is taking, however, quite too restricted a view of the disease to regard it as the result of an accident peculiar to railways. Concussion may arise from a fall, a leap from an unusual height, a blow or a wound, or any other accident of civil or military life. Still, as hundreds of thousands travel by railway for one who runs any other risk, it is not unnatural that spinal concussion should be regarded as a "railway disease." Of the nature, extent and consequences of the first injury a very clear description has recently been given by Mr. Erichsen, an eminent English surgeon. The point which most interests the general public is its connection with medical jurisprudence, and the conclusions derived from the latter as to the prolonged responsibility of railroad directors and managers for injuries, *i. e.* to passengers. If anybody is visibly hurt in a railway accident, he is entitled to compensation. If his leg is broken, for example, he gets the value of his leg as near as a jury can arrive at an approximate price for the value of that limb to him. But suppose the hurt is invisible? Suppose that the hurt is of a kind which does not visibly appear, or if it should appear, can only be traced back to its source by a careful and experienced professional man? How many physicians have been called on to treat cases of convulsions and inflammation of the brain in children, the cause of which, on careful inquiry, could be traced to falls or blows on the head, received weeks, and even months previously! The immediate effect of the injury, such as swelling and pain of the affected part, had disappeared, and the child seemed to be as well as ever. In some cases, on the other hand, it was remembered aftewards, although scarcely noticed at the time, that the child had become more irritable than was its wont, and that its appetite and digestion were not as regular as they had been before. Cases of an analogous nature in adults are on record. But it has been reserved for their multiplication of late years by railway accidents to force a more fixed attention to their real character, and to the extent to which medicine and law can be appealed to for the prevention and abatement of the evil.

A passenger who happens to be one, with others, who have received the shock from a rail-car crash, frequently gets out with his limbs whole, his body unbruised and his mind unconscious of any disorder beyond a general weakness and confusion, which he sets down vaguely to a shock to the system, while his friends charitably attribute it to excessive fright. By and by, however, he finds, and they find, that "he is not the man he was;" he "has lost bodily energy, mental capacity, business aptitude;" he becomes ill and irritable, grows pallid, loses his memory, finds his sleep disturbed, frets about the state of his eyes, his delicacy of touch, and, finally, displays all the symptoms of paralysis. He is in fact suffering a concussion of the spine—not merely of the bony case, but of the spinal marrow or cord which it contains, and from which nerves of sensation and motion are sent to all parts of the body. The concussion has shaken the nervous force out of him, just as, to use an ingenious illustration of Mr. Erichsen's a magnet struck with the heavy blow of a hammer loses its magnetic power. The obviously material changes in the spinal marrow itself are, inflammation, with enlargement of the blood-vessels, effusion of blood sometimes softening, and at other times hardening, and increased size of its substance. Pain is felt at one or more points of the spine, and is greatly increased on pressure and by movements of any kind, so as to occasion extreme rigidity of the spine or backbone. Death may be postponed for weeks, months, or even years. There may in such cases be remission or abatement, but no real intermission or suspension, of the symptoms. The chances of complete recovery are very small, and the treatment of course becomes difficult. We may sum up in a few words the rules on this point laid down by Mr. Erichsen. They are absolute rest of the body, and of course to the exclusion of travel, so often injudiciously recommended; absolute rest of the mind, and at a later stage counter-irritants, locally applied, or the use of powerful drugs, which we do not even name, as they can only be used by the advice and under the careful inspection of an experienced physician.

The subject of railway spine in its medico-legal bearings possesses great interest to every railway director, manager, and working official, as well as to the multitudes ofpassengers.—*Phila. Ledger.*

Mont Cenis Railway.

In a recent report, Captain Tyler, R. E., one of the Railway Inspectors of the British Board of Trade, gives the following account of the Mont Cenis Railway:

I have heard from Mr. Fell, since leaving the mountain, that he had been again with two of the directors of the company over the works, and that they had found them making good progress on the French side; but had thought it desirable to change the contractors on the Italian side, with a view to increased activity, and to ensure their completion this year. The new contractors have undertaken this obligation, and are to employ at least 1,250 men on that side. The printed prospectus of the company refers to the 1st of May, 1867, as the date on which this railway is to be opened throughout from St. Michel to Susa for public traffic, and the calculations of the directors have been based upon that supposition; but to this end the line and works from Lanslebourg to Molaret, 27 kilometres over the mountain, must be completed before the mountain is covered with snow in the autumn of this year; and it cannot be doubted that every exertion will be made to complete and open the line, inasmuch as the profit of the company depends upon its early employment. They cannot count upon any paying traffic after the completion of the grand tunnel and the permanent line; and, indeed, their concessions hold good only up to the opening of that line for traffic. In the original programme prepared for the French and Italian Governments, four hours and thirty minutes were allowed for the mail and express trains by the summit railway from St. Michel to Susa; but subsequent experiments have shown that this journey might be made in four hours. I shall still, however, allow four and a half hours for it, and I shall add three-quarters of an hour at each end for the transfer of mails and passengers, on account of the break of gauge—the gauge of the Mont Cenis Railway being 8.7⅝, while that of the French and Italian Railways is 4.8½. Through the favor of the Italian Government I walked into the headings at both ends of the grand tunnel and I found that very considerable progress had been made during the previous year, in spite of the numerous difficulties which had been encountered. The total progress at both ends for the year ending May 9, 1866, was 1,074.75 metres, and the total amount pierced, with the heading was 5,654.50 metres (about 3½ miles,) out of 12,220 metres (about 7½ miles, leaving 6,565.50 metres (about 4 miles) to be pierced. The question as to when the tunnel is likely to be completed depends principally upon the thickness of the quartz, (the thickness and quality of the rock which is interposed between the quartz and the schistose rock of Bardonneche, and the supply of money and labor. Unfortunately, 400 men and amongst them some of the best workmen, were leaving the tunnel works for the army whilst I was on the spot; and the financial condition of Italy, at present most unsatisfactory, must depend upon the duration of the present war. As quartz rock does not lie in strata with parallel sides, there can be no good reason for believing that the thickness of it (500 metres) which has been observed on the surface of the mountain will also be found at the level of the tunnel; and the question of its extent at that level must remain an element of uncertainty until it has been completely bored through. The rock which succeeds it has been called compact limestone, and its thickness has been stated at 2,500 metres, but the engineers of the tunnel believe it to be gypsum, more easy to work than the schist of Bardonneche or the anthracite rock of Modane, and 300 metres thick. Supposing an average distance of 800 metres a year to be pierced for the next five years at the Bardonneche end, and an average of 513.1 metres a year to be pierced during the same period from the Modane end, then the headings would be driven through so as to meet each other in five years from May, 1866, or by May, 1871; and the permanent tunnel might be completed, say, by the end of that year. But there are also the approaches to the tunnel to be constructed on the Italian side by the Italian Government, and on the French side by the Victor Emmanuel (now the Paris, Lyons and Mediterranean) Railway. These approaches, comprising other tunnels and heavy works, and being altogether about 35 miles long, have not yet been commenced. The shortest time, looking at the matter solely in an engineering point of view, in which the permanent line can be completed will be, therefore, as far as can be foreseen, towards the end of 1871; and it is impossible to calculate at present upon the future financial condition of Italy, and the effect it may have upon the progress of the works. After the construction of the whole permanent line, the tunnel route will be an immense advantage to the mail traffic as well as to all other traffic between France and Italy, inasmuch as the break of gauge, and therefore change of vehicles and consequent inconvenience and delay, which must be incurred in the use of the summit line at St. Michel and Susa, will be avoided. The gradients will indeed be very steep, even on the tunnel line, there being a rising gradient from the French side, half way through the grand tunnel, of 1 in 45½, and the steepest gradient on the line being 1 in 28. But it may reasonably be expected that in a few years, and not long after 1871, mail trains will run through from Calais to Brindisi for 1,390 miles, without break of gauge, in about 54 hours.

☞ At a meeting of the Directors of the Utica, Chenango and Susquehanna Valley Railroad, held recently at Richfield Springs, it was resolved to build the road on the Richfield Springs route.

Railway Purchasing Agent.

A PERSON of experience, thoroughly acquainted with the business and markets, desires to form an arrangement with some RAIL ROAD CORPORATION of standing, to act in the capacity of Purchasing Agent.

Memphis and Charleston Railroad.

We gave in our last issue a pretty full abstract of the Reports of the President, Directors, General Superintendent and Treasurers of this company, showing the receipts and expenditures in detail for a series of years, and its financial condition at the close of the last fiscal year, June 30, 1866. A succinct account was also given of the destruction of the road and equipment by the contending forces during the war, and its subsequent recovery and resuscitation. The progress made in the reconstruction of the road, bridges, buildings, etc., is thus described in the Report of the Chief Engineer:

Upon the transfer of the Eastern Division of the road by the United States military authorities to the company, on the 3d of September, 1865, preparations was made to relay the track from Decatur westward, to connect with the work begun at Pocahontas and carried on eastward, under the direction of the General Superintendent. The division from Decatur to Stevenson, 84 miles, having formed a part of the system of the United States military roads was in good order. The division from Decatur to Tuscumbia, 43 miles, had been partially destroyed during the war, the principal injury having been done between Jonesboro' and Tuscumbia. As soon as possible an engine and a train of cars were transferred across the Tennessee River at Decatur contracts for wood and timber were made, and the work of rebuilding the trestles and relaying the track was commenced.

On the 6th of November, the break between the Eastern and Western Divisions of the road was repaired, and the first train from Memphis arrived at Decatur. About fourteen miles of main track between Decatur and Tuscumbia had been destroyed, and the intervening sidings partially torn up. Much of the iron was found to be so bent as to be useless, and the timely purchase of rails from the United States Military Railroad authorities greatly hastened the completion of the track laying.

The work of restoring the road from Memphis to Decatur, a distance of 188 miles, presented many difficulties. At the beginning labor was disorganized and materials were difficult to get. Every bridge had been destroyed, and much heavy trestle work was required at Wolf River, Porter's, Hatchie, Tuscumbia and Cypress Creeks at various points between Corinth and Burnsville; and at Bear, Buzzard Roost, Cave, Spring, Town and Big Nance Creeks. The work was happily completed, and the track again made continuous from Memphis to Stevenson, except the gap caused by the destruction of the Decatur Bridge. The road bed, however, west of the Tennesse River, was in a bad condition. The ditches were filled with earth, the embankments much weakened, and the timbers of the open drains and shorter trestles required renewal.

An examination of the track between Corinth and Memphis showed that at least one-half of the cross ties would have to be renewed to make the road safe. The same was true also of other portions west of Decatur. The rails in many places were found to be much worn, and many bent rails, that had been imperfectly straightened and used in relaying the track, required to be taken up.

The buildings destroyed during the war, according to the report of the General Superintendent, embraced 24 depots, 20 division houses, and 18 wood sheds. The remaining depots and division houses were more or less injured, some requiring much repair. The whole of the fencing was destroyed, and the road was inadequately supplied with wood and water.

The track forces were fully employed in renewing the ties and rails during the winter, and in ditching whenever possible. Contracts for lumber were made with mills along the line of the road, and on other roads, and the necessary buildings were constructed as rapidly as the lumber could be obtained. New depots have been built at Germantown, Collierville, Lafayette, Moscow, Grand Junction, Saulsbury, Middletown, Pocahontas, Chewalla, Tuscumbia, Leighton, Jonesboro', Courtland, Hillsboro', Decatur, Madison, Brownsboro', Larkinsville and Bellefonte. The depots at Lagrange, Burnsville, Iuka, Dickson, Cherokee, Barton, Paint Rock, Scottsboro' and Stevenson, and the passenger house at Decatur, have been more or less repaired. A number of division houses, platforms, etc., have also been erected. The iron bridge over Big Bear Creek, 300 feet in length, was completed and opened for travel on the 1st of May, 1866, and a similar bridge of the same dimensions over Town Creek, was to have been completed in September last. These bridges were constructed by Messrs. Jones, Westlake & Co., of St. Louis, on the plan patented by J. L. Jones. Subsequently, a contract was made for the construction of the bridge over the Tennessee River at Decatur, which, as previously stated, was completed in July. This bridge is composed of one draw, and ten fixed spans, and is nearly 1,703 feet long. The lower chord is of wrought iron, while the upper chord and braces are of wood. The design is by Albert Fink, Esq., of Louisville, Ky., and the trusses are on the plan of the Warren girder. The bridge was built by the Louisville Bridge and Iron Co. Another contract was made in February, 1866, with Edward Denmead, of Baltimore, for bridges over Wolf River, Hatchie, Tuscumbia, Cypress, Buzzard Roost, Cane and Spring Creeks. The plan of these is the Howe truss, with iron lower chord, and wooden upper chord and braces. The whole work was to have been completed in October. In the course of the repairs, every important trestle bridge on the line was rebuilt. The repairs of the Florence Branch were nearly com-

pleted, and work on the Somerville Branch had so far progressed, that communication with that place was to have been resumed by August 1.

The expenditures incurred in the reconstruction of the road, etc., were given in our previous statement, and are fully accounted for by the condition of the roadway, bridges and buildings, as heretofore detailed, when the company first obtained possession of their property. The estimates for the completion of the bridges, etc., then under construction, are stated at $198,100.

A down freight house at Memphis is proposed to be built before the approach of winter. The building will be four hundred feet long by forty feet wide, with platforms in front and rear. It will be built of brick and covered with tin. It is also proposed to build depots at Mooresville, Woodville, and at the northern terminus of the Florence Branch.

The whole number of cross ties laid in the track during the year, including those bought from Government and from contractors, is 180,791. The repairs of track during the coming year will require 140,000 more. At least 100,000 ties will be required for repairs on the Tuscumbia-Memphis Division.

Sandusky, Mansfield and Newark Railroad.

The earnings and expenses of this road for the years ending December 31st, 1864 and 1865, have been as follows:

Earnings:	1864.	1865.
From passengers	$185,126 85	$207,540 79
" freight	174,915 13	188,203 15
" mails, express, etc.	22,765 53	26,172 88
	$382,807 51	$421,916 82
Expenses, viz:		
Repairs of engines	$34,680 72	$34,040 92
" cars	50,862 82	36,312 85
" track	57,157 13	83,484 45
Train expenses	37,500 07	46,411 89
Station "	24,806 08	29,158 97
Shop "	7,126 94	5,992 90
Fuel	21,561 34	34,555 11
Oil and waste	6,570 20	6,522 86
Salaries, etc	24,377 57	29,114 56
	$282,142 37	$305,594 51
Less paid toward change of gauge included in the above expenses	88,823 24	49,810 98
	$193,319 63	$255,783 53
Net earnings	$189,487 88	$166,133 29

Compared with the previous year the gross earnings of 1865 show an increase of $39,109 31; with an increase in operating expenses of $62,463 90—making a decrease in net earnings of $23,354 59. The report says:

Several causes have contributed to diminish the gross earnings, among the most prominent of which are the following: The want of Freight Cars, which was severely felt: during the winter of 1864–5 the depredations of the enemy on the line of the Baltimore and Ohio Railroad were frequent and the interruptions from this and other impediments encumbered the side tracks west of the Ohio River for the distance of 140 miles, for weeks, with cars of Baltimore and Chicago Freight: the wheat crop in Ohio, the past season, proved a failure, and our extensive accomodations at Sandusky, for this business, were rendered useless.

Notwithstanding these drawbacks, the amount of our earnings was quite as large as was expected, and the annexed tables show the sources from whence they were derived. A large portion of the traffic would have been lost to the company but for the change of the gauge.

The decline of the revenue in the month of December was rapid, and the prospects for business at remunerative rates, and are not very promising for the immediate future.

A reduction in the price of labor and material, and the most rigid economy in Railroad management will be required, to afford any prospect of fair returns. It is some satisfaction to be able to draw encouragement for the future from sources that failed us in the past.

Nor are there wanting additional reasons for hope. The opening of the Panhandle Railroad has given us a new route to Pittsburgh.

The business with that city over your line in connection with the west, by Monroeville and Sandusky, has been much abridged by the completion of the Pittsburgh, Ft. Wayne and Chicago Railroad and by the consolidation of the interest of the last mentioned road with the Cleveland and Pittsburgh Railroad. We expect to regain a portion of that business.

The channel giving access to the harbor at this place has been deepened the last summer and fall, and arrangements have been made to run two side-wheel steamers, making a daily line, between here and Detroit; also two Propellors owned at this end of the line, between this place and Buffalo.

The net earnings of your road are not as large as was expected. The anticipated reduction in the price of labor and material has not been realized.

The funding of the past due coupons has progressed satisfactorily. Those on the whole series of 1,290 bonds have been presented, except 40, which are known to be in the hands of heirs and the executors of Estates.

When these are funded the "Funded Bond Dobt" will amount to $730,753 85. The interest coupons not funded, due in January and July, on both classes, were paid.

Since the alteration of the gauge there has been placed on the track the four locomotives purchased, and five rebuilt, besides the two rendered useless by the collision in 1864.

Other additions have been made as mentioned in the report of the Superintendent, appended.

By consulting the annexed tables of monthly earnings and expenses it will be seen that nearly all the net earnings up to July 1st were applied in providing rolling stock, and these and the other tables show that the net revenue received since the first of July has been used to pay debts made to meet the interest, and some old wheat liabilities of the company.

We have now but seven passenger cars on our line, and must have three more. Two are under contract, one we expect to build.

The general increase in the price of labor and materials has rendered the calculations of both my predecessor and myself erroneous. The necessary increase of expenditures, even though kept down to the lowest point possible, has hitherto absorbed a much larger proportion of the earnings than was expected; and will continue to do so.

The report of Mr. Stewart, our Superintendent shows the increase in equipment and additions made the past, and also the wants of the current year.

Believing that all expenditures will be materially lessened by postponement, it has been thought expedient to keep them within as narrow limits as is compatible with the necessities of the company, the more especially as this expenditure is provided for by withholding the interest from the bondholders.

The last annual report shows that it was not expected we could pay expenses and the interest on the bonds, and also provide the additional equipment from the earnings.

All the bondholders consulted, advised against issuing bonds and placing them on the market to obtain money for that purpose.

The withholding two coupons on all the bonds would amount to $141,000, but it is believed to be more acceptable to the bondholders, generally, to pay the interest on the "funded bonds" and fund the coupons of the original. Three coupons of the original bonds falling due January and July 1866, and January 1867 will amount to $135,450 and when funded will increase our "Funded Bond Debt" by that amount. Three of those Funded, to be paid, amount to $76,650.

The "Funded Bonds" to be issued on this basis will include interest from July 1st 1866; that being the exact intermediate period of time between the dates when the coupons fall due.

Mr. C. F. Timpson is continued as the Trustee, and Mr. E. T. H. Gibson as the Agent to complete the funding of these additional coupons.

The receipts into the Treasury from all sources during the year, including $11,171 95 from previous year, were $591,986 32; and the disbursements were:

Paid to other roads on account ticket and freight departments	$117,292 58
Remitted to N. Y. and paid on account of interest coupons, interest and redemption Domestic Bonds	57,674 11
Paid coupons of Funded Bonds	13,521 82
Taxes, U. S., State and county	25,069 75
Short grain	5,292 45
Operating expenses, etc	363,655 61
Fencing road	504 80
Balance in Treasury, Dec. 31st 1865	8,970 23
	$591,986 32

The income account of the company for the ending December 31, 1865, is as follows:

Balance, December 31, 1864	$80,208 59
Receipts from operating the road	429,938 52
	$502,157 11
Operating expenses, as above	$305,594 51
Interest on bonded debt	110,797 81
Interest and exchange	669 85
U. S. Taxes	11,622 84
State and county taxes	13,446 88
Short grain account	5,292 45
Special expense account	2,648 64
Attorney's fees, etc.	1,575 87
Balance, December 31, 1865	50,508 26
	$502,157 11

The superintendent, in his report, says there were 42,936 new-cross ties, 160 tons new rails, 36 tons rails re-rolled, 1,098 tons rails repaired, 13½ tons rail spikes and 6,426 wrought iron chairs used in improving and maintaining the track during the year. Also 673 yards of masonry have been built to take the place of some carried away by high water last spring; 972 feet of new bridging and 42 new cattle guards and small culverts have been built at different points.

The company have nine locomotives on the road, two of them were built during the past year. The cars owned by the company January 1st 1866, are as follows: 7 passenger, 4 baggage, 2 caboose, 2 mail, 20 stock, 82 box, 28 merchandise, 42 platform, 15 coal, 20 hand and 18 ditching. Of the above, 20 freight cars, 7 hand cars and 8 ditching cars were built during the past year.

The following statement will show the amount of the extraordinary expenses in detail:

One baggage, 4 box and 15 coal cars	$17,600 00
Two locomotives	22,000 00
New house at Prouts	600 00
Paid on grain	5,057 28
New masonry	1,718 00
New water station at Shelby	1,378 75
For opening the harbor	400 00
Dredging about the docks at Sandusky	239 45
In part payment for lots	817 50
Total	$49,810 98

The number of passengers carried in 1864, 189,646, of which 9,372 were through, and 180,274 were way; in 1865, 204,231, of which 8,676 were

through, and 195,555 were way—showing an increase in 1865 of 14,585. Miles run by locomotives, 241,240.

CONDENSED BALANCE SHEET, DEC. 30, 1866.

Capital stock	$896,637 81
Due receiver	1,566 00
First mortgage bonds	1,290,000 00
Domestic bonds unpaid	1,800 00
Bills payable	12,036 81
Due other roads	8,854 41
December pay-roll, unpaid	13,792 57
Individual accounts	4,136 74
	$2,228,824 34
Railroad and equipment	$2,189,890 53
Balance in hands of agents	2,813 36
U. S. for transporting the mails	5,903 72
Fund to pay funded coupons	13,521 82
Individual accounts	7,724 68
Cash in Treasury	8,970 23
	$2,228,824 34

Treasurer.—L. P. WHEELOCK.

Louisville and Nashville Railroad.

We gave, week before last, an abstract of the reports of the officers of this company for the fiscal year ending June 30, 1866. The following extract from the Report of ALBERT FINK, Esq., Gen'l Superintendent, has reference to the connections and extensions of the road:

MEMPHIS, CLARKSVILLE AND LOUISVILLE RAILROAD.

Shortly after the close of the war, propositions were made by this company to the Memphis, Clarksville and Louisville Railroad Company to repair their road from Clarksville to Paris, Tennessee, with a view of forming a through railroad connection with Memphis. The Memphis, Clarksville and Nashville Railroad having no means to put the road in order, the Louisville and Nashville Railroad offered to operate the road, and to apply the net earnings to the redemption of the debt. Unfortunately this proposition was not accepted, and a whole year's business was thus lost. Early last spring the Memphis, Clarksville and Louisville Railroad Company obtained aid from the State of Tennessee—$400,000 in bonds—and soon after an arrangement was entered into by the two companies, according to which the Louisville and Nashville Railroad Company was to furnish the money on the security of these bonds. Under this arrangement, much more favorable and secure to this company than the one first proposed, the repairs of the road are now being pushed with energy, under the able management of GEO. T. LEWIS, Esq., the Receiver on the part of the State of Tennessee, and will be completed early in August.*

The opening of this line of road brings us 118 miles nearer to Memphis, Mobile, and New Orleans; and a new section of country along the Memphis and Ohio, Mobile and Ohio, and Mississippi Central Railroads, is made accessible to the trade of Louisville, which heretofore could only be reached in a very indirect way. Arrangements have been made with the two connecting lines for the operation of the road to Memphis, in effect the same as if it was under the control of one company. Passengers will not have to change cars between Louisville and Memphis, and freight will go through without break of bulk. One day and two nights is all the time required to put freight from Louisville into Memphis, and *vice versa*. This arrangement, it is hoped, will, when fully known among business men, induce a large amount of freight to go over this line. The Superintendents of the Mobile and Ohio and Mississippi Central Railroads have declared their willingness to make favorable arrangements with us for the speedy transportation of freight over their roads at reasonable rates.

* On the 13th of August the road was opened through to Memphis.

CONNECTIONS AT NASHVILLE.

In the endeavor to establish satisfactory connections at Nashville, through which shippers would be enabled to send goods through to Atlanta and points further south with dispatch and at low rates, we have hitherto been unsuccessful. The Nashville and Chattanooga and the Nashville and Northwestern Railroads being under the same management, freight from Johnsonville is sent through Nashville without break of bulk or charge for transfer, while this company is compelled to re-ship at Nashville, and pay at the rate of $10 per car-load for the use of the half a mile of road between the two depots. Thus, for example, the charge of $10 per car-load of corn (which is one of the principal articles shipped south) for passing over one half mile of road through Nashville is equal to the cost of transportation over 43 miles of the Louisville and Nashville Railroad. It would lead too far here to specify in detail the difficulties which are now, and which very likely will be at all times, in the way of establishing satisfactory through connections at Nashville, but the subject is of sufficient importance to seriously engage the attention of the directors and stockholders of the road, as well as that of the business men of Louisville generally.

EXTENSION OF THE LEBANON BRANCH.

While at present the Nashville and Chattanooga Railroad, being the only road leading from the Northwest to the State of Georgia, is enabled to favor rival lines greatly to our detriment, the establishment of an independent route to Central Georgia would at once remove that monopoly, and enable the Louisville and Nashville Railroad Company to compete more successfully with other lines. The completion of the Lebanon Branch to Knoxville would furnish this new route to Atlanta, the same in distance as *via* Nashville; but as we would have no difficulty in making through connections with the Knoxville roads, we would then avoid the heavy tax now exacted from us on all through freight at Nashville. This route would practically be 43 miles shorter than the one *via* Nashville. Having reached Knoxville once, we have opened the shortest route from Louisville to the sea cost at Norfolk; and, as soon as the Blue Ridge and the French Broad Valley roads are completed, we will be in direct communication with Charleston and Wilmington, and in fact with the whole railroad system of the Southeastern States. It will not be necessary to dwell here upon the advantages arising from such connections; they must be apparent to every business man.

A more direct communication between the Northwest and the Southeast has almost become a matter of necessity. Louisville is now in a position to establish this connection with much less outlay of capital than any other city, and should not hesitate to avail herself of this advantage. One hundred and fifteen miles of the road to Knoxville is already completed and in running order, leaving only 87 miles to be built by this company, which can be finished at a cost of $2,600,000. Nor would it be necessary to expend this whole amount before any returns could be expected. Twenty miles beyond the present terminus of the road the coal fields of Eastern Kentucky would be reached, and the transportation of coal to Louisville would furnish an immediate source of revenue to the road. At the lowest estimate, Louisville consumes 5,000,000 bushels of coal annually—one half of which is used by manufacturers—and, at present prices, this would amount to $1,100,000, all of which sum, less the profit of coal dealers, goes to Pittsbugh. Admitting that the Kentucky coal is not equal to the Pittsburgh coal for manufacturing purposes—a fact which is, however, not clearly established—it cannot be doubted that the superior article of cannel coal, which is found in great abundance along the line of the proposed extension, would supersede the Pittsburgh coal for family purposes.

The net revenue derived from the transportation of 2,500,000 bushels of coal, at low rates, is estimated at $100,000 per annum, equal to 8.33 per cent. on the entire cost of the branch to the coal fields, and 20 per cent. on the estimated cost of the part of the road between the present terminus and the coal fields. Nor would the railroad company alone be benefited by the prosecution of this enterprise. In opening the road to the coal fields, Louisville would at all times be able to command a steady supply of coal, independent of the fluctuations incident to Ohio River navigation; and it can hardly be doubted that by means of this completion the price of that important commodity, so intimately connected with the manufacturing interests of the city, must be considerably reduced. Assuming this reduction as amounting only to two cents per bushel, a saving to the city of $100,000 annually is effected—a sum equal to the interest of 10 per cent. on a million of dollars, showing that the city could sink one million of dollars in the prosecution of the enterprise without really sustaining any loss. This is leaving out of consideration the fact of retaining from $500,000 to $1,000,000 for circulation within the State—a sum now annually sent to Pittsburgh, and which would be applied to the development of the resources of this State, and the building up of trade and business along the line of the road, adding thus again to the prosperity of the city.

If such results can be obtained with so little expenditure of money, and without any risk, should the prosecution of this enterprise be deferred much longer.

DECATUR AND MONTGOMERY RAILROAD.

This road, when completed, will, by connecting Decatur with Montgomery, Alabama, form a most important link in the through line from Louisville to Montgomery, Mobile, and Pensacola, and open to the enterprise of Louisville the rich country tributary to the above cities; a country which can now only be reached in a most round-about way, *via* Atlanta or Meridian and Selma.

Freight is now sent from Louisville by river and sea to Mobile, and thence by river and rail to Montgomery, while the latter place, when once connected by rail with Decatur, would be but 492 miles from Louisville—155 miles nearer than the shortest all rail route now in existence. The addition which this road would bring to the business of the Louisville and Nashville Railroad would be very great, both in passengers and freight; and the enterprise well deserves whatever aid can practically be extended to it by the Louisville and Nashville Railroad and the city of Louisville.

EXTENSION OF THE MISSISSIPPI CENTRAL RAILROAD.

Another connection, very desirable to be made, as tending to the interests of this company, is the one between Jackson, Tenn., the present northern terminus of the Mississippi Central Railroad, and Humboldt, on the Memphis and Ohio Railroad. At present passengers for New Orleans have to change cars at Humboldt, and pass over seventeen miles of the Mobile and Ohio Railroad to Jackson, Tenn., where they take the cars of the Mississippi Central Railroad, while freights destined for the Mississippi Central railroad, when in smaller quantities than a car-load, have to be transferred both at Humboldt and Jackson. Although there is every disposition on the part of the managers of the Mobile and Ohio Railroad not to take advantage of their position as a connecting link between our Memphis line and the Mississippi Central Railroad, still, from the nature of the case, much inconvenience in the transaction of business cannot be avoided, and a more complete connection should be formed at an early day.

THE LOUISVILLE AND CINCINNATI RAILROAD.

The construction of this road would form an extension of the Louisville and Nashville Railroad to Cincinnati, and draw to the Louisville and Nashville Railroad a large amount of business which is now carried on through other channels.

Establishing as it would the shortest practicable railroad line between Cincinnati and the Southwest—Memphis, New Orleans, Mobile, Pensacola, and Montgomery—it would afford all railroad facilities which Cincinnati needs in that direction, and render the construction of a rival line which would pass around Louisville improbable, as capitalists would not be likely to invest in an enterprise inferior in its advantages to one already established. By the construction of this road Louisville would lose none of the advantages it now possesses. In directing through it a large amount of travel and business which now passes around, the city must certainly be benefited. To the Louisville and Nashville Railroad Company the completion of this road to Cincinnati is of the utmost importance, and whatever assistance could be given to this enterprise must prove very remunerative.

BRIDGE OVER THE OHIO RIVER.

To complete the connections of the Louisville and Nashville Railroad, and make all more valuable, the construction of a bridge over the Ohio River at Louisville is imperatively demanded. The advantages of a bridge to the railroad interest centering here and the city of Louisville are so well understood and appreciated that the matter is only here referred to for the purpose of completing the general review of all the improvements and connections which, as soon as completed, would immediately add greatly to the prosperity of the road and city, and which at no distant day may become absolutely necessary in order to establish the Louisville and Nashville Railroad and its branches upon a firm and enduring basis, unassailable by rival interests.

With a direct through line to Memphis, reaching by connecting lines into Arkansas and the far Southwest, and commanding the travel and trade of the lower Mississippi, and closely connected by railroad with New Orleans, with the shortest connections to Montgomery, Mobile, and Pensacola, by way of Nashville and Decatur, with uninterrupted rail connection with Atlanta, Savannah, Charleston and Norfolk, by way of Knoxville, Louisville would certainly be in a condition to obtain a large share of the trade of the South, and this, in connection with the large local business that must flow into the city from all sections of the State traversed by her roads, will make her ere long one of the most important commercial aad manufacturing cities of the Union.

The Centre Rail System for the Mont Cenis Railway.

A paper was read at a late meeting of the British Association by Mr. Fell, explanatory of his system for working on steep gradients and sharp curves, by means of the centre rail. The following is an abstract of the paper in question:

Mountain ranges have hitherto presented almost impassable barriers to the advance of railways. The Appeninnes, the Pyrennees, the Semmering in Austria, and the Ghauts in India, have, it is true, been crossed by the locomotive, and one gigantic tunnel is now in progress, for connecting the railways of France with those of Italy. The works of these undertaings are, however, of such a character as heavily to tax even the resources of a nation, and a plan by which mountain ranges could be traversed by railways, combining at once safety and economy, is a problem which remained to be solved. Various methods have been proposed for accomplishing this important object—among others are the rack and pinion, the pneumatic tube, an ingenious arrangement of ropes by Signor Aqudio, and the system of traction by means of the central rail.

The use of the centre rail appears to have been first thought of by Messrs. Vignolles and Erricson in the year 1830, and proposed by them to be applied to the inclines of the Liverpool and Manchester Railway. It was not, however, put into operation, being afterwards found on those gradients to be unnecessary. In ignorance of what had been designed by those gentlemen more than thirty years ago, the Baron Seguier, in France, the writer, and others, in England and elsewhere, consider themselves also to be inventors of the centre rail system. But it was not until Mr. Brassey and myself built a centre rail engine, and laid down a length of line on that plan, on the Cromford and High Peak Railway, for experimental purposes, in the autumn of 1863, that the system had ever been put into practical operation, at least in Europe.

About four years ago, the Italian Government entered into a convention for a service of mail steamers from the port of Brindisi, on the Adriatic, to Alexandria, and gave concessions for continuing their lines of railway to the former port, thus completing, with the exception of the passage of the Alps, at the Mont Cenis, a new and more expeditious route from this country to India and the East. The great tunnel commenced for the purpose of connecting France with Italy, forming the last link in this line, required many years for its completion, and the writer being in Italy at the time, was asked to furnish a plan by which this apparently insurmountable obstacle could be overcome at an earlier period. In conjunction with Mr. Brassey and some other gentlemen who appreciated the importance of the undertaking, in a national point of view, he proposed to construct a railway on the existing imperial road, a distance of 48 miles, from St. Michel, the present terminus of the French railways, to Susa, in Piedmont, where, at the southern base of the Mont Cenis, the Italian lines begin, and so put into early communication the existing lines of the two countries, and complete the new route to the East, whereby a saving of 38 to 40 hours could be effected in the transit of the Indian mail. The two Governments accepted the proposal on the condition of their being satisfied as to the practicability of working locomotives on gradients as steep as those of the public road—combined with sharp curves, and at such an elevation as the summit of this Alpine pass. The mean gredient of the first 24 miles of the line from St. Michel to Lanslebourg is 1 in 60, with a maximum gradient of 1 in 12; of the other 24 miles the mean gradient is 1 in 17, the maximum being also 1 in 12, and over the whole length there are at intervals curves of 40 metres, or 2 chains, radius. The line rises to an elevation of nearly 7,000 feet, and is consequently exposed in places to avalananches and heavy snow drifts, where it will be protected by suitable masonry or timber-covered ways.

It is evident that no ordinary locomotive could carry traffic on gradients of 1 in 12, in a climate where the co-efficient of adhesion falls at times below a tenth or even a twelfth of the weight of the engine—no amount of weight added to the engine would give it the power of drawing any load beyond itself up such inclines, under such circumstances, and it became indispensable to obtain an increased amount of adhesion by means altogether independent of weight. Various plans proposed for this purpose were considered, such as the rack and pinion, and grooved wheels; but the system adopted has been that of a third or traction rail, on which adhesion could be obtained by the pressure of horizontal wheels worked by the engine in conjunction with, or independently of, the ordinary driving wheels. This plan admits of the weight of the engine being reduced to a minimum, while the pressure upon the middle rail, and consequently adhesion, can be carried to any amount that may be required, and gradients of 1 in 12 be worked with as much certainty and safety as those of 1 in 100.

The centre rail also furnishes the means of applying most powerful breaks for controlling the descent of the trains on the steep inclines, and, by the guiding action of the horizontal wheels, greatly diminishes the frictional resistance in passing around sharp curves. Another, and not the least important of the advantages of the centre rail system, is the great additional security which it affords, rendering it almost impossible for engines or carriages to leave the rails. The first series of experiments were made by the permission of the London and North Western Railway Company, on the Cromford and High Peak Railway, from September 1863, to February 1864.

The second series of trials was made from the months of February to July last year, during the latter months with an improved engine, specially designed for carrying the loads and running at the speeds required by the programme accepted as the basis of the undertaking by the French and Italian Governments. It was proposed to carry the existing traffic by three trains a day, each way—namely, a mail train drawn by one engine, a mixed train with two engines, and a goods train also with two engines. The mail trains were to perform the journey in 4½ hours, including stoppages, or at an average speed of travelling of 12 miles an hour, the speed on the steepest gradient being fixed for ascending and descending at 12 kilometres or 7½ miles per hour, the gross weight of the train being 16 tons. The mixed trains were allowed 6 hours, and the goods trains 8 hours, for the journey, the weights being respectively 40 and 48 tons. The passengers, mails, and goods carried on the trains represented a traffic of 2½ millions of francs, or £100,000 sterling per annum. The sight of the experimental line was chosen by the French Government, and fixed on a portion of the road between Lanslebourg and the summit, at an elevation of about 5,600 feet above the sea, as shown on the plan and section. The length is 2 kilometres, or 1¼ miles. The average gradient is 1 in 13, and about half a mile is on curves from 40 to 150 metres radius.

The trials were made in the presence of Captain Tyler, R. E., Commissioner for the English Government, and also commissions of Engineers appointed by the French, Italian, Russian and Austrian Governments.

The result showed that the average speed attained for the mail train was 15½ in place of 12 kilometres per hour; and for the goods train 10½ in place of 6 kilometres per hour, while the steam pressure increased 20 to 25 lbs. each run up the line, consequently the power developed was sufficient to carry a mail train of 24 tons instead of 15 tons, and a goods train of 50 tons instead of 24 tons, and at the speed required. There can be no doubt that Captain Tyler has rendered an important public service by the trouble he has taken in thoroughly investigating the centre rail system, both as to its application to the passage of the Mont Cenis, and generally with regard to its safety, and to its mechanical and commercial capabilities. Captain Tyler concludes his report to the Board of Trade as follows:

"As the results of my observations and experiments, I have to report, in conclusion, that this scheme for crossing the Mont Cenis is, in my opinion, practicable, both mechanically and commercially, and that the passage of the mountain may thus be effected, not only with greater speed, certainty, and convenience, but also with greater safety than under the present arrangements."

The French Royal Commission, consisting of Messrs. Conte, Bochet, Guinard, and Perrin, made to their Government a voluminous and interesting report on the locomotive trials, which they concluded as follows: "From the experiments which have been described, and which the Commission has judged unnecessary to continue any further, and from the different verifications which it has made, the Commission has arrived at the conviction:

"1st.—That the system of traction proposed by Mr. Fell is applicable for the passage of the Mont Cenis, with the engines of the type which have worked at the last trials.

"2nd.—That this system presents no danger as regards the public security on steep inclines and on sharp curves, since, on the contrary, the existence of the centre rail furnishes a guarantee against getting off the rails, and at the same time a powerful means of stopping the trains.

"3rd.—That with the exception of some points of detail, the study of which has not yet been made, but which present no serious difficulty, this system may from the present time be considered as applicable to the crossing of the mountain.

That with regard especially to the working of the line during the winter season, the covered ways proposed by Mr. Fell will be sufficient to secure the regularity of the service."

The reports of the Italian, Russian, and Austrian Commissioners were equally favorable and conclusive.

The practicability of the new system having now been completely established, the French and Italian Governments, in the month of November and December last, granted concessions authorising the construction of the railway on the Imperial postal road over the Mont Cenis. They reserved a width of 6 metres for the ordinary traffic of the road, which, the normal width being 10 metres, left 4 metres, or about 13 English feet, for the railway.

Early in the present year a company was formed in London, of which his Grace the Duke of Sutherland is president, for carrying out the undertaking. The works were commenced in March last. They are now about half finished, and it is expected the rails will be laid throughout before the end of the year, ready for opening in the month of April or May next.

There are but few railways that are worked with one class of engines; usually at least two classes are employed, one adapted for the passenger and another for the goods traffic. On the Mont Cenis besides the *two kinds of traffic*, we have *two distinct and totally different sections* of the line. From St. Michel to Lanslebourg is a distance of 24 miles, with a mean gradient of 1 in 60, and a *very short* length of 1 in 12, and from Lanslebourg to Susa a mean gradient of 1 in 17, the *prevailing gradient* being 1 in 12, consequently there appeared to be a more than usual necessity and advantage in employing two separate types of engine, and I proposed to adopt for the heavy gradient section an engine capable of developing a great tractive force at a slow speed, and for the section with alternating steep and flat gradients another form of engine, that should at once be able to take its load up an incline of 1 in 12, and to run, at a higher velocity on the easier portions of the line, since there would be a saving of time in the journey, and probably also in the cost of traction by such an arrangement.

In the engine designed for the steep gradient section of the line, the vertical and horizontal wheels are of the same diameter, and are driven by one pair of cylinders. The latter set of wheels are supported by cradles or carriages, sliding laterally, in the frames of the engine, and are brought into contact with the centre rail by the compression of 12 volute springs, 6 on each side, by means of which 24 tons pressure can be put upon the centre rail. The machinery is simple and accessible, and the movement of the two sets of wheels is perfectly coincident, so that there is no friction or scrub between them. The power is transmitted from the cylinders direct to the cranks of the horizontal wheel axles, by the connecting rods, and to the cranks of the vertical wheels by means of rocking shafts at the leading end of the engine, the two arms of which are so fixed that at mid-stroke one arm is at a right angle to the piston rod, and other arm at a right angle to the line of the outside connecting rod, which latter is placed in an oblique position between the arm of the rocking shaft and the crank of the vertical wheel axle. Toothed wheels are employed to help the cranks of the horizontal wheels over the dead points. The compressing gear is so arranged that the pressure on the horizontal wheels can be regulated by a hand lever on the foot-plate, while the engine is running.

The breaks are applied to the outside wheels, but act on the inside one also, through the medium of the connecting and piston rods. There are also breaks that grip the centre rail, and by the two sets a break pressure of 60 tons is obtained on an engine weighing only 16 to 17 tons.

The engine proposed for working on the section of the line having a mean gradient of 1 in 60 differs from the one above described in the following respects: It would have four cylinders, placed parallel to each other at the leading end of the engine, by which the vertical and horizontal wheels would be driven independently of one another, the latter working only on those portions of the line where the centre rail was laid, and the former, being of larger diameter, would enable the engine to travel at increased speed on the more level portions of the line. The advantages of this arrangement would be considerable, and in consequence of the saving thus effected more time could be allowed for the really difficult part of the journey. This engine would be somewhat heavier than the other, but since the elevation to be attained on the St. Michel section is less than half that on the Susa section, this increase of from one to two tons in the weight would not be of so much consequence.

The wheel base of No. 2 engine is 6 ft. 10 in., with an overhang at the leading end of 6 ft. 2 in., and at the trailing end of 7 ft. 10 in. There is consequently a load of about 11 tons on the latter, and only 6 tons on the former axle. This irregular distribution of weight, together with the great overhang, at the speed of 12 to 15 miles an hour, causes a pitching motion with a certain amount of percussion on the bearings, and a tendency to get off the line when running only on two rails. This pitching motion on axles one of which is loaded up to 11 tons, would be destructive to a road laid with light Vignolles rail, like that of the Mont Cenis. On the experimental line, with the protection afforded by the centre rail, at comparatively slow speeds, and with a bearing rail of 75 to the yard, these defects were not of much importance, and they can of course be remedied in the engines now being built for actual service on the Mont Cenis.

The practicability having been established of obtaining adhesion by the pressure of horizontal wheels, on a central rail, the weight of the engine may now be reduced to simply that which is necessary for producing and carrying the power required for the traction of the train.

This advantage of the centre rail system has been brought into operation in constructing No. 2 engine, which, with only the same weight, has 50 per cent. greater power than No. 1. The economy of weight has been effected by an improved arrangement of the machinery, and by using an improved quality of material. In place of four cylinders, and two distinct engines, for working the two sets of wheels, No. 1 has but two cylinders and one engine; the frames and supports for carrying the horizontal wheels have also been much simplified. The external shell of the boiler, the wheels and axles, and chief part of the machinery, have been made of steel instead of iron. And the weight thus saved has been employed for increasing the capacity of the boiler—No. 2 engine having 600 feet of heating surface, and 10 feet of grate area, as compared with 420 feet of heating surface, and 6 feet of grate area in No. 1, without exceeding the same gross weight.

No. 2 engine, weighing 16 to 17 tons, can, it has been shown in the trials, easily maintain 160 to 170 horse power, or 1 horse power to each 2 cwt., which is a result equal to the best constructed engines in use at the present time, and the additional weight of the horizontal wheel machinery, has, to a great extent, been compensated for by the saving effected by the use of steel.

This question of the economy of weight in locomotive engines is one which it has been difficult to approach, but in centre rail engines it is a subject of improvement deserving the most serious consideration, as it is evident that the useful or paying load may be increased in the proportion that the weight of the engine is diminished.

It may be interesting to inquire what is the limit of the tractive force of the central rail engine, and the limit of the gradient up which it could take a load. Pressure having been shown to be equivalent to weight, we have in this case—the weight of the engine, plus the pressure on the horizontal wheels, divided by the adhesion. Now, since the pressure may be increased in proportion to the strength and hardness of the materials employed and the area of the surfaces in contact, it is practically unlimited, and so, in consequence, is the tractive force that can be exerted by a centre rail engine, and the gradient up which it can ascend.

It is theoretically practicable to make a centre rail engine ascend a vertical rail with a load, and with about the same expenditure of power and time that would be required with the same load to ascend an incline representing the hypothenuse of a triangle, of which the vertical rail would represent the perpendicular. Consequently the centre rail system, or the application of the principle of obtaining from pressure the adhesion required for developing tractive force on railways, is not restricted to gradients of 1 in 12, the maximum inclination on the Mont Cenis, but is equally applicable to any other steeper gradient, and that consistently with the economical expenditure of mechanical power.

For the working of mountain lines, such as that of the Mont Cenis, with a mean gradient of 1 in 17 for 24 miles, and at some seasons of the year a most unfavorable climate, from the effect of snow, frost, and fogs, it would be highly desirable if some means could be devised for cleaning the surface of the rails for improving the state of adhesion as the trains advanced, and so of dispensing to a considerable extent with the use of sand. During the experiments of the Mont Cenis, I observed that on the whole the adhesion was the best in the winter seasons, there being no rain or moisture, the snow falling and remaining for some months in the state of a perfectly dry powder. In places where the snow accumulates to any considerable depth, the line will be protected by a covered way for a distance of 8 to 9 English miles, and here the rails will always be in a good condition.

Mr. Fell then repeats the observations of Captain Tyler on the subject, in his report to the Board of Trade, which have already appeared in the JOURNAL.

With respect to the cost of working, the Italian Government Commissioners in their report state that, taking into account the interest on capital employed and working expenses in both cases, the cost of carrying passengers and goods by the Mont Cenis tunnel line would be 0.17 fr. per passenger per kilometre, and 0.28 fr. per ton of goods per kilometre, and 0.06 fr. per passenger, and 0.10 fr. per ton of goods, or about one-third by the summit line. That the great tunnel would effect a saving of 38 minutes in the time of the journey between France and Italy by the passenger trains, but the cost to the State would be 86,172,211 fr., or £3,446,889 sterling in excess of that of the summit line.

In introducing a new element into the locomotive engine, and applying it to a purpose for which it has hitherto been deemed unfit, there have been considerable difficulties to encounter and prejudices to overcome, the latter especially in the minds of those engineers who have not had an opportunity, or have not taken the trouble, to investigate the merits of the system for themselves. The Governments interested in the passage of the Mont Cenis have, however, treated the matter with the greatest fairness and liberality. His Majesty the Emperor of the French, and the eminent statesman at the head of the Italian Ministry, have fully appreciated the advantages their countries might derive from the introduction of a system of cheap mountain railways, and have from the commencement given the enterprise their cordial and powerful support. The centre rail system once perfected and put into operation on the Mont Cenis, is no doubt destined to confer similar benefits on other parts of the world, and put into communication countries and people at present separated by obstacles insurmountable by railways of the ordinary description. And those who for years have labored at this work may, as a reward for their anxieties, now rest with the conviction that they have accomplished an object which will in some degree contribute to the advancement of science and civilization.

☞ The first railroad iron laid west of the Republican River, was put down October 24th.

American Railroad Journal.

Saturday, November 24, 1866.

Stock Exchange and Money Market.

Money has been advanced one per cent., since our last, by the leading banks, and capitalists, not so much because of any material falling off in the available supply, or increase in the demand, but because of an unwillingness on the part of lenders to continue to grant accommodation to speculative operators in stocks and merchandise, unless at more remunerative rates than those which have been current here for many months past. To aid in the establishment of the advance in the price of money, all sorts of rumors of impending disturbance and stringency in the market have been industriously circulated; but their utter falsity is demonstrated by the abundance of capital at the new rates, which is unquestionably as marked, as when reports of ease and steadiness were the rule. Every really first class Stock firm finds it sufficiently easy to negotiate loans at the new rates on call, 6@7 per cent. to the best houses. The large dealers in Government securities have more ample means furnished them generally at 5 per cent, than they can advantageously employ, and this is another significant indication of liberal amount of capital available to responsible borrowers. The city banks, last week, increased their specie reserve $2,365,733, and their circulation, $264,562. The last $4,432,817 of their deposits and $5,392,134 of their legal reserve. They reduced their loans, $2,359,898. Their loss in the deposit line is due mainly to the transfers of Government deposits from the interior National banks to the New York Sub-Treasury, (which have to be made through our local banks, thus reducing the country bank balances,) and in these settlements the clearing-house certificates had to be used to a certain extent, because of the scarcity of National bank and legal tender notes. Probably four or five millions of the Clearing House certificates were presented by the banks, during the week, for redemption at the Sub-Treasury. About fifteen or sixteen millions more of these Treasury obligations are still held by the the banks. The Government, in preparing for their prompt redemption, has been negotiating for the sale of bonds and gold, and has been successful to the full extent of its requirements, which were comparatively moderate, though, during the progress of the negotiations, the most grossly exaggerated rumors were current, leading to unnecessary distrust and reserve, in legitimate business circles, and to a temporary break-down in the stock produce, and merchandise values from which there has since been only a partial and tardy recovery. Caution on the part of lenders is to be commended, but this is not irreconcilable with a just appreciation of the prime importance of a wise confidence in financial and commercial values, and of the peril involved in any line of conduct that would be likely to bring about a sudden revulsion. The city bank deposits are now $221,892,500, against $173,640,464 same time last year. Their legal tender reserve amounts to $66,120,361, against $47,737,560 same time last year. Their circulation now stands at $31,233,502, against $14,333,168 same time last year. The loans are now $278,338,390, against $271,790,435 two weeks since, $279,135,796 four weeks ago, and $224,741,853 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $140,429,216 a day, against a daily average of $129,436,056 the preceding week; and $126,972,408 the week ending with Nov. 3. The current week's exchanges average about $136,000,000 a day. The average of lawful money held by the Banks to their immediate liabilities for deposits and circulation is 32¼ per cent. on the present return as against 32¾ per cent. last Monday and 33 per cent. the Monday before.

National Bank notes to the amount of $978,955, were issued last week, making the total issue to 1,662 banks thus far $297,065,059, against $282,555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,291,400; and for the public deposits, $39,423,950—making a total of $379,715,350. The Treasury Department, last week, redeemed and destroyed $422,634 of worn and mutilated fractional currency, and issued $477,677 worth of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 17, were $21,195,695, including $1,964,529 from customs duties; payments, $16,605,488; balance at the close of the week, $96,367,977, against $91,807,769 at the close of the preceding

week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $7,314,863, and payments, $7,677,076. Tuesday, receipts, $2,254,648 and payments, $1,631,252. The balance at the close of business on Tuesday stood at $96,629,159 against $96,148,136 a week ago. The balance in the U. S. Sub-Treasury, Boston, at the close of last week, was $12,499,140, showing an increase of $27,484, as compared with the close of the previous week.

Government revenues have been up to a fair average, during the week. Excises yielded, $4,054,876, against $4,768,645 the preceding week; customs at the port of New York, $1,964,529, and at the outports, at least $660,000 (in coin) more, making the grand total income for the week equal to about $8,574,000 in currency, against disbursements of only $1,575,763 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $141,000,000, or equal to an average of nearly seven millions a week. It is still quiet confidently anticipated the excises will yield considerably over $300,000,000 to the Government, in the current fiscal year, and that full five hundred millions of revenue will be realized from all sources, during the year, which will end with June 30, 1867. Of these receipts thus far, Secretary McCulloch has been able to apply an average of $25,000,000 per month since the 1st July (or $102,000,000 in four months) to the reduction of the principal of the public debt, and we see no reason to doubt that the process of reduction will continue month by month to the 30th June next, though perhaps at a reduced average per month. We feel assured that neither Congress nor the Administration will do anything nor attempt anything to impair the revenues or the ability of the country to pay them, by rash or equivocal measures relating to the tariff, the tax laws or the currency.

Government received $4,598,489 from customs duties, at the port of New Orleans during the fiscal year ending June 30, 1866.

Gold has fallen from 143⅝, at the opening to 140 at the close of the week, under a pressure to realize, in view of the liberal receipts from California, and equally liberal disbursements from the Treasury, together with the increasing export demand for American stocks and produce, which lessens the chances of an outflow of specie at an early day. Some sales of coin were represented as having been made a few days since on Government account, which also tended to lower the premium. On the declining market, there were some heavy *short* contracts put out, the covering of which may eventually lead to a fresh temporary rally in the price. The recent severe fall has had the effect of crippling one or two of the more conspicuous *bull* firms. The suspension of one of these, on contracts amounting to about four millions, was reported on Wednesday. The report had a depressing influence on the market. The total imports of specie from Europe, and other ports since January 1, have been $9,095,798. The customs demand for Gold last week, averaged $327,421 a day; thus far, this week, it has been equal to $315,000 a day, or equal to a weekly aggregate of $1,890,000. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $77,216, and from California, $1,121,394. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $121,514,333, against $91,067,718 same time last year. The total receipts of California gold at this port since Jan. 1, have been $38,297,847, against $17,456,355 same time last year, showing an increase, in 1866, of $20,840,992. The exports of specie from this port, last week, were $526,385, making the total outflow of specie from the port, since Jan. 1, $57,150,012, against $26,495,183 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $1,643,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $45,664,710, against $36,099,040 same time last year. The specie exports from San Francisco from Jan. 1, to Oct. 19, reached $37,286,939, against $36,816,896 same time last year.

Foreign exchange has been in more liberal supply and rather better request, the demand having been stimulated by the severe fall in gold, from which a reaction is apprehended by the importing interest. There has been a considerable amount of exchange made against exports of U. S. 5-20 Bonds, which continue in good demand for foreign account. Bankers' 60 day bills on London closed at 108¾@109, and on Paris to 5.23¾@5.16¼; sight bills on London to 109½@109¾; and on Paris to 5.16¼@5.13¾. The offerings of produce bills are more extensive, this week. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $4,119,158, against $6,415,556 same week last year. The exports since January 1, have been to the value of $168,436,426, against $151,942,898 same time last year.

Government securities have been in active investment demand. The coin bearing bonds have declined in price, in response to the fall in gold. The offerings at the reduced prices, however, are quite moderate, especially of the Sixes of 1881, and the Five-twenties of 1862, which latter are particularly scarce, for immediate delivery. The temporary depression in the gold bonds has adversely affected the currency interest bearing notes, which are also quoted off in price, with a less urgent inquiry for them. U. S. sixes of 1867 closed on Wednesday at 134; U. S. sixes of 1868, at 132½; U. S. sixes of 1881 113¼; U. S. Five-twenties of 1862 at 108⅝@108⅞, ex-coupon; U. S. Five-twenties of 1865 at 106⅝@106¾; U. S. Five-twenties of 1865, consolidated, 108⅜@108½; U. S. Ten-forties at 100¼@100½, and U. S. Seven-thirties at 105⅝@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	115¼	May, 1865	111½
July, 1864	114¾	August, 1865	110½
August, 1864	114¼	September, 1865	109½
October, 1864	113¼	October, 1865	109
December, 1864	112¼		

Railway and miscellaneous share property was very seriously depressed in price, by extensive realizations, on speculative account, in the forepart of the week. This depression was brought about by apprehensions of a decidedly adverse money market, which fears those in interest did their utmost to augment. The past two or three days have witnessed a very moderate volume of transactions on a hesitating and irregular market, though there are indications that the worst has been seen for the present at least. Money cannot long remain dear here, without bringing a fresh supply from most other quarters of the country, especially such as are in debt to our merchants. There is at present no outflow of currency from this point, while from Boston, Philadelphia, and other important points, remittances are already being made hither. This addition to the stock of capital nowhere available for speculative purposes, will tend to check the downward course of the Stock Market, and probably lead to new combinations for a fresh rise from the starting point of the prevailing comparatively low prices of really desirable securities. The closing operations were mostly on a weak and *bearish* market, the complexion of which may be changed at any moment.

Produce and merchandise have been less freely dealt in, since our last, though buyers have had any existing advantage. There has been less speculative activity in breadstuffs and provisions, which are generally cheaper. Toward the close there was a partial revival in the demand, including some export inquiry for breadstuffs, particularly wheat, corn and barley. Cotton opened very heavily at declining prices, but has since rallied 2@3 cents per lb., from the lowest point touched, on an improved demand, partly from shippers. Middling grades closing buoyantly at 34½@36½ per lb. The stock of cotton now here is estimated at about 130,000 bales. The receipts at the port this week, have averaged over 6,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 159,700 bales, against exports of 57,104 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 283-, 188 bales against 509,085 bales same time last year; exports, 208,376 bales, against 253,334 bales same time last year, estimated stock at latest dates, 310,000 bales, against 345,000 bales same time last year. In foreign merchandise transactions have been on a very limited scale at generally reduced and declining prices, the turn of the market, especially for dry goods, being decidedly against importers. The total imports of foreign dry goods, last week, were $1,377,716, and the total amount marketed $1,357,770. The value of foreign merchandise imported last week, was $2,510,723—making the grand total specie value of last week's imports of dry goods and merchandise, $3,888,439, and since January 1, $268,503,099, against $177,797,750 same time last year. The freight market is moderately active and steady with 561 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 6.	Nov. 13.	Nov. 20.
Consols	—@89½	89¾	90¼
U. S. 5-20's	—@68¼	69½	70½
Erie	—@50½	51¾	50
Ill. Central	—@76¾	78	78

The New York exports, exclusive of specie, for the week ending Nov. 20, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$6,415,586	$4,119,158
Prev. reported	145,527,332	164,317,268
Since January 1	$151,942,898	$168,436,426

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$2,771,802	$1,377,716
Gen. merchandise	3,402,858	2,510,723
Total for the week	$6,774,055	$3,888,439
Prev. reported	171,623,095	264,614,660
Since January 1	$177,797,750	$268,503,099

The balance in the Sub-Treasury on Wednesday was $100,276,410 09.

Vermont Central Railroad.

At a meeting of the first mortgage bondholders of the Vermont Central Railroad, held in Boston on the 14th inst., the project of placing the road again in the hands of a corporation was referred to the board of Trustees, and the advisory committee consisting of Joseph Andrews and J. M. Pinkerton, who were instructed to report at the next annual meeting on the second Wednesday in November, 1867. The annual report of the board of Trustees showed that the earnings of the road for the past year ending June 1st, were $1,657,427, an increase of $243,447 over other years. The expenditures were $1,362,387. The amount of stock on hand is $428,000—an increase of $254,000 during the year. The net earnings of the road cover all claims and secure a sinking fund of $100,000, and the earnings of the last five months have been about $780,000. At a subsequent meeting of the second mortgage bondholders, at which $1,200,000 worth of bonds were represented, R. T. Taylor was chosen a member of the advisory committee.

☞ The branch of the Boston, Hartford and Erie Railroad, which was under construction between Webster and Southbridge, Mass., has been completed.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Nov. 10th, 1866, were $155,466 00
Corresponding week of previous year.. 150,037 00

Increase..... $5,429 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Nov., 1866.... $26,100 00
Corresponding week previous year..... 26,628 60

Decrease $528 70

The earnings of the Western Union Railroad for the week ending Nov. 14, 1866 . .. $18,910 81
Corresponding week previous year..... 14,521 57

Increase..... $4,389 24

The earnings of the Chicago and Great Eastern Railway for 2d week in Nov. were..... $32,240 67
Same period last year..... 26,482 55

Increase in 1866..... $5,758 12

The earnings of the Chicago and Northwestern Railway for the second week in Nov., 1866, were..... $252,216 00
Corresponding week of previous year.. 199,903 00

Increase..... $53,113 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in Nov., 1866, were..... $83,185 00
Corresponding week of previous year.. 78,525 00

Increase..... $4,660 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Nov. 1866, were..... $102,927 00
Corresponding week of 1865 ..... 113,532 00

Decrease $10,605 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Nov. 8th, 1866, were $39,961 00
Corresponding week of 1865..... 42,106 00

Decrease..... $2,145 00

The earnings of the Michigan Central Railroad for the 2d week in Nov., 1866, were.. $94,046 05
Corresponding week of previous year..104,136 58

Decrease..... $10,090 53

Railroad Earnings—Monthly.

The receipts of the Des Moines Valley Railroad in October, 1866, were $80,588 25
October, 1865..... 50,699 29

Increase $29,888 96

The earnings of the Cleveland and Pittsburg Railroad for the month of Oct., 1866, were:

From freight $167,911 57
" passengers 65,477 10
" miscellaneous 5,700 00

$239,088 67

Oct., 1865:
Freight, passengers, etc 223,846 39

Increase..... $15,242 28

The earnings of the McGregor Western Railway for Sept., 1866, were..... $31,641 00
Same time in 1865..... 39,118 00

Decrease $7,477 00

☞ The people of Niles, Berrian Co., Mich., have raised by subscription, the sum of $100,000 with which to grade and tie the "Grand Trunk Railroad of Michigan" across the seventeen miles of Berrian County. The line is projected to run from Ridgeway, near Port Huron, opposite Sarnia (the terminus of the Grand Trunk Railway of Canada), *via* Pontiac, Jackson and Niles, to the head of Lake Michigan, and thence to Chicago.

Journal of Railroad Law.

LIABILITY OF RAILROAD COMPANY FOR ACTS OF ITS OFFICERS.

The question of the liability of a railroad company for the acts of its officers arose in the case of Washburn *vs.* The Nashville and Chattanooga Railroad Company, in which case it was decided that a railroad company acts through the instrumentality of its officers and agents. If not prohibited by the charter, it may delegate its authority to its officers and agents, so far as may be necessary to effect the purposes of its creation. If the Superintendent of a railroad company be clothed with the power and authority of the Board of Directors, so far as regards the control and management of the trains, and all the arrangements connected therewith, he is the immediate representative of the company—the corporate executive officer—and the company is liable for an injury resulting from the negligence or improper order of the Superintendent, just as much as if it had emanated directly from an act of the company in its corporate capacity.

The opinion of the Court written by McKinney, J., contains a full statement of the facts, upon which the Court founded its decision as above stated. The following is the opinion of McKinney, J.—The plaintiff brought this action against the company to recover damages for an injury to his person, occasioned by a collision between two trains, on the defendant's road. Under the instructions of the Court, the jury found against the plaintiff.

It appears that about the 8th of December, 1857, a bridge on the road and perhaps a hundred yards of the track, were swept off by a flood, so that the trains were hindered from passing between Nashville and Chattanooga for some days otherwise than by keeping a train on each side of the breach in the road, and changing the passengers and baggage from one train to the other.

On the morning of the 14th of December, before the breach had been repaired, the Superintendent of the road directed Chilcutt, an engineer in the employ of the company, to leave Nashville with his train at the hour of 5 o'clock A. M., the schedule time of departure being 2½ o'clock P. M. The Superintendent informed the engineer that he would find a train in readiness on the other side of the breach in the road, and directed him to transfer his passengers and baggage to that train, and to go through to Chattanooga, stating that there would be no train from the latter place to Nashville that day. The agent of the company at Chattanooga, in ignorance of the order of the Superintendent, started a train from the latter place on the same morning, and on a curve in the road, the trains came in collision, whereby the plaintiff received a serious injury.

The telegraph wires were broken, so that no communication could be made in that way.

The respective conductors of the trains being entirely ignorant of the orders given at the opposite ends of the road, and neither having the least expectation of meeting a train, omitted the usual precautions to prevent a collision when running out of time. The proof shows that the train from Chattanooga was running on schedule time, but the other train was not.

It appears that the plaintiff was an engineer in the employ of the company. His train was lying idle at Chattanooga on account of the breach in the road; and on the day preceding the collision, he got upon another train to go to Nashville, on a private errand of his own, without permission, as it would seem from the proper agent of the company.

Chilcutt states that on his way to Chattanooga, on the day of the collision, the plaintiff got upon his train at Dechard's Station, a point between Nashville and the break in the road—and took his seat in the baggage car, the place where those who "ride free" should sit, and where he was sitting when the collision took place.

The proof shows that the Superintendent had the entire management and control of the "rolling stock," and also had the control and management of the conductors, engineers, brakemen, and all other employees of the road, all of whom were bound to obey his orders "according to the rules of the road."

The Court instructed the jury, in substance, that the Superintendent of the road and the plaintiff were both servants of the company; and that for an injury to the plaintiff, by the negligence or misconduct of the Superintendent, he could maintain no action against the company if there were no fault or negligence on behalf of the latter. That it made no difference that the one servant was higher in authority than the other, or that they belonged to different departments of the service. Nor did it make any difference that the plaintiff was not actually employed in the service of the company on the day the injury was received, unless he had abandoned the service of the company with the view of dissolving the relation of servant. The Court further stated, in effect, that the Board of Directors of the company was to be regarded as the principal; and that an employee of the board, though styled President or Superintendent, could not be so considered.

These instructions in reference to the facts of the case, are incorrect, we think, in several particulars.

The principle that a master is not liable for an injury received by one servant from the negligence of another, while both are acting in the common business of the same master—as applied to railway companies—is comparatively a new one everywhere, but especially in our Courts. It is a principle of great practical importance, and care must be taken that it be not applied to cases not clearly falling within it. In some of its incidents it can scarcely be considered as yet fully settled. Whether the rule is applicable to servants in different grades, or where they are subordinate the one to the other, or not in the same employment, are questions upon which there is some conflict of opinion in the American cases. In most of the cases, however, it seems to be thought that such a distinction is not maintainable; and that it is sufficient that both servants were engaged in the same general business.

In the view we have taken of the present case it is, perhaps, not necessary that we should very minutely consider to what extent the application

of the rule may be varied or modified by the different circumstances of particular cases.

We must be careful, however, that such a latitude be not given to the rule, as would enable the corporation to evade liability in all cases, by entrenching itself behind its officers and agents.

In the view of the Circuit Judge, the Superintendent of a railway company stands exactly upon the same footing as respects the applicability of this rule, with any other employee, however subordinate his position, and so of the President, and that the Board of Directors only, in view of the rule, is to be regarded as the principal or master. Upon this question we have been referred to no authority in point.

If this be correct, it will inevitably follow that the company cannot be held liable in a case like the present, unless it can be shown that the injury resulted from the direct action of the company in its corporate capacity. This is absurd. The corporation of necessity acts through the instrumentality of its officers and agents. If not prohibited by the charter, it may delegate its authority to its officers and agents, so far as may be necessary to effect the purposes of its creation. It must act in this mode, or not act at all.

The Superintendent may be said to be as respects this particular company, from the power shown to have been given him by the board, the immediate representative of the company—the corporate executive officer—intrusted for the time, with the power and authority of the Board of Directors, so far as regards the control and management of the trains, and all the arrangements connected therewith.

In this view, the company must be held liable for an injury resulting from the negligence, or improper order of the Superintendent, just as much as if it had emanated directly from an act of the company in its corporate capacity.

The matter of fact, that it was culpable negligence in the Superintendent to start a train from Nashville, out of time, without any precaution whatever to avoid a collision with a train coming in the opposite direction, is not denied.

But the instructions are erroneous in another respect. The principle stated above does not apply "where the servant injured was not, at the time of the injury, acting in the service of the master. In such case, the servant injured is substantially a stranger, and entitled to all the privileges he would have had if he had not been a servant." 6 Eng. R. cases, 580. Cited in 1 Am. R. cases, 568, in note.

The plaintiff, in the present case, may have been blamable for leaving his post of service without permission from the proper source; how that fact is, does not satisfactorily appear. But admitting he was improperly absent without leave, still he was received on another train of the company without objection by the conductor, who was intrusted with the duty of excluding all persons not lawfully entitled to be on the train. And whatever may have been the exact relation of the plaintiff to the company, under these circumstances it certainly cannot be said in the sense of the rule, or in any proper sense, that he was then acting in the service of the company. The fact that his absence from duty, without permission may have made him liable to an action by the company, does not affect the question before us.

For the foregoing reasons we think the rule is not applicable to the case.

The fact that the plaintiff was riding in the baggage car does not affect the case; though from the proof, that was the proper place for him to be, under the circumstances.

It is laid down in Redfield on R. 331–2, that "one being in the baggage car, with the knowledge of the conductor, will not preclude him from a recovery for an injury caused by a collision, even though he might, or would not have been injured if he had remained in the passenger car." 14 Howard, (U. S.,) 468.

Nor does it affect the question, that the plaintiff at the time of the injury was "riding free." The same author lays it down, "that the liabilities of the company attach although the passenger were riding upon a free ticket." Redfield on R., 328, and note. (See also, 14 Howard (U. S.) R., 468.

Upon the whole case, we think the judgment is erroneous, and it will be reversed.

Manassas Gap Railroad.

At a meeting of the stockholders of this company, held at Alexandria, Va., on the 7th inst., resolutions were passed empowering the President and directors of the company to negotiate for a transfer of its property and franchises to the bondholders or to the Orange and Alexandria Railroad Company, in order that the road may be speedily completed to Harrisonburg. In case of a failure to effect such negotiations, the directory are authorized to sell such property, rolling stock, etc., as is not absolutely necessary, and to remove the rails from one part of the road to another, for the purpose of constructing the road to such point as may be deemed best. The report of Mr. Marshall, President of the road, referring to the failure to complete the line to Harrisonburg, says he was disappointed in getting capital from Baltimore. He says:

The acts of the Legislature authorizing the Strasburg extension, and the incorporation of the Valley Railroad Company, which were proper for the purpose of giving to the people of the valley an outlet to the Baltimore market, give at the same time to Baltimore the route through Virginia to the West and South, which was the originally preferred route of the Baltimore and Ohio Railroad Company, which, though denied, was believed to be an object earnestly coveted by that company. The offer of this route by any company empowered with authority to make the road, was expected at once to open the Treasury of the Baltimore and Ohio Company in order to assist the construction of this road.

The opportunity was thought favorable to the Manassas Company to get means for the purpose of reconstructing the Valley and Piedmont sections, and having the Valley Railroad Company in view, resolutions were passed by the stockholders empowering the President and directors of this company to make sale of its Valley interest upon terms which would secure both Valley and Piedmont sections of the road, and relieve the company of its bonded and floating debt. Representations from both the Valley Railroad Company and the Manassas Company united in presenting this subject to the Baltimore and Ohio Company, through its President, John W. Garrett, Esq. The application was unsuccessful—Mr. Garrett having declined to give any pecuniary assistance for the present, upon the ground that the resources of his company were taxed to the utmost with his different operations at home, and further, that the charter of the Valley Company was not satisfactory. A further effort was made to interest President Garrett in the more limited work of building the connection of the Winchester and Potomac and Strasburg connection, from which some results might follow favorable to the restoration of Manassas. This effort was made, however, with like disappointment.

Whatever may be the future development of President Garrett's policy respecting this Valley line, his convenient season is entirely incompatible with the pressing wants of our stockholders and bondholders. The interest of all parties demands the reconstruction of the whole line at the earliest period possible. Possessed of no adequate means to accomplish this end, we can only look to parties outside the present organization who may be interested in the work. The bondholders of this company and the Orange and Alexandria Railroad Company have each a deep stake in the return of Manassas to its highest prosperity.

The stockholders re-elected E. C. Marshall, Esq., President of the company. The company has recovered all its scattered property, in the way of engines, rolling stock, &c., most of it much improved. The earnings of the company since the war for rented engines and other property was $41,545, and expenses $37,222—balance in favor of the company $4,323.

New York and Albany Railroad.

Articles of association have been filed in the office of the Secretary of State, at Albany, organizing "The New York and Albany Railroad Company," to build a railroad on the west side of the Hudson River. The directors named in the articles are: Robert L. Kennedy, John Jacob Astor, Jr., Daniel Butterfield and John McB. Davidson, New York; Homer Ramsdell, Newburg; Thomas Cornell, Rondout; Jonathan H. Hasbrouck, Kingston; Thomas W. Olcott, Robert H. Pruyn, Erastus Corning, Jr., John Tracy, Samuel Schuyler and Joseph H. Ramsey, Albany.

At a meeting of the directors, held at the Astor House on the 17th instant, Joseph H. Ramsey was elected President; Daniel Butterfield, Vice President; Thomas W. Olcott, Treasurer, and Erastus Corning, Jr., Secretary.

The preliminary surveys under the direction of C. W. Wentz have already been commenced. Books will be opened to fill up the balance of the stock on the 26th inst., and remain with the several directors and at the following banks until further ordered: Bank of Commerce, New York; National Mechanics' and Farmers' Bank, Albany; National Tanners' Bank, Catskill, and Banks of Catskill, First National Banks of Coxsackie and Saugerties, Kingston, Rondout and Newburg, and Rockland County Bank, Nyack.

Richmond and Newport News Railroad.

The survey of this road, under the direction of Ambrose C. Dunn, Chief Engineer, was completed on the 31st ult. The whole length is ascertained by this survey to be sixty-nine miles, with a maximum grade of twenty-two feet. It will be nearly a straight line, having few curves, and none less than one mile radius. There will be but one bridge—of fifteen hundred feet, over the Chickahominy. The company are building the road themselves, and are rapidly going on with the grading from Newport News towards Richmond.

☞ A locomotive engine passed over the new railroad bridge across the Susquehanna, at Havre de Grace, on the 20th. The road will be formally opened for travel on Monday, 26th.

Pacific Mail Steamship Co.

In addition to the dividend of five per cent. for the quarter ending October 31, just declared, payable on the 1st of December, this company has also declared a dividend of 33⅓ per cent. in full paid stock to all holders at the closing of the books on the 20th of November. The capital of the company now stands as follows:

Original capital	$10,000,000
Five millions of new capital, sold and invested in $10,000,000 of U. S. 6s of 1881	5,000,000
Five millions issued under the 33⅓ per cent. dividend	5,000,000
Total capital	$20,000,000

The assets on its ships, coal depots, workshops and materials:

Cash surplus	$5,000,000
U. S. 6s of 1881, at par	10,000,000

The company issue at once a certificate representing the stock dividend, and also accept orders from parties selling, which can be placed with the original certificates, when hypothecated, thus giving the lender all the security which will be had on the 2d of January, 1867, when the new certificates will be issued.

Grand River Valley Railroad.

The prospects of this company are said to be of the most gratifying character, and its early completion confidently expected. The grading, culverts, bridges, etc., between Jackson and Charlotte, are finished and ready for the iron, and a large force is engaged in opening the line, grading, etc., on 28 miles north of Charlotte. It is intended to have this last named section of the road ready for the iron by the 1st of July next. Work is in progress to connect the road with the Michigan Southern and Northern Indiana Railroad through the city of Jackson. A report of the Engineer, showing the progress of the work, is being prepared, and will soon be published.

Interest and Dividends.

The Chicago and Northwestern Railroad Co. have declared a dividend of seven per cent. on the Preferred Stock (less the Government tax) payable December 17th, in the preferred stock of the company. Fractional parts of a share will be paid for in cash.

The Pacific Mail Steamship Company have declared a dividend of five per cent., out of the net earnings of the quarter ending October 31, payable at the office of the company December 1.

The Northern (N. H.) Railroad Company have declared a semi-annual dividend of 4 per cent., yayable December 1.

The Western Union Telegraph Company have made a half-yearly dividend of 2 per cent.

The Trustees of the Illinois and Michigan Canal have declared a dividend of five per cent. on account of principal of Registered Illinois and Michigan Canal Bonds, payable at the office of the Treasurer, No. 89 Maiden lane, on and after Jan. 2, 1867.

☞ The following gentlemen have been re-elected directors of the Pacific Mail Steamship Company for the ensuing year, namely: Allan McLane, Howard Potter, Francis Skiddy, Charles Augustus Davis, William Denniston, Leonard W. Jerome, Elisha Riggs, Moses H. Grinnell and Cornelius K. Garrison.

Baltimore and Ohio Railroad.

The annual meeting of this company was held in Baltimore on the 19th inst. Wm. J. Albert, Esq., was chosen Chairman, and Joshua I. Atkinson, Esq., Secretary. John W. Garrett, Esq., the President of the company, stated, on behalf of the directors, that a large amount of the accounts of the company with the Government for services still remain unadjusted. A system had been adopted under which payments on account had been received, and adjustments were to be subsequently made. The company had succeeded in obtaining such settlements as enabled the Board to present the annual report for the fiscal year, terminating 30th September, 1864, which the President now submitted. Efforts continue to be made to obtain the final adjustments, so that the remaining reports could be finished. As early as this could be accomplished the further reports would be made.

The report was then read by the Secretary. This report is being printed in pamphlet form and will be ready for distribution in a short time.

After reading of the report, no other business being presented, the stockholders' meeting adjourned for the election of directors to serve for the ensuing twelve months.

Messrs. William J. Albert, Albert Schumacher and Miles White acted as judges, and, on counting the ballot, the following gentlemen were found to be unanimously re-elected by a vote of 37,423 shares, viz: Johns Hopkins, Samuel W. Smith, Francis Burns, Wm. A. Hack, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, Wm. Heald, Galloway Cheston, Wm. W. Taylor, Samuel Kirby.

Cincinnati & Indianapolis (Junction) R. R.

We learn from the Cincinnati *Gazette* that the work on this great central route between Cincinnati and Indianapolis is progressing rapidly, and by the 15th of December the cars will be running to Rushville, half a month in advance of the contract time. The completed miles of this road will then be as follows:

Hamilton to Connersville	42 miles.
Branch to Cambridge City	12 "
Connersville to Rushville	18 "
Total	72 "

Work on the main line from Rushville to Indianapolis will be pushed vigorously forward, and the expectation is that it will be completed by the 1st of September, 1867.

☞ Gen. Fremont has sold the Southwest Pacific Railroad to the Southwest Pacific Company, a corporation created by an act of the General Assembly of the State of Missouri, approved March 20, 1866. The consideration is $1,300,000. This will not retard the progress of the road at all, but rather enhance it, as the corporation is made up of the best men, financially and otherwise, in the country.

☞ The St. Louis and Iron Mountain Railroad has been sold to J. J. McRayand and others, representing Eastern and St. Louis capitalists, for $550,000. The Cairo and Fulton Railroad has also been sold to the same party for $350,000, but the sale has not yet been ratified by the Governor.

☞ Mr. Isaac Morse, of Colesville, Md., has been appointed Superintendent of the Chesapeake and Ohio Canal.

Iron Railroad.

This road is 13 miles in length, extending from Ironton, on the Ohio River, to Centre Station. At a recent meeting of the directors of this company, a proposition was favorably entertained which provided for the transfer of the road to parties who would agree to complete it to a connection with the Portsmouth branch of the Marietta and Cincinnati Railroad within one year. The Ironton *Register* says that the subject is to be brought before the stockholders at an early day for their final action.

Lynchburg and Danville Railroad.

This company was organized at Lynchburg, Va., on the 15th inst., by the election of Francis B. Deane, Jr., of Lynchburg, President, and E. F. Keene, Walter Coles, R. E. Withers, A. J. Clarke and John S. Langhorne, Directors, for one year.

☞ Hon. John Z. Goodrich of Stockbridge, has been appointed President of the Housatonic Railroad (between Pittsfield, Mass., and Bridgeport, Ct.,) in place of Charles Hunt, resigned. Mr. Goodrich will assume the duties of his office on the 1st of December.

☞ The Vermont Senate has passed bills authorizing the town of Woodstock to raise a sum not exceeding $50,000, and Sherburne, Bridgewater, Plymouth, Hartland and Hartford $30,000 each, to construct a railroad from Woodstock to some point on the White River.

☞ The Lehigh Coal and Navigation Company give notice that their canal will close for the season on the 4th of December next.

☞ The New York Canals will be closed on the 12th of December, except the Champlain Canal, which will be closed on the 5th of December.

To Engineers and Boiler Owners.

THE ANTI-INORUSTATOR,

A certain means of removing scale from steam boilers and keeping them clean. The Anti-Incrustator effects a very decided saving in fuel and greatly lessens the danger of boiler explosions.

This instrument works

IN THE STEAM-CHAMBER OF THE BOILER,

silently and without shock, and without the use of acids, powders or compounds, and the first expense is the only one attending its use.

The New York Anti-Incrustation Company are now prepared to equip steam boilers with their Anti-Incrustator and

GUARANTEE

it will remove scale or incrustation from boilers and keep them free from it.

Every information given at the office, No. 78 William Street, first floor, back room.

President.—BARRET H. VAN AUKEN.
Treasurer.—WILLIAM R. GARRISON.
Secretary.—J. R. ESTILL.
Directors.—B. H. Van Auken, C. K. Garrison, Charles Roome, Homer Ramsdell, Joseph E. Coffee, Enoch Ketcham, H G Leisenring. 3m47

Railway Purchasing Agent.

A PERSON of experience, thoroughly acquainted with the business and markets, desires to form an arrangement with some RAIL ROAD CORPORATION of standing, to act in the capacity of Purchasing Agent.

References unexceptionable.

Our Coal Supply.—New Avenues to the Anthracite Region.

The coal fields of the United States extend over an area of one hundred and forty-six thousand square miles—those of Great Britain about twelve thousand square miles. The amount of coal mined in the United States in 1865 was seventeen and a half million tons, which will be increased this year to upwards of twenty million tons. The mines of Great Britain produced in 1865, ninety-eight million tons. Those facts, in contrast, forcibly illustrate the inexhaustible resources of the United States, and indicate a future of almost fabulous National wealth; but at the same time it is too apparent to be denied, that notwithstanding the very great advantages of the rarest facilities in mining, and close proximity to the great tide water markets, the development of these vast fields has not kept pace with the internal improvement and manufacturing progress of the country. The reason for this has been the prevalence for many years, particularly in the principal anthracite producing sections, of a most pernicious system by which the chief transporting companies and a few strong operators, who are both miners and dealers in coal have been enabled to take and keep the control of the market; regulating prices by an increased or diminished supply, and advances in the rates of transportation to meet their purposes. The natural tendency of such a system is to crush out all true enterprise, while it is the direct source of all those troubles and difficulties so constantly occurring in those regions where by its practice the trade is rendered uncertain, and the living of the miner precarious. It yields immense profits to transporting companies, but its influence on the trade is unnatural and disastrous, checking the growth of manufacturing industry and imposing upon all classes of the community an onerous and needless tax. When, as within the last two years, we see the iron mills and furnaces on the Lehigh and along the Schuylkill, with the means of both rail and water transportation, absolutely suspending operations in consequence of the heavy cost of fuel, we realize that there are evils which even tariffs will not correct; that competition in coal transportation is as necessary as in mining, and that we must look to new avenues to secure for our manufacturers, our steam marine, and all classes of consumers the full benefits of a constant and ample supply of cheap fuel.

The principal coal producing State is Pennsylvania, and her mines as well from their advantageous location as their prolific and practically inexhaustible character, must continue to be drawn upon for many years to come for the chief supply of the seaboard markets. The great anthracite field, indeed, lying east of the Susquehanna, is almost an appendage of our metropolis, while new routes of transportation will in a very short time bring to us the soft coals of the Broad Top and Allegheny regions at greatly diminished cost. The first shipments from the Lehigh region were made in 1820, in which year three hundred and sixty-five tons were sent to market. The Schuylkill Canal was opened two years later, and in 1829 the Delaware and Hudson Canal. In 1830 the supply had increased to 174,734 tons; in 1840 to 841,584 tons; in 1850 to 3,177,537 tons, and in 1860 to 8,151,567 tons. The total supply of anthracite in 1865 from the Schuylkill, Lehigh and Wyoming regions was 9,488,396 tons, being half a million tons less than the previous year. The yield of semi-anthracite from the Broad Top and Susquehanna River regions was 479,991 tons, and of bituminous from the Allegheny and other regions 3,679,632 tons. The product of hard and soft coal in all the States in 1865, was as follows:

	Tons.
Pennsylvania	13,648,019
Ohio	1,440,159
Illinois	1,160,622
Maryland	903,495
West Virginia	279,343
Indiana	158,438
Kentucky	91,113
Missouri	87,072
Iowa	62,508
California	32,877
Virginia	30,958
Washington	19,214
Michigan	17,097
Tennessee	13,662
Rhode Island	8,060
Oregon	2,048
Kansas	1,913
Utah	817

The product of the various regions of Pennsylvania was as follows:

		Tons.
Schuylkill Region,	(Anthracite)	3,735,802
Lehigh "	"	2,040,913
Wyoming "	"	3,254,519
Shamokin "	"	457,162
Broad Top "	(Semi-anthracite)	315,996
Treverton "	"	153,995
Allegheny "	(Bituminous)	2,897,000
Mercer "	"	288,000
Blosburg "	"	394,632
Ridgway "	"	100,000

Of the total supply of anthracite coal in 1865, upwards of two million tons were consumed on the lines of the different avenues to tide water. There were sent to New York and Elizabethport 3,400,000 tons; to Philadelphia 988,219 tons, exclusive of 2,051,202 tons left at Richmond by the Reading Railroad. The Delaware and Lackawanna road sent 125,000 tons to Syracuse, and 41,000 tons to Ithaca, and the Pennsylvania Coal Company 530,000 tons to Newburg by rail. Of the bituminous coal of the Allegheny region 1,200,000 tons were sent down the Ohio, a million tons were taken for local consumption, and the balance sent east. The product of the Mercer mines was chiefly consumed at Erie, Buffalo and Cleveland. The mines on the Philadelphia and Erie road were but partially worked, and their product was chiefly consumed on the line of that road.

The annual increase in the supply, even within the last five years, has scarcely averaged half a million tons, including both hard and soft coal, whereas the condition of the market has been such as to fully warrant an annual addition of a million and a half tons at least, without incurring the risk of ruinous prices. The indications are, indeed, that the increase the present year will even exceed two million tons, and yet there is no where a surplus stock, or any likelihood that prices the coming winter will be materially lower than those of last. Cheap fuel is a great desideratum to the communities of our cities and manufacturing towns, and in the present state of industrial enterprise, an increase henceforward of two million tons annually will no more than insure an adequate supply, since cheapness, that is to say, a uniform rate of from four to five dollars per ton, would greatly stimulate consumption. Nor is it likely that much higher rates than these are to prevail for the future. The various lines of railroads and canals penetrating the coal regions of Pennsylvania are all preparing for increased business. The Delaware and Hudson Canal Company have perfected arrangements for rail communication with their mines; the Lehigh Navigation Company have added to their water transportation facilities by leasing the Delaware Division Canal, and are at the same time pushing their road west to the Susquehanna, and east to the Delaware; the Lehigh Valley Railroad Company are also extending their road into the Wyoming Region, and various other roads are projected, looking to the opening of new mines and new markets. In the meantime the supply of soft coal from the Allegheny Region over the Pennsylvania Railroad is steadily on the increase, amounting the present year to nearly a million and a half tons; the Philadelphia and Erie road is carrying both east and west large quantities of coal from the prolific fields through which that road runs for a hundred miles; the enlargement of the Pennsylvania Canal is in vigorous progress, and in connection with the enlargement of the Union Canal from the Susquehanna River to the Schuylkill Canal at Reading will complete a direct line of water communication between the semi-anthracite mines of the Broad Top region and tide water on the Delaware.

In addition to these various enterprises, all of which are important, a number of influential capitalists of this city and Philadelphia, having large interests in the Schuylkill and Wyoming Regions, have projected a scheme that under wise direction is likely very early to assume commanding magnitude, and to exercise a powerful influence in the development of the whole anthracite region. In view of the monopoly maintained by existing coal carrying companies, and its injurious influence on mining enterprise and the growth of the trade, the Pennsylvania Legislature at its last session chartered a company known as the Manufacturers' and Consumers' Anthracite Railroad Company, with authority to construct an additional line of road between Philadelphia and the Schuylkill Region, with a branch by the most feasible route from a point near the head of the Schuylkill Valley to the Delaware River, and thence to this city. During the summer the whole ground has been carefully examined by experienced and competent engineers, and at recent conferences the projectors of the enterprise have expressed the utmost gratification at the character of their reports. From Philadelphia it is believed a route can be secured scarcely less favorable for coal transportation than even the Reading road, and but a very few miles greater in extent, while the route to the Delaware lies nearly in a straight line, and is unexpectedly free from heavy gradients. The charter of the company authorizes the use of any existing road as a part of the main line, if desirable, and the plan of the enterprise as now contemplated comprehends, through the combination of existing interests, as far as may be, a great line northward from Philadelphia through the Lehigh and Wyoming Regions to Middle and Western New York, intersected in the vicinity of Perryville on the Lehigh by an air line from this city, and extending thence down the Schulykill Valley, thus opening the whole region east of the Susquehanna both to this city and Philadelphia by routes that will defy competition.

The details of the plan of operations embraces an immense and perfectly appointed shipping depot in the vicinity of this city, and another of like character on the Delaware adjacent to League Island, the latter to be reached from above Philadelphia by the Connecting Railroad now in course of construction and extensions of the Pennsylvania Railroad below the city. The peculiar advantages of such a depot, should League Island be selected as the site for a national naval station for the construction of iron vessels of war, would be very great if only with respect to the requirements of the Government in receiving its supplies of coal and iron; but there are other considerations making the location specially desirable. It is at a point on the Delaware that is almost wholly free from ice during the winter, when the Reading Railroad wharves at Richmond are inacessible, and moreover, practically has the advantage of a whole day for sea-going colliers over those loading at the Richmond wharves.

The charter of the company is exceedingly liberal in its provisions, and even with a less inviting field of operations the enterprise would attract the investment of capital. As it is, it is in eminently strong and experienced hands, and cannot fail to become the great coal carrier of the country, effectually correcting existing abuses in the carrying trade, and permanently cheapening the price of coal, since the charter limits the charges for transportation to two cents per ton per mile when carried in the cars of operators, and two and a half cents per ton when the cars are provided by the company, being about half the rates heretofore exacted by the monopolists.

Eel River Railroad.

This road was projected some years since to run from Logansport, Indiana, through the counties of Cass, Miami, Wabash, Kosciusko, Whitley, Allen, Noble and DeKalb to Butler Station, on the Air Line road, seventy-one miles west of Toledo and three miles west of the Ohio State line. The Logansport *Pharos* says that there is a prospect of its speedy completion. The sum of $1,500,000 has been borrowed for the construction of the road, and the work is to be prosecuted at once. It will pass through the following places: Logansport, Mexico, Paw Paw, Stockdale, Laketon, Manchester, Liberty Mills, Springfield, Columbia City, Auburn, Cherubusco and Butler Station.

Burlington and Missouri River Railroad.

The earnings of this road for the years ending April 30, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$146,342 93	$170,386 54
" freight & express.	276,503 36	286,131 17
" mails	5,982 71	5,377 95
" telegraph	1,155 18	2,589 08
" miscellaneous	1,621 80	2,260 53
	$431,605 98	$466,745 27
Expenses, viz:		
Track	$34,464 98	$71,896 15
Bridges	15,478 24	41,256 48
Buildings, etc.	3,596 89	5,996 88
Engines	12,023 85	14,027 16

Loss and damage	3,242 45	3,370 51
General office	8,321 55	10,197 80
Boston office	3,140 52	3,149 79
Taxes	18,726 26	20,188 03
Line expenses	3,152 43	1,488 82
Telegraph	2,611 14	3,576 49
Permanent improvement	2,218 47	6,552 83
Miscellaneous	4,319 35	7,812 64
	$185,275 38	$285,328 11
Balance of earnings	$246,330 60	$181,417 16

The ratio of operating expenses to earnings in 1865–'66 is 59.7 per cent., against 42.4 per cent. in 1864–'65. The report says:

The earnings of our road the past year have a little exceeded those of the preceding year, and our operating expenses, owing to the continued high price of labor and materials, have also been greater, as appears from the following comparison:

	Receipts.	Operating	
1866	$466,745 27	$285,328 11	$181,417 16
1865	431,605 98	271,259 18	155,346 86

As was foreshadowed in our last Report, the expenditures for renewal of bridges, iron, &c., for the year, have been heavy. But though they were sufficient to exhaust all our net receipts, above interest payments, they could not be deferred, especially as additional business was to come upon the road by its extension.

A year ago we referred to a plan by which the Chicago, Burlington and Quincy Company had offered to aid us in extending our road. By the assistance thus offered, and our land mortgage bonds, we secured means to put the work under contract for fifty-six miles to Chariton, and it is now in progress with a prospect of completion before the first of next January.

The addition of seventy-five per cent. to the mileage of the road, it is expected will increase the earnings proportionally, giving us the year after opening the new road, over $800,000, which amount we hope to have very soon doubled by the development of the country certain to result from giving it railroad facilities.

We are as unwilling to stop our road at Chariton, as we were to hold up at Ottumwa, and shall certainly go on with it at once if we can get means. Fifty miles further will carry us to the border of our lands granted in aid of construction which lie on both sides of the road the remaining one hundred miles to the Missouri River.

These lands have been but of little value while distant from communication by railroad with the rest of the world. The extension of the road through them will render them desirable for settlement as they are fertile and well watered, and will at once give them a market value. As these lands are held for a sinking fund to pay off the

land bonds, and are believed to be ample for retiring the whole amount to be issued under the mortgage, if the road is built through them before they are put upon the market, there is a double motive for going right forward with the road. We make our lands worth enough in a few years to pay off our mortgage, at the same time that we have a road which will, like the Chicago, Burlington and Quincy road increase in value yearly with the development of the country which it serves.

The land grant of our company in Nebraska, for aiding the extension of the road across that territory, to the one hundredth meridian, referred to in our last Report, brings us over three millions of acres, as appears from the report of our agent at Washington. We have too much on our hands in Iowa, just now, to do more than the preliminary work in Nebraska for the present. But though we should like to go on with the Nebraska road at the same time, and have it ready for use when we reach it, any delay which circumstances render unavoidable, will not cause serious inconvenience to us and our eastern connections, or their patrons, owing to a change of route at the east end of the Union Pacific road, which brings it, in its approach to the Missouri River, near Bellevue, within six or eight miles of the terminus of our Iowa road.

At a moderate expense, we can make a temporary connection with that road on terms mutually advantageous, and thus form as direct a line from the east as far through toward the Pacific as this Pioneer road, now open one hundred and twenty-five miles, and making rapid progress, shall from time to time to be expended.

The following figures show that we have not sold any of our mortgage bonds yet. All that the mortgage permits us to issue, viz., $18,000 per mile of road, will be required in construction of the section now under contract.

Our construction account now stands as follows:

On first division, Burlington to Ottumwa		$2,538,033 96
On second division, Ottumwa west		457,876 24
On accretions at Burlington, including buildings		46,109 30
On equipment		173,897 11
		$3,215,916 61

We obtained our means as follows:

Our financial statement, which in some of its features had become stereotyped in our reports, is considerably changed in the foregoing, nearly half a million of dollars appearing to construction west of Ottumwa.

The equipment of the road consists of: 11 locomotives, 8 passenger, 5 baggage, and 267 freight, coal, etc., cars. Three locomotives, two baggage and eighty-two freight cars have been added during the year. Number of passengers carried, 83,025; of which 21,224 were through, and 63,801 way. Of the through passengers, 7,676 went east, and 13,548 west. Of the way passengers, 29,886 went east, and 33,914 west. Total mileage of passengers, 3,236,065. Tons of freight moved, 76,820; of which 46,409 were through, and 30,411 way. Of the through freight, 23,249 tons were moved eastward, and 23,160 westward. Of the way freight, 17,245 tons were moved eastward, and 13,166 westward. Total mileage of freight, 4,559,884. Total number of miles run by traffic trains, 125,325. Total car mileage, 1,262,625.

The receipts and disbursements for the year ending May 1, 1866, were as follows:

Balance as per last report	$80,405 77

The Directors chosen at the annual meeting, June, 1866, are:

President.—JAMES F. JOY.

Directors.—Robert B. Forbes, Nathaniel Thayer, John M. Forbes, John W. Brooks, Erastus Corning, James F. Joy, James W. Grimes, Elbridge D. Rand, Robert S. Watson.

Treasurer and Secretary.—JOHN N. DENISON.

Superintendent.—CHARLES E. PERKINS.

Chief Engineer.—H. THIELSEN.

Western Union Telegraph.

This company have just opened their newly completed line overland to California, *via* Denver City, Bridger's Pass, and the overland stage route as now traveled. This line is in addition to the old line *via* Fort Laramie and the South Pass. The new line is constructed in a superior manner, and there will probably be little future interruption in telegraphic communication with the Pacific. The company have also opened their new line between Salt Lake City and Montana, thus bringing the mining districts of that country into direct communication with the rest of the telegraphic world.

Liability of Telegraph Co. for Mistake in Message.--Measure of Damages.

The case of Rittenhouse *vs.* The Independent Telegraph Company will be found of general interest as involving questions of law of the utmost importance both to Telegraph Companies and the public. The case arose in the court of Common Pleas of this city, and was brought to recover of the defendant, a corporation having and controling a line of telegraph between the city of New York and Washington, D. C., damages for a mistake in a message transmitted over the defendant's line, by the plaintiffs, at Washington, to their brokers, Drexel, Winthrop & Co., at New York.

It was shown on the trial, that on the 14th day of October, 1863; the plaintiffs delivered to the defendant at the office in Washington, the following message, directed to Drexel, Winthrop & Co.:

"If we have any old Southern on hand, sell same before board—buy five Hudson at board—quote price."

"RITTENHOUSE, FANT & Co."

The message received by Drexel, Winthrop & Co., was as follows:

"If we have any old Southern on hand, sell same before board—buy five hundred before board—quote price."

"RITTENHOUSE, FANT & Co."

By an understanding between the plaintiffs and their brokers, the words "old southern" in the message meant Michigan Southern Railroad Stock. The works "five Hudson" meant five hundred shares of Hudson River Railroad Stock; and the word "board" meant the stockbrokers' board in New York. The agents, without suspicion of the error in the telegram, sold all the Michigan Southern of the plaintiffs' before the morning board, and purchased five hundred shares of the Michigan Southern stock at the board for the plaintiffs, at forty-four thousand three hundred and thirty-seven dollars and fifty cents, that being the lowest price for which they could be bought. Immediately after the purchase, the brokers notified the plaintiffs by telegraph, of the purchase, and price. The same day, the plaintiffs directed their brokers, by telegraph, to cancel the errroneous sale and purchase of the Michigan Southern Stock, and to purchase the five hundred shares of Hudson River Stock. The message was received late in the day, and after the board adjourned. The brokers sold on the street, the same afternoon, the five hundred shares of Michigan Southern, for the best price they could obtain, forty-three thousand eight hundred and sixty-two dollars and fifty cents, being four hundred and seventy dollars less than they had to pay for them at the board. They also purchased on the street five hundred shares of the Hudson River Railroad stock, as directed by the plaintiffs, at one hundred and thirty nine dollars and fifty cents per share, that being the lowest price at which they could be obtained. The lowest price at which the same stock was sold at the morning board on that day was one hundred and thirty-six dollars per share, and the average price was one hundred and thirty-six dollars and seventy-five cents; making a difference between the lowest price at the morning board, and the price paid by the plaintiffs' brokers, on the whole five hundred shares, of one thousand seven hundred and fifty dollars, and a difference between the average price at the morning board, and the price paid, of one thousand three hundred and seventy-five dollars.

The broker testified that had the correct despatch been received by him, he would have purchased the five hundred shares of Hudson River stock, for the plaintiffs, at the first board in the morning.

The testimony on behalf of the plaintiffs being closed, the defendant's counsel moved to dismiss the complaint, on the following grounds:

1. That the message as delivered by the defendant to Drexel, Winthrop & Co., was so indefinite and uncertain in its directions to buy, as to put them upon inquiry as to its meaning; which was overruled by the court.

2. That the words five hundred in the connection in which they were used in the message as delivered, conveyed no authority to Drexel, Winthrop & Co., to purchase Michigan Southern Railroad stock; which was overruled by the court, the court deciding that the message as delivered, authorized Drexel, Winthrop & Co. to purchase five hundred shares of Michigan Southern Railroad stock.

3. That the purchase of five hundred shares of Michigan Southern Railroad stock, by Drexel, Winthrop & Co., was not a legitimate consequence or result of the defendant's error in the delivery of the message; which was overruled by the court.

4. That on discovery of the error in the message as delivered after the purchase of Michigan Southern Railroad stock, it was the duty of the plaintiffs, or their agents, Drexel, Winthrop & Co., to notify defendant of the purchase, and give the defendant an opportunity to adopt it, and assume the consequences thereof. The court sustained this point, and held and decided that as no such opportunity was given the defendant, but on the contrary, the plaintiffs sold this said stock without consulting the defendants, the plaintiffs could not recover any loss incurred by such purchase and sale. To this ruling, the plaintiffs' counsel excepted.

5. That the purchase of the Hudson River Railroad stock was a voluntary purchase, made with full knowledge on the part of the plaintiffs of the error in the delivery of the message, and of the market price of said stock, and that the damages alleged and claimed by the plaintiffs to have resulted therefrom, were speculative merely, and did not result from the defendant's error. The court overruled this point, and the defendant's counsel excepted.

6. That the purchase of Hudson River Railroad stock made by Drexel, Winthrop & Co., was not made in accordance with the directions of the plaintiffs, inasmuch as such purchase was not made at the board, and the defendants could not be liable thereon; which was overruled by the court, and the defendant's counsel excepted.

7. That the negligence and carelessness of the plaintiffs and their agents, in misconstructing the telegram contributed to the injury alleged, and the plaintiffs could not recover; which was overruled by the court, and the defendant's counsel excepted.

8. That after the discovery of error, and before purchasing the Hudson River Railroad stock, it was the duty of the plaintiffs to notify the defendant, and having omitted to do so, the plaintiffs could not recover for the loss on the purchase; which was overruled by the court, and the defendant's counsel excepted.

The court thereupon decided, that the plaintiffs were entitled to recover of the defendant the sum of one thousand three hundred and seventy-five dollars, with interest thereon from the 14th day of October, 1863, amounting in all to the sum of one thousand four hundred and twenty-five dollars and eighty-nine cents, and entered judgment accordingly.

From the judgment entered on this decision, the defendant appealed to the General Term.

By the Court.—BRADY, J.—The dispatch written by the plaintiffs was an order to their brokers here to sell their Michigan Southern stock and to buy five hundred shares of Hudson River Railroad stock. The language employed, however indefinite to others was intelligible to the brokers. The dispatch written was not sent, and the effect of the error was to make it an order to sell the shares of Southern, and to buy five hundred more. As to this the erroneous dispatch is neither uncertain nor indefinite. No other interpretation can be fairly given to it. The evidence established the fact that the use of words "five Hudson," by an understanding between plaintiffs and their brokers, meant five hundred shares of the Hudson River Railroad stock, and also, that the erroneous dispatch was understood to be an order to purchase five hundred shares of the Michigan Southern, and which, as before suggested, was the only conclusion to be drawn from the language employed. These views dispose of the exceptions to the sufficiency of the evidence to warrant the findings of fact upon which the judgment is based. The plaintiffs, on learning that an error had been committed, again directed the purchase of Hudson River Railroad stock, and were entitled to the advantages of such purchase at the rates prevailing on the day of the date of the dispatch, without reference to the session of the board, when the dispatch was received.

The omission to buy at the board on that day arose from the defendant's misconduct in sending the dispatch, and it became the duty of the broker under his instructions to make the purchase at once. The defendants having placed it beyond the power of the plaintiffs' brokers to make the purchase in the particular manner indicated, they cannot avail themselves of the fact that the purchase was not made in that mode. They cannot take advantage of their own wrong, particularly when it no where appears that they were injured by the circumstance. The prices paid were the lowest at which the stock could be obtained, and the defendants had the benefit of that fact. The purchase was voluntary, it is true, but it was an act which the plaintiffs had the right to perform, growing out of their relations with the defendants, established by the contract on the part of the latter to transmit the dispatch faithfully. These views are responsive to the exceptions taken to the legal conclusions arrived at upon the trial, and leaves but one to be considered.

The plaintiff's claim for a difference of $475 on the sale of the five hundred shares of Michigan Southern, was disallowed, upon the ground that the stock was, in legal effect, purchased on defendants' account, and could not be sold without some notice to them. I think this ruling was a

proper one, the relations of the parties being considered. If the plaintiffs intended to disavow the purchase, the defendants should have been notified thereof, and in that way enabled to keep the stock or not, as they might deem most advisable. By exercising the act of ownership in the sale made, they have adopted the purchase, and the sale must therefore be regarded as on their account. But if this view be incorrect, there can be no doubt that the defendants were entitled to notice of the mistake made by them, before any sale of the stock purchased, in pursuance of their erroneous dispatch, was made.

For these reasons the judgment must be affirmed.

Canadian Railways.

The following is an official statement of the Traffic Returns of the Canadian Railways for the month ending October 31, 1865 and 1866:

Railways.	Passengers.	Mails and sundries.	Freight.	Total 1866.	Total 1865.	Miles in operation. 1866.	Miles in operation. 1865.

☞ The Bennington and Rutland (late Western Vermont) Railroad has been leased to the Vermont Central road for at least one year from January next, when the lease to the Troy and Boston Railroad Company will expire.

☞ A railroad is contemplated from Shelburne Falls, Mass., to Wilmington, Vt., connecting the new line to New Haven with the Western Vermont line, thus making the most direct route to the Sound.

☞ The new route to Norfolk from Philadelphia, via Philadelphia, Wilmington and Baltimore and Delaware Railroads, was formally opened on the 26th ult.

Flint and Holly Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: H. H. Crapo, H. M. Henderson, J. B. Walker, Pardon Tillinghast, J. C. Delano, H. W. Seabury, Thomas Knowles. President, H. H. Crapo; Secretary, J. B. Walker; Treasurer, G. L. Denham. This road is 18 miles in length, extending from Holly, (a point on the Detroit and Milwaukee Railroad, 47 miles from Detroit,) to Flint, where it connects with the Flint and Pere Marquette Railroad, completed and running thence to East Saginaw, a further distance of 35 miles. The affairs of the company are represented as being in a highly prosperous condition. G. C. Kimball is Superintendent of the Flint and Holly Railroad, and H. C. Potter of the Flint and Pere Marquette.

Virginia Railway Connection.

The tunnel for the connecting link between the Richmond, Fredericksburg and Potomac and Richmond and Petersburg Railroad is progressing satisfactorily. The brick arching for the western end is completed, and the workmen were putting the finishing touches upon the eastern end a few days since. Thus three hundred feet of the archway has been completed in the most substantial manner, leaving three hundred and thirty-three feet in the centre yet to be done. This, with the air-line railroad from Alexandria to Fredericksburg, now in progress of construction, will greatly facilitate the transmission of mails to the South. The work on the latter road is commenced from Alexandria to Mount Vernon, and is progressing favorably.

Memphis and Little Rock Railroad.

We learn from the Little Rock (Arkansas) *Conservative*, that the Legislature of that State has relieved the Memphis and Little Rock Railroad Company from the payment of the loan of one hundred thousand dollars made by the State, formerly, and that the lands of the road have been exempted from taxation for five years. This action on the part of the Legislature will doubtless result in the early completion of that important road.

The *Conservative* also notices the arrival, in Little Rock, of a number of the prominent railroad officers of the State, who, it is informed, design holding a meeting in a few days, for the purpose of securing concert of action in pushing the railroad enterprises of the State.

☞ The Lafourche bridges on the Vicksburg, Shreveport and Texas Railroad are completed, and the cars will run to Bœuf river within two weeks, and there connect with a regular line of coaches to Vicksburg.

☞ Wm. W. Blackford has been appointed Chief Engineer, and E. S. Hutter, Treasurer, of the Lynchburg and Danville Railroad Company. The survey for the route is to be proceeded with immediately.

☞ The contract of the Iowa connection of the North Missouri Railroad has been let from the Iowa State line to Des Moines to B. B. Roberts.

☞ The Council of Simcoe, Canada, on the 24th ult., voted $500,000 towards the construction of the Huron and Ontario Ship Canal.

Pacific Mail Steamship Co.

The following gentlemen have been elected directors of this company for the ensuing year: Allan McLane, Howard Potter, Francis Skiddy, Charles Augustus Davis, Wm. Dennistoun, Leonard W. Jerome, Elisha Riggs, Moses H. Grinnell and Cornelius K. Garrison; and at a meeting of the Board of Directors, the following officers were chosen: Allan McLane, President; Francis W. G. Bellows, Vice President; Theodore T. Johnson, Secretary, and Charles S. Abercrombie, Treasurer.

Hempfield Railroad.

At a meeting of the stockholders of this road held at Washington, Penn., on the 21st ult., the following gentlemen were chosen directors for the ensuing year: C. M. Reed, Wm. M'Kennan, Joseph Henderson, Thos. Sweeney, S. Brady, James C. Acheson, James C. Clarke. A committee was appointed to enquire into the situation of the first mortgage bonds, and the state of the road generally.

☞ The Trenton *American* says: "A railroad has been projected, with every prospect of being carried to successful completion, from the Hackensack junction and the Northern Road to Hackensack, and from thence north through Passaic, Spring Valley, to the New York State line, in Rockland County, and eventually it is expected it will be the terminus of the projected Midland Railroad from Oswego."

☞ The receipts into the Treasury of Virginia for the fiscal year ending October 1st are stated at $999,044 54; balance on hand last year $761,968 69—total, $1,097,128 27. Disbursed during the fiscal year $761,968 69; balance on hand 1st October, 1866 $335,159 58; balance on hand to date $329,214 12.

☞ The Chartiers Valley Railroad, recently purchased by an agent of the Pennsylvania Railroad Company, is to be completed and in operation in eighteen months. The Washington, Penn., *Examiner* says the work is to be done by Jay, Cook & Co., who hold $101,000 of the bonds of the company.

☞ The Richmond *Dispatch* states that operations have been stopped on the York River Railroad. The hands have all been paid off, and the contractors and clerks have left for New York. The road had been completed as far as the Chickahominy.

☞ The Sand Patch Tunnel on the Pittsburg and Connellsville Railroad, has been cut through. Its total length is 4,750 feet. Width, 22 feet. Height 19 feet. It is intended for a double track.

☞ The earnings of the Richmond and Petersburg Railroad for the fiscal year ending 30th September were $167,880 88, while the running expenses for the same time amounted to $107,097.

☞ The Charleston and Savannah Railroad was sold on the 20th ult., by auction, to Joseph H. Taylor and others, for $30,000 cash.

☞ The Chicago and Northwestern Railroad was opened to Woodbine, 300 miles west of the Mississippi river, on the 27th ult.

☞ The work of laying down the heavy rail on the Montgomery and Eufaula Railroad was commenced on the 16th ult.

American Railroad Journal.

Saturday, December 1, 1866.

Stock Exchange and Money Market.

The sharp advance in the price of Money, noticed in our last, was the result in part of the free withdrawal of Government deposits from the recognized bank depositaries, and their transfer to the Sub-Treasury here, thus reducing the loanable resources of the banks, and compelling the latter to call in all old advances on stock and miscellaneous collaterals, and to mark up the price of renewed accommodation fully two per cent. from the rates current a few weeks since. At the advanced rates, there was less disposition to aid other than the most unexceptionable houses, and the denial of the usual facilities to the bulk of the Stock operators led to a temporary panic in the Stock market. Forced realizations on the railway and miscellaneous list depressed prices very seriously. General distrust followed this sudden revulsion in the Stock speculation. On Friday of last week, Secretary McCulloch authorized U. S. Assistant-Treasurer Van Dyke, at this port, to receive in liquidation of indebtedness on the part of the banks, to the Treasury, all compound interest notes offered, on the basis of par and full accrued interest. On the announcement of this determination, a sense of relief was experienced by the street operators, which has been since gradually assuming more encouraging form. On Saturday, there were apprehensions expressed of a very adverse bank statement, and the Stock market was consequently disturbed and feverish. On Monday, the bank statement was formally given to the public, and it proved decidedly more favorable than had been anticipated, though the changes from the preceding week were radical in the most important items, and significant of the extensive liquidation of the week. In the item of legal tender, instead of showing a decrease of about six millions, marked a falling off of less than four millions, or actually $3,761,107. It was generally believed that the deposits would show a reduction of at least eleven millions, and the loans of eight millions. The former fell off less than eight and a half millions ($8,477,515,) and the latter less than five and a half millions ($5,437,-975.) These changes indicate the immediate causes of the disturbance in the market and depression in values all through last week. The specie reserve has fallen off $308,259 while the circulation has increased $127,916. The flow of money is now in this direction, and increased ease is looked for in the course of the current week. Already, lenders give evidence of renewed eagerness to place their balances advantageously on the basis of the ruling figures, six to seven per cent. on call, but it is not easy to realize in temporary negotiations more than six per cent. on strictly prime collaterals. In the discount line, there is much less disposition to grant accommodation, and on even the best short date commercial paper, the ruling rates are 7@8 per cent. per annum. Government is now disbursing freely, and even mercantile houses in really good standing will soon experience less difficulty in obtaining all necessary aid. The city bank deposits are now $213,414,984, against $221,892,500 a week ago. Their legal tender reserve amounts to $62,359,254, against $66,120,861 same time last week. Their circulation now stands at $31,861,418 against $15,340,528 same time last year. The loans are now $267,920,415, against $279,135,796 four weeks ago, and $225,345,177 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $152,906,000 a day, against a daily average of $140,429,216 the preceding week; and $129,436,056 the week ending with Nov. 10. The current week's exchanges average about $127,000,000 a day. The probability is that the present average of legal tender money in bank is a rising one, and that the succeeding weekly statement will show a moderate gain, in place of the decline through the last two or three weeks.

National Bank notes to the amount of $1,184,-010, were issued last week, making the total issue to 1,662 banks thus far $298,199,060, against $282,-555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,-338,650; and for the public deposits, $39,403,950 —making a total of $379,742,600. The Treasury Department, last week, redeemed and destroyed $185,200 of worn and mutilated fractional currency, and issued $421,615 worth of new.

The U. S. Sub-Treasury receipts, week ending with Nov. 24, were $25,035,904, including $1,624,-

705 from customs duties; payments, $18,765,711; balance at the close of the week, $102,638,169. against $96,367,977 at the close of the preceding week. The business of the Office during the opening day of the current week, was as follows: Receipts, $5,489,712, and payments, $4,845,819. The balance at the close of business on Tuesday morning stood at $103,282,070, against $96,629,-159 a week ago.

Government revenues were on a moderate scale, during the week. Excises yielded, $3,612,683, against $4,054,876 the preceding week; customs at the port of New York, $1,624,705, and at the outports, at least $540,000 (in coin) more, making the grand total income for the week equal to about $6,624,000 in currency, against disbursements of $5,610,395 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $144,000,000, or an average of over six and a half millions a week.

Gold was sold down to 137½ last week, partly on account of real holders, and partly on account of the *short* speculative interest, who insisted that Government was marketing, or was about to market considerable portions of its coin reserve, now exceeding ninety-three millions, including $22,-000,000 on deposit. Since the extreme depression of Friday and Saturday, there has been a steady appreciation of the premium until Tuesday, when there was a very sharp rise to 144, partly the result of purchases made to cover the extensive volume of *short* contracts put out early in the week, and partly owing to the circulation of rumors of a threatening political nature, involving our Government in difficulty with France on the Mexican question, and with Great Britain on the subject of Fenian invasions of Canada, and the presence of American Fenians in Ireland. The costly cypher dispatch mentioned by the daily papers as having been transmitted by the Atlantic Cable to one of our Ministers abroad, was ominously hinted at as suggestive of the warlike tendency of our diplomatic negotiations abroad. It mattered little to the *bulls* of the Gold Room whether the rumors thus industriously circulated by them were or were not well-founded. The rumors served their purpose for a while most efficiently. Late in the afternoon, the impression became general that the rumors were false, or gross exaggerations, and the gold speculation suffered a sudden depression of full two per cent., the closing figures having been 141¾@142. The demand was mainly speculative, though there was a slight improvement in exchange and customs inquiry. There was nothing of moment doing for export. The total imports of specie from Europe, and other ports since January 1, have been $9,173,783. The customs demand for Gold last week, averaged $270,784 a day; thus far, this week, it has been equal to $315,000 a day, or equal to a weekly aggregate of $1,200,000. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $77,785, and from California, there were none. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $123,253,333, against $93,061,818 same time last year. The total receipts of California gold at this port since Jan. 1, have been $38,297,350, against $18,162,107 same time last year, showing an increase, in 1866, of $20,135,248. The exports of specie from this port, last week, were $781,685, making the total outflow of specie from the port, since Jan. 1, $57,-931,877, against $27,218,619 same time last year, $44,023,130 same time in 1864, and $67,088,091 same time in 1859. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $1,-080,300, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $46,745,016, against $36,650,327 same time last year. The specie exports from San Francisco from Jan. 1, to Oct. 19, reached $37,-286,939, against $36,816,896 same time last year.

There has been a more active inquiry for prime foreign exchange drafts, rates on which have been advanced ½ of one per cent., the market closing less buoyantly, in view of the renewed foreign demand for American bonds and produce, which was likely to add to the available supply of bills, especially on London. Bankers' 60 day bills on London closed at 109¼@109½, and on Paris to 5.17½@5.13¾; sight bills on London to 110@110¼; and on Paris to 5.13⅛@5.11¼. The offerings of produce bills are more fair this week, representing largely direct exports of cotton from Southern ports. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,466,611. The exports since January 1, have been to the value of $171,-903,037.

Government securities suffered a slight depression early in the week under review, in sympathy chiefly with the severe decline in gold, but at the reduced rates, the offerings were limited, and the investment demand was good. The lower prices brought into the market fresh buyers, on home and foreign account, and the increased purchases made by them led to a rally of 1½@2 per cent. from the inside quotations of the week. It has been remarked by the daily journals that the only really stable values through the panic and excitement of the past week were those of the interest-bearing Treasury obligations which held their own in the open market with remarkable sturdiness, in the face of every adverse influence. The coin-bearing bonds yielded barely sufficient to tempt buyers to purchase, with renewed avidity, either for home investment or for export. The six per cents of 1881 could not be had in any considerable sums at the ruling figures, though the outstanding amount of this form of the funded debt is over two hundred and eighty-three million dollars. The several Five-twenties issues fluctuated just enough to develop a fresh demand for them, as the most secure, reasonable and remunerative form of investment available. The original issue of 1862 fell twice to 107½@107¾, rallying speedily in each instance one to one and a quarter per cent., under the execution of important foreign orders for them, most of which orders came by telegraph from London, where these bonds have become quite scarce again, and whence orders are constantly being received, either from bankers needing the bonds in the legitimate course of trade, or from parties who have made *short* sales, and who resort to this market to cover their contracts advantageously. This special issue of the Five-twenties closed firmly on a very limited supply and a good investment inquiry. Of the later series of the Five-twenties, the most popular has been the consolidated issue of 1865, (interest payable January and July,) which home buyers have been purchasing freely, induced to do so in part by their relative cheapness, taking into consideration the currency value of the accrued coin interest (near five months) upon them. This issue is becoming a favorite with insurance and trust companies, and may yet supersede in foreign estimation the issue of 1862, which is now so closely held out of the market for permanent investment. U. S. sixes of 1867 closed on Tuesday at 134½; U. S. sixes of 1868, at 133; U. S. sixes of 1881 113; U. S. Five-twenties of 1862 at 109@109¼, ex-coupon; U. S. Five-twenties of 1865 at 107¼@107⅜; U. S. Five-twenties of 1865, consolidated, 108⅛@108¼; U. S. Ten-forties at 100@100¼, and U. S. Seven-thirties at 105¼@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....115½	May, 1865 .....111½
July, 1864.....115	August, 1865....110
August, 1864....114½	September, 1865..109¾
October, 1864....113½	October, 1865....109½
December, 1864..112½	

In the railway and miscellaneous share line, the worst sales of the week were those of last Friday, made under influences referred to in our opening paragraph. Everybody was a seller on that day, and nobody seemed to have a particle of faith in the elasticity of the market. Saturday was also a blue day. Monday was characterized by a renewed disposition on nearly all sides to purchase, and this was still more manifest early on Tuesday, leading to an improvement in prices. Toward the close, however, the market became less active and decidedly feverish, under adverse political rumors, of which the *bears* were making diligent use. This element of weakness may be presently eliminated, and a fresh upward movement inaugurated, in view of the growing ease in money.

Produce and merchandise have been, on the whole, in very moderate request, though Breadstuffs, Provisions, and Cotton closed with more animation and buoyancy. Middling Cotton left off at 34½@37 cents per lb., on a fair export inquiry. The stock of cotton now here is estimated at about 135,000 bales. The receipts at the port this week, have averaged over 4,500 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 146,000 bales, against exports of 59,000 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 331,000 bales against 575,000 bales same time last year; exports, 231,-000 bales, against 279,000 bales same time last year, estimated stock at latest dates, 356,000 bales, against 410,000 bales same time last year. Foreign merchandise has been extremely dull and much depressed in price, generally. The total imports of foreign dry goods, last week, were $1,-694,768, and the total amount marketed $1,178,-782. The value of foreign merchandise imported last week, was $2,840,324—making the grand total specie value of last week's imports of dry goods and merchandise, $4,535,092, and since January 1, $273,038,191, against $183,605,475 same time last year. The freight market is more active and quoted firm with 516 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 13.	Nov. 20.	Nov. 27.
Consols	—@89¾	90¼	89¼
U. S. 5-20's	—@69½	70½	70½
Erie	—@51¾	50	47
Ill. Central	—@78	78	77½

The New York exports, exclusive of specie, for the week ending Nov. 27, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$5,022,750	$3,466,611
Prev. reported	151,942,898	168,436,426
Since January 1	$156,965,648	$171,903,037

The New York imports for the week compare as ollows:

	1865.	1866.
Dry goods	$2,316,720	$1,694,768
Gen. merchandise	3,491,005	2,840,324
Total for the week	$5,807,725	$4,535,092
Prev. reported	177,797,750	268,503,099
Since January 1	$183,605,475	$273,038,191

The balance in the Sub-Treasury on Tuesday was $103,912,034 62.

Central Ohio Railroad.

At a meeting of the stockholders of this company, held at Zanesville, Ohio, on the 21st ult., a contract was approved by the terms of which the Central was leased to the Baltimore and Ohio Co. for twenty years, either party reserving the right to terminate the lease at the end of five years. The Baltimore and Ohio Company assume control on the 1st inst., and will at once proceed to put the road in complete repair, besides greatly increasing the motive power and rolling stock. The terms of the contract are understood to be that the Central Ohio is to have 35 per cent. of the gross earnings during the first five years, and 40 per cent. thereafter during the continuance of the contract.

McGregor Western Railway.

The extension of the McGregor Western Railway in Iowa to Cresco, a station in Howard County, 66 miles from the Mississippi river, was celebrated on the 20th ult. We learn that arrangements are being perfected, by which the road will be extended by the autumn of 1867, from Cresco to Owatona, on the Minnesota Central railroad, a distance of about eighty miles. The road is already completed from Owatona to St. Paul. Milwaukee will then have a line of railway through the heart of Minnesota, extending to its capital, and which will drain the finest agricultural region in that great State.

☞ During the last week the Senate Committee on Railroads have made a patient and thorough examination of the different projects, hearing the the inventors or their agents in explanation or defense of each. The plans not deemed absolutely chimerical have all been gone through with, and the Committee has adjourned until the 12th of December, for further deliberation.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Nov. 17th, 1866, were $143,068 00
Corresponding week of previous year.. 140,439 00

Increase..... $2,629 00

The earnings of the Western Union Railroad for the week ending Nov. 21, 1866 . .. $16,837 89
Corresponding week previous year..... 15,093 79

Increase $1,744 10

The earnings of the Chicago and Great Eastern Railway for 3d week in Nov. were..... $37,383 70
Same period last year..... 26,432 57

Increase in 1866..... $10,951 13

The earnings of the Chicago and Northwestern Railway for the third week in Nov., 1866, were..... $225,355 00
Corresponding week of previous year.. 205,394 00

Increase..... $19,961 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Nov. 1866, were..... $99,482 00
Corresponding week of 1865 ..... 114,278 00

Decrease $14,796 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Nov. 15th, 1866, were $39,854 00
Corresponding week of 1865..... 40,362 00

Decrease..... $508 00

The earnings of the Michigan Central Railroad for the 3d week in Nov., 1866, were.. $85,614 42
Corresponding week of previous year.. 106,290 88

Decrease..... $20,176 26

The earnings of the Chicago and Rock Island Railroad for the 3d week in Nov., 1866, were..... $79,864 00
Corresponding week of previous year.. 88,096 00

Increase..... $8,232 00

The earnings of the Toledo, Wabash and Western Railroad for the 3d week of Nov., 1866, were..... $87,281 46
Same week in 1865..... 78,857 49

Increase..... $8,423 97

Government Appropriations.

The following items of appropriations have just been officially compiled from the acts passed at the last session of Congress :

Pensions	$17,940,000 00
Deficiencies for sundry civil expenses	4,904,514 46
Naval service (for the year ending June 30, 1867,)	18,904,667 50
Post Office Department (for the year ending June 30, 1867,)	19,679,500 00
Military Academy (for the year ending June 30, 1867,)	301,457 00
Fortifications and other works of defence	1,540,000 00
Completion of Public Works	3,698,047 91
Army (for the year ending June 30, 1867)	38,004,241 83
Legislative, Executive and Judicial expenses	25,430,459 89
Consular and diplomatic expenses.	1,405,494 00
Indian department	3,778,535 45
Sundry civil expenses (for the year ending June 30, 1867,)	7,074,126 76
Deficiencies (for the year ending June 30, 1867,)	515,100 76
Miscellaneous	12,705,635 60
Total	$155,881,781 16

Commerce of New York.

The foreign imports at New York for the month of October are officially stated as follows :

	1865.	1866.
Entered for consumpt'n.	$16,357,282	$13,812,206
Entered for warehous'ng	5,903,993	8,113,869
Free goods	795,508	1,471,951
Specie and bullion	77,942	1,434,158
Total entered at port	$23,134,675	$24,832,184
Withdrawn fr. warehouse	4,699,328	8,789,838

The foreign imports at New York for ten months from January 1st, were :

	1865.	1866.
Entered for consumpt'n.	$97,310,788	$144,665,021
Do. for warehousing	64,050,528	101,782,061
Free goods	8,337,652	11,180,054
Specie and bullion	1,759,701	8,422,999
Total entered at port	$171,458,669	$266,050,135
Withdrawn fr. wareh'se	72,642,299	89,489,721

The duties received at New York from Jan. 1st, were :

	1865.	1866.
1st quarter	$14,415,083 83	$35,618,902 52
2d quarter	22,280,493 24	31,929,287 26
3d quarter	35,821,581 79	36,105,092 08
In October	10,973,513 01	11,002,048 08
Total from Jan. 1.	$83,490,671 87	$114,655,329 94

The exports from New York to foreign ports in the month of October, were :

	1865.	1866.
Domestic produce	$20,986,936	$14,593,664
Foreign mdse., free	33,235	32,061
Do. dutiable	252,072	186,108
Specie and bullion	2,516,226	1,463,450
Total exports	$23,788,469	$16,275,283
Do. exclusive of specie..	21,272,243	14,811,833

The exports from New York to foreign ports for ten months from January 1st, were :

	1865.	1866.
Domestic produce	$128,921,293	$156,186,890
Foreign mdse., free	805,415	598,217
Do. dutiable	2,993,713	4,146,845
Specie and bullion	25,205,342	55,489,740
Total exports	$157,925,763	$216,421,692
Do. exclusive of specie.	132,720,841	160,931,952

Philadelphia Passenger Railroads.

The charters granted to the Philadelphia City Passenger Railroads contain a provision that they shall pay into the City Treasury a tax upon their dividends. Some of the companies are required to pay 6 per cent. on all dividends declared; and others 6 per cent. whenever the dividends exceed 6 per cent. per annum upon the capital stock paid in. The following sums have been paid to the City Treasurer during the present year on account of this tax :

West Philadelphia Railroad Company, tax on dividends of 1866, $579 84.

Citizens' Passenger Railroad Company, on dividend of 1865, $2,750, and on the year 1864, $2,482 50. Total, $5,232 50.

Gray's Ferry Passenger Railroad Company, on dividends since the construction of the road, $4,286 63.

Second and Third Streets Road, on dividend of 1865, $2,731 47; on the years 1861-'2-'3-'4 $4,997 68. Total. $7,729 15.

Green and Coates Streets Road, on the years, 1860, 1862, 1863, 1864 and 1865, $4,113 37.

Philadelphia City Passenger Railroad, for the years 1861, 1862, 1863, 1864 and 1865, $10,761 47.

Frankford and Southwark Passenger Railroad Company, for the years 1863 and 1864, $4,813 29.

Making the total amount paid by the above companies, $37,033 95.

Bridge over the Ohio River at Cincinnati.

The cost, dimensions, etc., of the Wire Suspension Bridge over the Ohio River between Cincinnati, Ohio, and Covington, Ky., is given at length in the Cincinnati *Gazette*. The following is a recapitulation of the figures :

Estimated total cost	$1,750,000
Expended by old company	300,000
Expended by new company	1,200,000
Old stock held by city of Covington	100,000
Preferred Stock	750,000
Old Stock	335,000

Length of main strand from centre to centre of towers, 1,057 feet.
Length of each land span, 281 feet.
Total length of bridge, including approaches from Front street in Cincinnati and Second street in Covington, 2,252 feet.
Height of towers from foundation, without turrets, 200 feet.
Height of turrets, 30 feet.
Height of bridge above low water, 100 feet.
Width of bridge in the clear, 36 feet.
Number of cables, 2.
Diameter of cables, 12¼ inches.
Amount of wire in the cables, 1,000,000 pounds.
Strength of the structure, 16,800 tons.
Deflection of cables, 88 feet.
Masonry in each tower, 82,000 perches.
Masonry in each anchorage, 13,000 perches.
Masonry, total amount, 90,000 perches.
Towers at base, 86 by 52 feet.
Towers at top, 74 by 40 feet.
Cables, 2.
Strands in each cable, 7.
Wires in each strand, 740.
Wires in cables, total, 10,360.
Weight of wire, 500 tons.
Feet of lumber, 500,000.

The Bridge will be open to pedestrians on the 1st of December.

Chesapeake and Potomac Canal.

At a meeting of the Corporators of the Chesapeake Bay and Potomac River Tide Water Canal Co., held in Washington on the 22d ult., the Report of S. H. Sweet, Esq., Engineer, was presented and read. From this we learn that the proposed canal from Washington to Annapolis will be but 34 miles instead of 190 by the Potomac and Chesapeake line, a saving of 156 miles, and from 24 to 36 hours to all the markets of the East. It is stated that the cost of transportation from Cumberland to New York will be 25 per cent. less; to Philadelphia 35 less, and to Baltimore 34 less, than if sent by the Baltimore and Ohio railroad.

As contrasted with the cost by the present water lines from Cumberland to the eastern markets, it would cheapen the cost of transportation to New York 10 per cent., to Philadelphia 11 per cent., and to Baltimore 12 per cent.; reducing the cost of coal at New York 54 cents, at Philadelphia 50 cents, and at Baltimore 48 cents. To the local trade of the District of Columbia the advantages are stated to be equally important. From Washington the cost of transportation would be 13 per cent. less to New York, 26 per cent. less to Philadelphia, 38 per cent. less to Havre-de-Grace, and 40 per cent. less to Baltimore than if sent *via* the Potomac river, Chesapeake bay and inland canal route. The size of the canal and locks are to be of the same dimensions as those of the Delaware and Raritan canal, thus admitting the largest class of boats trading with New York and Philadelphia without transhipment, and of a capacity to pass vessels of 270 tons burden. It is estimated that the canal can be constructed for $3,850,000.

The surveys were commenced March 14th, and the field work completed about the middle of June, 1866. During this time over 100 miles were carefully examined with the transit, and level, and 50 miles of reconnoissance made with the level only. The examinations were first directed toward the finding of a feasible route for a tide-water canal, and failing in this, to obtain the most practicable route for an elevated or lock canal. The surveys for a tide-water canal were abandoned as impracticable after trial of four routes, the most favorable of which showed an elevation of 80 feet above mean tide at the highest point between the two cities. The examinations were then directed to a lock canal, and the most practical route for the same was found, having two feasible termini (from the Big Patuxent) on Chesapeake bay; one on South river, and the other on the Severn, at Round bay.

The South River line commences at the Anacostia or Eastern Branch Potomac, three quarters of a mile from Bladensburg, and about 4¼ miles from Washington. It follows up the Paint branch about seven miles, with a uniform grade of ten feet to a mile; thence up the Beaver Dam branch about four miles, with a grade of 13⅓ feet, crossing the summit 156 feet above tide, upon the land of Luther D. Jones, Esq. It then follows down Cass Valley about two miles, on a grade of 82 feet per mile, reaching an elevation of 90 feet above tide on the land of Dr. William Duvall. The line then follows along the western bank of the Big Patuxent valley, at an elevation of about 95 feet above tide, for 2½ miles, crossing the Horse Pen Branch, the valley of which is 50 feet above tide. The line crosses the Big Patuxent at Priest's Bridge, one half mile below the junction of the Little with the Big Patuxent.

The surface of water of the latter stream was found 25 feet above tide. From the Patuxent the line passes up Sanford's branch about 2 miles, with a grade of 22 feet per mile, and crosses the summit, between the Patuxent and South rivers, 165 feet above tide. From this summit the line follows down North Run branch 3 miles, to South river at Clagett's landing; thence down South river 4 4-5 miles; thence across the ridge 1½ miles to Annapolis bay. The summit of this ridge is 50 feet above tide. The total distance, by this line, from Washington to Annapolis, is 34 11-20 miles, 25½ of which is canal.

The Round Bay Terminus line commences three-quarters of a mile west of the Big Patuxent, on the line described above, and this stream is crossed above the forks. The surface of water in the creek is forty-eight feet above tide, and the summit, between the Little and Big Patuxents, 165 feet above tide, on the land of Charles T. Bealmer, Esq. From the summit the line approaches the Little Patuxent on a grade of 60 feet per mile, and crosses this stream near "White's Mill," the surface of water being 43 feet above tide. The line then follows up "Tower's branch," reaching the summit, between the water sheds of South and Severn rivers, on the land of L. W. Wharfield, 132½ feet above tide. From this summit two lines are presented; one to the Severn and the other to South river; the latter, from reconnoissance, found one mile shorter, and the grade as favorable.

The summit between the South and Severn rivers is found, on this line, at an elevation of 100 feet above tide; thence, crossing the Elk Ridge railroad 100 feet above tide, passes down Indian creek, on a grade of about 23½ feet per mile, to Round bay, on the Severn, 7 miles from Annapolis. The length of this line is a follows:

Distance from tide to tide—Potomac to Severn river—total of canal	25½ miles.
Distance from Eastern branch, Potomac, to Washington	4¼ "
Distance used of Severn river, from terminus to Annapolis	7 "
Total distance from Washington to Annopolis	36¾ "

The Chicago Stock Yards.

The following statements respecting the Chicago stock yards, illustrating in an interesting manner the rapid growth of the West, come to us from a source which is in every way trustworthy:

Whole area of yards ..... 380 acres.
Planked over with covered pens ..... 90 "

Material used:

22,600,000 feet of lumber.
1,100 tons of iron.
85,000 cross ties.
52,000 spikes.
534,000 nails.
24,883 fence posts.
30,294 feet water pipes.
315 hydrants.
65 switches and frogs.
2,039 gates.
1,200 cubic yards stone.

Whole cost $1,600,000

29 87-100 miles drains or sewers.
3 27-100 " water troughs.
6 89-100 " streets and alleys.
3 69-100 " sheds over hog pens.
2,445 cattle and hog pens, capable of holding at one time 2,175 car loads of cattle and hogs.
Hotel for 500 guests.
Exchange, 60 feet by 130.
5 hay barns, each for 1,000 tons, holding 5,000 tons hay.
3 horse stables, with stalls for 240 horses.
6 corn cribs each for 10,000 bushels, holding 50,000 bushels corn.
3 water tanks, holding 342,000 gallons water.
5 weighing scale.

Report of Stock for September, 1866.

Cattle	41,883 head.
Hogs	64,291 "
Sheep	17,306 "
Horses	169 "
Total	123,649 "

Net profits for September, 1866 ... $23,065 09

Fifteen years ago the stock yards of Chicago would hold only 25 car loads of stock, and now hold 2,175 car loads.

Railroads in New Jersey.

Notice is given that application will be made to the Legislature for the charter of a railroad from Trenton to a point at or near Flagtown, in Somerset county. Also for a road from Millstone, running near Hopewell, to Pennington, Mercer county. Either of these roads would open a district of country at present remote from railroad facilities, and afford advantages greatly needed, but it is questionable whether either enterprise would prove remunerative. It is also intimated that efforts will be made this winter to extend the Rocky Hill Railroad to the Delaware river, at a point near Lambertsville. Also that the projected Peapack road will be extended so as to connect with the Delaware and Lackawanna road. We also learn that the Central Railroad Company of New Jersey intend making application to the next Legislature for authority to built a road to Newark.

Interesting to Holders of Seven-thirty Notes.

The rapid conversion at the Treasury Department of seven-thirty notes into five twenty bonds is attended with many difficulties on account of the number of lost or stolen seven-thirty notes sent to the Department. Banks and persons dealing in seven-thirties should remember that although all the coupon bonds of the government are issued payable to bearer, so that they will pass by delivering, and are good though lost or stolen when in the hands of a *bona fide* holder, the case is different with the seven-thirties, which are issued in blank, but with the words "order" instead of " or bearer" imprinted on the face. As long as a seven-thirty note remains thus in blank it passes by delivery like a coupon bond; and a *bona fide* purchaser for value can collect the same, notwithstanding it has been lost or stolen. But in case the holder of the seven-thirty fills the blank space with his name, the note then becomes his property payable to him or his order, and he cannot thereafter be deprived of his title by any law or larceny of the note any more than the holder of a check or draft payable to his order; and this is the law, notwithstanding his name may have been so skilfully extracted by acid or otherwise as to leave no trace of the name. If the holder of the note can prove clearly that his name was once written upon the face of the seven-thirty his title is good nothwithstanding the erasure, and even against a *bona fide* holder for value received, and will be recognized by the Treasury Department, and upon proof the note will be paid to him. All persons dealing in government securities ought carefully to bear in mind the foregoing peculiarity of seven-thirty notes which may as stated become converted into negotiable securities, payable only to order, which cannot be the case with any of the coupon bonds of the government.

Richmond, Fredericksburg and Potomac Railroad.

The income of this company from transportation during the year ending September 30, 1865, was $402,717 23, and from rents of real estate $1,015 85, or, in the aggregate, $404,733 18. This amount exceeds by $104,277 04, or nearly thirty-five per cent., the greatest income ever received during any year preceding the war, and by over 53 per cent. the average income of the five years from September, 1856, to September, 1860. The aggregate indebtedness of the company is $215,541 88, not including the $100,000 eight per cent. bonds issued July, 1865, which are preferred, in accordance with the terms of the loan, above all other kinds of indebtedness. The machinery and equipment of the company, much of which is new, is in good condition.

☞ The New Albany, Ind., *Commercial* states that there is every prospect of the speedy commencement of work on the Cincinnati, Madison and New Albany Railroad. This company was organized, the route surveyed, and profile and estimates made more than a year ago. The proposed road begins at Lawrenceburg (connecting with the Indianapolis and Cincinnati Railroad), and follows the north bank of the Ohio River through Aurora, Rising Sun, Patriot, Vevay, Madison, Jeffersonville, and terminates at New Albany.

Manhattan Railway.

Articles of association have been filed in the office of the Secretary of State at Albany, incorporating the "Manhattan Railway Company." The places from and to which the road is intended to be constructed are the South Ferry and the southerly bank of the Harlem River, near the Croton Aqueduct High Bridge.

The following persons compose the company: Geo. Griswold, Joel Wolfe, Henry A. Smythe, James B. Johnston, W. W. Gilbert, Henry F. Vail, Robert L. Kennedy, Wm. B. Duncan, Geo. A. Thorne, Robt. B. Earle, Wm. Smith, John Thompson, Wm. R. Finch, Thos. Reed, John F. Winslow, John A. Griswold, John P. Yelverton, Asa P. Robinson, Hugh B. Wilson, George L. Morris, E. A. Searle, Chas. F. Munson, John Sedgwick, R. W. Cameron, John N. Hayward, Wm. Fullerton, Wm. Marshall, John V. L. Pruyn.

The said road is intended to be wholly within the county of New York, and from the Battery northward to Sixty-fourth street it is intended to be made and located in a tunnel under and beneath the surface of Broadway.

It is also intended to make two branches from the main line of the said road at the most convenient place or places for such branch roads between the South Ferry and the Harlem River. One branch to terminate at or near the Hudson River Railroad, and the other branch to terminate at or near the New York and Harlem Railroad.

The whole length of the road, as near as may be, is twelve miles.

The amount of capital stock is fixed at $10,000,000, to be divided into one hundred thousand shares of one hundred dollars each.

☞ The Corinth (Miss.) *News* states that a contract has been completed for building a railroad from Corinth to Hamburg, on the Tennessee River, a distance of about twenty miles. Cars are to be put on the road in eight months. The railroad from Hamburg to Nashville has been let, and laborers will soon be at work on it. From Hamburg the road passes Mount Pleasant, and will intersect the Decatur and Nashville road at Columbia. This road, when completed, will greatly shorten the distance between Nashville and Memphis. By this route it will be about two hundred and twenty miles. The present traveled route *via* Decatur is three hundred and ten miles.

☞ The engineer corps of the Baltimore and Ohio Railroad have completed their survey of the contemplated route for the Valley Railroad. The route was found entirely feasible, and there will be no difficulty in establishing the terminus at Salem, as proposed by the charter.

☞ The indebtedness of the Territory of Arizona is stated to be $17,087 13, about two-thirds of which was created for printing and salaries. The whole amount received for taxes was $1,155 06, or $773 94 less than the expenses of the Territorial Treasurer's office.

☞ Another railroad is projected in North Carolina, called the Tarborough and Williamstown. Considerable subscriptions have already been made, and the North Carolina papers judge from the spirit manifested, that the road will undoubtedly be built.

Middle Creek Railroad.

The Chief Engineer, F. C. Arms, has just completed the preliminary surveys for this road to Northumberland, Sunbury and the Treverton Bridge. The distance from Lewiston to Sunbury will not exceed forty-seven miles, connecting the Pennsylvania and Mifflin and Central Railroads with four roads at Sunbury, viz: the Northern Central, Philadelphia and Erie, Shamokin Valley, and (virtually) the Lackawanna and Bloomsburg.

Interest and Dividends.

The West Jersey Railroad Company have declared a semi-annual dividend of four per cent., free of tax, payable November 30.

The Rockport Railroad Company has declared a semi-annual dividend of 5 per cent.

The Little Miami Railroad Company have declared a dividend of two dollars per share, exclusive of the income tax, payable December 20.

☞ The Governor of Oregon has addressed a special message to the Legislature, recommending legislation to provide for the construction of a railroad through the Willamet Valley, and by way of Oakland, Roseburg, Jacksonville and Yreka, to and connecting with the Central Pacific Railroad in California—thus putting the capital of Oregon in direct communication with San Francisco. A company is ready to build the road if the Legislature will help them.

☞ The new railroad from the head of the canal, two miles above Mauch Chunk, to Easton, Pa., will be 48 miles in length. The company have contracted for steel rails, weighing fifty-six pounds per yard. The road will connect at Easton, with the Morris and Essex, and also with the New Jersey Central Road for New York, and at Bethlehem with the North Pennsylvania Road for Philadelphia.

☞ A West Virginia journal states that the work upon the Laurel Fork and Sand Hill Railroad is progressing at a more favorable rate than could reasonably have been anticipated, and the contractors propose to be ready to surrender the road at a very early day.

☞ The Branch of the Boston, Hartford and Erie Railroad, incorporated May 1, 1849, as the Southbridge and Blackstone Railroad, was completed, and commenced its daily running from Southbridge Centre Village to its junction with the above road at East Thompson, November 9, 1866.

☞ The total receipts into the Treasury of the State of Illinois during the past year were $1,850,000; disbursements $1,874,000. The present debt of the State is $2,282,000; a reduction of $410,000 within the year.

☞ The San Francisco Central Pacific Railroad will be 54½ miles in length, commencing at Washington, opposite Sacramento, and extending to Benicia. The company was organized on the 29th of September. Capital authorized $1,500,000.

☞ The formal opening of the bridge across the Susquehanna river, on the Philadelphia, Wilmington and Baltimore Railroad, took place at Havre de Grace on the 26th ult.

☞ W. O. Winston, Esq., of DeKalb county, Ala., has been elected President of the Wills' Valley Railroad Company.

☞ Charles E. Beyers has been appointed Chief Engineer of the Philadelphia and Reading Railroad.

☞ P. V. Daniel, Jr., Esq., has been re-elected President of the Richmond, Fredericksburg and Potomac Railroad Company for the ensuing year.

☞ Robert F. Stockton, has been chosen President of the Delaware and Raritan Canal.

KASSON & CO.

COMMISSION MERCHANTS

FOR THE SUPPLY OF

Railroad Iron, Locomotives, Cars, Chairs, Spikes, and R. R. Material

OF EVERY DESCRIPTION

No. 58 Beaver St., New York.

Proprietors KASSON'S LOCOMOTIVE EXPRESS.

CIRCULAR 22. NOVEMBER 24TH 1866.

FOR SALE, LOCOMOTIVE ENGINES.

			Gauge.	Weight.	Diam. Cylinder.	Length Stroke.	Diam. Drivers.	No. Drivers.
			ft. in.	tons.	in.	in.	in.	
1 Engine,	No.	101	4 8½	25	14	22	54	4
1 "	"	102	4 8½	22	15	20	54	4
1 "	"	103	4 8½	24	15	20	64	4
1 "	"	104	4 8½	24	15	20	60	4
1 "	"	105	4 8½	22	12	22	60	4
1 "	"	106	4 8½	16	11	24	54	4

No. 101.—Is a first-class Engine, has been thoroughly rebuilt, and will be ready for delivery next month.

No. 102.—Thoroughly overhauled, and put in excellent running condition.

No. 103.—A very serviceable Engine, in good order, cleaned and repainted.

No. 104.—Has new trucks, springs, brasses, crank axle ($1,050), new jacket, head light, &c., Chilled Tyres, copper tubes (130.)

No. 105.—This Engine was built by DANFORTH, COOK & Co., and has been by them thoroughly overhauled and rebuilt, and is pronounced by them "in first-rate order." Can be had AT A BARGAIN.

No. 106.—Good for contractor's work.

All of above will be sold cheap.

KASSON & CO.

N. B. Wanted, all kinds of old and second-hand Locomotives and Cars.

Pacific Mail Steamship Company's

THROUGH LINE TO

CALIFORNIA,

And Carrying the U. S. Mail,

VIA PANAMA RAILROAD.

LEAVE PIER NO. 42 NORTH RIVER FOOT OF Canal Street, at 12 o'clock noon, as follows:

Dec. 1st—OCEAN QUEEN, Capt. Jeff Maury, to connect with GOLDEN AGE, Capt. Landge.

Dec. 11th—HENRY CHAUNCEY, Capt. A. G. Gray, to connect with GOLDEN CITY, Capt. Watkins.

Dec. 21st—RISING STAR, Capt. T. A. Harris to connect with MONTANA, Capt. — —

All Departures touch at ACAPULCO; those of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Departure of 11th each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of Dec. 1st, 1866, will connect with the first steamer of the Company's China Line, leaving San Francisco Jan 1, 1867, for Hong Kong.

100 Pounds Baggage allowed each adult. Medicine and attendance free. For Passage Tickets and all further information apply at the office, on the wharf foot of Canal Street, North River, New York.

Finances of Ohio.

The receipts into the Ohio State Treasury during the fiscal year ending November 15, 1866, were as follows:

General revenue fund	$1,508,420 29
Canal fund	59,148 10
Sinking fund	2,629,580 64
State common school fund	1,412,078 62
Soldiers' allotment fund	59,812 63
State military fund	401,805 15
Soldiers' relief fund	2,181,563 57
Soldiers' claims fund	99,837 59
National road fund	24,127 29
Bank redemption fund	4,291 38
District school library fund	83 15
	$8,380,748 41

And the disbursements were:

General revenue fund	$1,339,816 80	
Canal fund	46,874 47	
Sinking fund	2,074,879 97	
State common school fund	1,353,280 20	
Soldiers' allotm't fund	57,267 73	
State military fund	360,285 36	
Soldiers' relief fund	2,017,851 46	
Soldiers' claims fund	85,942 29	
National road fund	21,719 18	
Bank redemption fund.	1,279 32	
		7,359,496 73
Balance Nov. 15, 1866		$1,021,251 68

A comparison of the above table with the Treasurer's report for 1865, will show a decrease of $4,865,420 75 in receipts, and $5,130,586 51 in disbursements, and an increase of $265,165 76 in the balance on hand.

The following funds show decreases in receipts as compared with 1865:

General revenue	$745,007 68
Soldiers' allotment	5,129,483 03
Soldiers' claims	127,735 42
National road	5,704 04
Canal bank, Cleveland	547 77
Seneca County bank	610 29
City bank, Cincinnati	1,549 39
	$6,010,637 62

The increases in receipts are as follows:

Canal fund	$11,422 10	
Sinking fund	704,717 35	
Common school fund	71,139 29	
State military fund	197,223 49	
Soldiers' relief fund	160,208 89	
Bank redemption fund	505 75	
		1,145,216 87
Net decrease, as above stated		$4,865,420 75

In the following funds the decrease of disbursements are:

General revenue	$548,315 16
Soldiers allotment	5,077,536 30
State military	26,311 89
Soldiers' claims	124,789 43
National road	8,369 79
Canal bank, Cleveland	547 77
Seneca county bank	610 29
City bank, Cincinnati	1,549 39
	$5,783,030 02

There are increases in disbursements as follows:

Canal fund	$36,196 57	
Sinking fund	478,627 80	
Common school fund	67,434 26	
Soldiers' relief fund	69,346 56	
Bank redemption fund	838 32	
		652,443 51
Net decrease in disbursements		$5,130,586 51

It will be noticed from the above exhibit that the disbursements from the general revenue fund, were nearly $550,000 less in 1866 than they were during the preceding year of 1865. This fund is devoted to payment of the general expenses of the State Government, and the decrease in disbursements from it indicates the amount of economy that has been practised.

The receipts into the treasury and the disbursements therefrom for the past seven years, were as follows:

	Receipts.	Disbursements.
1860	$4,081,147 55	$3,959,071 48
1861	5,657,727 88	5 524,564 72
1862	6,512,807 14	6,029,566 98
1863	6,313,614 00	5,361,687 00
1864	8,710,139 82	6,706,471 70
1865	13,246,169 16	12,490,083 24
1866	8,380,748 41	7,359,496 73

The large excess in the amounts for 1865 is owing to the soldiers' allotment fund, as over $5,000,000 were collected during that year from the Ohio soldiers in the field and camp, and transmitted through State and County Treasuries to their families and friends at home, while in 1866 the amount was less than $60,000.

The finances of the States are certainly in an excellent condition. The State debt is being rapidly reduced, and the expenses of the State Government are being curtailed, consequently the taxes are becoming lighter, which will be a source of great satisfaction to tax payers.

Grants of Public Lands.

The following table shows the number of acres of the public lands granted by Congress to States and corporations to aid in the construction of railroads and wagon roads:

	Acres.
Illinois	2,595,053.00
Mississippi	2,062,240.00
Alabama	8,729,120.00
Florida	2,360,114.00
Louisiana	1,578,720.00
Arkansas	3,940,271.63
Missouri	3,745,160.21
Iowa	6,751,207.98
Michigan	5,327,930.99
Wisconsin	5,378,360.50
Minnesota	7,783,403 09
Kansas	6,550 000.00
California	3,400,000.00
	55,201,581.40
Corporations—	
Pacific Railroads	99,360,000.00
Wagon roads—	
Wisconsin	250,000.00
Michigan	1,718,618.27
Oregon	1,305,600.00
	3,274,218.27
	157,835,794.67

Of the land granted to the States 20,682,617.65 acres have been certified under the grants, and of the nearly one hundred millions of acres granted to the Pacific Railroad corporations but 45,510.54 acres have been certified.

Debt of Philadelphia.

The following is an official exhibit of the funded debt of the City of Philadelphia, and assets, Nov. 1, 1866:

To amount of city loans outstanding Nov. 1, 1866	$35,981,799 24
To amount authorized but not issued for special purposes, viz: school, water, gas, &c	2,277,800 00
Total	$38,259,599 24
By cash in hands of Sinking Fund Commissioners	$559,372 50
By city loans	2,736,137 81
By other securities, valued at	18,961,345 00
By outstanding taxes collectable	850,000 00
Balance	15,152,744 43
Total	$38,259,599 24

Assets of the City of Philadelphia for the year 1866.

Cash on hand Nov. 1, 1866	$538,440 46
Estimated receipts of registered taxes in 1867	400,000 00
Estimated receipts from sources other than taxes prior to January, 1867, and for the year 1867	1,627,670 00
Estimated receipts from taxes and registered taxes prior to January, 1867	450,000 00
Estimated receipts from Trustees of Gas Works for 1867	185,000 00
Total	$3,201,110 46
Amount required to be provided from taxes or by loan	7,604,351 58
By funding $1,500,000, leaves to be provided from taxation	$6,104,351 58

Mississippi and Tennessee Railroad.

The report of this company shows that there were received during the year ending September 30th, 1866, $164,878 55 for passages; $189,496 88 for freights; $7,802 41 for express; $4,583 33 for carrying the mail; $511 for privileges; making in all a total receipt of $367,272 17. The road is represented as being in a flourishing condition; and a hope is expressed that the company will soon be enabled to run its track as far down as Memphis. The present value of the road and equipment is estimated at $3,015,106 94.

Virginia Central Railroad.

The earnings of this road for the year ending September 30, 1866, were as follows:

From passengers	$247,625 43
" freight	196,184 96
" express	26,336 11
" U. S. mail	15,238 48
" rents, etc	2,114 12
	$487,449 10

Expenses, viz:

Conducting transportation and legal and miscellaneous exp.	$149,415 65	
Repairs of road and buildings	127,343 70	
Repairs of locomotives and cars	53,235 97	
Repairs of workshops and tools	2,500 00	
Salaries	12,016 68	
Taxes	20,552 30	
Insurance	2,071 50	
Repairs on real estate	177 32	
Extraordinary repairs, etc.	260,337 13	
		627,650 15
Excess of expenditures		$140,201 05

The ordinary operating expenses, as given above were $367,313 02. Deducting only these from the gross receipts, the net earnings will amount to $120,136 08. The extraordinary expenses were as follows:

Purchase of 3 locomotives and 36 cars	$54,614 21
Repairs on locomotives purchased from Government	1,934 82
Repairs on locomotives returned from Piedmont Railroad	3,310 67
Cars built in company's shops	27,982 39
Rent of locomotives and cars from Government	9,446 75
Debts contracted previous to April, 1865	4,766 29
One-fourth repairs locomotives and cars	17,745 32
Iron rails purchased for repairs of track, less old rails sold	38,775 62
Relaying track, including cost of chairs and spikes	14,537 00
Rebuilding depots and water stations.	4,718 54
Eight new section houses	1,692 50
Paint and boiler shops in Richmond	1,310 83
Repairs and additions to shops and tools	3,798 09
One-fifth of labor expended on roadway	18,379 49
New bridges built	3,490 00
One-half the cost of repairs to trestle works and cattle guards	5,021 00
Excess of material at shops over last year	3,819 11
Excess of wood over last year	20,662 50
Excess of cross-ties over largest number ever before used in one year	22,241 00
Re-building culverts	1,920 00
Work done at shop for sundry persons	171 50
Total, as above	$260,337 13

Almost the whole of this sum may be regarded as an addition made to the value of the property of the company as compared with its value at the close of the preceding year. The division of expenditures was, however, made for the purpose of ascertaining as far as practicable, the actual amount necessary to restore the road and its machinery after the depreciation and damages due to the war. A large amount of work has been done during the past year in restoring the roadway. The road-bed east of Staunton, which was neglected during the war, is now in better condition than ever before, and a large proportion of the cross-ties have been renewed. West of Staunton not so much labor has been expended, either in ditching or renewing cross-ties; but the road has been worked with safety by the judicious distribution of such timber as could be had, and the excellent surface given to the track. About 11 miles of new rail have been laid on the road east of Gordonsville, and 11 miles of old rail have been repaired and relaid. This makes a fair track, and may last several years. About 14 miles of new iron are needed to put the track in first-rate condition. The cost of the new rail, (after deducting amount received for old rails,) and the cost of re-laying the track, are classed as extraordinary expenses. The number of cross-ties put in the track during the year has been 128,817—being 65,720 more than were ever laid in repairs in any previous year. New bridges have been built at Christian's Creek and Gordonsville, and two new road bridges over grade. Ninety-six thousand brick have been laid in culverts to replace old wooden or other defective ones. A large amount of trestle work has been renewed, and a large number of new cattle guards built. The amount of labor expended on the whole road, including city tracks in Richmond, but exclusive of ditching, was equal to 54,692½ days' works, the total cost of which was $54,750 76. The superintendent recommends the building of freight houses at several points on the road, and the covering of the new bridges to keep them from decay. The freight houses at Beaver Dam, Tolersville, Ivy, Mechum's River, and Greenwood have been repaired or rebuilt, and the freight house at Staunton was to have been completed in December.

Three locomotives have been purchased and two which were loaned the Piedmont road have been returned. The cost of repairs on these and on the two purchased from the government, has been charged to extraordinary expenses. Four passenger and four baggage cars have been built in the company's shops; and three passenger cars, a baggage car and a mail car have been repaired. Forty-two freight cars have been added to the equipment, of which 29 were purchased from the government, 5 from the York River Railroad Company, and 8 built in the company's shops. Two cars have been destroyed. The company now have 15 passenger, 2 mail and express, 3 mail and second class passenger, 6 baggage, 6 conductors', 97 box, 14 stock and 48 platform cars.

The total number of passengers carried was 119,036; of which 59,003 went west, and 60,033, east. Total mileage of passengers, 5,769,464. Total number of tons carried, 36,888; of which 15,468 went west, and 21,340 east.

A statement is given by the Treasurer, showing the indebtedness of the company on the 30th September 1865 and 1866, of which the following is an abstract:

	1865.	1866.
Mortgage debt less the amount of sinking fund	$1,394,063 87	$1,427,063 87
Bonds for dividends.	122,807 00	122,613 00
Bonds of 1866, for interest	....	83,125 03
Floating debt	245,712 99	366,369 47
	$1,762,583 86	$1,999,171 37
Less cash on hand and debts due to company	125,465 78	118,539 04
Total	$1,637,118 08	$1,880,682 33

—showing an apparent increase in the indebtedness of the company since Sept. 30, 1865, of $243,534 25. The report says:

Very much the larger portion of this increased indebtedness was really in existence on the 30th of September, 1865. It can be itemized as follows:

Iron purchased from United States government	$70,000 00
Interest funded	83,125 03
Part of amount paid government for hire of engines, say	7,000 00
Amount due October 1st, 1865, for wood, ties and material, and not then reported in excess of what was due and unpaid October 1st, 1866—say.	20,000 00
	$180,125 03

The failure to bring these items into the accounts of the year to which they belonged, was owing to the fact that no account is kept of unpaid interest, but the entries are made as it is paid or otherwise settled; and to the further fact, that unless the company is in funds, the general superintendent does not generally certify accounts, but puts them off until the company is prepared to pay them, and thus no evidence of the indebtedness appears upon the books of the treasurer, from which the reports are made up.

Much of the interest falling due on the bonds

of the company during the war remained unpaid, having been held over by the holders of the bonds, or bought up by others as a safe investment; this, with the semi-annually accruing interest up to January, 1867, the board found it would be impossible now to pay. The unsettled claim was likely to embarrass the operations of the company, they therefore proposed to its holders to fund at par in 8 per cent. bonds, redeemable chiefly in ten years from July, 1866, all interest up to January 1867, inclusive, and gave assurance that the regular payment of interest would be resumed on the 1st of July, 1867. This proposition was regarded as just and fair, and has been received generally with favor by the parties interested. A considerable amount has already been funded, and the funding is still progressing.

Under the authority of the stockholders, and with the assent of the general assembly, 8 per cent. coupon bonds, to the extent of $300,000, have been issued, secured by mortgage and payable in ten years. But $33,000 of these bonds have been sold, leaving in the possession of the company $267,000, which will be held in case of emergency, and for the completion of the road to Covington, so soon as it shall be deemed expedient to do so.

The financial condition of the company has been such that no addition could be made to the sinking fund, it remains therefore as it was on the 30th of September, 1865.

The difficulty of raising funds, and the knowledge of the fact that the White Sulphur Springs would not be opened to any extent in 1866, prevented the completion of the road from Jackson's River Depot to Covington during the past year.

It is deemed advisable to make arrangements for its completion at as early a period as the condition of the country and of the finances of the company will justify it. Very slight damage has accrued to the work already done from the lapse of time.

The general assemblies of the States of Virginia and West Virginia, at their last sessions, invested a commission, composed of prominent gentlemen in each state, with the power to transfer the franchise of the Covington and Ohio Railroad Company to such persons as would make the most favorable propositions for the speedy construction of the work. In May last these commissioners entered into certain contingent agreements with gentlemen in New York, of the highest personal and financial positions, who immediately sent one of their number to Europe to make the necessary financial arrangements. The subsequent political and monetary complications in that country have retarded their operations; but now there is every reason to hope, that in a short time those arrangements will be completed, and that the work will be energetically pressed forward. Should there, however, be a failure in these arrangements, and should the commissioners not succeed in getting competent parties to take the work, so vital is the interest of this company in this great enterprise, that your board will regard it as the duty of the Directory of the Company to ask the stockholders to take into consideration the propriety of themselves undertaking a work, without the completion of which your road must remain a mere local one.

Some purchases have been made of real estate, contiguous to the property of the company in Richmond, which were deemed essential to its interest.

Connections have been formed and arrangements, made which give the company a full share of the travel between Richmond and the Southwestern cities.

A contract was made in August, 1865, with the Adams Express Company, by which they lent this company $50,000, and obtained the privilege of doing, under proper restrictions, express business upon your passenger trains, to the exclusion of other parties who would not make a like loan and agree to similar restrictions. The National Express Company, subsequently organized, made complaint against this contract, and upon the suggestion by the Board of Public Works that the contract was tainted by usury and was illegal, the Board of Directors of this Company, on the 16th of November last, directed that the Adams Express Company should be informed of these facts, and notified that the execution of the contract must be suspended, and asked to assent to such changes as would make it conform to law. On the 24th of November, the Adams Company notified this Company that they would expect a compliance with the contract. The opinion of counsel was taken, which was favorable to the legality of the contract. The Adams Company, however, acceded to a modification of the contract, and a new one was made on December 1st, by which the advance was converted into a prepayment, without interest, instead of a loan; this cured the taint of usury. This company had received the money of the Adams Company, had spent it, and had it not to repay. Every dictate of honor and honesty required that this contract should be fairly carried out, unless the courts decided it to be illegal, and the directory determined upon that course. An unavailing effort was made to arrange the matter with the National Express Company, and on January 1st they were remitted to the freight trains, and their remedy in the courts. They applied for an injunction to restrain this company from carrying out their contract; this injunction was awarded, and on the 11th day of July, 1866, the passenger trains, without the restrictions of the contract with the Adams Company, were thrown open to all parties desiring to forward matter, and so remain at this time.

The general condition of the roadway is good; your rolling stock is in excellent condition. You have on hand a good supply of wood, a fair supply of other necessary material. Several of your depots are rebuilt, and the others will be in the course of this fiscal year. We think that your revenues will increase considerably during this year, and we feel assured that the expenditures will be much less. With an improvement in the condition of the country, your property will become as valuable as it ever was.

The financial condition of the company September 30, 1866, was as follows:

Capital stock:		
State's subscription		$2,013,987 52
Individual subscriptions		1,339,691 50
		$3,353,679 02
Funded debt, viz:		
Bonds guaranteed by State, payable in 1880	$100,000 00	
Coupon bonds of 1851, payable in 1872	206,500 00	
Coupon bonds of 1854, payable in 1884	983,000 00	
State Loan 1859-'60	210,000 00	
Coupon bonds of 1865, payaole in 1876	33,000 00	
Coupon bonds issued for funding interest, payable 1877	79,500 00	
Registered do., payable 1870	3,625 03	
Bonds issued for dividends in 1851, payable 1866	23,116 00	
Do. in 1853, payable 1875	82,640 00	
Do. in 1855, now due	16,857 00	
Bonds issued for temporary loans, now due	55,704 23	
Do. to contractors, now due	5,880 00	
		1,799,822 26

Treasurer.—J. GARRETT.
Superintendent.—H. D. WHITCOMB.

The National Finances.

REPORT OF THE SECRETARY OF THE TREASURY.

In his report under date of the 4th of December, 1865, the Secretary estimated, according to the data furnished him by this Department and by the other Departments, that the expenditures of the Government for the three quarters of the fiscal year ending June 30, 1866, would exceed the receipts $112,194,947 20. The result was widely different. The receipts exceeded the estimates $89,905,905 44; the expenditures fell short of the estimates $200,529 235 30. The following statement exhibits the items of increase of receipts and decrease of expenditures in comparison with the estimates:

STATEMENT *of the estimated and actual receipts and expenditures of the United States from October* 1, 1865, *to June* 30, 1866.

	Receipts. Estimated.	Receipts. Actual.	Excess of Receipts.
Customs	$100,000,000 00	$132,037,068 55	$32,037,068 55
Lands	500,000 00	532,140 40	32,140 40
Internal revenue	175,000,000 00	212,607,927 77	37,607,927 77
Miscellaneous	80,000,000 00	48,285,125 90	18,285,125 90
Direct tax		1,943,642 82	1,943,642 82
		$395,405,905 44	$89,905,905 44
Cash balance Oct. 1, 1865	$305,500,000 00	67,158,515 44	
	$372,658,515 44	$462,564,420 88	
	Expenditures. Estimated.	Expenditures. Actual.	Excess of Estimate.
Civil service	$32,994,052 88	$30,485,500 55	$2,508,551 33
Pensions and Indians	12,256,730 94	11,061,285 79	1,195,505 15
War department	307,788,750 57	119,080,464 50	188,708,286 07
Navy department	35,000,000 00	26,802,716 31	8,197,283 69
Interest on public debt	96,818,868 75	96,894,260 19	*80,391 44
	$484,863,462 64	$284,324,227 84	$200,529,235 30

* Deficiency in estimate for interest on public debt.

RECAPITULATION.

Actual receipts, including cash balance		$462,564,420 88
Estimated receipts, including cash balance		372,658,515 44
		$89,905,905 44
Estimated expenditures	$484,853,462 64	
Actual expendit's.	284,824,227 34	
		200,529,235 30
Total		$290,435,140 74

The following is a statement of receipts and expenditures for the fiscal year ending June 30, 1866:

Balance in Treasury, agreeable to warrants July 1, 1865		$858,309 15
To which add balance of sundry trust funds not included in the above balance		2,217,732 94
		$3,076,042 09
Receipts from loans		712,851,553 05
Receipts from customs		179,046,651 58
Receipts from lands		665,031 03
Receipts from direct tax		1,974,754 12
Receipts from internal revenue		309,226,813 42
Receipts from miscellaneous sources		67,119,369 91
		$1,273,960,215 20

Expenditures:

Redemption of public debt	$620,321,725 61	
For the civil service	41,056,961 54	
For pensions & Indians	18,852,416 91	
For the war department	284,449,701 82	
For the navy department	43,324,118 52	
For interest on the public debt	133,067,741 69	
		1,141,072,676 09
Leaving a balance in the Treasury on the first day of July 1, 1866.		$132,887,549 11

The following is a statement of the receipts and expenditures for the quarter ending September 30, 1866:

Balance in Treasury, agreeable to warrants July 1, 1866		$132,887,549 11
Receipts from loans		174,011,622 24
Receipts from customs		50,843,774 24
Receipts from lands		228,399 72
Receipts from direct tax		340,454 39
Receipts from internal revenue		99,166,993 98
Receipts from miscellaneous sources		7,981,764 24
		$465,460,557 92

Expenditures:

For the redemption of the public debt	$243,782,683 44	
For the civil service	11,893,736 44	
For pensions and Indians	11,787,975 66	
For the war department	13,833,214 03	
For the navy department	7,873,609 17	
For interest on the public debt	33,865,399 99	
		323,041,768 73
Leaving a balance in the Treasury on the first day of Oct., 1866		$142,418,789 19

The following statement exhibits the items of increase and decrease of the public debt for the fiscal year ending June 30, 1866:

Amount of public debt, June 30, 1865		$2,682,593,026 53
Amount of cash in Treasury		858,309 15
		$2,681,734,717 38
Amount of public debt, June 30, 1866	$2,783,425,879 21	
Am't of cash in Treasury.	132,887,549 11	
		2,650,538,330 10
Net decrease		$31,196,387 28

This decrease was caused as follows, by payments and *increase of cash in Treasury*:

Bonds, 6 per cent., acts July 21, 1841, and April 15, 1842		$116,139 77
Treasury notes, 6 per cent., acts December 23, 1857, and March 2, 1861		2,200 00
Bonds, 5 per cent., act September 9, 1850, (Texas indemnity).		283,000 00
Treasury notes, 7-30, act July 17, 1861		380,750 00
Certificates of indebtedness, 6 per cent., act March 1, 1862		89,381,000 00
Treasury notes, 5 per cent., one and two year, act March 3, 1863		38,884,480 00
Compound interest notes, 6 per cent., act June 30, 1864		34,743,940 09
Bonds, 5 per cent., act March 3, 1864		1,551,000 00
United States notes, acts July 17, 1861, and Feb. 12, 1862		200,441 00
United States notes, acts February 25, July 11, 1862, and March 3, 1863		32,068,760 00
Postal currency, act July 17, 1862		2,884,707 88
Cash in Treasury increased		132,029,239 96
Gross decrease		$332,525,658 61

From which deduct for increase, by:

Bonds, 6 per cent., acts July 1, 1862, and July 2, 1864, issued to Central Pacific Railroad Co., &c., interest payable in lawful money	$4,784,000 00	
Treasury notes, 7-30, acts June 30, 1864, and March 3, 1865, interest payable in lawful money	134,641,150 00	
Temporary loan, 4 5 and 6 per ct., acts July 11, 1862, and June 30, 1864	30,459,135 25	
Gold certificates, act March 3, '63	10,713,180 00	
Fractional currency, act March 3, 1863	4,949,756 08	
Bonds, 6 per cent., act July 17, '61.	146,050 00	
Bonds, 6 per cent., act March 3, '64	3,882,500 00	
Bonds, 6 per cent., act June 30, '64.	8,211,000 00	
Bonds, 6 per cent., act March 3, '65	103,542,500 00	
		301,329,271 33
Net decrease		$31,196,387 28

The following statement exhibits the items of increase and decrease of the public debt for the four months from June 30, 1866, to October 31, 1866:

Amount of public debt, June 30, 1866		$2,783,425,879 21
Amount of cash in Treasury		132,887,549 11
		$2,650,538,330 10
Amount of public debt, October 31, 1866	$2,681,636,966 34	
Add amount of old funded and unfunded debt, included in debt of June 30, 1866, not in statement	114,115 48	
Total	$2,681,751,081 82	
Am't of cash in Treasury.	130,326,960 62	
		2,551,424,121 20
Net decrease		$99,114,208 90

Which decrease was caused as follows, by payments:

Bonds, 6 per cent., act July 21, 1841, and April 15, 1842		$14,500 00
Bonds, 6 per cent., act January 28, 1847		1,672,450 00
Bonds, 6 per cent., act March 31, 1848		617,400 00
Bonds, 5 per cent., act September 9, 1850 (Texas indemnity)		175,000 00
Bonds, 5 per cent., act March 3, 1864 (Ten-forties)		149,750 00
Treasury notes, 6 per cent., acts December 23, 1857, and March 2, 1861		6,150 00
Temporary loan, 4, 5 and 6 per cent., acts February 25, March 17, July 11, 1862, and June 30, 1864		75,172,997 76
Certificates of indebtedness, 6 per cent., acts March 1, 1862, and March 3, 1863		26,209,000 00
Treasury notes, 5 per cent., one and two year, act March 3, 1863		500,000 00
Treasury notes, 7-30, act July 17, 1861		11,200 00
Compound interest notes, 6 per cent., act June 30, 1864		10,500,000 00
Treasury notes, 7-30, acts June 30, 1864, and March 3, 1865		82,237,250 00
United States notes, acts July 17, 1861, and February 12, 1862		3,804 00
United States notes, act February 25, 1862, July 11, 1862, and March 3, 1863		10,691,779 00
Postal currency, act July 17, 1862		691,031 75
Gross decrease		$208,652,312 51

From which deduct for increase of debt and *decrease of cash in Treasury*:

Bonds, 6 per cent., act July 17, 1861	$7,050 00	
Bonds, 6 per cent., act March 3, 1865	101,738,500 00	
Bonds, 6 per cent., acts July 1, '62, and July 2, '64, issued to Central Pacific R. R. Co., &c., interest payable in lawful money	3,840,000 00	
Gold certificates, act March 3, '63	183,800 00	
Fractional currency, acts March 3, 1863, and June 30, 1864	1,208,165 12	
Cash in Treasury, decreased	2,560,588 49	
		109,538,103 61
Net decrease		$99,114,208 90

The following statement exhibits the items of increase and decrease of the public debt from the highest point, August 31, 1865, to October 31, 1866:

Amount of public debt Aug. 31, 1865, as per statement		$2,845,907,626 56
Amount of old funded and un-		

funded debt		114,115 48
		$2,846,021,742 04
Amount of cash in Treasury		88,218,055 13
		$2,757,803,686 91
Amount of public debt Oct. 31, 1866, as per statement	$2,681,636,966 34	
Amount of old funded and unfunded debt	114,115 48	
	$2,681,751,081 82	
Am't of cash in Treasury.	130,326,960 62	
		2,551,424,121 20
Net decrease		$206,379,565 71

Which decrease was caused as follows by payments and *increase of cash in Treasury:*

Bonds, 6 per cent., act Jan. 28, 1847	$1,672,450 00
Bonds, 6 per cent., acts July 21, 1841, and April 15, 1842	144,039 77
Bonds, 6 per cent., act March 31, 1848	617,400 00
Bonds, 5 per cent., act March 3, 1864	1,700,750 00
Bonds, 5 per cent., act Sept. 9, 1850, (Texas indemnity)	455,000 00
Treasury notes, 6 per cent., acts Dec. 23, 1857, and March 2, '61	8,200 00
Temporary loan, 4, 5 and 6 per cent., acts Feb. 25, 1862, and June 30, 1864	62,146,714 27
Certificates of indebtedness, 6 per cent., acts March 1, 1862, and March 3, 1863	84,911,000 00
Treasury notes, 5 per cent., one and two years, act March 3, '63	31,000,000 00
Treasury notes, 7-30, act July 17, 1861	295,100 00
Compound interest notes, 6 per cent., act June 30, 1864	68,512,020 00
Treasury notes, 7-30, act June 30, 1864, and March 3, 1865	105,985,700 00
United States notes, acts July 17, 1861, and Feb. 12, 1862	134,610 00
United States notes, acts Feb. 25, 1862, July 11, 1862, and March 3, 1863	42,830,174 00
Postal currency, act July 17, 1862	3,029,739 63
Suspended requisitions	2,111,000 00
	$405,553,897 67
Increase of cash in Treasury	42,108,905 49
Gross decrease	$447,662,803 16

From which deduct for increase—

Bonds, 6 per cent., acts July 17, and Aug. 5, '61	$114,750 00	
Bonds, 6 per cent., act March 3,'64	3,882,500 00	
Bonds, 6 per cent., act June 30, '64	8,211,000 00	
Bonds, 6 per cent., act March 3,'65	205,281,000 00	
Bonds, 6 per cent., acts July 1, '62, and July 2, '64, issued to Central Pacific R. R. Co., &c., interest payable in lawful money	8,624,000 00	
Fractional currency, acts March 3, 1863, and June 30, 1864	4,273,007 45	
Gold certificates, act March 3,'63	10,896,980 00	
		241,283,237 45
Net decrease		$206,379,565 71

These statements are in the highest degree encouraging. They are conclusive evidence of the greatness of our resources, and they clearly indicate the patience of the people under self-imposed burdens, and their unwillingness that this debt should be a perpetual incumbrance upon the country.

The following is a statement of the public debt June 30, 1866, exclusive of cash in Treasury:

Bonds, 10-40s, 5 per cent., due in 1904	$171,219,100 00
Bonds, Pacific Railroad, 6 per ct., due in 1895 and 1896	6,042,000 00
Bonds, 5-20s, 6 per cent., due in 1882, 1884 and 1885	722,205,500 00
Bonds, 6 per cent., due in 1881	265,317,700 00
Bonds, 6 per cent., due in 1880	18,415,000 00
Bonds, 5 per cent., due in 1874	20,000,000 00
Bonds, 5 per cent., due in 1871	7,022,000 00
Bonds, 6 per cent., due in 1868	8,908,341 80
Bonds, 6 per cent., due in 1867	9,415,250 00
Compound interest notes, due in 1867 and 1868	159,012,140 00
7-30 Treasury notes, due in 1867 and 1868	806,251,550 00
Bonds, Texas indemnity, past due, not presented	559,000 00
Bonds, Treasury notes, &c., past due, not presented	3,815,675 80
Temporary loan, ten days' notice.	120,176,196 65
Certificates of indebtedness, past due, not presented	26,391,000 00
United States notes	400,891,368 00
Fractional currency	27,070,876 96
Gold certificates of deposit	10,713,180 00
Total	$2,783,425,879 21

Cash in Treasury, $132,887,549 11.

The following is a statement of the public debt, October 31, 1866, exclusive of cash in Treasury:

Bonds, 10-40s, 5 per cent., due in 1904	$171,069,350 00
Bonds, Pacific Railroad, 6 per cent. due in 1895 and 1896	9,882,000 00
Bonds, 5-20s, 6 per cent., due in 1882, 1884 and 1885	823,944 000 00
Bonds, 6 per cent., due in 1881	265,324,750 00
Bonds, 6 per cent., due in 1880	18,415,000 00
Bonds, 5 per cent., due in 1874	20,000,000 00
Bonds, 5 per cent., due in 1871	7,022,000 00
Navy pension fund, 6 per cent.	11,750,000 00
Bonds, 6 per cent., due in 1868	8,290,941 80
Bonds, 6 per cent., due in 1867	7,742,800 00
Compound interest notes, due in 1867 and 1868	148,512,140 00
7-30 Treasury notes, due in 1867 and 1868	724,014,300 00
Bonds, Texas indemnity, past due, not presented	384,000 00
Bonds, Treasury notes, temporary loan, certificates of indebtedness, &c., past due, not presented	36,604,909 21
United States notes	390,195,785 00
Fractional currency	27,588,010 33
Gold certificates of deposit	10,896,980 00
Total	$2,681,636,966 34

Cash in Treasury, $130,326,960 62.

The Secretary estimates that the receipts for the three quarters ending June 30, 1867, will be as follows:

Receipts from customs	$110,000,000 00
Receipts from lands	500,000 00
Receipts from internal revenue	186,000,000 00
Receipts from miscellan's sources	20,000,000 00
	$316,500,000 00

The expenditures, according to his estimates will be:

For the civil service	$37,405,947 39	
For pensions and Indians	12,262,217 21	
For the war department, including $15,000,000 for bounties	58,804,657 05	
For the navy department	23,144,810 31	
For interest on the public debt	105,551,512 00	
		237,169,148 96
Leaving a surplus of estimated receipts over estimated expenditures of		$79,330,856 04

The receipts for the next fiscal year ending June 30, 1868, are estimated as follows:

From customs	$145,000,000 00
From internal revenue	265,000,000 00
From lands	1,000,000 00
From miscellaneous sources	25,000,000 00
	$436,000,000 00

The expenditures are estimated as follows:

For the civil service	$50,067,342 08	
For pensions and Indians	25,388,489 09	
For the war department including $64,000,000 for bounties	110,861,961 89	
For the navy department	30,251,605 26	
For interest on the public debt	133,678,243 00	
		350,247,641 32
Leaving a surplus of estimated receipts over estimated expenditures of		$85,752,358 68

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Nov. 24th, 1866, were $140,242 00
Corresponding week of previous year.. 152,504 00
Decrease $12,262 00

The earnings of the Chicago and Northwestern Railway for the fourth week in Nov., 1866, were $281,565 00
Corresponding week of previous year,. 237,368 00
Increase $44,197 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Nov. 22d, 1866, were $35,911 00
Corresponding week of 1865 41,250 00
Decrease $5,339 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in Nov., 1866, were $63,556 00
Corresponding week of previous year.. 68,161 00
Decrease $4,605 00

☞ It is stated that contracts to the amount of some forty millions of dollars are soon to be let for constructing the Union Pacific Railway, from the Omaha branch, its present terminus, to Salt Lake City; and also to build a railroad bridge across the Missouri River, between Omaha and Council Bluff.

☞ The Albany *Argus* says a survey ordered by the State of New York with reference to a ship canal from the Hudson River to Lake Champlain, has shown the project to be entirely practicable. It will open a communication for a large class of vessels between the Hudson River, Lake Champlain, the River St. Lawrence and the great lakes.

American Railroad Journal.

Saturday, December 8, 1866.

Stock Exchange and Money Market.

The Annual Report on the National Finances by Secretary McCulloch just presented to Congress, is very favorably viewed in the street by all parties. Surprise is expressed that the actual national income of the last fiscal year has so far exceeded, and the actual public expenditures fallen so far short of, the estimates of the Secretary in his preceding annual report.

Next to the President's Message, and the Report of Secretary McCulloch, the report of Commissioner Rollins, of the Internal Revenue Bureau, has been of most interest to business people. From this report, it appears that the internal revenue of the Government, during the last fiscal year, which ended June 30, 1866, reached $310,-906,984, against $211,129,529 the preceding year, and $117,145,749 the year ending with June 30, 1864. These amounts include drawback upon goods exported and amounts refunded as erroneously assessed and collected, but are exclusive of the direct tax upon lands, and the duty upon the circulation and deposits of national banks. The income tax yielded $60,894,136 the last fiscal year, making the total amount received from the tax upon incomes since the passage of the law of 1862, and including the collections during the present fiscal year, already reported to the office, $164,865,018 05. The Commissioner expresses the belief that the receipts of the current fiscal year will reach the sum of $285,000,000. An earlier day for the making of returns, under the annual list, income, &c., is recommended.

The publication of the Message and documents has tended to reassure the public, and to revive confidence in commercial circles. The money market has been gradually relaxing in favor of borrowers, during the week, under an accumulating supply, available for temporary purposes. The demand for accommodation has been mainly for call loans, and from the Stock firms, whose wants have been pretty promptly supplied at 6@7 per cent.; while to the Government houses, capital has been quite freely offered, and only moderately availed of, at 5 per cent. In discounts the business has been on a restricted scale and confined almost exclusively to prime short date commercial paper, which passes at 6½@7 per cent. per annum. The last city bank statement was regarded as the most favorable, for some weeks past. It showed a reduction of $4,908,747 in the loan item, as an offset to the loss of $4,525,807 in the deposit line, $873,796 of legal tenders, and $245,858 in specie. The circulation increased $32,431. The city bank deposits are now $208,-889,177, against $228,484,370 week ending Oct. 6, 1866, and $175,523,894, week ending Dec. 2, 1865. Their legal tender reserve amounts to $61,485,458, against $48,220,805 same time last year. Their circulation now stands at $31,393,849 against $15,-867,400 same time last year. The loans are now $263,011,688, against $279,135,796 six weeks ago, and $229,197,844 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged only $108,180,240 a day, against a daily average of $152,906,000 the preceding week; and $140,429,216 the week ending with Nov. 18. The current week's exchanges average about $115,000,000 a day.

National Bank notes to the amount of $828,-190, were issued last week, making the total issue to 1,663 banks thus far $299,027,259, against $282,-555,440 at the close of the last fiscal year, June 30, 1866. From the total issued is to be deducted the currency surrendered and returned, which includes worn out notes, amounting at date to $2,-073,932, leaving the amount of national bank notes in actual circulation $296,953,327. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,354,650; and for the public deposits, $39,217,950—making a total of $379,572,-600. The Treasury Department, last week, redeemed and destroyed $247,200 of worn and mutilated fractional currency, and issued $178,667 worth of new. The Comptroller of the Currency, in his report, states that since the last annual report 62 national banks have been organized, of which 51 are new associations, and 11 are conversions of existing state banks to the national system, making the total number organized up to October 1, 1,663 of which 1,647 were in operation, with an aggregate capital of $417,245,154 07, and a circulation of $292,671,753, secured by a deposit of bonds to the amount of $332,467,700.

The U. S. Sub-Treasury receipts, week ending with Dec. 1, were $15,094,432, including $1,178,-

246 from customs duties; payments, $15,277,828; balance at the close of the week, $102,455,273. against $102,638,169 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday receipts, $5,025,720, and payments, $4,-909,979; Tuesday receipts, $3,000,928, and payments, $2,173,920. The balance at the close of business on Tuesday stood at $103,598,023, against $103,282,070 a week ago.

Government revenues were on a restricted scale, last week, partly owing to the occurrence of Thanksgiving, which lessened the number of business days. Excises yielded about $4,650,000, against $3,612,683 the preceding week; customs at the port of New York, $1,173,246, and at the outports, at least $391,000 (in coin) more, making the grand total income for the week equal to about $6,840,000 in currency, against disbursements of $3,275,000 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $148,000,000, or an average of over six millions a week.

The extremes of Gold, during the week, have been 142¼@138½, the lowest point having been reaching on Wednesday, under a pressure to realize, in apprehension of the gradual marketing of the surplus coin reserve of the National Treasury, as intimated in the proceedings of Congress, and the Washington correspondence of the city journals. The speculation at present is most decidedly adverse to the *bull* interest, and extensive *short* sales are being made. Cash gold is abundant, and a handsome commission is being paid by some of the more sanguine operations for a rise, to have their burdens carried for the present. A bill has been introduced into the House of Representatives, by Mr. Boutwell of Mass., recommending the public sale of two millions gold per week by the Treasury but serious doubts are expressed of its passage. The bill is now in the hands of the Ways and Means Committee, some of the members of which have already expressed their opposition to the measure. The sales of Treasury gold have been recently confined to small sums, amounting, since this day week, or thereabouts, to between four or five millions. It is said that the currency proceeds have been employed in buying some of the short-date obligations of the Government, such as the Seven-Thirties, and the Compound Interest notes. It is also stated that the Secretary does not contemplate making free sales of gold at present, and will only market such small amounts as the public interest will justify him in disposing of. The closing rate of Gold on Wednesday was 138⅞. The customs and export inquiry is very moderate at present. The total imports of specie from Europe, and other ports since January 1, have been $9,264,692. The customs demand for Gold last week, averaged $234,649 a day; thus far, this week, it has been equal to $217,274 a day, or equal to a weekly aggregate of $1,303,644. The arrivals of specie from Europe, Havana and other foreign ports, last week, reached $90,900, and from California, $1,134,033. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $124,502,017, against $95,369,365 same time last year. The total receipts of California gold at this port since Jan. 1, have been $39,431,383, against $19,057,560 same time last year, showing an increase, in 1866, of $20,373,823. The exports of specie from this port, last week, were $636,571, making the total outflow of specie from the port, since Jan. 1, $58,-568,448, against $27,218,619 same time last year, $45,546,383 same time in 1864, and $67,804,733 same time in 1859. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $147,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $46,957,971, against $37,621,026 same time last year. The specie exports from San Francisco from Jan. 1, to Nov. 8, reached $38,-499,629, against $38,266,275 same time last year.

Business in Foreign Exchange was rather active for Saturday's steamers and moderate for Wednesday's. The supply of prime bills was fair, but the leading drawers were quite firm in their views. The price of prime Sterling is now close up to the specie shipping point. Bankers' 60 day bills on London closed at 109¼@109½, and on Paris to 5.17½@5.13¾; sight bills on London to 110@110¼; and on Paris to 5.13½@5.11¼. The offerings of produce bills have been moderate this week, representing in part, direct exports of cotton from Southern ports. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,480,885, making the exports since January 1, $175,383,922, against $160,805,868 same time last year.

Government securities have been in quite active request at buoyant prices, since our last, for home and foreign investment purposes. The chief inquiry has been for the later issues of the Five-twenties, and the first and second series of Seven-Thirties. The first issue of the Five-twenties of 1865 has been at length recognized at the London Stock Exchange as was anticipated by us, in this column, some weeks since, and these bonds are now as regularly quoted, as those of 1862, in the London telegrams. They are within one per cent. of the original issue, in the London market. U. S. sixes of 1867 closed here on Wednesday at 133; U. S. sixes of 1868, at 131½; U. S. sixes of 1881, 113@113¼; U. S. Five-twenties of 1862 at 108½@108¾, ex-coupon; U. S. Five-twenties of 1865 at 107¼@107⅜; U. S. Five-twenties of 1865, consolidated, 108⅞@109⅛; U. S. Ten-forties at 100@100⅛, and U. S. Seven-thirties at 105½@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116¼	May, 1865	111¾
July, 1864	115¾	August, 1865	110¾
August, 1864	115¼	September, 1865	110¼
October, 1864	114¼	October, 1865	109¾
December, 1864	113¼		

There has been some increase of activity in railway and miscellaneous share property, which opened with a rising tendency. For a day or two preceding Wednesday, there was considerable hesitation, equivalent to positive weakness in the market, and the *bear* element was very industriously laboring to depress values, by sinister rumors relative to impending Treasury negotiations, involving probable stringency in money, and a consequent forced realization on stocks, to the detriment of prices. These rumors, however, were entirely groundless, and designed exclusively to promote the schemes of their unscrupulous authors. At the close of Wednesday, there was a partial restoration of confidence, and of buoyancy in the market.

In produce and merchandise, there has been rather more doing, but generally on a reduced scale of prices. Breadstuffs and provisions have declined materially, and been more freely purchased at the reduced figures. Cotton has been in moderate request and without marked changed in value, closing with Middlings at 33@36 cents per lb. The stock of cotton now here is estimated at about 140,000 bales. The receipts at the port this week, have averaged over 4,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 166,000 bales, against exports of 75,419 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 417,000 bales against 616,000 bales same time last year; exports, 152,-000 bales, against 306,000 bales same time last year, estimated stock at latest dates, 420,000 bales, against 390,000 bales same time last year. A slight improvement in the demand for foreign merchandise is noticeable, chiefly in the dry goods line, but prices continue, for the most part, in favor of purchasers. The total imports of foreign dry goods, last week, were 902,839, and the total amount marketed $604,617. The value of foreign merchandise imported last week, was $2,024,841—making the grand total specie value of last week's imports of dry goods and merchandise, $2,927,680, and since January 1, $275,-965,871, against $190,398,696 same time last year. The ocean freight market is moderately active and rather firm with 567 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 20.	Nov. 27.	Dec. 4.
Consols	—@90¼	89¼	88½
U. S. 5-20's of 1862	—@70½	70½	70½
U. S. 5-20's of 1865	—@69½	69½	69½
Erie	—@50	47	46¼
Ill. Central	—@78	77½	77½

The New York exports, exclusive of specie, for the week ending Dec. 4, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,840,220	$3,480,885
Prev. reported	156,965,648	171,903,037
Since January 1	$160,805,868	$175,383,922

The New York imports for the week compare as ollows:

	1865.	1866.
Dry goods	$3,589,996	$902,889
Gen. merchandise	3,203,225	2,024,841
Total for the week	$6,793,221	$2,927,680
Prev. reported	183,605,475	273,038,191
Since January 1	$190,398,696	$275,965,871

The balance in the Sub-Treasury on Wednesday was $105,182,000 40

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—N. Y. City 6s, 1887, 100; do., State 6s, 1868@1872, 100; do., 7s, Bounty Loan, reg., 107⅜; Virginia 6s, ex-coupon, 45½; Kentucky 6s, 96; Kings County 6s, 98; Dubuque and Sioux City 1st mort., 83; Chicago and North-

western, Appleton Ext. bonds, 88; Galena and Chicago 1st mort., 100; Chicago, Rock Island and Pacific 1st mort., 7s, 93; Morris and Essex 1st mort., 97¼; Chicago and Great Eastern, 30; do., 1st mort., 71; Indianapolis and Cincinnati, 87; Hannibal and St. Joseph, 56¾; New York and New Haven, 117½; Stonington, 102; New Jersey, 130; Wilkesbarre Coal, 63½; Union Navigation, 101; Mariposa pref., 31⅛; do., 1st mort., 43; Boston Water Power Co., 30¾; Rutland Marble, 21; South Am. Nav. and Marine R. R. Co., 110¾; Brunswick City Land, 7¾; Adams' Exp. ☞ J. H. Strong has been appointed Superintendent of the Housatonic Railroad.

Union Pacific Railroad.

In the year 1860 the American people decided that a railroad should be built to connect the Atlantic States with the Pacific Coast. In the years 1862 and 1864 Congress passed the Union Pacific Railroad laws, providing for the building of a road running westward, to be called the "Union Pacific Railroad," and another running east, to be called the "Central Pacific Railroad," running toward each other. These are now building, and will probably meet near the city of the "Saints" in 1871.

The Union Pacific Railroad proper commences at the one hundredth parallel of longitude west from Greenwich, in latitude about forty degrees twenty minutes, or about that of Keokuk on the Mississippi, and two hundred and fifty miles west of the Missouri River. The original law provided for three branches which should connect with the main line, and granted subsidies, both in bonds and lands, to aid in their construction. These three branches are: The Omaha branch, popularly known as the main line, being built under the same organization as the Union Pacific; the other two branches are the Atchison and the Kansas Valley branches, distinguished as the "Central" and "Southern." In accordance with the acts above noted, the Southern branch should have commenced at Kansas City (connecting direct with St. Louis, by way of Jefferson City, Mo.,) and following along the Kansas River to Fort Riley, turned then northwest by north up the Republican River, connecting with the Union Pacific Railroad at the one hundredth parallel. The Central or Atchison branch was to start from the city of Atchison, on the Missouri River, and running in a westerly direction, strike the Southern branch on the banks of the Republican River, one hundred miles from Atchison. The law provided that the companies proposing to build these several roads and branches should file their assent, with the maps of the route chosen. The Hannibal and St. Joseph Company of Missouri, filed their assent with the maps, for the construction of the central branches, for one hundred miles in length next the Missouri River. The rights and privileges which they thus acquired were on June 9, 1863, transferred to the "Atchison and Pike's Peak Railroad Company," the act of July 1, 1862, giving to the "associates, successors and assigns" of the Hannibal and St. Joseph Company, all the rights and powers thereby conveyed to them. By virtue of this arrangement, therefore, the Atchison and Pike's Peak Railroad Company are entitled to the benefits of the Pacific Railroad act. They commenced to grade the road in the fall of 1865, and began to lay the iron in May last. The first twenty miles were completed and inspected about the beginning of August, and the subsidy of $10,000 per mile paid by the Government. About fifty miles are now completed, the second section of twenty miles is inspected and approved by the Government commissioners.

At the last session of Congress permission was given to the Southern Branch Company to refile the map of their road, by which they are permitted to pass westward by the Smoky Hill route, crossing the one hundredth meridian some ninety miles southward of the Union Pacific Railroad, and of course omitting to supply the required connection of one hundred and fifty miles be-

tween the Republican River and the eastern end of the Union Pacific Railroad, without which connection the Central branch would be inoperative as a through route. It is probably with a view to securing the important Santa Fe trade not only for itself, but for St. Louis, to which city the traffic of the Southern branch will be carried.

The Atchison and Pike's Peak Railroad Company remonstrated against the change, which would cut them off from the object of their work, but the permission was given, and they now claim that, having been deprived of vested rights by the change, they should be enabled by Congress to build the wanting section of one hundred and fifty miles, by having granted to them the full subsidy for that portion, as it is now allowed for the one hundred miles already authorized. They urge that unless that section be built, the one hundred miles will not be a portion of the Pacific Railroad system, but will be an isolated line of road. They claim that it would not be fair, nor indeed possible for them to build the extra road without the same allowance as that already granted for all the rest.

An effort will therefore be made to induce Congress at its next session to grant the subsidy referred to. The company will represent the incalculable value to the country at large of a railroad connecting Northern Missouri with the great Pacific coast. They urge, too, that it is but justice to the people of Atchison that the road should be carried through, as their trade has materially fallen off in consequence of the opening up of other roads, in the absence of railroad facilities through Atchison, which is the normal outlet for a large and important section. It is claimed, too, that this is much the most reliable route, as less snow falls along this line and in North Missouri (on the parallel of forty degrees,) than in two or three degrees either north or south of that parallel.

The second twenty miles of the Central branch being completed, the Government commissioners went out to inspect it previous to the payment of the subsidy of $16,000 per mile. The Commissioners are Brevet Brigadier General J. H. Simpson, President of the Corps of Civil Engineers at Washington; Dr. W. White, of New Haven, Connecticut, and General Curtis. The officers and stockholders of the road deemed it a good opportunity to go out and see what was being done with the money, and what kind of a country lay around it, and on the way to it. An excursion party was organized, which left New York on the morning of Tuesday, the 13th ult., and increased as it went westward. The excursionists arrived in Chicago on Wednesday evening, and left on Friday morning for Kansas, *via* the Chicago, Burlington and Quincy, and the Hannibal and St. Joseph Railroads.

The road over which the train bore the excursionists runs almost due west, turning a little here and there to suit the character of the ground, but without any extensive curves or steep gradients. The first twenty miles is marked by numerous cuttings and embankments, and a few bridges; after that the road departs but little from the natural surface. The direction of the road thus far is across the country, cutting the ridges and valleys at right angles. West of that the furrow lines of the route run in the other direction—across the meridian—and but little cutting or banking up is necessary. The road is well built, the ties being large and of hard wood, running two thousand seven hundred to the mile. The iron is from Troy, N. Y., and Pennsylvania, and a little from Cleveland. The bridges are well built, there being considerable quantities of gray limestone at several points along the route, and station houses are being erected of the same material. The commissioners pronounced it excellent work. It is being performed under the supervision of C. Gunn, Esq., Civil Engineer of the road. A single telegraph wire runs along the track, the beginning of a telegraph system which will ere long flash over the continent the wants, and thoughts, and actions of millions of people, whose homes will be on the boundless plains of the great West, its fertile soil yielding food not only for them but for other untold millions elsewhere.

As already indicated, the surface of the section passed through is rolling, most of it being prairie. It has a good natural drainage, and appears to be sufficiently watered, though that fact could not be well ascertained in a trip through it at this season of the year. The soil is deep, showing an average of perhaps a yard in thicknesss by the sides of the cuttings, and reaching the astonishing depth of seventeen feet eight inches in one bottom where a well was sunk, twenty-five miles from Atchison. It rests on a subsoil of hard pan, the clay being of good quality for making bricks, being free from limestone. This rests on a bed of gray limestone, and this again on shale. Coal is believed to underlie the whole. It is a remarkable fact that the different strata have little or no dip, they do not even follow the undulations of the soil, arguing an alluvial formation undisturbed by upheavals. At the depth of about twenty feet the well borers find a thin stratum of sand, containing numerous shells, showing that the whole has been at one time under water, perhaps for ages. The character of the soil may be inferred from the fact that the crop of 1850 was fully one-fourth of the average yield, though not a drop of rain had fallen for fifteen months.

There is but little timber along the road, a regular gradation in quantity being observable from east to west. Near Atchison it is moderately plentiful, grows scarcer to the limit of Atchison county, eighteen miles out, and on the Kickapoo Reserve shows but little except in thin strips along Nigger Creek, and a few smaller streams. Geological research develops the remarkable and encouraging fact that the vegetative growth is extending westward at the rate of about two miles per year. The whole country from the Missouri River to Denver was ages ago an arid desert. From four hundred miles to about five hundred and fifty miles west of Atchison it is still barren, and it is only for a few miles west of Atchison that the timber growth has succeeded in establishing itself above the influence of prairie fires. The timber is still creeping west, preceded some three hundred miles by the grasses. Before many years have elapsed the whole country will be grassed and susceptible to timber growth, a result which will be materially aided by the presence of man. In this connection we may state that the aridity of Denver produces a very large alkaline spring, which gives forth potash enough to supply the continent.

Climatologically the line of the Hannibal and St. Joseph and Central Branch Union Pacific Railroad, lying near the fortieth parallel of latitude, is much dryer than the country north or south. It is believed that it will be available for travel in winter often when the other roads are blocked up by snow, and in like manner be free from the disasters incident to heavy floods, especially as the line lies high and dry, being well drained from rain and exposed to a wind scouring process sufficient to forever keep it clear of snow.

The country is fast filling up. All the lands as far as the west line of Atchison county were entered by private parties before the road was decided on. These are now held at five to fifteen dollars per acre, good land near the county line selling at $1,000 the quarter section. To compensate for this, the company holds 125,000 acres of magnificent land in the famous Kickapoo reserve, which will soon be in the market at from three to ten dollors per acre. The land is at present unoccupied except by a few Indians of the Kickapoo and Potawottomie tribes. The road runs through the middle of the reserve, which occupies the greater portion of Brown, and parts of Atchison and Jackson Counties.

The Atchison and Pike's Peak Railroad Company has contracted with Colonel Osborne to build the whole line of one hundred miles. Sixty are now graded, and the iron laid on forty-five miles; the other fifteen will be covered by the iron rail by the 10th instant. The company has up to the present time expended about two millions of dollars, the capital stock being one million, with power to increase to an amount equal to the expense of building the road. It is the intention of the company, when the line completed to the junction of the Union Pacific Railroad, at or near Fort Kearney, to build a line connecting that point with the southern branch thus striking for the Santa Fe trade. This movement will largely benefit Northern Missouri and Chicago, as the trade of Santa Fe is a great and highly important one.

In this connection we may note that the "eastern" branch has now completed about one hundred and forty-six miles of its track from Wyandotte, and it is rumored, intends to make application to take up their track at the eastern end, connecting with the Missouri River at Leavenworth instead of Wyandotte, thirty miles distant, so as to make the road run between Leavenworth and Lawrence, instead of from Kansas City and Wyandotte to Lawrence, as now. The Leavenworth people are understood to be moving in this matter, deeming it of vital importance to their interests, as a proposed cut off from Lawrence to Pleasant Hill (about hundred and twenty-five miles,) would leave them "out in the cold" without the compensation of being with New England in that dread dilemma.—*Chicago Tribune.*

Journal of Railroad Law.

COMPETENCY OF A PARTY AS WITNESS.—THE COMMON LAW RULE APPLIED.

The case of Smith *vs.* North Carolina Railroad Company, which lately arose in North Carolina, was an action brought by a passenger on a railroad against the company to recover damages for the loss of his trunk and its contents. In North Carolina and in some other States, as Pennsylvania, the old common rule that a party cannot be a witness in his own behalf, prevails. In this case, which is of interest only to citizens of such States as still preserve the old rule, the Court held that the plaintiff, although he had no means of proving the loss of the trunk, except by his own testimony, could not be allowed to testify as to such loss in his own behalf.

The action was tried before Shipp, J., at the Fall Term of Macon Superior Court, 1863.

The plaintiff declared against the defendant as a common carrier for the loss of his trunk and its contents. It was admitted on the trial, that the trunk was put into charge of the defendant at Graham station on the road where the plaintiff took the cars, and that the trunk was put on the train as the plaintiff's baggage to be carried to Charlotte, a station on said road, that being the plaintiff's destination. The plaintiff tendered himself as a witness to prove by his own oath that the trunk was lost between Graham and Charlotte, and that he could not prove the loss otherwise, and also to prove the contents of his trunk, or for either of those purposes. The Judge was of opinion, that the plaintiff was not a competent witness in his own case, though he could not prove the loss of his trunk by other evidence than his own oath, and refused to permit him to be sworn and to testify in his own case. To which refusal the plaintiff excepted and submitted to a non-suit.

The following decision was delivered by BATTLE, J.—The question on the record by the bill of exceptions is one of much practical importance in these days of increased and increasing traveling in stages, railroad cars and other modes of conveyance. Though not a new question in some of the American States, it is now for the

first time brought before us, and we must decide it upon the principles of evidence settled and established in this State.

It is an ancient and fundamental rule of evidence in the common law, that "*Nemo in propria causa, testis esse debet.*" 1 Bla. Com., 443. Exceptions to this rule have, perhaps always, been admitted as to matters which are auxiliary to the trial, and which are in their nature preliminary to the principal subject of controversy, and are addressed to the Court. Thus a party may make affidavit to the materiality of a witness, of diligent search made for a witness, or for a paper alleged to be lost, of his inability to attend, of the death of a subscribing witness, and cases of the like kind. 1 Green. on Ev., Sec. 349. But upon the trial of the merits of the cause, on an issue before the jury, the maxim that "no one is allowed to be a witness in his own cause," has come down to us from the earliest period of the common law, almost intact. The first innovation made upon it arose out of the statute of Winchester, 13 Ed. 1 Ch. 1, commonly called the statute of hue and cry, which gave to a party robbed an action on the case for damages, against the hundred. In such action the plaintiff was allowed to be a witness on his own behalf to prove the loss. This testimony was said to have been admitted on the ground of necessity, and Lord Kenyon in Evans *vs.* Williams, 7 Term. Rep., 481, in a note, said that originally it was only in an action on that statute that it was admitted on such ground. It was no doubt thought that as the statute gave the action to the party robbed, and as he could very rarely prove his loss except by his own oath, a just and liberal construction of it gave him also the privilege of being a witness for himself. The change of the rule of evidence in cases of this kind may, therefore, very properly be considered as having been effected by statutory enactment, rather than by a deviation from it at common law. The breach in the integrity of the maxim being, however, once made, it was followed in course of time by at least one other innovation for which no statute can be held responsible. Thus, in 12 Vin. Abr., 24 pl., 32, it is laid down in a trial at *Bodmyn Coram Montague*, Baron against a common carrier a question arose about the things, in a box, and he declared that this was one of those cases where the party himself might be a witness *ex necessitate rei.* These are the only cases which have been called to our attention as having been decided by the English common law Courts; and of these it may be remarked that one was a decision at *nisi prius*, and the others were evidently the offspring of a statute. In some of the American States the decision made by Baron Montague has been adopted, and applied to the baggage of a traveler lost by the negligence of the carrier. (See Pettigrew *vs.* Barnam, 11 Maryland Rep., 434, Johnston *vs.* Stone, 11 Hamp. (Ten.) Rep., 419, Herman *vs.* Dinkwater, 1 Green. (Maine) Rep., 271, while in one State at least it has been rejected. See Snow *vs.* The Eastern Railroad Company, 12 Met. (Mass.) Rep., 44.)

In North Carolina the common law of evidence have been generally very strictly observed; and we are not aware that the maxim upon which we are commenting has been departed from as testimony intended for the jury, except in cases where the innovation has been introduced by statute. Thus in what is generally known as the book debt law, a party may prove by his own oath the items of his account to the amount of sixty dollars only. Rev. Code Ch., 15. In cases of this kind there was a very strong necessity for the admission of such testimony, but the Courts did not feel themselves at liberty to change a settled rule of evidence, and it remained unaltered until 1756, when the act entitled "an act to ascertain the method for proving book debts" was passed. (See Rev. Code of 1820, Ch., 57.) In admitting the witness to testify for himself, it is worthy of remark that the act has carefully guarded the other party against the danger of corrupt or perjured testimony. The account must be a book account, there must be no other means of proving the delivery of the articles than by the book and his oath; it must be for articles delivered within the last two years, and he must swear that the book contains "a true account of all the dealings, or the last settlement of accounts between them."

The necessity for admitting a plaintiff as a witness to prove the contents of his trunk in an action against a railroad company or other common carrier for its loss, is not greater than it was in the case of a book debt; and as in the latter named case the Courts felt themselves bound to leave it to the Legislature to supply a remedy for the mischief, so we must do in the case now before us. Our duty as a Court is, to ascertain in each case that comes before us what the law is, and then to decide accordingly; and if in the progress of society new circumstances or combinations of circumstances arise, to which there is no principle of the common law applicable, we cannot assume the functions of Legislatures to devise one.

That is the province of the Legislature, and we have neither the inclination nor the right to interfere with it.

The judgment of the Court below must be affirmed.

Richmond and York River Railroad.

The Fredericksburg (Va.) *Ledger* says that the President of this road has "not only succeeded in raising the money to buy iron to rebuild his road, which was destroyed by the war, but has also succeeded in inducing the Philadelphia, Wilmington and Baltimore Railroad Company to survey the routes to Urbanna and Piankitank respectively, with a view to building a branch road to one of the two places."

James River and Kanawha Canal.

The Richmond *Whig* solicits government aid to complete this canal to the Ohio River, as it is a work of national importance, "and will benefit not simply Virginia, but all the States touched by the Mississippi and its tributaries."

Interest and Dividends.

The Lehigh Coal and Navigation Company announces a semi-annual dividend of 5 per cent., or 2½ dollars per share, free of tax, payable on demand.

☞ The second annual election of 21 directors of the Atlantic and Great Western Railway Co., and 3 inspectors or judges of the succeeding election will be held at the office of the company in Meadville, Penn., on the 8th of January, 1867.

Proposed International Railway Uniting the Atlantic and Pacific Oceans.

The following highly interesting article on the proposed International Railway, uniting the Atlantic and Pacific Oceans, is taken from the London *Money Market Review*:

We have expended an enormous amount of capital upon the railways of Great Britain, indeed such an extravagant amount that, although the traffic upon all of them, almost without exception, is immensely greater than was anticipated in the first instance, very few of them can be considered paying lines. We have no railway paying dividends of 20 or 25 per cent. to its shareholders, and very few that pay so much as 10 per cent., but we have many, very many, in which the shareholders would be very thankful to get 5 per cent. The railway across the Isthmus of Panama also cost an enormous amount in its construction, but such is the traffic over it, and such the value of the monopoly it enjoys, that its shareholders have for several years received dividends of 20 per cent., and last year they received a dividend of 25 per cent. and a bonus of 40 per cent., making a total division of profits in one year of no less than 65 per cent. upon their capital. And this Panama line is a bad line, that is, it has had a bad port at each termini, and it passes through a country and under a climate about the worst in the world. The port at Aspinwall, on the Atlantic side, is exposed to the storm winds of the North so as frequently to render the approach of vessels dangerous, and the port on the Pacific side is in the midst of a calm-belt extending several hundred miles, in which the calm is so continuous and profound as almost to preclude the possibility of sailing vessels approaching. At one time coals could be delivered at $4 per ton at Aspinwall, whilst at the other end of the railway the price was $40 per ton. The company, therefore, was desirous of supplying the trade with coals from Aspinwall, and of bringing back cargoes of guano from Panama, by which they might have realized a profit of $70,000 a year, but they were obliged to abandon the attempt because, in consequence of the almost continual calm, the guano vessels could not get into the port of Panama. The climate of the country through which this line passes is said to be sultry and unhealthy almost beyond any other part of the world, and during the wet season the rains descend in a perfect deluge. The first thirteen miles of the line are carried over a deep swamp, covered with jungle, reeking with malaria, and abounding with wild beasts, noxious reptiles, and venomous insects. Further on it runs through a rugged country, over rapid rivers, and all sorts of impediments, and after passing the summit, descends rapidly to the Pacific. The distance is only 47½ miles, and the transit occupies about four hours, or at the rate of less than twelve miles an hour, but the exorbitant charges imposed by the company—£5 4s. 2d. each person—makes this the most expensive bit of railway traveling in the world. And yet, notwithstanding all the disadvantages of the ports, and the line, and the climate, and the exorbitant cost, the traffic is steadily increasing at the rate of 30 per cent. per annum, and the company have already as much passenger traffic as they can manage, and a great deal more goods traffic than they can undertake.

Here, then, we should imagine is a case, if any such case ever existed, in which a better line of transit, with better ports, and passing through a more favorable, as well as a more agreeable country, might enter into competition with a certainty of success pretty well assured. Such a line Commander Pim, of the Royal Navy, discovered several years ago through Nicaragua. The Republic of Nicaragua is situate about 300 miles further north than Panama, and, as the map will show, occupies as nearly as possible the central position of the New World. Its territories, containing an area of about 30,000 square miles, afford a ready means of access between the Atlantic and Pacific Oceans, which renders them of the highest degree of importance to the commerce and navigation of the world in general, and of England especially,

Its climate is varied; on the low coast lands the heat is great and the atmosphere humid, but in the interior the seasons are very uniform and marked. The scenery of Nicaragua, it is said, is most beautiful, and, taking it all in all, perhaps unrivalled in the world. The Constitution of the Republic is modelled upon that of the United States; the laws are liberal and well administered, and the State is now in a quiet, prosperous, and thriving condition. Captain Pim had six years' intimate acquaintance with the country, its government, and its people, and made himself thoroughly acquainted with its topography. There is a line of road running as nearly as possible parallel to the transverse valley of the Nicaragua Lakes, and this line, having been pronounced by competent engineers to be well adapted for the construction of a canal, seemed likely to offer no serious obstacle to the construction of a railway. It was, in fact, nearly the same line which the present Emperor of the French had pointed out many years ago as a feasible line for a ship canal. As a terminus on the Atlantic side, Captain Pim discovered, after a close examination of the coast, "the neglected and imperfectly known Bay enclosed within Monkey Point," and which has since been officially named after himself "Pim's Bay." And this really seems to be the only eligible port discoverable along that part of the Atlantic coast. Having carefully sounded and surveyed this bay, with the assistance of Mr. Armstrong, a master of the Royal Navy, Captain Pim found it admirably adapted for the purpose of the Atlantic port. On the Pacific side there was the port of Realejo, which had been surveyed by order of the British Admiralty some years before, and found to be everything that could be desired for a harbor.

The concession by the Government of Nicaragua is made for the term of ninety-nine years. Upwards of one million three hundred thousand acres of land, all situate within the three rich mineral districts of Chontales, Matagalpa, and Segovia, are ceded gratuitously; and, besides these, there are extensive land grants on each side of the line in alternate squares, one for the Government of Nicaragua and the next for the railway company, and so on all through the greater part of the line. Both the ports are to be free ports, and it is expressly stipulated that the Government shall have no sort of control over the working or management of the line. As the country abounds with such natural products, these concessions may become of great value. Large groves of india-rubber trees, with an abundance of cedar and mahogany, besides other valuable products, abound over the entire line. An examination of the gold and silver districts, it is said, has proved beyond dispute that "the gold and silver fields of Nicaragua are destined to a prominent place in supplying the precious metals to the world." Among its other manifold productions may be enumerated cochineal, indigo, sarsaparilla, vanilla, copal, cotton, cocoa, coffee, tobacco, hides, live-oak, balsams of various kinds, several dye-woods, pitch pine containing quantities of tar, lignum vitæ, a great quantity of hard woods, silk, grass, tortoise shell, &c. Some of these articles cannot be surpassed in quality by those of any other country. The indigo of Nicaragua, for example, has long been accounted the best; the cocoa is still unequalled; the coffee is equal to Costa Rican, and the cotton, when formerly exported, was superior to any of the New Orleans varieties. All these are advantages which may prove prolific sources of profit to the shareholders, but they are advantages which sink into comparative insignificance by the side of the great benefits which such a route will confer upon our commerce generally. By this railway a new road will be opened up from this country and from the United States to California and British Columbia, by which the distance will be shortened by six days, and the cost of the journey lessened by fifty per cent. Even distant China and Japan will be brought nearer than before, but New Zealand and Eastern Australia will be the greatest gainers. The former will be fifteen days nearer the greater marts of commerce, London and New York, and the latter will be nearer by several days, to say nothing of the comfort and security of making the voyage on an ocean seldom ruffled by storms and enjoying an exceptionally fine climate.

On Wednesday week a large and influential meeting was held at the London Tavern, at which several known city gentlemen attended, as well as several equally well known scientific and traveled gentlemen, who were well acquainted with the country. The chair was occupied by Admiral H. B. Young, and he was supported by Captain Bedford Pim, R. N., Captain M. F. Maury, D. C. L., Mr. Thomas Brassey, Mr. J. P. Gassiot, F. R. S., Mr. Hawkesley, C. E., Captain Charles Mangles, Lieut-Colonel Money, Mr. Moxon, Mr. J. H. Murchison, F. R. G. S., Mr. John Field, Mr. Charles Young, &c., &c. Captain Pim gave a full and lucid exposition of the nature of the project, its advantages and its practicability, which were further elucidated and confirmed by Mr. Thomas Hawkesley, who knew something of the country, and had been in communication with Captain Pim, on the subject for several years. Captain M. E. Maury, on being called upon by the chairman, said it was true that he had for many years devoted his attention to this subject, and had taken an active part in the formation of the Panama Company, and he entered into a variety of very interesting details, tending to show the vast superiority of the route propsed by Captain Pim. In the course of his address Captain Pim alluded to the "Central American Transit Company," which had established a line of communication across the Isthmus, almost parallel to the one now projected, and which was at the present moment in full working order. The company had the greatest difficulties to contend with in consequence of the silting-up of the San Juan River, which it was expected would soon compel the company to close that route. The Americans, however, prefer the Nicaragua route because it is more healthy, and much the shorter route to San Francisco; and, if such was the case now, although in the course of transit they had to change six times what would it be when the proposed line was completed? Only the other day, he said, his agent at New York informed him that, "in spite of the enormous difficulties of the route, 500 passengers had sailed for it from New York on the 29th September last." And Captain Maury, in allusion to the close opposition between the Central American Transit Company and the Panama Railway Company, stated that the former had carried 24,000 passengers against the 27,000 of the latter company; "so that the chance of traffic for the proposed company was not a matter of speculation, but a matter of fact, and showed the advantage of the Nicaragua route, so far as the communication between the east and the west coasts of America was concerned."

Captain Mangles proposed, and Mr. Moxon seconded, a resolution to the effect that "the proposed railway offers the best and cheapest means of connecting the Atlantic and Pacific Oceans, and that the time has now arrived when vigorous measures should be taken for its speedy realization." Colonel Money proposed, and Mr. J. P. Gassiot seconded, a resolution appointing a deputation to wait upon the Prime Minister and the First Lord of the Admiralty for their countenance and support, guaranteed by the Treaty of February, 1860; and Mr. Field proposed and Mr. Parke Pittar seconded a resolution appointing a committee with a view to carrying out the object. At length, then, we may hope that this great scheme will be promptly and vigorously undertaken and effectually carried out. Of late years, we fear, we have been lavishing millions and millions of capital upon many less worthy and less promising objects, and we do not think it will much redound to our credit that this one, so worthy and so promising, has been so long neglected.

Since the above was written an influential deputation, including representatives of the three large steam companies connected with the West Indies and the Pacific, have waited on the First Lord of the Admiralty concerning the Nicaragua transit route. They were most favorably received, all legitimate encouragement being promised on the part of the Admiralty. We understand that the Prime Minister is to receive the deputation on Monday next.

Maine Central Railroad.

This company will petition the next Legislature of Maine for permission to form a connection between their road and the Kennebec and Portland or to extend the former from its present terminus at Danville Junction to Portland, passing through the towns of New Gloucester, Gray, North Yarmouth, Cumberland and Falmouth. The illiberal management and inadequate facilities of the Grand Trunk Railway, on which these towns are now dependent, have aroused a very general feeling in favor of the proposed new road.

☞ At a meeting recently held at New Albany, Ind., in behalf of the projected New Albany and Indiana Railroad, it was proposed that the city should donate a fraction over $83,000 to the company, on condition that the road should be built to Lawrenceburg—connecting with the Indianapolis and Cincinnati line—by January, 1868. The meeting endorsed the proposition, which must be sanctioned by two-thirds of the freeholders of the city before the necessary bonds can be issued.

☞ It is proposed to extend the South Shore Railroad from Cohasset, its present terminus, through Scituate and Marshfield, to Duxbury.

Atlantic and Great Western Railway Co.
(CONSOLIDATED.)

SECRETARY'S OFFICE,
MEADVILLE, PA., DEC. 1, 1866.

NOTICE is hereby given that the second annual election of twenty-one (21) Directors of this Company, and also of three (3) Inspectors, or Judges, of the succeeding election, will be held at the office of the Company, in the City of Meadville, Pa., on Tuesday, the eighth (8th) day of January, 1867.

The poll will be open at 2 P. M. and close at 4 P. M.

The Transfer Books will close on the twenty-fifth (25th) day of December, and open the day after the election.

5149 J. C. CALHOUN, Secretary.

L. P. MORTON & Co.,

BANKERS,

30 Broad Street, New York,

OFFER FOR SALE THE

First Mortgage Convertible Bonds

OF THE

St. Louis, Jacksonville and Chicago Railroad Co.,

REDEEMABLE IN 1894.

INTEREST SEVEN PER CENT., FREE OF GOVERNMENT TAX, PAYABLE SEMI-ANNUALLY ON 1st APRIL AND 1st OCTOBER, IN NEW YORK.

Present Issue of Bonds $900,000,

LIMITED TO $15,000 PER MILE.

This Road is located in one of the most densely populated and most highly productive sections of Illinois.

The Company have completed and in operation ninety miles of road, and are constructing sixty miles, which will be completed within twelve months.

Under a perpetual agreement this line has been connected with that of the Chicago and Alton R. R. Co, thirty miles from St. Louis, and on completion of the work now in progress will connect with the same road one hundred and twenty six miles from Chicago. Under this agreement a bonus of ten per cent is paid to the St. Louis, Jacksonville and Chicago Co, on all traffic delivered to the Chicago and Alton Co., and harmonious action in conducting the traffic upon the two lines is effectually secured.

Price $90, and Accrued Interest.

New York, Saturday, December 15, 1866.

Railroad Ties.

We would call the attention of our readers to the advertisement of Messrs. BRADFORD & RENICK in another column. These gentlemen are prepared to furnish Railroad Ties of every description, also timber for cars, bridges, &c. Office, No. 71 Broadway, New York.

New York Central Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Henry Keep, of New York; Le Grand Lockwood, of New York; Azariah Boody, of New York; David Crawford, Jr., of New York; H. Henry Baxter, of New York; Danforth H. Barney, of New York; Joshua Hanna, of New York; Erastus Corning, of Albany; John Butterfield, of Utica; Edward B. Judson, of Syracuse; John H. Chedell, of Auburn; Geo. J. Whitney, of Rochester; William C. Fargo, of Buffalo.

Mr. Henry Keep was elected President, and Mr. W. C. Fargo, Vice-President.

Tonnage of New York.

The number of vessels arriving at and departing from the port of New York, together with the tonnage and seamen employed, during the third quarter of the year 1866, is officially stated as follows:

Entered at New York from foreign ports for the three months ending Sept. 30, 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels....	497	258,101	7,912
Foreign vessels	794	437,580	16,596
Total.....	1,291	695,681	24,508
Same time in 1865...	1,407	642,005	22,565
Same time in 1864...	1,274	574,476	21,127
Same time in 1863...	1,330	624,426	21,539
Same time in 1862...	1,504	693,360	22,429
Same time in 1861...	1,182	584,027	18,600
Same time in 1860...	1,145	582,513	19,128

Entered at New York from foreign ports for nine months ending September 30, 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels ..	1,334	778,075	24,239
Foreign vessels....	2,503	1,375,919	50,212
Total	3,837	2,153,994	74,451
Same time in 1865..	3,604	1,653,514	58,194
Same time in 1864..	3,765	1,780,005	74,518
Same time in 1863..	3,798	1,832,129	61,256
Same time in 1862..	4,047	1,899,050	60,551
Same time in 1861..	3,582	1,768,505	56,446
Same time in 1860..	3,283	1,607,240	53,686

Cleared at New York for foreign ports for the three months ending Sept. 30, 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	251	190,881	5,491
Foreign vessels	888	470,625	17,355
Total.....	1,139	661,506	22,846
Same time in 1865...	1,128	575,285	19,841
Same time in 1864...	1,349	662,333	21,711
Same time in 1863...	1,279	647,751	20,457
Same time in 1862...	1,409	702,708	21,263
Same time in 1861...	1,174	602,660	18,749
Same time in 1860...	995	533,943	17,905

Cleared at New York for foreign ports for nine months ending September 30, 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels ..	891	594,675	18,740
Foreign vessels....	2,530	1,397,601	50,637
Total.....	3,421	1,902,276	69,377
Same time in 1865..	3,182	1,556,491	53,451
Same time in 1864..	3,566	1,796,608	58,866
Same time in 1863..	3,560	1,838,602	57,649
Same time in 1862..	3,671	1,826,613	56,696
Same time in 1861..	3,267	1,628,793	53,976
Same time in 1860..	2,789	1,406,192	48,478

The following is a comparative statement of the arrivals under the American and foreign flags for the three months ending September 30, in each of the last seven years:

	American.		Foreign.	
	Vessels.	Tons.	Vessels.	Tons.
1860	772	417,824	373	164,689
1861	686	382,302	496	201,724
1861	670	370,503	834	322,857
1863	388	216,900	942	407,526
1864	486	220,267	788	364,208
1865	493	224,820	914	417,185
1866	497	258,101	794	437,580

The relative arrivals of American and foreign tonnage during the nine months ending September 30, in each of the last six years are as follows:

	American.		Foreign.	
	Vessels.	Tons.	Vessels.	Tons.
1861	2,362	1,192,921	1,220	575,584
1862	2,056	1,095,049	1,991	804,001
1863	1,443	808,305	2,345	1,023,824
1864	1,206	641,871	2,559	1,188,188
1865	1,143	574,389	2,461	1,079,125
1866	1,334	778,075	2,503	1,375,917

Coastwise commerce of New York for the three months ending September 30:

	Entered Coastwise.		Cleared Coastwise.	
	No. Vessels.	Tons.	No. Vessels.	Tons.
1860.....	374	116,848	1,139	424,534
1861.....	265	89,990	533	119,044
1862.....	512	190,120	767	168,280
1863.....	363	147,060	649	191,121
1864.....	317	112,154	730	199,757
1865.....	698	315,365	1,332	520,431
1866.....	630	342,908	1,173	484,660

Coastwise commerce at New York for nine months ending September 30:

	Entered Coastwise.		Cleared Coastwise.	
	No. Vessels.	Tons.	No. Vessels.	Tons.
1860	1,180	376,554	3,864	1,318,829
1861	916	294,085	2,397	690,948
1862	812	277,464	1,226	409,657
1863	1,256	490,003	2,162	630,419
1864	989	411,815	2,237	651,063
1865	1,465	672,538	2,761	1,049,503
1866	1,935	1,024,289	3,459	1,494,254

☞ The Green Bay *Advocate* has an article urging the importance of the Green Bay and Lake Pepin Railroad, and the necessity of speedy action in the matter. It says that the company at a recent meeting resolved to raise $2,000 for immediate use, in canvassing the subject. Wabasha has guaranteed $1,000 in cash, besides $100,000 in city and county aid.

Debt of Indiana.

The funded debt of the State of Indiana at this time is $6,953,889, of which $5,342,500 is in 5 per cents, and $1,611,389 in 2½ per cent stock; $465,070 of the 2½ per cents were redeemed last July, making $5,813 38 less interest to pay on Jan. 1 than was paid in July. The total amount of interest due in January is $153,704 87. Of this amount $138,856 55 is due to stockholders, the remainder being due on stocks held by the State Department Sinking Fund. The amount required to pay the January interest will be forwarded to New York by the Treasurer of State during the present month. It is supposed that the next redemption of the 2½ per cent stocks under the act of the last Legislature will take up the most of the certificates now outstanding.

Morris and Essex Railroad.

The receipts of this company for the year ending December 31, 1865, were:

From passengers		$457,161 92
" freight		192,147 17
" mails and sundries		31,147 01
		$680,456 10

Expenses, viz:

Repairs of road, bridges and buildings	$112,527 06	
Repairs of engines & cars	86,900 60	
Wood, oil and waste	116,531 42	
Operating the road, and transporting passengers and freight	160,421 10	
Salaries and insurance	17,926 90	
Government tax	19,478 67	
		$513,785 75
Earnings less expenses		$166,670 35
Paid interest on funded and floating debt of the company		112,160 30
Balance		$54,510 05

Two semi-annual dividends and one semi-annual interest have been paid during the year, amounting to $222,744 92; of which there was paid in stock of the company $97,650, and in cash $125,-094 92. The President, in his report dated June 19, 1866, says:

It was expected, at the last annual meeting, that the Phillipsburgh Branch would ere this have been in successful operation. But various causes have conspired to delay the completion of that work. It is now, however, nearly finished. Some grading yet remains to be done, on Sections 7, 20 and 21. The Directors recently went over the entire line, for the purpose of ascertaining the condition of the work, and the probability of its early completion. The grading will be entirely completed, and the permanent track laid and in use, at a very early day. It has already been* laid at all points of the line, except the sections above referred to. A temporary track has been put down at the unfinished parts, which has been used to a moderate extent for the transportation of coal, for nearly six months past; and which is capable, as soon as the requisite accommodations for disposing of coal on a large scale can be provided, of passing at least 2,000 tons a day. These accommodations are being pushed forward with all the energy which the work admits of, and the company will soon be in a condition to inaugurate this branch of traffic on an extended scale. The Board have steadfastly kept in mind, that the business of the line will receive its full development only when it fully participates, (as it soon will) in the vast commerce carried on between the City of New York and the Great West, including Pennsylvania. The coal beds and iron mines of that state, and the grain fields of the more Westerly States, must have an outlet to the Atlantic Seaboard. This outlet must necessarily be across New Jersey; and nothing can prevent this company from receiving its fair share of this great trade. At this moment, an amount of traffic stands waiting to precipitate itself upon the road, sufficient to fill the line to its utmost capacity. All that the company needs is adequate capital, to put the road in a condition to receive the business, and to furnish it with rolling stock sufficient to carry it on. This the Board, as will afterwards appear, are endeavoring to provide; and they have strong hopes of being able, without difficulty, to raise all that is necessary to put into profitable use the large amount of capital which is already invested, and much of which yet lies dead and unproductive.

The Board, in anticipation of the work to be done, have already provided a large amount of rolling stock, which is ready, or nearly so, for immediate use. They have purchased four hundred double coal-cars, capable of carrying ten tons each, and have, during the year, added thirteen locomotives to their propelling force, and have several more under contract; and have also been largely increasing their stock of freight and passenger cars. But a still larger stock is yet desirable, and it is of the highest consequence, that the works should not be allowed to remain idle, or to do less than they are capable of doing, for lack of the requisite rolling stock, fixtures, machinery, wharves, freight depots, and other conveniences, adapted to the road, with all its capacities and wants. One cause of the delay in the completion of the extension has been the rocky character of the excavations on the sections above mentioned. This, together with the increased price of labor and materials, has greatly enhanced the cost of the work beyond the original estimates. The road when completed will be one of the best in the country. Its grades will be easy, its curves slight, its tangents long and prevailing, and its capacity will be fully equal to that of any other road of equal length. Its cost will be much less than that of competing roads, which have proved highly successful and remunerative.

It should be added, that, besides the additional outlay which will have to be made in completing and furnishing the present line of the road, the Board also contemplates the speedy construction of a branch from Denville to Boonton, in order to accommodate the extensive iron interests that centre at the latter point. This branch will form part of the main branch, hereafter to be constructed through the Great Notch.

A double track is also being constructed from Roseville to South Orange, and it is proposed at once to extend the same to Millburn, and possibly to the Passaic River, near Chatham.

In addition to these extensions of the double track, large additions to the sidings of the whole line are being made, which, as long as the road consists of a single track, are absolutely essential to the introduction of an extensive coal and freight traffic, in connection with regular passenger trains. A double draw is also being made at the Hackensack bridge. Besides this, extensive repairs and improvements are going on at various points on the whole line of the road.

In view of the fact that the Pennsylvania system of railroads, with which our most important connection is to be formed, is constructed on the gauge of 4 ft. 8½ in., it was sometime since determined to adjust the road of this company to the same gauge. Accordingly, the track of the Phillipsburgh branch has been laid on this gauge; and measures are now being taken to alter the gauge of the remainder of the line to conform thereto.*

During the past year, several events of considerable interest to Stockholders have transpired, to which it is now necessary to advert.

It is known to the Stockholders, that, during the Fall of last year, an arrangement was made with The Atlantic and Great Western Railway Company for a lease to that company of the entire road and property of The Morris and Essex Railroad Company. The causes which led to the arrangement were briefly the following. The Atlantic and Great Western Railway Company have constructed a railroad, intended as a trunk road, from Dayton, Ohio, to Salamanca, New York, where it connects with the Esie Railway, and over that road, has a connection with the City of New York. At Dayton, it connects with another railroad, which extends its lines to Cincinnati and St. Louis. The proprietors of this trunk road were desirous of having a new outlet to New York; and made negotiations for that purpose with several railroad interests in Pennsylvania. A line was wanted across New Jersey to complete the series. Proposals were accordingly made to the Directors of The Morris and Essex Railroad Company, for a lease of the road of this company; and these proposals were of such a character as to make it the serious duty of the Directors to entertain them. The acknowledged high character and financial responsibility of the parties who made these proposals, consisting of Sir S. Morton Peto and his associates, who were on a visit to this country at the time, afforded, it was thought, a guaranty that any agreement entered into by them would be carried out. The result was, that an agreement was made on the first day of November last, whereby The Morris and Essex Railroad Company leased to The Atlantic and Great Western Railway Company, for 999 years, the entire road, property, and works, at a rent, which, considered as a certain and uniform income, without risk, tax or expense, was deemed an advantageous consideration for the stockholders of this company. This rent, after paying all interest on the bonds and obligations of the company, and all demands of every kind against it, was to be eight per cent. on the Capital Stock of the company, for the first year, nine per cent., for the second year, and ten per cent., annually, thereafter, for the whole period of the lease: with a further provision, that, if the lessees should realize more than the said ten per cent., The Morris and Essex Railroad Company should share such surplus, in proportion to their capital invested in the road and property, as compared with the capital to be invested therein by the lessees. The Lessees further agreed to construct a branch railroad from Denville to Bloomfield, or to some point on the main road, east of Bloomfield, by way of Boonton and the Great Notch; and were to expend at least $100,000, in improving the depot of the company at Hoboken, and to double-track the main road from Newark to Morristown, and from Denville to Phillipsburgh —all of which was to stand in the name of The Morris and Essex Railroad Company, and be operated under the lease, and to remain as security for its due performance. These outlays on the part of the lessees were to be made within the limited period of four years, or the lease to be void; but the agreement was to make them in less than three years. This lease was to commence on the 1st of February, 1866; but the road and property were to remain in the occupation of The Morris and Essex Railroad Company, for their greater security, until all the said outlays should be made by the leesses. The lease was duly executed by the parties, and, at the last session of the Legislature, a law was procured, validating and confirming it, and requiring a copy to be filed in the Secretary of State's office; which was done.

In pursuance of this lease, The Atlantic and Great Western Railway Company, in February last, entered upon the performance of the duties it imposed upon them, and expended a considerable amount of money, in preliminary arrangements for constructing the Boonton Branch, and in the erection of wharves, coal-trestles, &c., at Hoboken, which are of great importance to the early commencement of operations in the coal traffic. But, in March last, the financial difficulties in England, which largely affected The Atlantic and Great Western Railway Company, rendered it necessary for them to suspend their operations, and to request the temporary aid of The Morris and Essex Railroad Company. Their agents having represented, that they were not

* The gauge of the entire line has been changed to 4 ft. 8½ in., since the date of this report.

prepared to advance the moneys necessary to continue the construction of the road and works of the company, as provided by the agreement of November, 1865; and having requested this company to raise the same, on its own credit and resources, a supplemental agreement between the parties to that end was made, on the 3d day of April last, providing for the issue of additional bonds or stock of this company. In pursuance of this agreement, and, in order that no interruption to the progress of the works might ensue, the Board at once took measures to raise the necessary funds for prosecuting the same with renewed vigor. This has been done, by means of a temporary loan; but, in order to make a more permanent and extended provision for all wants of the company, in completing and furnishing the line, and organizing its operations, on a scale that will ensure an active realization of revenue, the Board resolved to make a permanent loan by the issue of convertible bonds, to the amount of one million and a half of dollars; and, to insure their prompt sale, resolved to offer them at 85 per cent. of their par value. As these bonds will be convertible into stock of the company, at any time before the last instalment becomes due, to wit., the 1st of February next, it was deemed fair and just to the Stockholders, that they should first have the refusal of them, in proportion to their interest in the company; so that, if any money was to be made by the purchase of the bonds, the Stockholders might have the opportunity of making it. The Treasurer was accordingly directed to issue to the several Stockholders the recent circular on this subject. Since this circular was issued, it has been suggested to the Board, that the time for the conversion of the bonds into the stock of the company should be extended and, also, in case a second mortgage should hereafter be made, to secure a further loan by the company, that such of these convertible bonds as might not have been converted into stock, should be placed on an equal footing with any bonds to be issued under such second mortgage.

At a recent meeting of the Board, this suggestion was fully considered, and resolutions were adopted to meet these views. The Treasurer was directed to send a supplemental circular to the Stockholders, informing them thereof. A copy of the circular and the supplements thereto are appended to this report. The Board, from information they have received, feel assured that they will have no difficulty in placing the whole loan. This operation cannot but be attended with favorable results. It will enable the company to put their works into profitable operation—so long desired; and will leave untouched a large residue of their first mortgage bonds, still to be disposed of, for the further uses of the company: the proposed convertible bonds not being issued under or covered by that mortgage. It is here proper to state, that the first issue of three and a half millions of dollars of bonds, under the first mortgage, has all been disposed of, and the Board, under a provision of the mortgage to that effect, have issued the remaining million and a half, provided for by the mortgage. A portion of the money thus realized will be needed to carry out the proposed arrangements herein referred to; the remainder, which will probably amount to nearly one million dollars, will remain in the Treasury of the company, and will be applicable to any demand which may hereafter arise for further facilities, should the same be required for the business operations of the road.

It is also proper to state, that, in February last, the Board, pursuant to an understanding had with the Lessees, at the time of the execution of the lease before mentioned, issued the residue of stock required to make the whole amount equal to three and a half millions of dollars. The charter of the Company, with the supplements thereto, authorized a capital of five millions; and, by the supplemental agreement made with the lessees, in April last, the Board were authorized to issue such further amount of stock as might be deemed advisable for attaining the objects of that agreement.

Should the proposed convertible bonds be changed into stock, the full complement of capital stock, authorized by the charter, will be filled.

The Stockholders will understand, that thus far all the ordinary operations of the Company, and all its funds, have been managed by, and kept under the control of their own Directors and agents, it being one of the terms of the lease made to the Atlantic and Great Western Railway Company, that the Morris and Essex Railroad Company were, for their better security, to remain in the occupancy of their own works, until the lessees should make the constructions and outlays provided for in the lease. Should any contingency, therefore, occur, by which the lease should fall through, or fail to be carried into effect, it will produce no change in the operations or management of the Company's works. Everything will go on, as it has done, under the care and superintendence of its own officers and directors. And it is provided by the lease and the supplemental agreement of April last, that, in case the lessees should not be able to proceed with the fulfilment of the contract, on their part, it will be in the option of this company to terminate it. Whilst, therefore, many advantages to the company have undoubtedly already accrued, by the connection formed with the Atlantic and Great Western Railway Company, at the same time, the terms of that connection are such that no disadvantage and no interruption in the operations of this company can ensue, should that connection, by any contingency, be dissolved. The intercourse of the Board and officers of this company with the officers and agents of the Atlantic and Great Western Railway Company has been of the most pleasant character, and every disposition has been evinced, on the part of the lessees, to conform to the spirit and terms of the agreement entered into with them; and the Board have no hesitation in expressing their conviction that those gentlemen have acted with entire good faith in all their transactions with this company.

Annexed hereto will be found tabular statements of the business of the company, showing its operations, during the year 1865, and also a comparative statement of the receipts for the first five months of the years 1866 and 1865, respectively. An inspection of the latter statement will show an increase in the company's business, during that period, of $105,385 85, or more than forty per cent. Of course, the large increase in the price of labor and material, and of all incidental railroad expenses, during the past year, without any corresponding advance in the prices of transportation render the net results to the company less favorable than they would be, if the business of the country were in a normal condition. It is believed, that this exceptional state of things has reached its limit, and that prices will gradually resume their proper relation to the business interests of the community. With the prospect of such a result in view, and when it is remembered that the increase of business and receipts, as above shown, has taken place, even with the present limited and partial operations of the company, with its most profitable sources of revenue yet to be developed, the Board cannot refrain from expressing their conviction that a prosperous future is opening to the road and property under their charge, and that the stockholders of the company will continue to realize adequate returns for their investments.

The following statement shows the financial condition of the company December 31, 1865:

Capital stock		$3,199,050 00
Funded debt		3,084,775 00
Floating debt		108,104 20
Contingent account		290,790 13
		$6,682,719 33
Cost of road and its appendages	$6,537,292 53	
Capital stock of Newark and Bloomfield Railroad Company	55,000 00	
Wood on hand paid for	38,395 00	
Cash and cash items	52,031 80	
		$6,682,719 33

Richmond and Petersburg Railroad.

The annual meeting of this company was recently held in Richmond, Va. The report of the directors for the fiscal year ending September 30 1866, was read and approved. We give the receipts and disbursements. Gross receipts, $167,880 80; operating expenses, $107,077 09; net income, $60,703 71. An election of officers was then held, and Chas. Ellis, the present incumbent, was unanimously re-elected president of the company, and Messrs. R. B. Haxall, Dr. D. W. Lassiter and Thomas H. Wynne directors on the part of the stockholders.

☞ We understand that the surveys for a railroad from Albany to New York, on the west side of the Hudson river, are progressing favorably. Two routes will be surveyed; one running a portion of the way in the interior, and the other close to the river. It has been already ascertained that a cheaper route near the river can be selected than the line upon which the Hudson River road is constructed. The project is considered entirely feasible, and there can be but little doubt of the construction of the road.

☞ The San Antonio (Texas) *Herald* says that the Supreme Court at Austin, has just given a decision in a railroad bond suit, which will largely involve San Antonio. More than fifteen years ago that town subscribed $50,000 towards the construction of the San Antonio and Mexican Gulf Railroad, for which bonds were issued. The road failing to comply with the railroad laws of the State, the city refused payment. Suit was instituted, and a decree has finally been rendered condemning the town of San Antonio to pay the full amount with costs.

☞ The directors of the Leavenworth, Lawrence and Galveston Railroad have entered into a contract with heavy western capitalists for the building of this road. Work was to have begun last week, and the directors promise to complete it beyond the southern boundary of Douglas county by midsummer, and within two years it is expected that the cars will run to the southern line of Kansas.

☞ Efforts are being made to rebuild the bridge over the Susquehanna at Columbia, Penn., which was destroyed in the summer of 1863. A meeting of the citizens of Columbia, and other towns interested in the movement, was to have been held on the 13th inst. It is supposed that an effort will be made to form a stock company for the building of a bridge, both for wagons and railroad cars.

☞ The award of the sale of the St. Louis and Iron Mountain and Cairo and Fulton Railroads to A. J. Mackay & Company, with the approval, was filed in the office of the Secretary of the State on the 8th inst.

☞ The Tunnel on the Albany and Susquehanna Railroad will be finished on the 1st of June next. Its whole length will be 2,200 feet, of which 1,500 are completed.

☞ A dispatch from Montgomery, Ala., states that a bill incorporating the New Orleans, Mobile and Chattanooga Railroad had become a law.

☞ The Delaware and Raritan Canal will be closed on the 18th inst.

☞ The Central Pacific Railroad is complete to Cisco, ninety-three miles east from Sacramento, and twelve and a half miles from the summit of the Sierra Nevada Mountains, and 5,911 feet above the level of the sea.

The Postal Service.

REPORT OF THE POSTMASTER-GENERAL.

The revenues of this department for the year ending June 30, 1866, were $14,386,986 21, and the expenditures $15,352,079 30, showing an increase of the latter of $965,093 09. Anticipating this deficiency, a special appropriation was made by act of Congress approved July 28, 1866.

The decrease of revenue compared with the previous year was 1 1-5 per cent., and the increase of expenditure 12 per cent. Including the standing appropriation for free mail matter, $700,000, as a legitimate portion of the revenues yet remaining unexpended, the actual deficiency for the past year is only $265,093 09—within $51,141 of amount estimated in the annual report of 1864.

That portion of the revenues accumulated in depository and draft offices, under the supervision of the "finance office" of this department, was $6,751,655 39; collected by the Auditor, $2 641,-074 88; and retained by postmasters for salaries and office expenses, $4,994,256 44.

The estimated expenditures for the year ending June 30, 1868, are	$17,583,000
The revenues, estimated at 5 per cent. over last year	$15,106,335
Appropriation for free matter	700,000
	15,806,335
Excess of expenditures	$1,776,665

For this deficiency no special appropriation will be required. The standing appropriations for free matter, unexpended for several years, are deemed sufficient. The following amounts will, however, be required from any money in the Treasury not otherwise appropriated, viz:

For overland mail transportation between Atchison and Folsom, and the marine mail transportation between New York and California.....	$900,000
For steamship service between San Francisco, Japan and China, for one year from July 1, 1867	500,000
For steamship service between the United States and Brazil, for the same period.	150,000
	$1,550,000

The number of postage stamps issued during the year was 346,734,325, representing $10,816,-661; stamped envelopes, 30,386,200, representing $921,500 50; stamped envelopes bearing printed cards and requests, 7,683,525, representing $230,-006 75; stamped wrappers, 1,025,000, representing $20,500; making in all $11,988,668 25; a decrease of $858,769 25, as compared with the previous year.

The aggregate of stamped envelopes and stamped wrappers issued during the year ending June 30, 1866, was 39,094,725, representing $1,-172,007 25, an increase of 12,888,550, representing $424,557 55, or nearly 50 per cent.; being largely in excess of issues during any previous year since the introduction of stamped envelopes.

The sale of stamps, envelopes, &c., during the past year amounted to $12,204,729 54, or $216,-061 29 more than the issues, showing the absorption to that extent of the stock, remaining unsold in the hands of postmasters, which amounted on the 1st of July, 1865, to $447,710.

The issues of postage stamps and stamped envelopes during the current fiscal year, from 1st of July to 1st of November, are $360,765 in excess of the issues for the corresponding period of last year, being at the rate of more than one million of dollars per annum.

There were in the service of the department on the 30th June, 1865, 6,069 contractors for the transportation of the mails.

Of mail routes in operation there were 6,930; aggregate length, 180,921 miles; aggregate annual transportation, 71,837,924 miles; aggregate annual cost, $7,630,474; including the compensation of route, agent, local agents, mail messengers, postal railway clerks, and baggage masters in charge of mails, viz: $779,710, the aggregate annual cost was $8,410,184. This service was divided as follows:

Railroad routes: length 32,092 miles; annual transportation, 30,609,367 miles; annual cost, $3,391,592, about 11 cents per mile.

Steamboat routes: length, 14,346 miles; annual transportation, 3,411,962 miles; annual cost, $440,844, about 13 cents per mile.

Celerity, &c.: routes' length, 134,483 miles; annual transportation, 37,816,485 miles; annual cost, $3,798,038, about 10 cents per mile.

The length of routes was increased over the preceding year 38,581 miles; the annual transportation, 13,624,420 miles; and the cost $1,393,-590, the increase arising principally from the restoration of service in the Southern States.

A table herewith annexed shows the rate of pay per annum for mail transportation in operation in late insurgent States on the 30th June, 1866, $1,-170,529, compared with the amount due for service actually rendered in those States in the year ending with that date $769,218; the difference, $401,311, resulting from the fact that much of the service was in operation only part of the year. The net postal receipts from those States for the same period being $693,835, the liabilities (without including the compensation of route agents, local agents, and mail messengers,) exceed the receipts by $75,383.

A table is annexed showing the mail service in operation in these States Sept. 30, 1866, compared with the condition of the service in the same States Nov. 1, 1865, the date to which the statements on this subject were made up in the last annual report. From this table, it will be seen that there are in operation in the States enumerated 90 railroad routes, with an aggregate length of 8,170¾ miles, at a cost of $587,581 per annum; 26 steamboat routes, with an aggregate length of 5,557 miles, at a cost of $195,565 per annum; and 1,137 "star service" routes (celerity, &c.,) with an aggregate length of 46,442¾ miles, at a cost of $1,062,477 54 per annum—making the whole service now in operation in these States, of all grades, 1,253 routes, with an aggregate length of 60,170½ miles, at a cost of $1,845,623 54 per annum. Compared with the service in operation on the 1st of November, 1865—viz: 71 railroad routes, with an aggregate length of 6,242 2-10 miles, at a cost of $437,257 per annum; 12 steamboat routes, with an aggregate length of 3,869½ miles, at a cost of $93,260 per annum; and 154 "star service" routes, with an aggregate length of 8,186¼ miles, at a cost of $177,743 per annum—there appears an increase of 19 routes, 1,928 55-100 miles, and $150,324 annual cost of railroad service; 14 routes, 2,971½ miles, and $102,305 annual cost of steamboat service; and 983 routes, 38,256½ miles, and $884,734 54 annual cost of "star service"—making a total increase of 1,016 routes, 41,872 55-100 miles, and $1,137,368 54 annual cost.

Another table is annexed showing the number, termini and length of Southern railroad routes not in operation September 30, 1866; the number being only fourteen, and the aggregate length 696 12-100 miles. Comparing this with ninety routes in operation, having an aggregate length of 8,170¾ miles, shows a remarkable progress in the resuscitation of the railroad system of the South. There being 2,250 routes in all the States enumerated, these statements show more than half the whole number to be in operation, comprising nearly nine-tenths of the railroad routes. All the routes in these States were duly advertised to be let to contract, a part from 1st January, 1866, and the residue from 1st July, 1866; but on a large number of them no proposals were received under the advertisement, and on many others the bids were extravagantly high. In the latter case, offers of the highest admissible rates were submitted by the department to the lowest bidders; and in some instances negotiations were opened through special agents, postmasters and leading citizens. By all these means combined, the amount of service here stated has been obtained.

The existing contracts in all the States named, except Tennessee, will expire on the 30th June, 1867. New advertisements, inviting proposals for four years' service from 1st July 1867, are now being issued, under which it is hoped all routes of real utility in the whole section will be let.

By a recent order of the department, the overland mail route to California, of which Atchison, Kansas, had been the initial point, has been changed so as to have two points of departure—one from Junction City, Kansas, on the Union Pacific Railroad route (eastern division,) running from Wyandotte, Kansas; and the other from Fort Kearney, Nebraska, on the Union Pacific Railroad route, running from Omaha City, Nebraska. The lines from these two points meet at Denver City, in Colorado Territory.

The Junction City road connects at Wyandotte with the Pacific Railway from St. Louis, Mo., making a continuous railway connection with the Eastern cities. By this route the stage travel is diminished 168 miles, and the time occupied in transit should be proportionally reduced. The mails to and from California, which before were sent *via* Chicago and St. Joseph, were consequently ordered, on the 15th of August last, to be sent *via* St. Louis, Wyandotte and Junction City. The reports so far received of the actual running of the mails since the change took effect do not show the average diminution of time in the performance of the through trip which the department was led to expect, though the capacity of the route for superior expedition is proved by the fact that in one or two instances the mails have been received at New York in 19 days from San Francisco, a day less than the shortest time ever made previous to the change. Subsequently, however, the extension of the Chicago and Northwestern Railway to Omaha City, which is necessary to form a continuous line by rail to Fort Kearney, has become so nearly completed, that, on the 13th of November instant, orders were issued to forward *via* Chicago, Omaha City and Fort Kearney, all mails destined for the overland route from the distributing offices at Portland, Boston, Hartford, Albany, New York, Philadelphia, Pittsburg, Buffalo, Cleveland and Detroit—the expectation being that mails from that portion of the country represented by these distributing offices will find their quickest transit by the Northern route.

The aggregate amount of postage, sea, inland and foreign, upon the correspondence exchanged with foreign countries, was $2,289,219 30, being an increase of $469,290 70, as compared with the previous year. Of this amount $1,840,800 92 accrued upon the mails exchanged with Great Britain, France, Prussia, Bremen, Hamburg and Belgium; $328,841 33 on mails exchanged with the British North American Provinces, and $120,-077 05 on the correspondence transmitted to and from the West Indies, Mexico, Central and South America.

The transatlantic mail steamship lines employed in the service of foreign Governments, conveyed mails, the postages on which amounted to $975,-109 23; and those employed in the service of this department conveyed mails, the postages on which amounted to $865,691 69.

The cost of transatlantic mail service performed by steamships employed by this department, under the provisions of the existing law, which allows the sea and inland postage to American and the sea postage only to foreign steamers, was $525,-307 46.

The cost of ocean transportation of mails to and from the West Indies, by steamers receiving different rates of compensation within the limit of the postages, was $57,871 69, being $29,742 32 less than the amount of United States postages upon the mails conveyed.

The amount paid for sea and isthmus transpor-

tation of the mails exchanged with Central and South America, *via* Panama, was $17,377 45.

The excess of postage collected in the United States upon the correspondence exchanged with Great Britain and the continent of Europe, was $500,627 76; causing balances against the United States on settlement of the international postage accounts, amounting in the aggregate to $278,714 19.

A liberal postal convention has been concluded with the Kingdom of Italy, which adopts the leading reforms in international postal intercourse, recommended by the Postal Conference held at Paris in May, 1863. It was negotiated and signed at Turin on the 8th of July, 1863, and the ratifications thereof were formally exchanged at Florence on the 14th of June, 1866. This convention, a copy of which is annexed, will be carried into execution as soon as notice is received from the post department of Italy of the route or routes of transit by which the exchange of correspondence in closed bags can be effected.

Notice was given by the British Government, under date of July 25, 1866, of its purpose to terminate the existing postal convention between this country and the United Kingdom on the 1st of January, 1868, simultaneously with the expiration of the mail subsidy contract with the Cunard line; accompanied with an assurance of the desire of that Government to conclude a new convention on a more liberal basis, reducing the present rates of international postage and granting enlarged mail facilities. The necessary steps were at once taken to accomplish that object, and I have the satisfaction of announcing that a preliminary basis for a new postal convention has been agreed upon by the two post departments, reducing the international charge on a single letter from 24 cents to 12 cents; admitting into the mails printed matter of every kind, and patterns of merchandise, at such rates as the dispatching country shall establish; and granting to each country, reciprocally, the right to transmit correspondence in closed bags, or in the ordinary mails, through the other, at the same rates of charge paid by the inhabitants of the country through which the coerespondence is forwarded.

The principal advantages of the new arrangement may be briefly stated as follows:

1. A reduction of the international letter postage to one-half of the existing charge.

2. The removal of all restrictions upon the exchange of printed matter in the mails at reduced postage charges.

3. The compulsory pre-payment of postage upon letters and other mail matter, avoiding entirely the keeping of complicated postage accounts upon international correspondence.

4. A reduction of postage with all other countries to and from which correspondence is transmitted in the British mail, or in closed bags through the United Kingdom.

5. The establishment of uniform and reasonable charges for the sea and territorial transit of correspondence in closed mails; and granting to each post department the right to make use of all mail communications established under the authority of the other for the dispatch of correspondence, either in open or closed mails, on the same terms as those applicable to the inhabitants of the country providing the means of transmission.

6. The postage of all international letters to belong wholly to the dispatching country, and no charge whatever to be made by the receiving country on delivery.

7. Each post department to make its own arrangements for the dispatch of mails to the other, by well appointed ships, sailing on stated days, and to pay the owners of such ships for the conveyance of the mails which it dispatches.

No time has yet been agreed upon for carrying the new convention into operation, but it is confidently expected that the British office will consent to name as early a date as practicable, that the public may receive, without unnecessary delay, the benefit of the reduced rates of postage, as well as of more frequent means of mail communication between the two countries.

The Pacific Mail Steamship Company of New York, to which was awarded the contract for the China mail service, authorized by the act of February 17, 1865, has executed a contract for that service.

The contract is for monthly trips between San Francisco and Hong Kong, touching at the ports of Honolulu in the Sandwich Islands and Yokohama (Kanagawa) in Japan, both on the outward and inward passages, by a line of first class American sea-going side-wheel steamships, of not less than 3,500 tons burden, Government measurement, and of sufficient number—not less than four—to perform the stipulated service.

The Great Republic, the first of the new steamships building specially for this service, was launched at New York on the 8th of November, is now receiving her machinery, and is expected to be ready for sea about the 1st of May, 1867. The second steamship is to be launched early in December, and will be prepared for service about the 1st of July, 1867; and the machinery for two others is in course of construction.

The company have tendered their first class steamship Colorado to take the mails from San Francisco on the 1st of January, 1867, the day named in the law.

The number of post offices established during the year	1,143
Number discontinued	636
Increase of offices	507
Number of post offices in operation on the 30th of June, 1865	20,550
Total number in operation on the 30th June, 1866	23,828
Number of post offices in the States not engaged in the Rebellion	20,550
Number in the late insurgent States, of which 2,778 were re-opened during the year	8,839
Number of offices subject to appointment by the President	709
Number by the Postmaster General	23,119
Number of offices re-opened in the Southern States up to Nov. 1	3,234

The free delivery system is in operation in forty-six of the principal cities. The number of carriers employed was 863, at an aggregate compensation of $589,236 41.

The whole number of dead letters received, examined, and disposed of during the year, was about 4,500,000, upward of 40 per cent. of which were from forty-seven of the larger post offices. About 600,000 other letters were received, being unmailable for want of pre-payment of postage, or on account of misdirection or illegible address.

During the year there were registered and remailed to the respective owners, as inclosing money in sums of $1 and upward, 32,814 letters, containing an aggregate of $244,589 99, of which number 27,948, containing $221,066 19, were delivered, being 90 per cent. The number of letters inclosing sums of money less than $1, remailed to the respective owners, was 13,834, containing an aggregate amount of $3,652 55. Of these, 11,175, containing $3,001 23, were delivered.

The number of letters containing papers of value other than money, as deeds, bills of exchange, drafts, checks, &c., received, registered and returned for delivery to the owners, was 26,610, and the nominal value of the inclosures therein was $7,826,881 68. The number of these letters delivered was 24,053, being 85 per cent.

The number of Congressional and official papers returned to the proper departments was 17,806.

The number of letters inclosing soldiers' discharges and other military papers sent to the Adjutant-General's Office, &c., was 8,918.

About 2,500,000 dead letters have been destroyed during the year.

The number of money order offices now in operation is 766, being 347 more than at the date of the last annual report, and measures have recently been taken to establish 67 additional offices in the Pacific States and Territories.

The number of orders issued during the year was 243,609, of the value of		$3,977,259 28
The number paid was 233,124, of the value of	$3,851,839 49	
To which is to be added amount of orders repaid to purchasers	52,050 73	
		3,903,890 22
Excess of issues over payments		$73,369 08

From the establishment of the system on November 1, 1864, to July 1, 1865, a period of eight months, the orders issued amounted to $1,360,122 52, and the orders paid and repaid to $1,313,577 08.

The average amount of each order issued during the year was $16 32.

The whole number of duplicates 1,432, of which 1,124 were issued to replace originals lost in the mails or otherwise, 296 were in lieu of orders invalidated by age, and 12 to replace orders illegally indorsed.

The sum of $2,710,685 53, being surplus funds accruing at the smaller offices from the transaction of the money order business, was transmitted to first class offices used as depositories, either by national bank drafts or in registered packages by mail. The receipts and expenditures for the last fiscal year, as adjusted and reported by the Auditor, were as follows, viz:

Receipts:		
Fees on orders issued		$35,799 98
Premium received on exchange		3 08
		$35,803 06
Expenditures:		
Commissions to postmasters	$11,432 49	
Clerk hire	14,910 50	
Books and stationery	1,224 59	
Premium paid on draft	25	
Miscellaneous, including furniture and fixtures	564 44	
Remittances lost in the mail	533 00	
		28,664 27
Excess of receipts over expenditures		$7,138 79
This sum represents the gross amount of revenue derived from the transactions of the money order business for the past year, and if we deduct therefrom the amount of the deficiency in the receipts as compared with the expenditures during the period of eight months ending July 1, 1865, as stated in the last annual report, viz		7,047 97
There remains the sum of		$90 82

As the proceeds of the system from its commencement up to the close of the last fiscal year.

☞ The Iowa extension of the Chicago and Northwestern Railroad is now completed within 25 miles of the Missouri River, at Omaha, where it connects with the main stem of the great Union Pacific road, which already carries freight and passengers 300 miles beyond the Omaha frontier. East of and between the Missouri and Mississippi Rivers the Chicago and Northwestern Company are now operating altogether 1,103 miles of road, soon to be increased to 1,128 miles.

☞ The Quincy and Palmyra railroad was sold on the 30th of November to the Hannibal and St. Joseph Railroad Company for a quarter of a million dollars, and now forms part of that road. The officers, in conjunction with the managers of the Wabash Valley road, have united to bridge the Mississippi at Quincy, and the work will be commenced at once.

☞ Subscriptions are being collected at Louisville for the purpose of building a railroad from Cincinnati to connect with the Frankfort Railroad near Eminence, Ky.

American Railroad Journal.

Saturday, December 15, 1866.

Stock Exchange and Money Market.

There is remarkable uniformity in the current workings of the Money Market. A steady accumulation of capital is reported at this centre. The banks are gaining rapidly in the line of national currency, the remittances of which from the West are quite liberal. There is some outflow of legal tender notes to the South, where national currency is not in as much favor as the plain greenbacks of the Government. Hence it is that while the city banks show a falling off in their legal tender reserve, they report an inconvenient increase in their supplies of national bank notes, for which, in the prevailing prostration of legitimate enterprises, it is difficult to find employment without cheapening the price of money, and helping to renew the speculative excitement of the autumn months. At present, the manifest tendencies of the market is wholly in favor of responsible borrowers, who are enabled to procure all the aid they temporarily require at the rate of five to six per cent. on Government and other strictly prime collaterals. Exceptional call loan negotiations are reported one per cent. above and below these quotations. The city banks keep up their rate to seven per cent., but find it hard to place any new loans of magnitude at so high a figure, while private capitalists are seeking controlable employment for their accumulating balances at the average price of six per cent. Prime short date commercial paper is in demand among the discount houses at 6@7 per cent., and long date do., at 7@8 per cent. per annum. There is no reliable market for other grades, rates on which are very irregular. Nobody seems to apprehend any action on the part of Secretary McCulloch, or the national legislature, likely to disturb the growing ease in money, so essential to the prosperous funding of the maturing obligations of the Government. So far as the Secretary is concerned, we know definitely from himself that, as in the past, so in the future, his object will be to keep the market steady and to work back to specie payments without a financial collapse. This is his judicious programme, as set forth in a letter of the 7th inst., addressed to the Hon. E. G. Spaulding, of the Farmers' and Mechanics' National Bank of Buffalo, N. Y. And it is more than probable that this will be the programme of all the truly wise and conservative elements in Congress. The Secretary in the same letter, announces that he will act in the future, as in the past, with great caution, and that he will attempt no impracticable thing. We have not the slightest doubt that, in such an aim, Congress will be one with him, seconding his efforts to maintain the public credit, by judicious legislation, relative to industrial and commercial interest of the country. The last exhibit of the public debt, brought up to Dec. 1, is regarded by business people as eminently favorable to an easy and unembarrassing Money Market, as far as depends on the policy and negotiations of Secretary McCulloch. The point in the debt statement of most immediate practical interest is the strength of the department in the way of currency reserve. The currency balance in the Treasury increased from $30,918,922 on the 1st of November, to $40,195,281 on the 1st inst, which large reserve, independent of the revenues, affords adequate means to the Secretary to pay off promptly all the maturing currency interest claims of the Seven-thirty note holders, and all of the unclaimed past due indebtedness of the Government, thus enabling him to abstain completely from any line of conduct likely to disturb financial or commercial values unnaturally. Another significant feature of the debt statement is the contraction of the legal tender issue, which amounted to six millions in November. The aggregate legal tender circulation, including plain greenbacks and compound interest notes, is $582,828,989, against $538,707,925 on the 1st ult. The plain greenback circulation on June 1, was $402,128,318; Aug. 1, $400,361,728; Sept. 1, $399,603,592; Oct. 1. $399,165,292; Nov. 1, $390,195,785; Dec. 1, $385,441,849, showing a contraction of about seventeen millions in six months. From the last weekly return of the city banks, it appears that there has been, during the week, a decrease of $2,391,641 in the item of loans, $5,212,355 in the deposit line, $538,601 in the legal tender reserve, and $374,957 in the specie reserve. The Croton National Bank having been admitted to membership, made its first report to the Bank Clearing House last week. The city bank deposits are now $203,676,822, against $228,484,370 week ending Oct. 6, 1866,

and $176,480,562, week ending Dec. 9, 1865. Their legal tender reserve amounts to $60,946,857, against $48,271,757 same time last year. Their circulation now stands at $31,794,653 against $16,570,613 same time last year. The loans are now $260,620,027, against $279,135,796 seven weeks ago, and $227,839,344 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged only $107,885,977 a day, against a daily average of $108,180,240 the preceding week; and $152,906,000 the week ending with Nov. 25. The current week's exchanges average about $113,000 a day.

National Bank notes to the amount of $83,672, were issued last week, making the total issue to 1,663 banks thus far $299,886,931, against $282,555,440 at the close of the last fiscal year, June 30, 1866. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,391,650; and for the public deposits, $38,883,,950—making a total of $379,275,600. The Treasury Department, last week, redeemed and destroyed $394,400 of worn and mutilated fractional currency, and issued $389,196 worth of new. Washington advices state that the Congressional Committee on banking and currency agreed to an amendment to the National Currency act, on Tuesday, requiring all National Banks to redeem their issues in New York, either through their Redeeming Bank in one of the seventeen cities now named by law, or directly. This is in accordance with the recommendation of Secretary McCulloch and the Comptroller of the Currency.

The U. S. Sub-Treasury receipts, week ending with Dec. 8, were $20,389,469, including $1,419,236 from customs duties; payments, $16,155,329; balance at the close of the week, $106,689,405, against $102,455,273 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday receipts, $5,138,544, and payments, $4,761,059; Tuesday receipts, $1,994,927, and payments, $1,318,583. The balance at the close of business on Tuesday stood at $107,743,233, against $103,598,023 a week ago.

Government revenues are again on the increase. Excises yielded, last week, $6,266,769, against $4,650,000, the preceding week; customs at the port of New York, $1,419,236, and at the outports, at least $500,000 (in coin) more, making the grand total income for the week equal to about $8,954,000 in currency, against disbursements of $4,224,319 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $156,000,000, or an average of about six millions a week. The current revenues from excises keep up to this average. The current customs revenues average about two millions in gold a week.

Gold has been as high as 139, and as low as 136⅞, since our last. There has been a moderate customs, and very limited export demand through the week. Of the coin balance in the Treasury on the 1st instant, amounting to $95,186,816, the sum of $75,550,316, was absolutely the property of the Treasury, as against $88,516,038 on the 1st of November; while the sum of $19,636,500 belonged to depositors holding gold certificates, as against $10,298,980 standing to the credit of the same parties on the 1st ult. The closing price of gold on Wednesday was 137½, on a dull, but steady market. The specie exports of that day were only $272,188 by the Scotia. Government held a coin reserve at the close of last week amounting to $93,722,000, including $22,160,389 on account of depositors. The aggregate issue of coin certificates by the United States Sub-Treasury up to the close of last week was $157,495,080, of which $135,336,700 have been redeemed, leaving $22,160,380 outstanding, as above. The total imports of specie from Europe, and other ports since January 1, have been $9,421,309. The customs demand for Gold last week, averaged $236,539 a day; thus far, this week, it has been equal to $266,000 a day, or equal to a weekly aggregate of $1,596,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week, reached $156,617, and from California, $1,263,113. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $125,963,017, against $97,121,260 same time last year. The total receipts of California gold at this port since Jan. 1, have been $40,694,505, against $19,057,560 same time last year, showing an increase, in 1866, of $21,636,945. The exports of specie from this port, last week, were $580,596, making the total outflow of specie from the port, since Jan. 1, $59,149,044, against $27,805,529 same time last year, $46,618,898 same time in 1864, and $68,480,430 same time in 1859. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $555,600, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $47,513,371, against $37,773,196 same time last year. The specie exports from San Francisco from Jan. 1, to Nov. 14, reached $39,370,856, against $39,951,343 same time last year.

There has been an improved inquiry for foreign exchange, and with a rather short supply of bills available, there has been more firmness in the market. Business in Sterling for Wednesday's steamers was on the basis of an ⅛@¼ per cent. advance on the subjoined figures, which, however, were the nominally current rates after the closing of the foreign mails. Bankers' 60 day bills on London closed at 109¼@109½, and on Paris to 5.18¾@5.13¾; sight bills on London to 110@110¼; and on Paris to 5.13½@5.11¼. The offerings of produce bills have been less extensive this week, owing in part, to the tardy receipt of bills drawn against direct exports of cotton from Southern ports. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,101,416, making the exports since January 1, $178,485,338, against $166,423,887 same time last year.

Government securities have lightly dealt in, during the week, by the heavy operators, and prices have yielded ½@1 per cent. on the gold-bearing bonds in sympathy with the depression in gold. The reduced figures made for these bonds are now eliciting increased orders from home investment buyers. On Wednesday, the execution of the investment orders steadied the market, and resulted in a handsome aggregate business, chiefly through private channels. The investment demand is mainly for the later issues of the Five-Twenty bonds. According to the last debt statement of Dec. 1, the outstanding Five-twenties of all issues now amount to $861,640,300, including 514,780,500 of the original or 1862 issue, $100,000,000 of the issue of 1864, $183,381,750 of the first 1865 issue (May and November), and $63,487,050 of the second, or consolidated, 1865 issue (July and January). The six per cents of 1881 now amount to $283,740,000, against $283,738,750 a month ago. These, with the $171,069,350 of Ten-forties, constitute the bulk of the coin-bearing portion of the debt. There is also a growing investment inquiry for the Seven-thirty notes, the conversion of the first series of which into the new 5-20s of 1865 it is believed will be vigorously resumed after the first of January next ensuing. The three series of the Seven-thirty currency loan have been, thus far, reduced, by conversions, to $696,933,750, making the total reduction in the Seven-thirty line (mainly of the first, or August issue, maturing in about eight months) more than one hundred and thirty millions from the aggregate issue of eight hundred and thirty millions through the Government Loan Agency. According to the statement of the 1st inst., the coin-bearing portion of the debt was increased $37,508,750 in November by the issue of consolidated Five-twenties of 1865. The currency-bearing portion of the debt was reduced $24,785,550 by the redemption of Seven-thirties and compound interest notes. U. S. sixes of 1867 closed here on Wednesday at 128; U. S. sixes of 1868, at 125; U. S. sixes of 1881, 112¼@112½; U. S. Five-twenties of 1862 at 107½@107¾,; U. S. Five-twenties of 1865 at 106@106¼; U. S. Five-twenties of 1865, consolidated, 108⅜@108½; U. S. Ten-forties at 99¾@99⅞, and U. S. Seven-thirties at 105@105¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....116½	May, 1865 .....111¾
July, 1864.....116	August, 1865....110¾
August, 1864....115½	September, 1865..110¼
October, 1864....114½	October, 1865....109¾
December, 1864..113½	

In railway and miscellaneous share property there has been renewed speculative activity, with increased firmness and buoyancy in prices, accompanied by the occasional relapses, inseparable from an advancing market. The demand comes more generally than of late from parties outside of the street cliques, and the opinion gains ground that for a month or so, the course of the market will be upward. The growing ease in money, which is an encouraging assurance of security and protection to the legitimate financial and commercial interest, is referred to by the sanguine operators at the Stoch Exchange, as likely to foster the speculative movement.

General business is tardily regaining life and buoyancy, at least in the domestic produce lines There is increased animation in Breadstuffs, Provisions, and other leading articles, resulting, in part, from export purchases, which are gradually increasing in volume. Prices, which were variable during the week, closed firmly, with an upward tendency on Wednesday. The cotton market derives some relief from the latest foreign advices, which have fostered the home export inquiry, and give holders the advantage. Middling grades of Cotton closed at 34@36 per lb., on a buoyant market. The stock of cotton now here is estimated

at about 150,000 bales. The receipts at the port this week, have averaged over 4,800 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 198,500 bales, against exports of 78,761 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 483,000 bales against 670,466 bales same time last year; exports, 179,000 bales, against 323,000 bales same time last year, estimated stock at latest dates, 452,000 bales, against 393,500 bales same time last year. There has been a partial rally in the market for imported articles, especially desirable styles of dry goods, which have been less eagerly pressed for sale, and which have accordingly shown more steadiness in prices. The total imports of foreign dry goods, last week, were $1,432,230, and the total amount marketed $1,134,696. The value of foreign merchandise imported last week, was $3,196,052—making the grand total specie value of last week's imports of dry goods and merchandise, $4,628,282, and since January 1, $280,594,153, against $195,542,325 same time last year. The ocean freight market is more active and firmer with 582 vessels of all classes in port. The main export movement is in breadstuffs, cotton, tobacco, provisions, and petroleum.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 27.	Dec. 4.	Dec. 12.

☞ The engineer employed to lay out the Massachusetts part of the contemplated Sheffield and Millerton (N. Y.) Railroad estimates that the cost of building the road to the State line, a distance of five miles, will be $18,000 per mile, including the superstructure. Only about twenty-three miles of new road are required to complete the proposed through route from New York, via Pittsfield, to Montreal

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Dec. 1st, 1866, were $141,703 00
Corresponding week of previous year.. 154,916 00

Decrease $13,213 00

The earnings of the Chicago and Northwestern Railway for the first week in Dec., 1866, were $173,132 50
Corresponding week of previous year,. 167,867 83

Increase..... $5,264 67

The earnings of the Detroit and Milwaukee Railroad for the week ending Dec. 6th, 1866, were $29,818 00
Corresponding week of 1865..... 32,661 00

Decrease..... $2,843 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Dec. 1866, were..... $79,959 00
Corresponding week of 1865 ..... 86,890 00

Decrease $6,931 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in Dec., 1866, were..... $62,096 00
Corresponding week of previous year.. 62,815 00

Decrease $719 00

The earnings of the Western Union Railroad for the week ending Dec. 7, 1866 .. .. $9,467 48
Corresponding week previous year.... 9,462 42

Increase $5 06

The earnings of the Marietta and Cincinnati Railroad the 4th week in Nov., 1866...$37,968 00
Corresponding week previous year.... 36,575 75

Decrease $1,392 25

Railroad Earnings--Monthly.

The earnings of the McGregor Western Railway for Nov., 1866, were $32,973 00
Same time in 1865..... 36,938 00

Decrease $3,965 00

The earnings of the Minnesota Central Railway for Nov., 1866, were $39,588 00
Same time in 1865..... 19,718 00

Increase..... $19,870 00

Interest and Dividends.

The Philadelphia, Wilmington and Baltimore Railroad Company have declared a semi-annual dividend of five per cent., clear of Government tax, payable the 2d of January next.

A dividend of five dollars per share, on the capital stock of the Chicago, Iowa and Nebraska Railroad, free of government tax, will be payable January 1, 1867, at the office of the Treasurer, 22 Asiatic Building, Salem, Mass.; and at the office of the company, at Clinton Iowa.

The New York and New Haven Railroad Company have declared a dividend of five dollars per share, free from government tax, payable January 2, 1867.

The Boston and Lowell Railroad Company has declared a dividend of 4 per cent., payable Jan. 1. A scrip dividend of 20 per cent., payable at a future day either in stock or money, at the option of the Company, has also been declared, and stockholders are requested to present their certificates of shares at the office of the Treasurer, on and after Jan. 1, and receive a proper certificate of dividend.

Duties of Common Carriers by Water.—Damage to Goods in Carriers Warehouse.

The case of the owners of the Mary Washington against Ayers, just decided in the United States Circuit Court for the 4th district of Maryland, though not referring to Railways, contains an important discussion of the duties of common carriers, and is equally applicable to carriers by land as to carriers by water. The owners of the Mary Washington, appellants, agreed with the appellees, Ayres and others, for a certain compensation which was paid, to convey on their steamer certain merchandise from Baltimore to Hill's Landing, on the Patuxent river, and to deliver it there to Pumphrey. The merchandise was accordingly conveyed to respondent's wharf, at Hill's Landing, and Pumphrey not being there to receive it, was placed in the warehouse connected with the wharf. This warehouse was kept for the accommodation of the carrying trade in which the steamer was employed. Goods landed for delivery were temporarily placed in it when immediate and direct delivery was impracticable or inconvenient; and goods received for shipment were in like manner accommodated, when immediate shipment could not be made. No charge was made for the accommodation. It was an incident to the trade, and paid for in the freight. The goods in the present case were damaged after being stored in this warehouse.

The following opinion was delivered by

CHASE, C. J.—Under the circumstances of this case I think that the contract of affreightment bound the carriers not only to carry the merchandise to the landing, but to deliver it to Pumphrey, or excuse non-delivery by proof of equivalent action or waiver. The duty of a carrier by water is not fulfilled by simple transportation from port to port. The goods must be delivered, or at least landed, and a reasonable opportunity given to the consignee of ascertaining their condition. In order that an opportunity for inspection and for the removal of the goods may be given, the consignee must be notified of the arrival of the goods. This is the general rule. If exceptions are made by usage, circumstances, or special arrangements, they must be shown by proof.

In the present case the respondents allege that it was not their practice to give notice to consignees, but instead of giving such notice, to deposit goods in their warehouse, where the consignees were expected to call for them, on learning from their correspondents, or otherwise of their arrival. They insist that this arrangement was for the benefit of the owners of the goods, and was understood and agreed to by them. The evidence does not sustain this claim. It shows clearly enough the practice of the respondents, but it does not show any understanding, on the part of the owners of the goods, that the respondents were to be relieved from their responsibility as carriers until its actual delivery, or its equivalent deposit in their warehouse, with information conveyed to the owners, in some way, that their goods had arrived. The warehouse arrangement was rather for the convenience of the carriers than of freighters or consignees. The storage, with information of arrival, however obtained, may be regarded properly enough as a substitute for actual and direct notice; and it may be admitted that opportunity for removal, after such information, would discharge the carriers from responsibility as such, in the same manner as actual notice and like opportunity. But to hold that mere deposit in their own warehouse, under the circumstances of this case, terminated their special responsibility, would be a dangerous relaxation of the salutary rule on which the security of commerce so largely depends.

It is clear from the proof, that the merchandise was damaged after the landing, and while in the custody of respondents, before Pumphrey had information of its arrival, or opportunity to take it away. It seems, however, that the merchandise was not ordered by the libellants by Pumphrey, and that he declined to receive it, and it is alleged that the carriers, therefore, were not liable. And there was proof that no order for the merchandise was actually given, and that Pumphrey, on learning its condition, refused to have anything to do with it. But it is not easy to perceive the importance of this circumstance. It is plain enough that the libellants acted in good faith upon an expectation founded on a conversation with Pumphrey, that he would like to have the merchandise sent to him, and that he would receive and pay for it, if of good quality and in good condition, and the proofs show that this expectation was warranted. Whether warranted or not, the duty of the carriers was in no way effected. Their obligation both to shippers and consignees, was to convey and deliver, or at least offer to deliver safely. It is true that after Pumphrey had information of arrival, and declined to receive the merchandise because of its bad condition, the respondents could not be held responsible as carriers, to the libellants, for subsequent injuries in the warehouse; but their responsibility for prior injuries was not changed, and it is that responsibility only which is now in controversy.

In the present case the question whether the respondents were liable as common carriers or as warehousemen is of little importance, except as a question of jurisdiction. The proof shows a degree of negligence which would make them liable in either character. But if their liability were as warehousemen only, they would not be responsible in this court. A court of the Union has in general no jurisdiction of suits against warehousemen by citizens of the same state. Remedies for violation of these contracts must be sought by their co-citizens in state courts.

It is not questioned, however, that the judicial power of the United States extends to all cases of admirality and maritime jurisdiction. This is a provision of the National Constitution. Nor is it questioned that this whole jurisdiction is vested by law in the District Courts of the United States, and on appeal in the Circuit Courts.

This was expressly enacted by Congress in 1789. Nor is it questioned that a contract of affreightment, to be performed by traversing tide-waters, or other navigable waters, is in general a maritime contract, or that a suit upon such a contract makes a case of admirality jurisdiction. This is settled by repeated decisions. And it is insisted that the contract of affreightment in this case was to be performed wholly within the state of Maryland, and that this case, therefore, having arisen from an alleged breach of it, is not within the admirality jurisdiction Upon this I remark, in the first place, that there is nothing in the nature or his-

tory of admiralty jurisdiction which excludes from its cognizance contracts to be performed within the country or state in which it is exercised. On the contrary, such contracts, if maritime in their character, were constantly held before the organization of the Union to be proper subjects of that jurisdiction.

Within a comparatively recent period, however, doubts have been expressed whether such contracts can be enforced by national courts setting in admiralty. Such doubts were expressed in 1848 by Justice Nelson, speaking for a majority of the Justices of the Supreme Court of the United States in the case of The New Jersey Steam Navition Company *vs.* The Merchant's Bank, 6 How, 392. They were founded on the assumption that "the exclusive jurisdiction in admirality cases was conferred on the National Government as closely connected with the grant of commercial power," and were cautiously stated as follows: "It is a maritime court, instituted for the purpose of administering the law of the seas. There seems to be ground, therefore, for restraining its jurisdiction, in some measure, within the limit of the commercial power, which would confine it, in cases of contracts, to those concerning the navigation and trade of the country upon the high seas and tide-waters with foreign countries, and among the several states. Contracts growing out of the purely internal commerce of the state, as well as commerce beyond tide-waters, are generally domestic in their origin and operation, and would scarcely have been intended to be drawn within the cognizance of the Federal courts."

The principle thus intimated rather than asserted was applied ten years later in the case of Allen *vs.* Newberry, 21 How. 244, to a contract of affreightment to be performed on Lake Michigan, between two ports in Wisconsin; but the decision against the jurisdition over the contract was placed quite as much upon the Act of Congress of February 26, 1845, which restricts admirality jurisdiction on the lakes and interior navigable waters to contracts relating to vessels employed between ports in the different states, as upon the more general restriction derived from the limitation of the commercial power.

It cannot escape observation that this denial of jurisdiction to the national courts of affreightment contracts to be performed between the ports of the same state, but on navigable waters where, in cases of tort, the admirality jurisdiction is undoubted, rests wholly upon the assumption that the restriction upon the commercial operates as a constitutional limitation of the jurisdiction in admirality over contracts.

Now, without more than a mere reference to the difficulty of assigning a reason for such a limitation of that jurisdiction in matters of contract which would not require the like limitation in tort no such limitation exists, it is proper to observe that it has been more than once distinctly denied by the Supreme Court that any reference whatever in respect to the jurisdiction in admirality can be drawn from the constitutional provision concerning commerce. Thus in the case of The Genesee chief, 12 How. 452, the late chief justice, speaking for the court, and speaking with special reference to admirality jurisdiction said: "Nor can the jurisdiction of the courts of the United States be made to depend on regulations of commerce. They are entirely distinct things, having no necessary connection with one another, and are conferred in the constitution by seperate and distinct grants."

So too, in the case of The Propellor Commerce, 1 Black 578, in 1851, the supreme court, noticing an objection to its jurisdiction on the ground that it did not appear that the propeller was engaged in foreign commerce, or in commerce between the states, and speaking through Justice Clifford, said: "Admirality jurisdiction was conferred upon the Government of the United States by the constitution, and in cases of tort is wholly unaffected by the considerations suggested in the proposition."

This is the latest judgment of the Supreme Court, and unless it can be shown that jurisdiction in matters of contract is not as "wholly unaffected by the considerations" referred to, as jurisdiction in matters of tort, it seems to be my duty being fully satisfied that this court has jurisdiction under the constitution and the law over the contract of the respondents, to award to the libellants that justice to which the proofs clearly entitle them, without turning them out of this and requiring them to resort to another court. I do think this can be shown, and therefore.

Affirm the decree of the District Court.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Nov. 1, 1866.	Dec. 1, 1866.
Debt bearing int. in coin.	$1,333,558,841 80	$1,371,068,591 80
Debt bearing interest in currency..	882,408,440 00	857,622,890 00
Matured debt not presented	36,988,909 21	22,605,794 71
Debt bearing no interest.	428,680,775 33	433,698,598 93
Total...	$2,681,636,966 34	$2,684,995,875 44
Coin in Treasury.....	$99,413,018 55	$95,168,816 15
Currency....	30,913,942 07	40,195,821 07
	$130,326,960 62	$135,364,637 22
Debt less cash in the Treasury.....	$2,551,310,005 72	$2,549,631,238 22

The total debt shows an increase since the 1st of November of $3,358,909 10. The balance in the Treasury shows an increase, as compared with November 1st, of $5,037,676 60. Deducting the amount on hand from the aggregate debt, both on the 1st of November and the 1st of December, the decrease of debt would be $1,678,767 50. The total debt on the 31st of August, 1865, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August, 1865, and 1st of December, 1866, and the actual decrease in the Public Debt since that period has been $208,058,333 21.

☞ The Oregon Legislature has passed a bill extending aid to the Oregon Central Railroad, which is to be built from Portland to the northern line of California, connecting with the California and Oregon Railroad. By this bill the State agrees to pay 7 per cent. interest on $1,000,000 of the company's bonds for 20 years.

Illinois Central Railroad.

The statement of this Company for the month ending November 30, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold.....	17,979.23 for	$177,488 54
Acres Int. Fund Lands sold.....	321.92 for	3,805 86
Acres Free Lands sold..	6,111.43 for	62,750 46
Total sales during month of Nov., 1866.....	24,412.58 for	$244,044 86
To which add Town Lot Sales		325 00
Total of all.....		$244,369 86
Acres sold since Jan. 1, 1866.....	133,166.05 for	$1,415,597 03
Cash collected in November.....		243,214 72
Cash collected since Jan. 1, 1866...		1,780,300 05

TRAFFIC DEPARTMENT.

Receipts from	Freight	$373,545 00
do.	Passengers.....	136,581 28
do.	Mails.....	6,358 33
do.	Rent of Road.....	4,000 00
do.	Other Sources.....	50,000 00
Total Receipts in Nov., 1866.....		$570,484 61
Total Receipts in Nov., 1865.....		$624,968 30
Total receipts since Jan. 1, 1866....		$6,030,488 90

South Side (L. I.) Railroad.

This road is 35 miles in length, extending from Jamaica, in Queens Co., to Islip, in Suffolk Co. We learn that the whole line is graded and ready for the ties, which have been negotiated for, and will shortly be delivered. We learn, also, that the road is to be extended to Patchogue, in Suffolk Co., and eventually to Williamsburg, in Kings Co., or some other point on the East River. The whole length of the road will then be some 55 miles. The contractors are L. W. Myers and P. C. Shanahan.

Cleveland, Zanesville and Cincinnati R. R.

The projected railroad connection between Cleveland and Cincinnati, *via* Millersburg and Zanesville, is again receiving attention. It is said that a new company has been incorporated which will absorb the whole line, including the Cleveland, Zanesville and Cincinnati and the Cincinnati and Zanesville Railroads, and will supply the two links yet to be constructed, viz: from Millersburg to Zanesville, about 50 miles, and from Morrow to Cincinnati, about 36 miles. The former road is 61 miles in length, extending from Millersburg to Hudson, a point on the Cleveland and Pittsburg Railroad, 26 miles from Cleveland. The latter is 132 miles long extending from Zanesville, on the Central Ohio Railroad, to Morrow, on the Little Miami Railroad, 36 miles from Cincinnati. The only link absolutely required, therefore, is between Millersburg and Zanesville, a distance of about 50 miles. With this portion of the line constructed, trains can run through from Cleveland to Cincinnati without change—the northern and southern portions being supplied by the Cleveland and Pittsburg and Little Miami Railroad Companies, as now.

☞ Subscriptions to the capital stock of the Manufacturers' and Consumers' Railroad Company are progressing, and there is a determination to raise the sum required. The citizens of Pottsville have resolved to raise one-third of the amount, if not more.

Orange and Alexandria Railroad.

The annual financial report of the Orange and Alexandria Railroad shows debts due $300,665 06, with resources, $42,618—leaving a deficit of $258,047. The whole receipts of the company since it was turned over to the present managers have been $300,101, and expenditures $197,450. Next year the company expect a net revenue of $240,000.

☞ The Auditor of the State of Virginia will continue to fund, but not transfer the back interest on the Virginia registered bonds. These bonds bear interest from 1st January, 1866. Parties failing to fund before the 1st proximo will lose the interest from 1st January, 1866, to 1st January, 1867, on the bonds thus deferred.

☞ Arrangements are now being made to construct a railroad from Holmesburg to Bustleton, in Philadelphia county, Penn., a distance of two miles. It is to be connected with the Philadelphia and Trenton railroad at Holmesburg, and will also connect with the Philadelphia and Attleborough railroad, whenever completed.

☞ A despatch dated St. Louis, Dec. 9th says: Two surveying parties belonging to the Pacific Railroad Company have recently arrived at Salt Lake—one by the southern and the other by the northern route. Both routes are pronounced feasible. An excellent grade was also found along the Humboldt river.

☞ A bill was introduced in the U. S. Senate on the 10th inst., by Mr. Conness to grant aid for the construction of the San Francisco Central Pacific Railroad. Referred to the Committee on Public Lands.

☞ A bill was introduced in the House of Representatives on the 10th inst., by Mr. Higby, granting lands to aid in construction of a railroad from Stockton to Copperopolis, California. Referred to the Committee on Public Lands.

☞ The Commissioners of Washington county have refused the application of the President of the Western Maryland Railroad, to pay monthly instalments on the subscription of stock to the road.

☞ The first mortgage bonds of the Chicago, Iowa and Nebraska Railroad Company, have been all cancelled, the second mortgage bonds are now secured by the first mortgage on the road and equipments.

☞ Joseph H. Sherrard has been re-elected President of the Winchester and Potomac Railroad Company. The directors are: William B. Baker, R. Y. Conrad, John F. Wall and Philip Williams.

☞ John W. Garrett Esq., has been re-elected President of the Baltimore and Ohio Railroad Company, and John King, Esq., Vice-President.

☞ The Ohio and Mississippi Railroad Company propose to build a branch road from Vernon to Jeffersonville.

☞ Hon. John W. Van Valkenburgh has been appointed Assistant Superintendent of the Albany and Susquehanna Railroad.

☞ Street passenger cars will commence running in Charleston, S. C., on the 15th inst.

☞ The subject of a railroad from Bergen, in Genesee Co., N. Y., to Olean, in Cattaraugus Co., *via* Warsaw, in Wyoming Co., is eliciting considerable attention. It is understood, that if the towns through which the projected road is to pass, will give the right of way and do the grading, the Central Company will furnish the road and put it in running order.

☞ We learn that the suit for an injunction to prevent the consolidation of the Cincinnati and Indianapolis with the Indianapolis and Lafayette road has been withdrawn. The project for placing the whole line from Cincinnati to Lafayette, under one management and in one company, will be carried out upon the basis originally arranged.

☞ The Hagerstown *Mail* says that the contractors for the extension of the Western Maryland Railroad have commenced work on the section of six miles at Union Bridge, and have bought the lumber for their shanties, on all the sections from Hagerstown to Smithsburg, which are now being built. This looks encouraging.

☞ The Baltimore and Ohio Railroad Company have decided to run three trains a day on the Central Ohio line, one of which will be an accommodation between Wheeling and Zanesville.

☞ Another section of 30 miles of the Union Pacific Railroad was completed on the 5th inst., making the whole length of track constructed west of Omaha, 300 miles.

☞ The Tennessee Legislature have passed a resolution ordering the Comptroller to borrow $250,000 to aid in paying the interest on the State bonds falling due January 1st.

☞ The Georgia House of Representatives has passed the bill granting State aid to Muscogee for the Air Line Railroad.

RAILROAD TIES.

The undersigned are prepared to furnish Railroad Ties of **Hackmatack, Cedar, Pine, Hemlock** and **Spruce** in any quantity. Also every description of **Northern** and **Southern Pine, Oak** and **Spruce** for **Railroad Cars, Bridges, &c., &c.**

BRADFORD & RENICK,
3m50 **71 Broadway, New York.**

Atlantic and Great Western Railway Co.
(CONSOLIDATED.)

SECRETARY'S OFFICE,
MEADVILLE, PA., DEC. 1, 1866.

NOTICE is hereby given that the second annual election of twenty-one (21) Directors of this Company, and also of three (3) Inspectors, or Judges, of the succeeding election, will be held at the office of the Company, in the City of Meadville, Pa., on Tuesday, the eighth (8th) day of January, 1867.

The poll will be open at 2 P. M. and close at 4 P. M.

The Transfer Books will close on the twenty-fifth (25th) day of December, and open the day after the election.

J. C. CALHOUN, Secretary.

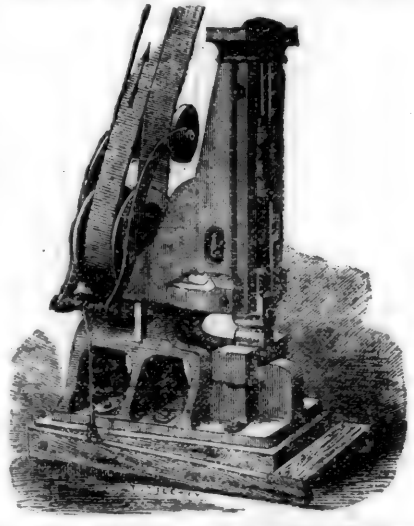
UNION CAR WHEEL CO.



N. Y. Office, 117 Broadway.
Works, cor. Greene & Wayne Sts. Jersey City, N. J and Harlem, N. Y.

MANUFACTURERS OF
Carbonized Car Wheels
AND
Locomotive Tires

From the best qualities of Charcoal Pig Iron. Proprietors of Moore's Patent for Annealing Car Wheels, &c.

H. C. LUCE, Prest.
H. W. MOORE, Supt.

AIR SPRING
FORGING HAMMER.

This Hammer has been in practical use for 2 years, during which time over 100 have been sold and given satisfaction.

It is simple in construction, not liable to get out of order, strikes a square Elastic Blow, and for the amount of work it will do requires less power than any other Hammer.

They are in use in a number of Railroad and large Machine Shops.

Send for Circulars giving full particulars and the names of parties using them.

CHARLES MERRILL & SONS,
556 Grand St., New York

BARSTOW, EDEY & CO.,
BANKERS and BROKERS
HAVE REMOVED FROM
No. 30 to No. 36 Broad Street.
OFFICE NO. 16.

20,000
Pheonix Railroad Chairs

American Railroad Journal.

New York, Saturday, December 22, 1866.

Columbus and Indianapolis Central Railway.

The following gentlemen have been elected directors of this company for the ensuing year: B. E. Smith, and Hon. Wm. Dennison, of Columbus; John Gardner, Norwalk, O; S. R. Hilliard, Delaware, O; Hon. John S. Newman, Indianapolis; Hon. J. F. Thomas, Philadelphia, and J. T. Seeley, Wm. B. Thompson and Joseph Tuckerman, of New York. The officers are: B. E. Smith, President; G. Moodier, Secretary; J. M. Lunt, Superintendent; J. Alexander, Treasurer; W. F. Doggett, Auditor; C. W. Smith, General Freight Agent, and F. Chandler, General Ticket Agent.

Financially, the Columbus and Indianapolis Central Railway Company is in excellent condition, having been enabled during the past summer to make a handsome dividend to stockholders, and pay off on the first of the present month, when they became due, first mortgage bonds to the amount of $600,000. These bonds were negotiated 15 years ago, by Winslow, Lanier & Co., of New York, for the old Indiana Central, and were liquidated by the same house.

The tonnage of this road has increased 33 per cent. since the close of the war, the passenger traffic remaining nearly the same.

The company is now interested in the construction of two branch lines, one from Union City to Logansport, and one from Cambridge City to Rushville and Jeffersonville.

New York Central Railroad.

The annual statement of the operations of this company for the fiscal year ending September 30, 1866, was submitted at a meeting of the stockholders held at Albany on the 12th inst. The following is an abstract:

EARNINGS AND RECEIPTS.

From through passengers		$1,407,254 38
" way "		2,952,994 19
" through freight		6,050,535 15
" way "		3,462,184 51
" mail transportation		95,790 00
" express		159,200 00
" rents, storage, etc		468,827 45
Total		$14,596,785 68

PAYMENTS OTHER THAN FOR CONSTRUCTION.

For transportation expenses, viz:		
For passenger business	$4,143,312 30	
" freight "	6,870,128 94	
		$11,013,441 23
For interest, including interest on Debt Certificates held for the sinking fund	$1,049,995 85	
For sinking funds	112,102 38	
For rent of Niagara Bridge and Canandaigua Railroad	60,000 00	
For U. S. tax on earnings	322,232 00	
		1,544,330 23
For dividends, viz:		
No. 25, Feb., 1866, 3 per cent	$739,230 00	
No. 26, Aug., 1866, 3 per cent	739,230 00	
U. S. tax on same	73,923 00	
		1,552,383 00

The transportation expenses for the year ending September 30, 1866, were 75.45 per cent. of the gross earnings for the same period.

The net earnings for the year ending September 30, 1866, were $2,039,014 21, equal to 7.83 per cent. (and U. S. tax thereon) on the amount of the capital stock of the company.

The following is a statement in detail of the cost of operating the road and maintenance of roadway and machinery:

COST OF OPERATING THE ROAD.

	Amount.	Allotted to Pass. Transp.	Allotted to Fg't Transp.
Office exp., stat'ery, etc.	$51,790 84	$20,716 33	$31,074 51
Agents and clerks	348,471 48	140,002 03	208,469 45
Labor, handling freight	463,102 75	.....	463,102 75
Porters, watchmen, etc.	306,696 28	122,678 51	184,017 77
Wood and water station attendance	97,470 54	38,988 21	58,482 33
Conductors, etc.	298,844 89	127,106 64	171,738 25
Enginemen and firemen	456,856 84	139,763 54	317,093 30
Fuel and preparing	1,893,011 21	757,204 48	1,135,806 73
Oil and waste	261,752 38	104,700 98	157,051 40
Loss & damage of goods	128,480 12	3,093 75	125,386 37
Damages for injuries of persons		47,847 01	88,277 61	9,569 40
Damages to property, including damages by fire and cattle killed.	11,867 98	4,747 19	7,120 79
Gen'l superintendence	88,667 78	35,467 11	53,200 67
Contingencies	300,122 29	156,048 91	144,073 38
Totals	$4,754,982 34	1,688,795 24	3,066,187 10

MAINTENANCE OF ROAD AND MACHINERY.

	Amount.	Allotted to Pass. Transp.	Allotted to Fg't Transp.
Repairs of road, etc.:			
Repairs of road bed and railway, except'g cost of iron	$1,435,999 54	$574,399 81	$861,599 73
Cost of road (including the cost of chairs and spikes) used in rep'rs	1,092,256 47	436,902 58	655,353 89

		$44,119,903 60

The following is a detailed statement of the funded debt:

Debt certificates, or premium bonds, issued to stockholders in 1853, under the consolidation agreement, payable May 1, 1883, with interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$8,892,600 00	
Deduct the amount of the sinking fund provided for their payment under the consolidation agreement, consisting of $1,875,100 00 in said certificates duly cancelled, and amount temporarily uninvested $567,061 26	2,442,161 26	
		$6,450,438 74
Amount outstanding of the debts of the former companies, assumed under the consolidation agreement		100,000 00
Bonds for funding the principal of the debts assumed for the former companies, at consolidation, payable August 1st, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st of February and August	$1,780,000	
Less in sink'g f'd cancelled	382,000	
		1,398,000 00
Bonds to stockholders in Buffalo and Niagara Falls Railroad Company, under the lease of that Company's road, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$110,800	
Less in sink'g f'd cancelled.	33,800	
		77,000 00
Bonds for railroad stock, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$817,000	
Less in sink'g f'd cancelled.	211,000	
		606,000 00
Bonds for real estate purchased, payable May 1st, 1883, interest at 6 per cent per annum, payable semi-annually, on 1st May and November	$235,000	
Less in sink'g f'd cancelled.	70,000	
		165,000 00
Bonds and mortgages, for real estate purchased, with interest at 7 per cent. per annum, excepting $45,550 50, the interest upon which is at 6 per cent. per annum		185,365 60
Bonds payable August, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August, with convertible privilege at par, till 1st August, 1869*	$2,990,000	
Less conv. into capital st'k	801,000	
		2,189,000 00
Bonds payable December, 1887, interest at 6 per cent. per annum, payable semi-annually on 15th June and December—issued in renewal of 7 per cent. bonds, due 15th June, 1864†	$3,000,000	
Less in sink'g f'd cancelled	75,000	
		2,925,000 00
Total amount of funded debt Sept. 30th 1866		$14,095,804 34

* Between the close of the fiscal year and the verification of this report, the further amount of $1,729,000 in these bonds was converted into capital stock—making the total amount of capital stock on the 11th December, 1866, $26,530,000, and leaving the amount in these bonds outstanding $460,000.

† Of these bonds $11,900 in amount had not been presented for payment at the close of the fiscal year—the funds to meet them having been appropriated, they are not included in the statement of debt.

The company has no floating debt.

The average rate per annum of interest on funded debt, is 6.21 per cent., and all interest, except on mortgages, is payable in the city of New York.

ADDITIONAL STATEMENTS.

The items charged to construction account, during the year, have been:

Land: principally at St. Johnsville, Syracuse, Rochester and Buffalo...	$97,991 79
18 locomotive engines added to equipment.....	216,000 00
11.80 miles of second track on the Syracuse and Rochester direct road..	118 000 00
	$431,991 79

Between the close of the fiscal year and the issuing of this report, the remainder of the second track on the Syracuse and Rochester direct road (1.29 miles) has been completed and brought into use, so that the entire main line (Albany to Buffalo) is now double tracked, except from Rochester to Churchville, 14 51 miles.

The amount charged to transportation expenses includes the cost of rebuilding the freight house and elevator at Buffalo which were destroyed by fire on the 17th of March last, and the erection of an iron bridge over the Erie canal at Canastota, besides the general repairs and improvements necessarily consequent upon the increased magnitude of the year's traffic.

The bridge across the Hudson river at Albany was opened for use on the 22d of February last, enabling through trains to and from New York and Boston, *via* Albany, to be run without the transfer of passengers or freight.

In June last this Company commenced operating the road of the Saratoga and Hudson River Railroad Company, from its junction with this Company's road, about 3¼ miles east of Schenectady, to Athens, on the Hudson river, a distance of about 37¼ miles.

The length of iron bridging now upon the line, reduced to single track, is 6,131¾ feet.

The renewal of iron rails during the year amounted to 20,375 tons, equal to 205.57 miles of single track. The number of ties renewed during the same period was 471,436.

Since the close of the fiscal year a part of the down track on the grade just west of Albany has been laid with steel rails, with a view to test, practically, the economy of using them to a greater or less extent instead of iron.

The capital stock has been increased during the year $210,000, by the conversion of an equivalent amount of 7 per cent. bonds due in 1876. In 1865, $205,000 of these bonds were converted; in 1864, $177,000; in 1863, $209,000—making the amount to date $801,000. The funded debt has decreased $531,638 43—making the decrease of capital stock and funded debt during the year $321,638 43.

The increase in gross earnings over the previous year has been $621,261 29; with an increase in expenses, exclusive of interest and sinking funds, of $114,863 30—making the increase in net earnings $506,397 99. The increase of fuel and supplies on hand is $1,019,315 12.

The company have 276 locomotives; 208 first-class passenger cars; 84 second class and emigrant cars; 83 baggage, mail and express cars; 4,876 freight cars; and 351 cars for gravel and other service.

Miles run by passenger trains 2,371,321; by freight trains, 3,833,454; by other trains, 402,486—total 6,607,261, an increase as compared with 1865 of 803,213. Aggregate miles run by passenger cars in passenger trains, 9,050,340; do., by baggage, mail and express cars 3,304,912—total, 12,455,252, an increase of 284,939.

Number of passengers carried eastward, 1,936,012, of which 97,674 were through, and 1,838,338 were way. Do., carried westward 1,778,722, of which 107,093 were through, and 1,671,629 were way. Aggregate both ways 3,714,734, of which 204,767 were through, and 3,509,967 were way. Total miles traveled by passengers 212,950,779—a decrease as compared with the previous year of 10,278,492.

Tons of freight carried eastward 1,108,675, of which 577,068 were through, and 591,607 way. Do., carried westward, 493,522, of which 226,772 were through, and 266,750 way. Aggregate both ways 1,602,197, of which 743,840 were through, and 858,357 way. Total movement of freight, or number of tons carried one mile, 331,075,547—an increase as compared with the previous year of 66,121,921.

Length of main line from Albany to Buffalo, 297.75 miles; length of side or parallel and branch lines 258.13—total length of main, side and branch lines owned by the company, 555.88; length of second track, on main line and branches, 280.51; length of sidings, turnouts and switches 152.27—total length of equivalent single track, 988.66 miles.

Length of Niagara Bridge and Canandaigua railroad (leased) 98.46 miles; sidings, turnouts and switches 3.42—total length of equivalent single track 101.88.

Length of Saratoga and Hudson river railroad, from junction east of Schenectady, to Athens (leased) 37.87 miles; sidings, turnouts and switches 5.32—total length of equivalent single track, 43.17.

Total length of equivalent single track on leased roads, 145.07. Do. on lines owned and lines eased, 1,133.73.

Baltimore and Ohio Railroad.

The regular monthly meeting of this company was held in Baltimore on the 12th inst., at which J. W. Garrett, Esq., was re-elected President, a position he has filled during the past eight years with signal ability. On taking the chair he delivered an address of which the following is an abstract.

At the annual meeting on the 19th of November, the 38th annual report, for the year ending Nov. 30, 1864, was presented; but owing to causes heretofore stated, viz: the difficulty of adjusting accounts with the Government, the subsequent reports have not been submitted. He then proceeds to state the leading acts, the progress of the works, and the developments of the policy of the company, and of its prospects.

During the past year, in addition to the regular force, more than 2,000 men have been employed in constructing second track, tunnels, bridges, water stations and buildings; the result of which has been the construction of 80 miles of first class double track, which are now in use, and the enlargement of the tunnel at Marriottsville to the requisite size for the admission of the large cars now in use. The tunnel at Paw-Paw is also being enlarged. A large amount of grading and other work has been done in the meantime upon the remainder of the line east of Piedmont; and it is confidently expected that the entire line from Baltimore to Piedmont, 206 miles, will be completed with a superior double track during the next year. A tunnel 800 feet in length is in course of construction near the Point of Rocks, where the Chesapeake and Delaware canal borders upon the Potomac River. This work, which was commenced in December, 1865, is already more than half accomplished, and it is expected the heading will be through by February next, and that by August following the double track can be laid through this tunnel, and the exposed line upon the banks of the canal be abandoned. Preparations are also being made to commence work upon another tunnel at Williams' Point, west of the tunnel above mentioned, the construction of which during the winter months can be easily performed without interference with the canal. Care is taken to straighten the line and improve the curves, wherever practicable, during the construction of the double track, by which decided improvements are being accomplished.

Since the close of the war, 12 first class iron bridges of an aggregate length of 3,475 feet with 27 spans varying from 78 to 205 feet in length, have been constructed and are now in successful use. A brick machine shop, two stories, 199 by 60 feet has been erected at Mt. Clair. Schroeder's Run has also been securely arched. A blacksmith shop 568 by 70 feet, and wheel house 50 by 100 feet, built of brick, are nearly completed. At Martinsburg an engine house and machine shop, 184 by 60 feet has been finished; and a car shop 100 by 200 feet is approaching completion. At Piedmont a new passenger station, engine house, blacksmith, car and other shops, have been erected. An engine house at Grafton is nearly completed. Additional buildings have been and are being constructed at Parkersburg, Wheeling, and other important points.

A large force is now employed in arching the tunnels upon the Parkersburg Branch, three of which will be completed during the present month; in addition to which 1,010 feet have been arched at Eaton's tunnel. The arching of three additional tunnels will be immediately commenced. It is the purpose of the company to press energetically the work of arching every tunnel upon the line as rapidly as it can be judiciously performed.

Upon the solicitation of the Winchester and Potomac Railroad Company, at the close of the war, this company undertook the re-construction of its bridges, and the construction of its road from Stevenson's station to Winchester, together with the necessary buildings. It also arranged with that company to supply the requisite machinery, and work the road. These arrangements have given great satisfaction, and the results are cordially appreciated by all parties interested.

Much work has been done upon the Washington County Railroad, leading from the Main Stem at Weaverton to Hagerstown, 23 miles. This company has thus far contributed to the payment for work done upon that road $180,000. It is expected that the road will be opened prior to the dedication of the National Cemetery at Antietam, on the 17th of September next. As this road passes through that classic battle ground, it is anticipated that its large facilities, in connection with the Baltimore and Ohio road, will enable the great concourse expected on that interesting occasion to reach the Cemetery with convenience and comfort. Upon the completion of this most desirable and important road, Washington County will have not only the benefit of transportation by the Chesapeake and Ohio Canal, and as at present a

route through the Cumberland Valley Railroad, and by the Northern Central and Pennsylvania Railroads to Baltimore and Philadelphia, but also economical transportation by this excellent and direct line over the double tracked Baltimore and Ohio road to Baltimore.

The President regrets the delay in the construction of the Pittsburg and Connellsville Railroad, caused by litigation; but for which, the direct communication by rail, between Baltimore and Pittsburg, would now be in actual operation. The work upon the road is, however, being gradually pushed forward, and the heaviest portion of it—the Sand Patch Tunnel, through the summit of the Alleghenies—is well advanced towards completion.

The company's engineers have located two routes from the Point of Rocks to Washington—one *via* Bladensburg, and the second directly into the city of Washington. By the latter route the distance will be but 42 miles, being a reduction of the distance, compared with that by the Relay House, of 49 miles. The latter location was made by the solicitation of the Mayor, and other leading citizens of Washington.

During its last session, Congress refused to authorize any additional lines of road from Washington to Baltimore, and after thorough examination, the Committee on the District of Columbia recommended the passage of an act, in July last, which became a law on the 25th of that month, authorizing the entrance of the Metropolitan Branch into the District of Columbia, and to the city of Washington, under an agreement to be made with that city. The authorities of Washington appeared desirous that the more direct route should be selected, instead of that *via* Bladensburg, and their Councils have now this subject under consideration. If they adopt satisfactory legislation, the Mayor of that city has been assured, in accordance with the views entertained by this Board, that the line which they prefer shall be adopted.

As it is very clear that, with the fact that the present double track road between Baltimore and Washington affords abundant facilities for more than twenty times the amount of transportation now offering or to be obtained for the route, that no public interest requires a parallel line to be built, it is still believed, as great public interests will be served by the construction of the direct line from Washington to the Point of Rocks, that Congress will maintain the views heretofore held, by refusing its authority for such lines, and continue thus to encourage the large expenditure of money by this company required to complete the Metropolitan Branch.

During the past nine months a large portion of the heaviest work upon this line at Parr's Ridge has been executed. The line has also been located, and arrangements perfected, should the authorities of Washington legislate satisfactorily for the entrance of the road into that city, to commence there at once, and prosecute the work with rapidity, so as to open this line from Washington to Rockville for local and other purposes at the earliest practicable period. It is also preparing to commence at various other points upon the line, so that the entire work can be vigorously prosecuted.

This company has not contributed to the construction of the line of railway from Harper's Ferry through the Valley of Virginia to connect with the Virginia and Tennessee Railroad, etc., for the reason that adequate legislation has not been secured in that State; and because this company has before it enterprises which will absorb all the means it can command. It is, however, ready and willing to co-operate with the State in developing the resources of this region, whenever the Legislature, considering the facilities which will be afforded the mining, manufacturing and agricultural interests thereof, by an outlet through this road, shall respond by such wise action as will serve the vast and important interests involved.

The lease of the Central Ohio Railroad, which went into operation on the 1st of the present month, is next alluded to. The line is now under the same government from Baltimore to Columbus. It is the design of this company at once to so strengthen and improve that road, and add to its equipment and facilities, as will enable it to transact, promptly and successfully, a largely increased business. It is believed that great advantages will result to the city of Baltimore, and to the Baltimore and Ohio and Central Ohio Roads, from this unity of management and perfect co-operation. The officers of the Baltimore and Ohio Company are making special arrangements to promote the local interests upon that road, as is the system upon its own line, and to furnish every practicable facility for the increase of its traffic and the development of its advantages. More intimate relations will be secured and maintained with the great lines of railway centering at Columbus, and it is designed to secure increased advantages for prompt transportation of freight, and in improved connections for passengers. The lines running in connection with the Central Ohio Road desired the arrangement which has been made, and this company is assured of their cordial and effective co-operation in increasing and improving the business and facilities of the route.

The equipment of the company has been continuously increased, especially in locomotive power, so that it is enabled not only to transact promptly all business offered, but also to furnish additional capacity for a largely increased business. The organization of the lightning express line has proved to be a marked success, and is most useful in advancing the special interests for which it was designed, viz: the transportation of costly and perishable articles between the west and east over the entire road at passenger speed. The arrangements of this line extend from Baltimore *via* Parkersburg, and the Marietta and Cincinnati Road to Cincinnati and the Southwest, and *via* Bellaire and the Central Ohio Road to Columbus, and all points in the West and Northwest.

Owing to unforeseen difficulties, the location of the bridges over the Ohio river has been delayed. It is hoped that such arrangements will shortly be made as will enable the company to progress rapidly with the building of these important structures.

It is the intention of the company in connection with the Marietta and Cincinnati Railroad Company, to establish, during the next season, an independent line for passengers and freight between Cincinnati and Baltimore and Washington.

The general business of the road has been large, and has been conducted with promptness and regularity. The coal business for a large portion of the year has been heavy. During May, June and July, it amounted to 265,152 tons, exclusive of that for the use of the company—showing a capacity at that time for shipment of more than a million of tons a year. The increase in equipment and in double track since that time has increased the capacity of the road to one and a half millions per year.

The establishment of the line of steamships between Baltimore and Liverpool has proved a decided success. The vessels have thus far made 14 voyages to, and 12 from, Liverpool with full lists of passengers and freight. It was also found necessary to charter an additional vessel, which is now loading at Liverpool for Baltimore. It has been determined also to establish a permanent line between Baltimore and Bremen, and arrangements are being made for the construction of two iron steamers for that purpose. This company have also joined in the formation of a line between Baltimore and Charleston, in connection with the Charleston Railroad Company, and the Savannah Railroad Company, and merchants and others of the two cities. The number of steamers connected with the port of Baltimore on the 1st inst., aggregated 99, of which 22 are ocean steamships.

The roads under the management of the Baltimore and Ohio Railroad Company now traverse 683 miles of territory, viz: the Main Stem, 379 miles; the Parkersburg branch, 104 miles; the Washington branch, 31 miles; the Winchester and Potomac road, 32 miles; and the Central Ohio, 137 miles.

Evidences are not wanting of the large prosperity of the regions traversed by the Main Stem and the Parkersburg branch, and which is doubtless attributable as well to the correctness of the policy and of the system of management furnished and acted upon by the company, as to the advantages and facilities afforded by the road. The connecting roads to be built, and which will doubtless be influenced by the principles of this management, will unquestionably yield to the territories through which they pass fruitions equally important and desirable and which will assure also there progress and prosperity.

The address, of which the above is but a faint outline, was fully endorsed and approved, and ordered to be printed in pamphlet form for general distribution.

Philadelphia and Reading Railroad.

The fiscal year of this company closed on the 30th of November. The total quantity of Anthracite coal transported over the Schuylkill County branch, was

In 1866	3,425,330 05	tons.
In 1865	2,802,892 90	"
Increase in 1866	622,937 15	"

This table does not embrace the Bituminous coal transported over the Lebanon branch, nor the Anthracite over the Schuylkill and Susquehanna Railroad, West, which is but a small quantity.

☞ The total coal tonnage of the Lehigh Valley Railroad for the year ending Nov. 30 was:

In 1866	1,730,474 12	tons.
In 1865	1,402,276 16	"
Increase in 1866	328,197 16	"

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of November, were:

Total exports	$183,052,516	$234,172,447
Do. exclusive of specie.	156,800,994	174,916,017

Western Maryland Railroad.

We understand that the Board of County Commissioners unanimously refused to raise at this time the $150,000 subscribed by the county to the above road, on certain conditions and upon certain representations, the law authorizing the County Commissioners to subscribe the above amount, required as a condition precedent to the grading of the road to our eastern county limits, or the satisfactory assurances to the Commissioners that this would be done in a reasonable time. It seems the President and Directors of the road last fall, Mr. Irwin being then the President, came before the Commissioners with a statement that the road could be built at a cost in no case exceeding $1,200,000, and assured them that over $1,100,000 had already been subscribed, leaving only about $75,000 necessary to complete the entire road to Hagerstown. Upon this statement of facts, and relying upon the absolute truth thereof, the Commissioners subscribed the sum of $150,000 in behalf of the people of this county. Subsequently Mr. Irwin, and his Board of Directors let the making of the road for the sum of $1,659,000, without having obtained any additional subscriptions, thus falsifying the statement made to the Board and entering into a contract for the payment of about $400,000 more than the company could command, thus demonstrating conclusively that the road could not be made to our eastern limits with the funds now at the command of the company. Under this state of facts, and not wishing to sink $150,000 of our people's money in this end of the road years before it could or would, in all probability, be made available by the completion of the entire road, the Commissioners declined to authorize the commencement of work on the road in this county. We have not the slightest doubt but that their action will be heartily endorsed by all our people. What has been done by our County Commissioners involves no hostility to the road whatever, but what was eminently proper and necessary to save our people from having to pay $9,000 annually as interest on $150,000 expended for five or ten years before the road could or is likely to be made available. We hope the company will press on its work and bring the road to our eastern county borders; *then* will the Commissioners commence *our* part of the work and speedily complete the same, but *not* before this happens.—*Hagerstown Herald.*

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 7th Dec., inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1865..	934,300	9,998,400	18,166,700	4,269,100
1866..	450,800	6,852,700	24,193,100	6,801,600
Dec.	483,500	3,145,700	*6,076,400	2,532,500

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 1,112,640 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 7th of Dec., in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1.
Flour, bbls.....	1,184,300	934,300	450,000
Wheat, bush....	15,465,600	9,998,400	6,852,700
Corn, bush.....	10,352,400	18,146,700	24,193,000
Barley, bush....	3,045,900	4,249,100	6,801,600
Oats, bush.....	12,177,500	10,489,900	10,240,300
Rye, bush.....	620,300	1,289,900	1,521,800
Malt, bush.....	.....	505,100	427,000
Beef, bbls	70,700	9,864	2,200
Pork, bbls.....	58,400	15,109	43
Bacon, lbs.....	579,600	1,273,100	10,000
Butter, lbs.....	1,327,800	1,239,900	1,255,000
Lard, lbs.....	2,614,800	1,999,600	1,241,400
Cheese, lbs.....	4,398,900	16,671,000	9,807,000
Wool.....	1,302,100	635,500	519,800

☞ The Hanover Branch (Mass.) Railroad Co. have contracted with J. B. Dacy & Co., of Dorchester, to build their road. It will be commenced in a few days, and by the opening of summer the road bed will be far advanced towards completion.

☞ The Senate of Alabama, on the 6th inst., passed a bill authorizing the City Council of Montgomery to issue bonds to the extent of $1,000,000 in aid of the South and North Alabama Railroad.

☞ Mr. A. Altman of the Stock and Banking House of Messrs. Smith, Martin & Co., No. 11 Broad street, has been admitted a member of the Open Board of Brokers.

☞ Mr. Charles O. Russell has been appointed Superintendent of the Western (Mass.) Railroad, *vice* Mr. Henry Gray, resigned. Mr. J. B. Chapin, has been appointed Assistant Superintendent.

☞ The Governor of Georgia has vetoed the Air Line Railroad Bill.

Stock Exchange and Money Market.

A decided increase in the available supply of loanable funds is reported this week, on a moderately active and remarkably easy market. The speculative demand is fair but is not equal to the absorption of the augmented offerings, and the tendency of rates is in favor of borrowers. Lenders seem eager to place their balances on call at 6 per cent. to the Stock Exchange firms, and 5 per cent. to the dealers in Government securities. The last bank statement has strengthened public confidence in the future easy workings of the market, and all parties now seem to anticipate cheaper accommodation. The policy of government, relative to the great industrial and commercial interests of the country, as thus far developed, has been laudably conservative; and to this circumstance also is largely due the relaxation in monetary affairs, and the improved feeling among business people, generally. In the way of currency movements, it is reported that the flow is steadily in this direction, leading to a vigorous accumulation of legal tender and national bank notes in the vaults of the city banks. The discount market is reported comparatively tame. Prime short date commercial paper is in light supply and fair request at 6@7 per cent. per annum. In other grades, there is no noticeable movement, though the offerings of other than really good names are out of all proportion to the limited disposition of lenders to discount them, even at a severe shave. The bank returns, made up on Monday, showed a marked gain in strength, making it the most favorable statement given to the public in nearly two months. The legal tender reserve increased $3,047,452; and the deposits, $2,781,449, while the loans were reduced $2,167,697, chiefly from the inability of the bank managers to place their funds advantageously at present. The specie reserve fell off $590,350. The circulation increased $3,002. The specie reserve of the banks is now $18,991,200 against $16,981,435 same time last year. The city bank deposits are now $206,458,271, against $228,484,370 week ending Oct. 6, 1866, and $170,913,753, week ending Dec. 16, 1865. Their legal tender reserve amounts to $63,994,309, against $48,887,556 same time last year. Their circulation now stands at $31,797,655 against $16,570,613 same time last year. The loans are now $258,452,330, against $279,135,790 seven weeks ago, and $227,814,356 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $92,855,139 a day, against a daily average of $107,885,977 the preceding week; and $108,180,240 the week ending with Dec. 2. The current week's exchanges average about $101,746,184 a day. The new Gold Exchange Bank has thus far relieved the city Bank Clearing-house of a large share of the daily exchanges or clearings of Bank checks. A much larger saving is looked for, through the Gold Exchange Bank in the way of check drawing, check certification and clearings than $15,000,000 per day on the accounts of Gold brokers alone. On Tuesday $72,000,000 of gross settlements were made, with resulting balances of only $6,000,000.

The Philadelphia bank statement of Monday shows a loss in all items, save circulation, specie and loans, in which there has been a slight increase. The changes are on the side of a decrease. There was a loss of $372,681 of legal tender notes, on a decrease of about the same amount shown by the last weekly exhibit. The average deposit line shows a decrease of $723,637, on a decrease of nearly as much last week. The loans increased $6,585, the specie slightly, and the circulation $140,074. The aggregate clearings for the week foot up $32,064,063, against $35,775,798 last week—showing a decrease of about two and three-quarter millions. The balances for the week amounted to $3,138,280—being a decrease on the amount of balances last week of over a hundred thousand dollars.

National Bank notes to the amount of $344,440, were issued last week, making the total issue to 1,663 banks thus far $300,231,371, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $2,091,432, leaving, with the existing 1,649 banks, an actual circulation at this date, of $298,139,939. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,866,350; and for the public deposits, $38,045,950—making a total of $379,212,600. The Treasury Department, last week, redeemed and destroyed

$338,000 of worn and mutilated fractional currency, and issued $453,310 worth of new.

The U. S. Sub-Treasury receipts, week ending with Dec. 15, were $12,793,157, including $1,471,199 from customs duties; payments, $10,703,386; balance at the close of the week, $108,689,176, against $106,689,405 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday receipts, $5,268,182, and payments, $6,045,112; Tuesday receipts, $1,844,469, and payments, $1,029,657. The balance at the close of business on Tuesday stood at $108,727,058, against $107,743,233 a week ago.

Government revenues are on a moderate scale at present, with a tendency to increasing fertility in the excises. Excises yielded, last week, $4,500,000, against $6,266,769, the preceding week; customs at the port of New York, $1,471,199, and at the outports, at least $500,000 (in coin) more, making the grand total income for the week equal to about $7,250,000 in currency, against disbursements of $3,583,113 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $161,000,000, or an average of about six millions a week. The current customs revenues keep up to the average of about two millions in gold a week.

Speculation in gold has been rather more animated, since our last, but it has run chiefly against the market. The increasing produce exports, the rising quotations from foreign markets for American securities, and the proclaimed stable and conservative policy of Secretary McCulloch—in which purpose Congress is more than likely to support the financial minister—tend to depress the premium. The *bear* element in the Gold Room has been disposed to force the process by putting out *short* contracts. The highest figures made during the week were 138⅝, and the lowest 136⅝. The market was weakest on Wednesday, when gold opened at 137⅜, fell to 136⅝, and closed tamely at 137. The specie exports from the port amounted to $1,138,980 last week, and $115,437 on Wednesday. The *Asia*, from Boston on Wednesday, also took out $50,000. Apart from the export demand, main legitimate inquiry at present is from importers, for custom house purposes. This inquiry, however, is temporarily restricted. The total imports of specie from Europe, and other ports since January 1, have been $9,552,705. The customs demand for Gold last week, averaged $245,199 a day; thus far, this week, it has been equal to $189,830 a day, or equal to a weekly aggregate of $1,138,980. The arrivals of specie from Europe, Havana and other foreign ports, during the week, reached $131,896, and from California, none. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $127,495,017, against $99,305,197 same time last year. The total receipts of California gold at this port since Jan. 1, have been $40,694,505, against $19,796,298 same time last year, showing an increase, in 1866, of $20,898,207. The exports of specie from this port, last week, were $1,348,563, making the total outflow of specie from the port, since Jan. 1, $60,497,607, against $29,226,453 same time last year, $47,857,724 same time in 1864, and $69,153,653 same time in 1859. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $393,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $47,906,371, against $37,948,868 same time last year. The specie exports from San Francisco from Jan. 1, to Nov. 14, reached $39,370,856, against $39,951,343 same time last year.

Foreign exchanges improved a fraction early in the week, on a livelier inquiry for prime bills, especially on London, which were in very moderate supply. Subsequently, the offerings increased, and the demand fell off somewhat, leaving the market quite spiritless after the closing of the mails on Wednesday, with a tendency to lower figures. Bankers' 60 day bills on London closed at 109⅜@109½, and on Paris to 5.17½@5.13⅛; sight bills on London to 110⅛@110¼; and on Paris to 5.13¼@5.10¾. The offerings of produce bills have been rather more extensive this week, owing, in part, to the increased produce exports from this port. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $4,095,672, making the exports since January 1, $182,581,010, against $171,234,076 same time last year.

Government securities have been in much better demand, and decidedly firmer in price. The main inquiry has been for the Five-twenties and Seven-thirties. The Five-twenties of 1862 have begun to attract the attention of foreign buyers, once more, in view of the advancing tendency of the bonds abroad, the gradual disappearance into investment channels of the floating supplies in foreign markets, and probability of an early increase of foreign investment orders. Such orders are now coming to hand on a very moderately supplied and rather buoyant local market, which any material increase of demand could not fail to influence most favorably for the public credit. The home inquiry has been principally for the new 5-20s of 1865, which have now attached to them nearly a half year's coin interest; and for the first series of the Seven-thirties, which are immediately convertible into the latest issue of the Five-twenties. U. S. sixes of 1867 closed here on Wednesday at 127; U. S. sixes of 1868, at 125; U. S. sixes of 1881, 112¼@112⅜; U. S. Five-twenties of 1862 at 107½@107¾; U. S. Five-twenties of 1865 at 106⅜@106⅝; U. S. Five-twenties of 1865, consolidated, 108⅜@108⅝; U. S. Ten-forties at 99⅞@100, and U.S. Seven-thirties at 105⅛@105½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....116¼	May, 1865 .....111½
July, 1864.....115¾	August, 1865....110¾
August, 1864....115¼	September, 1865..110⅜
October, 1864....114¼	October, 1865....110
December, 1864..113¼	

Railway and miscellaneous securities were active and buoyant during most of the week, but within a day or two, there has been some pressure to realize, and consequent heaviness in the dealings, though these incidents are deemed purely temporary, in view of the cheapening money market.

The Stock Exchange now holds a protracted single session from 10 A. M. to 4 P. M., for the purpose of diverting business from the Open Board and the Long Room. The change is not deemed likely to prove advantageous to any interest. In such a tedius sitting, the dealings cannot fail to drag, and the brokers will soon find such protracted labor, very monotonous, if not absolutely unprofitable. The official reports of sales are made up from ten to twelve o'clock, and from twelve to four o'clock in two separate lists.

General business exhibits rather more animation and buoyancy, particularly in the line of the leading kinds of domestic produce, such as breadstuffs and cotton, which have advanced; and provisions, which have been irregular in price. All these have been more or less sought after for export. Middling grades of Cotton closed firmly at 34½@36½ per lb., on a rather buoyant market. The stock of cotton now here is estimated at about 150,000 bales. The receipts at the port this week, have averaged nearly 4,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 214,000 bales, against exports of 91,600 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 550,000 bales against 741,000 bales same time last year; exports, 205,000 bales, against 362,000 bales same time last year, estimated stock at latest dates, 460,000 bales, against 412,000 bales same time last year. In dry goods and other merchandise, there has been a moderate increase of business, and price, have exhibited more particularly for staple articles in other than speculative hands. The total imports of foreign dry goods, last week, were $1,123,269, and the total amount marketed $760,875. The value of foreign merchandise imported last week, was $1,879,628—making the grand total specie value of last week's imports of dry goods and merchandise, $3,002,897, and since January 1, $283,597,050, against $198,822,383 same time last year. The ocean freight market is more active and firmer with 555 vessels of all classes in port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 4.	Dec. 12.	Dec. 19.
Consols.....—@	88½	88¼	89⅝
U. S. 5-20's of 1862—@	70½	71	71½
U. S. 5-20's of 1865—@	69½	—	70¼

Iowa Railroads.

No State in the Union is more wide awake on the subject of railroads at this time than Iowa. The roads already in running order are rapidly pushing ahead, opening up more and more miles into the country; work is being pushed forward on new lines already projected, and plans are being rapidly developed for still further lines. During the past year, says the Dubuque *Herald*, the Dubuque and Sioux City Railroad has been opened through to Iowa Falls; the McGregor Western has been completed from Calmar to Cresco; the Northwestern has been pushed through from Boonsboro nearly to Council Bluffs; the Mississippi and Missouri has been opened up still further west, and the Des Moines Valley completed to Des Moines. During the next season these roads will be pushed still further, and it is not unlikely that trains may be running before January, 1868, upon roads now only commenced. The Dubuque and Sioux City should be pushed through to Fort Dodge, and it is to be hoped it will be. And the Cedar Falls and Minnesota, under the control of the Dubuque and Sioux City, will be completed from Waverley to Nashua and perhaps to Charles City. All this, of course, develops the State, promotes settlement, enhances values, encourages industry, thrift and enterprise, and pushes the State along faster than all other interests combined.

The Tehuantepec Railroad.

The Washington correspondent of the *Journal of Commerce* says the project of the transit company for the construction of a railroad and telegraph across the Isthmus of Tehuantepec is attracting more general attention there than any other commercial enterprise of the day; the route by the Isthmus from New York to our Pacific coast being represented shorter by nearly fifteen hundred miles than by way of Panama; and that if the Fernandina road across Florida be adopted as a part of the route, the distance saved will be nearly two thousand miles. The Liberals have been throughout in undisputed possession of the State of Tehuantepec. The transit company have an order from President Juarez to the local authorities to extend all facilities for the immediate commencement and prosecution of the work, and will proceed forthwith to build the road. Its friends confidently expected that in less than two years the route will be opened and thronged with the commerce of the world.

James River and Kanawha Canal.

The Richmond *Examiner* says that the prospect that the James River and Kanawha Canal will be taken by the French Company, which has been negotiating for it for several years past, is better than it has been since the close of the war, and much better than the friends of the company have thought it to be since the negotiations were reopened in 1865.

The Baltimore Central Railroad.

Only 11 miles of this road require completion to connect it with the Philadelphia, Wilmington and Baltimore Railroad at the Susquehanna, near Port Deposit. When this short distance is finished farmers along the line will be afforded a choice of markets in Philadelphia and Baltimore.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Dec. 8th, 1866, were $134,804 00
Corresponding week of previous year.. 131,074 00

Increase..... $3,730 00

The earnings of the Chicago and Northwestern Railway for the second week in Dec., 1866, were $159,564 00
Corresponding week of previous year.. 139,590 00

Increase..... $19,974 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Dec. 13th, 1866, were $23,725 00
Corresponding week of 1865..... 28,889 00

Decrease..... $5,164 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Dec, 1866, were..... $71,012 00
Corresponding week of 1865 ..... 81,311 00

Decrease $10,299 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in Dec., 1866, were..... $48,611 00
Corresponding week of previous year.. 52,615 00

Decrease $4,004 00

The earnings of the Western Union Railroad for the week ending Dec. 14, 1866 . .. $7,853 71
Corresponding week previous year.... 8,303 14

Increase $449 43

The earnings of the Marietta and Cincinnati Railroad the 1st week in Dec., 1866 ..$24,540 00
Corresponding week previous year.... 26,127 50

Decrease $1,587 50

The earnings of the Michigan Central Railroad for the 1st week in Dec., 1866, were.. $72,368 00
Corresponding week of previous year.. 81,442 00

Decrease..... $9,074 00

The earnings of the Chicago and Great Eastern Railway for 1st week in Dec. were.....$28,247 24
Same period last year 23,500 54

Increase in 1866..... $4,746 70

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg Railroad for the month of Nov., 1866, were:

From freight	$141,287 35
" passengers	55,299 55
" miscellaneous	4,800 00
	$201,386 90
Nov., 1865:	
Freight, passengers, etc	220,107 81
Decrease.....	$18,750 91

The earnings of the Ohio and Mississippi Railroad line, from Cincinnati to St. Louis, for Nov., were:

	1866.	1865.
Eastern Division.....	$177,826 36	$242,581 35
Western Division.....	124,599 44	169,971 98
Total.....	$302,425 80	$412,553 33
Decrease		$110,127 53

Comparative earnings from January 1, to Nov. 30, inclusive:

	1866.	1865.
Eastern Division.....	$1,822,194 55	$2,063,107 69
Western Division....	1,276,775 90	1,445,579 09
Total	$3,098,970 45	$3,508,686 78
Decrease		$409,716 33

Railway Statutes of New York.

We continue down to the present year our digest of the miscellaneous statutes of this State relating to railways. Many of them are of the utmost importance, and should be more familiar to the officers and employees of railroad companies than we have reason to believe they are.

License to sell Tickets—Prohibition of Unauthorized Sale—Places and Prices of Tickets—Penalties.—By chapter 470 of the laws of 1857, it is provided that no person other than the agents or employees of railroad, steamboat or steamship companies of this State, shall offer for sale or sell any ticket or tickets, or any printed or written instrument issued by, or purporting to have been issued by any railroad, steamboat or steamship company in this State or elsewhere, for the transportation of any such passengers upon any such railroad, steamboat or steamship, or any instrument wholly or partly printed or written, delivered for the purpose or upon the pretense of the procurement to such passenger or passengers, of any such ticket or tickets, or in any other manner, charge, take or receive any money as a consideration or price for such passage, or for the procurement of such passage ticket or tickets, and no ticket or tickets, or other evidence as aforesaid, shall be sold or offered for sale by the said agents or employees, except at the offices designated for that purpose by the said companies respectively, and at prices not exceeding their regular established rates. (Sec. 1.)

Section 3, provides that the violation of this act shall be punished by fine of not less than one hundred dollars, or by imprisonment of not less than three months, or by both.

Sleeping Cars—Fare—Tickets—Liability of Company.—Any patentee of a sleeping car, or his legal representative, may place his car on any railroads of this State, with the assent of the companies owning the same. Such patentee, or his legal representative, may charge for use of said car in all cases to each passenger occupying the same, forty cents, which sum shall entitle a passenger to the use of a berth for one hundred miles; and the said patentee, or his legal representative, may charge at the rate of three mills for every additional mile, but in no case shall the charge exceed eighty cents. (Act of 1858, Chap. 125, § 1.)

The railroad companies permitting the use of such cars shall, nevertheless, keep sufficient first class cars of other kinds for the convenient use and occupation of all passengers not wishing to use a sleeping car. And the tickets issued for the use of sleeping cars, shall have plainly written or printed thereon, "Sleeping car," and all persons using a sleeping car, shall be furnished with such tickets. (§ 2.)

No railroad corporation shall be interested in the additional sum paid for the use of berths in sleeping cars, pursuant to the provisions of this act. (§ 3.)

Nothing in this act contained, shall be so construed as to exonerate any railroad company from the payment of damages for injuries in the same way and to the same extent, they would be required to do by law, if such cars were owned and provided by the company. (§ 4.)

Railroad Police—Appointment and Powers.—By Chap. 346, laws of 1863 as amended, by Chap. 259, of the laws of 1866, it is provided that any railroad corporation on which road steam is used as the motive power, and any steamboat company may apply to the Governor to commission such person or persons as the said corporation may designate, to act as policeman for said corporation; but no more than one policemen shall be appointed at any one station of such company. (§ 1.)

The Governor, upon such application, may appoint such persons, or so many of them as he may deem proper to be such policemen, and shall issue to such person or persons so appointed, a commission to act as such policemen. (§ 2.)

Every policeman so appointed shall, before entering upon the duties of his office, take and subscribe the oath prescribed in the twelfth article of the constitution; such oath, with a copy of the commission, shall be filed with the Secretary of State, and a certificate thereof by said Secretary be filed with the clerk of each county through or into which the railroad or steamboat for which such policeman is appointed may run, and in which it is intended the said policeman shall act; and such policemen shall severally possess all the powers of policemen in the several towns, cities and villages in which they shall so be authorized to act as aforesaid. (§ 3.)

Such police shall, when on duty, severally wear a metallic shield, with the words "railway police," or "steamboat police," as the case may be, and the name of the corporation for which appointed inscribed thereon, and said shield shall always be worn in plain view, except when employed as detectives. (§ 4.)

Health of Cattle Transported in Cars.—No railroad company in the carrying and transportation of cattle, sheep or swine, shall confine the same in cars for a longer period than twenty-eight consecutive hours, unless delayed by storms or other accidental causes, without unloading for rest, water and feeding, for a period of at least ten consecutive hours. In estimating such confinement, the time the animals have been confined without such rest on connecting roads from which they are received shall be computed, it being the intention to prevent their continuous confinement beyond twenty-eight hours, except upon the contingencies stated. Nothing in this act shall require the unloading of cattle, sheep or swine from the cars of the Buffalo and State Line Railroad before their arrival at Buffalo, and the Atlantic and Great Western Railroad before they arrive at Salamanca. (Laws of 1866, Chap. 560, § 1.)

By the 2d section of this act, it is provided that if the owner or person in charge of said animals refuses or neglects to pay for the care and feed of animals so rested, the company may charge such expense to the owner or consignee, and retain a lien upon the animals until the same is paid; and it is further provided that no claim of damages for detention shall be recovered by the owner or shipper of any animals for the time they are so detained.

Penalty for Violation.—The 3d section provides that any railroad company, owner, consignee or person in charge of said cattle who shall violate any provision of this act, shall for each and every violation, be liable for a penalty of $100, to be sued for and collected by any person, in the name of the people, one-half of the penalty when col-

lected to belong to the informer, and the balance to be paid to the State Treasurer.

Town Subscriptions to Railroad Companies.—Chapter 696 of the laws of 1866, provide that the original written consent of the tax payers to the loaning of money on the credit of the town or city to aid in the construction of any railroad, shall be duly recorded and filed in the clerk's office of the county in which such towns or cities may be situated, and a certified copy filed in the county where the property affected thereby is situated.

Railroad Operated by Cable attached to Stationary Power.—By chapter 697 of the laws of 1866, provision is made for the formation by ten or more persons of a company for constructing, maintaining and operating a railway for public use in the conveyance of persons and property by means of a propelling rope or cable attached to stationary power, on their complying with the provisions of the general railroad act of 1850. Sections 2 and 3 of the act direct the name by which the company may be designated, and the fare allowed to be charged (not exceeding five cents per mile.) Section 4 permits the construction and operation of a road in other States, where the laws of such State do not conflict. Section 5 provides for the extension of the life of such companies upon certain conditions precedent.

Prohibition of Free Passes on Railroads.—Every railroad company in this State is hereby prohibited from issuing free passes over its respective road or roads, or carrying persons or property free of charge over its road or roads, except such persons as may be injured upon its road or roads, and excepting such persons as may be employed by such railroad companies, as clerks, laborers, officers or attorneys, and excepting also sick and disabled soldiers. (Laws of 1866, Chapter 798, § 1.)

The penalty for a violation of this act shall be fifty dollars for each offence, to be sued for and recovered in the county where the offence shall be committed, by the district attorney thereof, in the name of the people of this State, and when collected shall be paid into the Treasury of the State. (§ 2.)

Annealed Car Wheels.

The Union Car Wheel Company, with works at Jersey City and Harlem, under the Superintendence of H. W. Moore, Esq., the original founder of the Union Car Wheel Works at Jersey City, have inaugurated a more perfect method of annealing car wheels than any to which our attention has been called. Their wheels ought certainly to prove to be the very perfection of a car wheel.

The two chief requisites in a good wheel are attained viz: the *deep chill* on the tread and the *tough plate*—for whatever may be said in favor of any particular make of iron for car wheels, certainly any iron is tougher for being made malleable, and any car wheel is stronger in proportion as its web is made homogeneous and free from the strain of shrinking.

The principle on which this concern make their wheels is claimed to be this; to make a high mixture of the best charcoal irons, so high a mixture as to impart a deep chill averaging half an inch in depth. The plate or web and spokes of the wheel are thus cast so hard that the wheel would be too hard to bore out. It is at red heat, however annealed raised to a white heat and treated much as iron is treated to make it malleable. This produces a soft tough plate capable of resisting great concussion, the tread during the process being so protected that the chill is not annealed. Three days are required to anneal the wheel.

The result is that a wheel weighing 400 lbs., will stand thrice as much pounding as one of 500 lbs., cast and cooled in the usual way in sand or with a fire to prolong its cooling. We can see no reason why *a decarbonized casting* is not the thing for car wheels, and we believe that the time will come when Railway Managers will require all the wheels they use to be annealed by decarbonization as is done at the Jersey City and Harlem Wheel Shops by Mr. Moore.

Mr. Moore has annealed a wheel so thoroughly as to take a piece of the plate and draw it out in a forge.

A deep chilled tread and a plate approximating wrought iron cast in one piece from the best irons must prove in the long run the safest and most desirable thing in this line of which we have any knowledge.

We hear that Engine Wheels weighing 400 lbs., from the U. C. W. Works, have been running since spring on a passenger train without a failure or the first sign of wear. This reduction in weight is very desirable as saving power in hauling, the saving to a train of 40 freight cars being over 30,000 pounds dead weight. This saving in wear and tear and in power would of itself prove an economy so considerable as to pay for the wheel in its ordinary life time.

The Union Car W. Co., are the sole proprietors of this valuable process. A visit to their works near the ferry at Jersey City, to see specimens of their work would convince any practical railroad officer of the truth of our statements in regard to the annealed wheels.

Specimens may also be seen at the office of the President of the Company, H. C. Luce, Esq., 117 Broadway, N. Y. *

Lake Superior Iron.

A recent article in the *Scientific American* professes to find the cause of the frequent breaking of the shafts and cranks of ocean steamers in the fact that they are generally made of scrap iron. It says: "From the examination we have given this subject, we are of the opinion that the only reliable and safe course for our forge-masters to pursue, is to make their forgings of one kind of iron. Let them test the various brands of foreign and American irons, and use only the strongest and most tenacious that can be procured; and we feel confident that we shall hear no more of broken steamer shafts, endangering a loss of life and property." A Western exchange, in noticing this article claims for the Lake Superior iron the superiority over all other brands in strength and tenacity. The editor has seen an inch square bar of Lake Superior iron bent double and hammered down at the bend, when perfectly cold, without even presenting a fibrous or abraded appearance, but drawing perfectly smooth and as bright as polished tin over the curve. He has also seen an inch-and-a-half round bar, having a sold head forged on each end, drawn out by tractile force like a stick of soft wax, until it was about one inch in diameter in the centre, without a sign of parting, or the tearing of any fibres, or the appearance known as 'brooming;' but the portion drawn out remained smooth and became as bright as a mirror." The common impression that this iron is too soft for use as shafting, we are assured, is quite unfounded. Though tenacious and ductile it is not extremely flexible, and can be tempered to a great rigidity. The subject is certainly worth the attention of forge-masters, and scientific men generally will be interested in its discussion.

Erie Railway.

The earnings of the Erie Railway and Buffalo Division for the month of Nov., 1866, were:

Erie Railway.....	$1,330,448 73	
Buffalo Division....	86,878 79	—$1,417,327 52
Nov., 1865—		
Erie Railway.....	$1,522,471 55	
Buffalo Division....	115,121 00	— 1,637,592 55
Decrease on Erie Railway and Buffalo Division.....		$220,265 03

The earnings of the Erie Railway (including the Buffalo Division) for the first eleven months of the fiscal years 1865 and 1866, have been as follows:

	1865.	1866.	
January...	$1,070,890	$1,187,188	Inc. $116,298
February..	1,011,735	983,855	Dec. 27,880
March	1,331,124	1,070,434	Dec. 260,690
April	1,538,313	1,153,295	Dec. 385,018
May.....	1,425,120	1,101,668	Dec. 323,452
June	1,252,370	1,243,143	Dec. 9,227
July.....	1,274,568	1,203,462	Dec. 71,095
August ...	1,418,742	1,290,330	Dec. 128,412
September.	1,485,285	1,411,347	Dec. 23,938
October...	1,580,317	1,480,251	Dec. 100,006
November.	1,637,592	1,417,327	Dec. 220,265
Total decrease			$1,433,685

The earnings of October and November, 1866, do not include those of the Canandaigua Branch, as it is not now operated by the Erie Railway Company. In comparing the relative earnings, therefore, those of the Branch for October and November, 1866, should be added. This of course we cannot do unless they are supplied to us; and, indeed, no separate statement of them has ever been made public. The earnings of the Buffalo Division in October, 1865, were $141,701. In October, 1866, even these were not published separately, less the comparison should be unfavorable.

☞ The earnings of the Spruce and Pine streets Passenger Railway, Philadelphia, for the year ending October 31, 1866, were $101,986 39, from which was absorbed in expenses $63,495 42, leaving a net income of $38,490 97, against gross receipts last year of $84,900 80, and expenses $64,355 99, leaving a net income of $20,544 81, showing a net gain this year over that of last year of $17,946.

☞ The Grand Trunk Railway Company of Canada have contracted with Mr. Hodges for a supply of peat for four years, one hundred tons per day for the first year, and three hundred tons per day for the remaining three years.

☞ The newly chartered Coos Railroad Company contemplates the immediate construction of a line from Littleton *via* Lancaster to the Grand Trunk at Northumberland.

☞ Hon. D. Waldo Lincoln, of Worcester, has been elected Vice President of the Boston and Worcester Railroad Company.

Ohio—Property and Taxation.

The following is an official statement of the valuation and taxation of Ohio for the year 1866:

The number of acres of land assessed for taxation is 25,403,301, the valuation of which is	$498,771,034
The value of real estate in cities, towns and villages is	164,876,508
The value of chattel property is	442,561,379
Total valuation of 1866	$1,106,208,921

This is an increase over 1865, of $36,603,066, of which the sum of $175,072 was in real estate not in cities and villages; $2,914,491 in real estate in cities, towns and villages, and $33,513,503 in chattel property.

On the duplicate of 1866 taxes have been levied as follows:

For sinking fund, for payment of principal and interest of the Public Debt	$1,325,439 75
For general revenue—support of the State Government	1,104,535 46
For common school fund	1,437,192 02
Total	$3,867,167 23
The County and local taxes amount to	12,640,699 90
Thus making the total State and local taxes for 1866	$16,507,867 13

The sum shows that notwithstanding the large increase in the base of taxation, the aggregate for all purposes are $4,038,370 55 less than they were last year. The decrease is thus divided:

State taxes	$1,796,200 20
Local taxes	2,242,170 35
Total	$4,038,370 55

The aggregate assessments for school purposes this year amount to $4,493,844 50, of which the sum of $3,056,652 48 is by local taxation, and $1,437,192 02 by State levy.

Interest and Dividends.

The Philadelphia and Reading Railroad Company have declared a dividend of five per cent. on the preferred and common stock, clear of National and State taxes, payable in cash or common stock at par, at the option of the holder, on and after the 31st inst., at the office of the company in Philadelphia. The option as to taking stock for this dividend will cease at the close of business hours on Saturday, 30th March next.

The Michigan Central Railroad Company have declared a dividend of Five Dollars per share, free of Government tax, payable January 1, 1867, at the usual places in Boston, Detroit and New York.

The Dry Dock, East Broadway and Battery Railroad Company will pay, January 2, a dividend of 5 per cent., free of tax, at the National Broadway Bank.

The Augusta and Savannah Railroad Company have declared a dividend of $3.33⅓ per share, payable on demand at the Central Railroad Bank, in Savannah.

The Central (Ga.) Railroad Company has declared a dividend of $5 per share for the six months ending 30th ult.

The Boston and Worcester Railroad Company have declared a dividend of five per cent., free of Government tax, payable Jan. 1, 1867.

The Western Union Telegraph Company will pay, January 21st, a semi-annual dividend of 2 per cent. on capital.

The New York and Harlem Railroad Company have declared a dividend of four per cent. on the common and preferred stock, less the Government tax, payable January 2, 1867.

The Boston and Providence Railroad Company has declared a dividend of 5 per cent., payable Jan. 1.

The Ohio Canal stock, reimbursable at the pleasure of the State after Dec. 31, 1860, will be paid at the Ohio State Agency, No. 25 William street New York, on the first day of January, 1867, at which time interest on the same will cease.

The semi-annual interest due May 1, 1866, on the first mortgage bonds of the La Crosse and Milwaukee Railroad, and that due September 1, 1866, on the bonds issued by the City of Milwaukee to aid in the construction of said railroad, will be paid on presentation of the coupons at the office of the Milwaukee and Minnesota Railroad Company at the City of Milwaukee.

The interest on the public debt of the State of Illinois, maturing on the first Monday and January, 1867, will be paid at the Ocean National Bank of the City of New York, on the 7th to the 22d (inclusive) of January, 1867.

To Prevent Street Cars Running off the Track.

Dr. B. M. Esterle, of San Francisco, whose invention for raising carriage wheels out of railroad tracks, enabling them to cross the tracks or turn around on them, etc., having met with success, has brought out another valuable invention. It is a simple plan for preventing cars running off the track of street railroads and protecting the track against breaking or other injury by heavy trucks passing over it. Unlike most inventions in that line, it is an improvement on the rail itself, not on the wheels or couplings of the cars. It consists of slips of iron straight on one side and rounded off to a point at each end on the other, bolted to the surface of the rail on the inner edge. These slips are so arranged that the wheels on the opposite side of the car touch them alternately, and do not bear on both sides at once. If the fore or hind wheels of a car are off the track, drawing the car forward or backing it will bring them on again immediately, and it is impossible to get the whole four wheels at once. In making new rails, the slips or projections mentioned could be made a part of the rail itself, the same as the flange now used. The invention would be of particular benefit at the abrupt curve at the corners of the streets, where the cars are constantly getting off. The flange of the car wheel passes between the slips on the inner edge of the rail, and the flange or upper part of the rail, on which the weight of the car now runs.

☞ The Easton and South Easton Passenger Railway Co., which was incorporated at the last session of the Pennsylvania legislature, has been organized by the election of a board of directors and officers. Sufficient stock has been subscribed, and it may be taken for granted that the road will be built.

☞ The Wyoming and Petrolia Branch of the Great Western Railway of Canada was opened for traffic on the 17th inst. Four trains daily connect with the Main Line.

☞ The European and Northern American Railway has been put under contract from Bangor to Winn, and the work of construction will commence immediately.

Union Pacific Railroad.

The ninth section of 35 miles of this road, commencing at the 270th, and terminating at the 305th mile station west from Omaha, having been completed, the Government Commissioners have been instructed by the Secretary of the Interior to repair to Omaha without delay to examine and report upon the section.

☞ Work on the Montgomery and Erie Railroad is progressing. The ties are being distributed preparatory to laying the rails on that portion between Goshen and Campbell Hall, the sub-grading of which is finished. Gangs of laborers are at work finishing the grading on the line between Campbell Hall and Montgomery. The station buildings at the latter place are in progress. The fencing is also rapidly progressing.

☞ The certificate of incorporation of the Storrs Township, New Richmond and Central Union Depot Junction Railroad Company, was filed in the office of the Secretary of State at Columbus, Ohio, on the 9th inst. The capital stock is $500,000, and the incorporators are L. S. Cotton, Martin Wright, S. Woodward, Larz Anderson, and J. W. G. Bailey.

☞ The certificate of incorporation of the New York, Pennsylvania and Ohio Railroad Company was filed in the office of the Secretary of State on the 4th inst. The termini of the road are to be at Cincinnati and Millersburg, Holmes county, Ohio. The capital stock is $5,000,000.

☞ The earnings of the Western Union Telegraph Co. from July 1, to October 31, 1866, were $2,291,494 19; and the expenditures, $1,400,301 77—leaving net earnings, $891,192 42. The expenditures for construction during the same time were $812,899 19.

☞ The St. Paul *Press* says that an apparently well founded rumor is in circulation to the effect that the Chicago and Northwestern Railway Co. is in treaty for the purchase of the rights and franchises of the Winona and St. Peter Railroad.

☞ Iron laying has been commenced on the Grand River Valley (Mich.) Railroad. The bridge across the Grand river at Jackson has also been completed, and this important link in Michigan railroad communication is stated to be progressing rapidly.

☞ Engineers are now engaged in locating the route for a railroad from Honesdale, Pa., to Hawley, where it will connect with Hawley Branch of the Erie railway. It is said that the requisite amount of stock has been subscribed.

☞ Arrangements have been made between the Syracuse and Oswego Railroad and the Syracuse and Binghamton Railroad, by which the wide gauge track will be continued to Oswego.

☞ The railroad from Greenfield, Mass., to Shelburne Falls, 13 miles, is being rapidly constructed. It is to be completed by July 4, 1867.

☞ The Legislature of Georgia have passed the bill to aid the Savannah, Griffin and North Alabama Railroad.

☞ Wm. H. Parker, Esq., of Concord, N. H., has been appointed General Superintendent of the Boston, Hartford and Erie Railroad.

American Railroad Journal.

New York, Saturday, December 29, 1866.

San Francisco Central Pacific Railroad.

We have received from W. S. Watson, Esq., Chief Engineer, a pamphlet copy of his report on the survey and location of this road from Washington, on the Sacramento River, opposite Sacramento, to Benicia; to which is added an estimate of the cost of construction and equipment, and of the revenue, expenditures, etc., when completed.

As previously stated by us, this company was organized on the 29th of September last, by the election of a Board of Directors with Lansing B. Mizner, Esq., as President; Thos. A. Brown, Vice President; Jabez Hatch, Treasurer; S. C. Gray, Secretary; and W. S. Watson, Chief Engineer.

The city of Benicia is situated on the straits of Carquinez, 28 miles from San Francisco, at the outlet of Suisun Bay, the most eastwardly of the bays forming the harbor of San Francisco. The harbor capacity of the city front of Benicia is unsurpassed on any part of the Bay of San Francisco. The city of Sacramento is about 90 miles, by the course of the river, from Benicia, and 120 miles from San Francisco. An air line from San Francisco to Sacramento passes two miles to the south of Benicia. An air line from Benicia to Sacramento is 50½ miles; and the proposed road, if built as now projected, will not exceed 54½ miles, and can be reduced to 52 miles. The whole distance from Sacramento to San Francisco will then be but 80 miles, which will be a reduction to 66 per cent. of a distance of 120 miles of river travel. The distance from Sacramento to San Francisco by an air line is 75 miles. The connection with San Francisco is to be made by steamboat—the distance being 28 miles, entirely in the Bay of San Francisco.

The result of the survey was the finding of a highly favorable line for the construction of a first class railroad, having all the elements capable of the most successful operation.

This road will connect two of the most important cities on the Pacific coast. It is located on the only great thoroughfare in the State, and is intended to supply a great public want, daily becoming more a necessity, the importance of which has been admitted for years. Its construction has occupied the attention of capitalists, engineers and business men since 1852. All have admitted its feasibility; while the necessity of a reliable outlet from the interior valley of the State at Sacramento, to deep water navigation is universally admitted. This interior valley is formed by the two great rivers, the Sacramento and the San Joaquin and their tributaries. The former, coming from the North, drains all that part north of Sacramento city. The latter coming from the south, drains all that part of the State north of Tejon Pass. This valley comprises an area of 30,000 square miles. These streams, which since the settlement of the country have constituted the highways over which nine-tenths of all the business of California has been done, are extremely difficult of navigation, even in the best stage of the water; and from the sinuosity of their course, the distance from San Francisco to Sacramento, as has been shown, is increased from 75 miles, in an air line, to 120 miles by the river; and from San Francisco to Stockton, on the San Joaquin, from 67 miles, in an air line, to 125 miles by the traveled route. The business of the entire northern and middle counties of the State has hitherto been done through the channel of the Sacramento River. All travel and merchandize destined for these counties are shipped to Sacramento city, and above, to be there forwarded by teams to the mountains. It has been estimated that probably not less than four-fifths of all the gold products of the State during the past 17 years have been obtained in the counties mentioned; their return travel and freight have been through this channel; and along this route it is proposed to construct the San Francisco Central Pacific Railroad.

The only grade worth mentioning encountered on the line between Sacramento and Benicia, is at the crossing of the Montezuma Hills, being, for two miles, 10 feet per mile ascending, and, two miles, 20 feet per mile descending towards Fairfield. From the tables of alignment and grades which accompany the report, it appears that 51.74 miles are straight line; 0.79 mile with curves of two degrees and under, 2,865 feet radius; and 2.70 miles with curves of four degrees and under, 1,436 feet radius. There are of level line 35.55 miles; of grades of 5 feet and under, 5.66 miles; of 10 feet and under, 7.02 miles; of 20 feet and under, 5.49 miles; and of the maximum grade, 22 feet, 1.51 mile—or 93.75 per cent. of straight line, and 6.25 per cent. of curves, with a minimum radius of 1,436 feet. Of the whole line, 64.36 per cent. is level, and 35.64 per cent. with grades from 5 to 20 feet per mile. It is estimated that a first class freight engine of 32 tons will draw a load of 268 tons over the road at the rate of 22 miles per hour. The total elevation to be overcome going northwardly is 101 feet, and returning is 71 feet—total both ways 172 feet. It is confidently expected, that with a good track and properly managed road, the entire distance can, and will, be regularly run in one hour.

The entire amount of grading is estimated at 1,187,000 cubic yards of earth, and 60,000 cubic yards of rock. For two-thirds of the length of the road, the grading will be embankment, mostly "borrow," to be made from the excavations on both sides of the road. The banks will be generally 14 feet wide at grade line, and cuts 16 feet wide. American rails, 52 lbs. per yard, will be used, with wrought iron chairs, laid on red wood ties 6×8 and 8 feet long, at the rate of 2,400 per mile. Six locomotives, with passenger, baggage, freight, etc., cars will be required, together with running gears, stationary machinery, etc. Depots, station buildings, and wharfing and docks at Benicia will also be necessary. The fencing and

ballasting will be deferred until the trains commence running. The latter is, however, not included in the estimate of cost.

The structures on the entire route will be "trestle bents," except at the Sacramento River and at Cordelia Creek, amounting to about 6,000 feet of trestle work, of from 6 to 12 feet heighth of posts. The bridge at Sacramento, which will not be commenced until after the completion of the road, will be 800 feet in length, with a draw of sufficient opening to accommodate the river travel. It will rest on crib pile foundations about 60 feet apart, with centre pier for the draw, the estimated cost of which will be $67,500.

The total cost of the road is put down at $1,580,550, or $28,800 per mile, viz:

Graduation	$401,750
Structures	132,300
Superstruction	539,600
Equipment	173,900
Buildings	88,000
Fences	40,000
Engineering expenses	50,000
Right of way and law expenses	15,000
Add 10 per cent. for contingencies	140,000
Total	$1,580,550

Two steamboats will also be required to make the connection with San Francisco, which if supplied by the company, will cost $440,000—making the total cost of road and boats, $2,020,550.

To provide the funds necessary for this work, it is proposed to have subscribed to the stock of company $1,000,000, and to make and negotiate a first mortgage bond for $1,500,000, from which it is presumed $1,165,000 could be calculated on, still leaving in the hands of the company $1,000,000 of stock, to be used as circumstances may dictate.

The total receipts are estimated at $1,619,650, and the expenses, including taxes, insurance, and interest on bonds, $729,432—leaving a net income of $883,968, or 44.19 per cent., on an investment of $2,000,000.

This road, when completed, will connect at Sacramento with the Central Pacific of California, which has its present terminus at that city, and which will be the great thoroughfare which is to connect the Atlantic and Pacific Oceans. It is almost certain that the Central Pacific will reach Salt Lake in 1870, and that the eastern links of that road will reach the same point at or about the same time. When this is accomplished, the transportation of 1,000 passengers and 2,500 tons of freight per day is thought to be a low estimate of the amount of business this road will be required to perform, which at the legal rates of transportation in that State, viz: 10 cents per passenger and 15 cents per ton of freight per mile, will amount to a daily income of $26,000, or an aggregate for the year of nearly ten millions of dollars.

New York and Oswego Midland Railroad.

About a year ago a company was organized for the construction of a railroad from Oswego to Jersey City, running by way of Syracuse through Madison, Chenango, Otsego, Delaware and Sullivan Counties, to the New Jersey State line. We learn from the Albany *Argus* that the directors have been actively engaged in pushing forward the project, and claim that the prospect for the ultimate construction of the road is now flattering. The main reliance of the friends of the route is in securing town subscriptions or the pledge of town bonds.

Georgia Railroad and Banking Company.

We have received the report of this company for the fiscal year ending March 31, 1866. During the first part of the year, April 1 to May 15, the receipts were in Confederate currency and amounted to $414,948 59; the expenses during the same time were $450,120 50—an excess of expenses over receipts of $35,171 91. It was not until the 15th of May that the company could collect in funds that could be made at all available afterwards, so that, so far as practical results are concerned, the past railroad year may be said to have commenced on the 15th of May and terminated on the 31st of March. During this latter period the receipts were:

From passengers		$362,543 13
" freight		761,974 37
" U. S. for transportation		30,875 42
		$1,155,397 92
Expenses, viz.:		
Conducting transp	$116,466 48	
Motive power	219,355 99	
Maintenance of way	156,122 92	
" cars	66,151 66	
New railroad iron	20,000 00	
Incidental to laying 4½ miles new track on main line and 1¼ on Athens branch	15,904 66	
Rebuilding depot buildings & machine shops, burned	14,296 45	
Government tax paid	20,530 79	
Rebuilding cars	11,650 00	
		640,478 95
Leaving as net profit		$514,918 97

The amount paid for entire new work, taxes, etc., which is included in the above, amounted to $85,688 90.

The track and rolling stock was greatly damaged during the war, and at its close the road was found, like nearly all others in the South, without material for track or shops, which explains the heavy payments made for motive power and maintenance of way and cars; for while these have increased considerably, the expenses of conducting transportation is $18,790 27 less than for the year closing April 1, 1861, the last preceding the war.

At the date of the report of the superintendent, April 30th, 400 tons of new rails had been purchased and laid down on the Main Line, and 100 tons on the Athens branch. In addition to which 217 tons were on the way from New York. The new iron is laid down continuously from Atlanta, the old rails being reserved for repairing. The useless rails are exchanged for new iron. This plan it is proposed to continue. With a few hundred tons more of new iron, the company can keep up the renewal and repairs satisfactorily. He estimates the cost of new iron for the current year at $120,000, and about half that amount yearly hereafter until the track is brought to first rate condition.

The company had 55 locomotives, about half of which were in running order, 3 had been condemned, 3 sold, and the remainder were undergoing repairs. The number of freight, stock, coal, etc., cars is 378. The president in his report says:

After the losses and disasters during the war, it is of some importance to the Stockholders to know the present state of their affairs and the probable value of their property. By reference to former statements, we find charged to profit and loss, since the 11th of May, 1865:

For Confederate notes and bonds	$1,117,471 58
Bonds and treasury notes of the State of Georgia	345,587 60
Negroes emancipated and other items specified	95,214 24
Total	$1,558,273 42
Add freight account due by late Confederate Government	674,245 29
Aggregate loss in money and credits	$2,232,522 71
To which may be added:	
300 cars lost or destroyed, at an average of $500	$150,000 00
Buildings at Atlanta	50,000 00
Depots on the line destroyed	20,000 00
Eighty miles of road torn up, including destruction of bridges, average damage per mile $3,500	280,000 00
Loss by the war and its incidents	$2,732,522 71

As this estimated damage to property will gradually be restored from income, and charged to expenses, it is not expected to give any inconvenience or be very seriously felt by the company.

After these multiplied losses and disasters, it will be pleasing to learn that the stock is still whole, and with a very handsome surplus. From the statement of the Cashier, it appears that there was still on the 31st March last, a credit to profit and loss account of $1,186,784 29. Credits have been so shaken and unsettled that it is not easy to make reliable estimates of the true value of some of our assets. The account has been very carefully scrutinized, however, and it is believed that the following estimate may be relied on as sufficiently safe for all practical purposes:

ASSETS.

Real estate, stocks, Bonds, notes, cash, &c	$1,912,247 00
Liabilities of all kinds—say bonds, deposits, circulation, &c	777,804 00
Surplus	$1,134,443 00

The item "Notes of various banks,"* is believed to be the only item in our assets subject to much uncertainty. This was originally provided as "specie funds" to meet current liabilities, but is now of uncertain value and its precise value cannot now be estimated.

This result, in the face of so many losses, is owing to the large available surplus we held at the commencement of the war, and profits made and appropriated since the peace, which have enabled us to make head against such heavy inroads upon our resources.

The following is an adjusted statement of the condition of the Georgia Railroad and Banking Company, on the 31st of March, 1866, after charging to profit and loss its valueless accounts:

Road and outfit		$4,156,000 00
Real estate		186,958 66
Banking House and lot		35,000 00
E. W. Cole, Gen'l Supt.		8,429 50
Stock of other corporations		1,051,670 00
Bonds " "		170,500 00
Discounted notes		33,253 54
Assessment on stock unsettled		262 50
National Bank of Republic		285 81
Certificates of city council of Augusta		153 00
Notes of various banks		353,789 50
National currency	$89,482 81	
Notes of Central R. R. & B. Co.	4,419 00	
Due bills at call	28,436 00	
Specie	58,104 42	
		175,442 23
		$6,121,744 74

*It is believed that the depreciation of some of our stocks will be balanced by premiums on others.

Capital stock	$4,156,000 00
Profit and loss	1,184,034 99
Bonds of this company	290,500 00
Dividends unpaid	11,250 99
Collection account	6,903 76
Due other corporations, agents, etc.	22,501 65
Deposits	5,643 76
U. S. income tax retained	1,598 86
Circulation	443,310 73
	$6,121,744 74

President.—JOHN P. KING.
Superintendent.—E. W. COLE.
Treasurer.—J. MILLIGAN.

Peat for Fuel.

We have given, in previous issues of the JOURNAL, the results of several carefully-made experiments by the Grand Trunk Railway Company of Canada with Hodges' Patent Prepared Peat, for the purpose of testing its officiency as an article for fuel; the locomotives having been specially adapted by Mr. Hodges for that purpose. These experiments in every instance proved highly satisfactory; and we now learn that the company has given to Mr. Hodges a contract extending over five years, or seasons, during the first of which it will take 100 tons of his prepared peat a day, and during the four succeeding years 300 tons daily. The saving which will be effected by the cheapness of the peat as compared with wood, it is believed will be very great. The following is an extract from a paper recently prepared by Mr. Hodges' giving his views, etc., on the nature and properties of peat:

Peat is a sponge-like substance, composed of aquatic plants, mosses, sedges, grasses, and a variety of shrubs and low trees, with the roots, leaves and branches in a state of decomposition, exactly in the same place and position in which they have grown and accumulated for many ages, in some instances to a depth of thirty or forty feet.

It is entirely a vegetable compound, containing no other extraneous matter, than that washed in amongst it by floods and rains, from the surrounding lands.

In Ireland, where the atmosphere is at all seasons very much charged with moisture, Peat grows or forms on the sides of hills or mountains, and is called black or mountain Peat. When cut out and dried, this Peat becomes very hard, and, without any manufacture whatever, makes an excellent fuel. On the continent of America the climate is much drier, and aquatic plants can thrive and accumulate only in situations where, during the dry seasons, there is abundance of water. It therefore follows that no abundance of Peat is to be found on this continent.

The fibrous or red Peat is the only description found, and this grows abundantly in all shallow ponds, lakes or basins, where there is no outlet for the water. Occasionally, it accumulates on the margins of sluggish rivers, and, by its growth, dams up the water, rendering the localities more favorable for its production. In such places, however, it is more likely to contain impurities deposited by flood waters, and is therefore not so fit for fuel as that formed in the situations before mentioned.

When cut out from the bog and dried, red Peat is very light, losing only about forty per cent of its bulk by skrinkage, while, by evaporation, it parts with from eighty to ninety per cent of its weight. As dug from an undrained bog, Peat contains very little solid matter, and, to manufacture one ton of fuel, it is always necessary to dig from eight to nine tons of Peat.

Getting rid of this immense quantity of water is one of the chief difficulties in the manufacture of Peat fuel. A great variety of mechanical or artificial means has been resorted to from time immemorial to accomplish the purpose; all, however, have been abandoned on account principally of the cost.

But even supposing all the water could be driven out of it by artificial means, red Peat, without first being pulped, will not make good fuel; it would still retain its sponge-like character, have a great tendency to expand, readily absorb moisture, and would not stand the blast.

Something more, therefore, than getting rid of the moisture is necessary, and it is generally acknowledged by most competent and experienced authorities, that the fibre or tube-like character of the innumerable rootlets, of which Peat is principally composed, must be entirely destroyed, and that too before it has been subjected to the action of the atmosphere, or dried to any considerable extent. When this is properly performed, and the homogenous mass of pulp is left to dry simply by natural evaporation, it becomes not only dense and hard in proportion to the quality of the bog from whence it is obtained, but a fuel is the result; of the purest character, which will bear the blast as well as the hardest and best burnt coke.

Peat fuel, even with the limited experiments as to the best mode of using it economically, has proved itself equal if not superior to any known fuel, and it is no more than reasonable to anticipate greater results when its use becomes general, and furnaces are expressly adapted to its use.

As locomotives are now constructed for the combustion of wood, coal or coke, the waste of steam power to create a blast or draft is enormous, it being estimated by competent authority that two-fifths of the whole quantity of fuel consumed is expended for that purpose. Now, well dried Peat requires but very little draft through the furnace bars, it being necessary for a perfect combustion of the immense quantity of gas that it gives out, to admit air through the furnace door. It is therefore much more than probable, that by altering the blast to meet the limited requirements of Peat fuel, at least twenty per cent. additional power will be given to all Peat-burning engines, or a corresponding decrease in the quantity of fuel used may be effected.

No sparks issue from the smoke stack of a locomotive when burning Peat fuel, even with the present enormous blast, and when they are especially adapted for it, fires from sparks will be unknown.

Peat fuel, when well manufactured and dried, does not readily absorb moisture, even though exposed in wet situations for days.

A piece of Peat fuel, containing twenty per cent. of moisture, was put into a pail of water, weighing at the time of immersion ..... 72½ ozs.
At the end of one hour it weighed ..... 74½ "
" two hours " ..... 75 "

Quantity of water absorbed in 2 hours .. 2½ "
being scarcely 3½ per cent.

A piece of Peat fuel, well dried, was put into a pail of water, and at the time of immersion weighed ..... 63 ozs.
At the end of one hour it weighed ..... 64½ "
" two hours " ..... 65½ "

Quantity of water absorbed during two hours of immersion ..... 2½ "
equal to about 4 per cent., or one-fifth of the amount that coke would have absorbed if exposed to a heavy shower of rain, or little more than would, under similar circumstances, be taken up by small coal.

It is established beyond question that for raising steam, smelting, puddling, converting of iron into steel, and for manufacturing purposes generally, well prepared Peat fuel is infinitely superior to any other fuel known; and the time has arrived when the immense deposits of this valuable article, which crosses the track of every railway on this continent, should be utilized, doing away with the necessity, in the Western States, of using for fuel the corn which should serve for food.

☞ The Manassas Gap R. R. will be completed to Piedmont in about four weeks.

Michigan Central Railroad.

The financial condition of this company on the 1st of December, 1866, is exhibited in the following report:

INCOME ACCOUNT.

By balance of income account, per Treasurer's Report, June 1, 1866	$460,802 67
Receipts of road from June 1, to December 1, 1866	2,310,903 27
	$2,771,705 94
To dividend paid July 1, 1866, 5 per cent. in cash	$349,135 00
U. S. Gov. tax on dividend	8,143 20
" " receipts	39,857 85
Annual payments towards sinking funds	84,500 00
Operating account, exclusive of interest and exchange, from June 1 to December 1, 1866	1,509,210 10
Interest and exchange accounts from June 1 to December 1, 1866	293,540 12
Balance to new account	487,319 67
	$2,771,705 94

The foregoing account shows the net receipts of the road for six months ending 1st inst., after deducing operating, interest, and exchange accounts, but excluding the amount paid to the sinking funds, to be $460,152 00. After deducting the amount paid to sinking funds, the balance is $375,652 00. Adding the balance to credit of this account, June 1st, $460,802 67 less the July dividend, $349,135 00, the amount to credit of income account is $487,319 67.

Although the earnings for the six months ending Nov. 30, 1866, are less than those of the corresponding period of 1865 by $166,174 96, they show an increase of $256,556 38 over those of the same period of 1864.

It is confidently expected that the third rail over the Great Western Railway of Canada will be completed, ready for operation, by the first of January, 1867; and it is anticipated that our freight business will thereby be considerably increased.

The new freight building was finished some time since, and is one of the finest structures of the kind in the country.

The sum invested in the sinking funds amounts to $984,004 29.

The Company is free from floating debt.

Suez Canal.

We learn, from the Malta *Times* that the works of the Suez Canal are being actively carried forward by M. de Lesseps, who at present, however, is not in Egypt. An average depth of seven to nine feet has been obtained between Port Said along the salt water canal, and the rest of the distance to Suez is traversed temporarily by a fresh water canal about seven feet deep, connected with the other by means of locks and powerful pumps. As far as 60 station the full width of the proposed ship canal has been excavated of 60 metres, but from that point to 75 station at Ismalia the width is incomplete. All that has been done has been done well, and reflects the highest credit on the science, skill, and persevering energy of the French engineers. The real difficulties of dredging in a constantly dissolving sand are now commencing. But well-informed persons entertain but little doubt that these and all others may be overcome by time and money. As to what amount of these important necessaries will be required to bring the great work to a successful completion it is scarcely possible at the esentpr stage to hazard a conjecture.

Pacific Railroads.

EXTRACTS FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

On the 6th of November, instant, the Union Pacific Railroad was completed to a point twenty-three miles west of the hundredth meridian of longitude, being 270 miles distant from Omaha. The want of a railroad connection from Omaha eastward has retarded the transportation of the iron and equipments of the road and compelled the company to rely upon shipments by the Missouri river, at such times as the state of the navigation permitted. The difficulty will be removed by the construction of the railway from Clinton to Council Bluffs, which, it is believed, will be completed next spring.

The company have constructed all their depot buildings at Omaha. The arrangement and extent of their grounds and permanent fixtures are on a scale adapted in our vast and increasing traffic between the western and eastern shores of the continent. The road has been built of such excellent materials, and in so substantial a manner, as to elicit repeated expressions of commendation from the government directors and commissioners. There can be no better evidence of the fidelity with which the company have met the requirements of Congress than the fact that the commissioners have in no instance, refused to accept any portion of the road presented to them for examination.

The company have not filed a map showing the permanent location of the road beyond a point three hundred miles west of Omaha. Surveying parties have been actively engaged in ascertaining the most direct and practicable route, taking Julesburg, on the South Platte, on the mouth of Lodge Pole creek, about three hundred and seventy-five miles west of Omaha, as a starting point, and have furnished a statement of the comparative distances, quantities and gradients of three lines—one *via* Cache la Poudre and Antelope pass, one *via* Camp Walbach and Crow creek, and the other *via* Lodge Pole creek, Camp Walbach and Cheyenne pass. It is expected that the definite location of this part of the road will not be long deferred.

The company report that in April, 1865, their engineer commenced an extended reconnoissance of the country east of Great Salt Lake, with a view to find a practicable route over the Wasatch mountains to Green river *via* Spanish Fork and the Uinta. After ascending the Spanish Fork to its headwaters he explored the whole district of country lying between the hundred and tenth and hundred and eleventh meridians of longitude, and between the parallels of forty degrees and forty degrees and thirty minutes of latitude. The result of these examinations satisfied him that such a route could not be found.

The survey of the line by the way of the valley of the Sweetwater, the south pass of the Rocky Mountains and the valley of Black's Fork of Green river, was then commenced. It established the important fact that the summits of all the passes of which surveys had been made in the great ranges of those mountains have very nearly the same altitude above tide-water. Further examinations were made by the company's engineer in that region, the details of which have not been furnished to the department.

One of the most important of this company's surveys extends from the Great Salt Lake west to the Humboldt valley, between the hundred and fifteenth and the hundred and sixteenth meridian of longitude, traversing the great American desert. Although incomplete, it has resulted in the discovery of a line, with grades not exceeding sixty feet per mile, from Great Salt Lake City to the valley of the Humboldt, across the Humboldt range of mountains, a distance of two hundred and eight miles. For about one hundred and fifty miles across the desert no fresh water was found by the engineer. He is satisfied, however, from his examinations, that it can be obtained in the passes over Cedar mountain on the eastern side of the desert, and the first range west of the desert, leaving only sixty miles without fresh water. The soil is admirably adapted to a fine hard road-bed. The results of the survey are satisfactory to the company, and show that the difficulties to be overcome are much less formidable than were anticipated.

The company report that the amount actually expended on the road in money is $9,690,082 01. Of this amount $3,113,221 25 have been derived from the sale of $3,280,000 of government bonds, $3,901,357 01 from loans, and $2,508,725 from stock subscriptions. This amount does not embrace the indebtedness to the contractors for the first two hundred and forty-six miles of road, extending from Omaha to the one hundredth meridian. Their contract expired by the completion of this part of the line, and when the whole indebtedness of the company is adjusted, the entire expenditure, including a million of stock which the contractors agreed to take, will not fall short of $12,500,000. The amount of the company's loans is $3,668,213 95. To meet this debt it has $5,480,000 of its first mortgage bonds unsold, and $560,000 of government bonds.

The amount of bonds actually executed is $3,660,000. The company is entitled to issue the following amounts: First, for two hundred and forty miles of road accepted by the government, $3,840,000; second, for one hundred miles in advance, $1,600,000, making a total of $5,440,000.

None of these bonds have been offered for sale. They are made by the act of Congress a lien prior to that of the government, and it was deemed advisable to wait, before negotiating them, until the work had made such progress as to give to the public the assurance that its successful completion was no longer a matter of doubt. They have therefore been used to a limited amount as a basis for temporary loans.

The rolling stock on the road consists of twenty-one locomotives, one hundred and fifty-six flat, forty-six box, thirty-five hand and five passenger cars.

The Union Pacific Railway Company (eastern division), have constructed their road to Fort Riley, one hundred and thirty-five miles west of the Missouri river, of which one hundred and thirty have been accepted by the government, thus giving a continuous line of railroad and telegraph four hundred and eighteen miles west of St. Louis.

They have also constructed a branch road, thirty miles in length, from Lawrence to Leavenworth, which affords them another line of communication to the Missouri river.

The company report that the present equipment of the road is as follows: Nine locomotives, ten first class passenger, three baggage and express, one hundred and one box, ninety-four flat and twenty-seven hand cars. They have also purchased eight locomotives, five passenger, fifty flat, twenty stock and four hand cars, have supplied the road with the requisite stations, depots and water tanks and commenced the construction of machine shops and round houses at Wyandotte and Lawrence. Iron, weighing fifty-six pounds to the linear yard, and sufficient to construct one hundred and sixty additional miles of road, with sidings, has been purchased and will be delivered monthly until next April. Contracts have been made to complete the road two hundred and fifty miles beyond Fort Riley by the 31st day of December, 1867.

The passenger and freight traffic of the road is already considerable and gives promise of great increase in the future. The gross receipts of one hundred and five miles of main line and thirty miles of branch road for the month of September were $42,000.

The commissioners, under date of September 28, report that they have examined, and they recommend the acceptance of an additional section of the road of the Central Pacific Railroad Company of California, making a distance of seventy-four miles from Sacramento. The company report, under date of the 13th ultimo., that they have constructed an additional section of twenty miles, reaching at the terminus an elevation of about sixty-one hundred feet above tide water at Sacramento. A force of ten thousand men is now engaged in grading the next two sections, the ties are redwood, equal to cedar in durability, and number about twenty-five hundred to the mile, and the culverts are constructed of granite, or other hard stone, except in the valley, where hard burnt brick is substituted, as stone could not be procured. The bridges are made of the best quality of red fir. The drainage is ample, and the road well ballasted with gravel and broken rock. The grades are necessarily high. The maximum authorized by law has been reached for a distance of three and one-half miles. There is no difficulty in operating these portions of the road. The passenger trains make twenty-five and the freight trains twelve miles per hour.

There are on the road or in transitu 30 locomotives and 671 cars. The company have in Sacramento the machinery for a large machine and repair shop, including a powerful horizontal engine for furnishing the driving power. The shop is in process of erection, and the company expect soon to be able to build locomotives and cars equal to those furnished in the Eastern States. The tunnels have been constructed sufficiently wide to accommodate double tracks. A full force is at present employed in constructing a tunnel 1,600 feet in length at the summit of the Sierra Nevada, and one of 900 feet in length seven miles east of that point.

Examinations and surveys indicate the valley of the Humboldt as the most advantageous route through the State of Nevada.

The company expect to reach during the next year the Big Bend of the Truck river, to which point the road has been permanently located, a distance of 195 miles from Sacramento. They allege that their expenditure exceeds $12,000,000, and they entertain no doubt that the road will be completed to Salt Lake City during the year 1870.

The Atchison and Pike's Peak Railroad Company have completed forty miles of their road west from Atchison. The company report that they have on hand six locomotives, two passenger, one baggage and express, fourteen box, and thirty-two flat cars, three tanks and two turntables, &c., with a machine shop and a blacksmith shop complete, the former being built of stone masonry and covered with an iron roof, and they are now engaged in the erection of a round house. The road is generally built in a very substantial manner; nearly all the bridges and culverts are of the best quality of solid masonry. The longer span bridges are of the Howe truss pattern. The road bed for the next thirty miles is nearly ready for the superstructure. The ties, iron, chairs and spikes for the same are on hand or in transitu. The company report an expenditure, in the construction and equipment of the road, of $2,307,650. They confidently expect that sixty miles of road will be completed by the first of January next.

The Western Pacific Railroad Company filed on the 13th of last July their acceptance of the provisions and conditions of the resolution of Congress extending the time for the construction of the first section of twenty miles of their road, approved May 21, 1866. On the 2d instant this department received the report of the government commissioners, showing the completion and equipment of that section. It extends from San Jose, in the direction of Sacramento, to a point in Alameda county, a distance of twenty miles.

The report of the President of Sioux City and Pacific Railroad Company, under date of the 16th instant, sets forth that renewed surveys by their engineers during the past season justify and confirm the opinion that the most direct and practicable route from Sioux City to a point which they have selected upon the Union Pacific Railroad from Omaha is on the east side of the Missouri river to a crossing near De Soto, thence *via* Fish Creek to the Platte Valley, and thence to the point of connection with the latter road at Fremont, forty-six and one half miles west from Omaha. It is also stated that the grading of the northern sixty-eight miles has been placed under contract and a force already engaged on the work. The company has arranged to construct about six

miles of road, which will connect its line very advantageously with the Cedar Rapids Railroad at a point where it is expected that the latter road will reach the Missouri river valley in a few days.

There is nothing on file in the Deparment to show that the company authorized to construct the Atlantic and Pacific Railroad by the act of Congress approved July 27, 1866, have accepted the provisions of the act.

The work on the wagon road from Niobrara to Virginia City has been continued, though with serious annoyance from hostile Indians. The route has been shortened nearly one hundred miles.

Operations on portions of the projected road from Sioux City to the mouth of the Big Cheyenne river have been prosecuted with great activity and success. That part between the initial point and Yankton, with the exception of the bridges, is finished and in perfect order. The bridge over the Big Sioux river is being built. If the construction of it does not absorb the appropriation now on hand, the remainder will be applied to the completion of the bridges over the Vermillion river and the James. Apprehended Indian difficulties have prevented the extension of the road from the mouth of the Big Cheyenne.

The superintendent of the road from Virginia City, Montana, to Lewiston, reports a considerable force is employed. The funds at his command will not, in his opinion, more than suffice to locate and clear out a trail ten or twelve feet wide from Lewiston to the valley of the Bitter Root. From thence roads are already open to Virginia City. He prefers the route by the Loo-Loo Fork, though it, in common with the others, is subject to obstruction from snow during one-half of the year.

Steam Power in Towing Vessels on Canals.

The following is from two very interesting papers read before the Institution of Civil Engineers, London, on the 13th of November:

The first paper read was on the "Results of the Employment of Steam Power in Towing Vessels on the Gloucester and Berkeley Canal," by Mr. W. B. Clegram, M. Inst. C. E. It was stated that this navigation was 16½ miles in length, and level from end to end. The width at the surface varied from 80 feet to 100 feet, with passing places from 150 feet to 200 feet wide, and at the bottom from 13 feet to 20 feet, while the depth of water was from 18 feet to 18 feet 6 inches. Seagoing vessels up to 700 tons register, and drawing 16 feet, could by it reach Gloucester. Prior to the year 1860, these vessels were towed by horses, at a cost of about one farthing per ton per mile, and at speeds varying from 1 mile to 3 miles an hour. At the date named, three steam tugs, fitted with high pressure engines and screw propellers, were purchased complete for the sum of £3,000, and were placed upon the canal to do this work. Two men and one boy were employed in each tug, and the consumption of coals in each was from 15 cwt. to 20 cwt. every twelve working hours. In the four years ending the 25th March, 1865, 1,059,137 tons register of shipping had been towed 16 miles, carrying 1,109,334 tons of goods, at a cost of £6,400, including 15 per cent. per annum on the price of the tugs, to cover interest of money, repairs, and renewals. Applying this outlay to the tonnage of the vessels towed, it gave 1.45 penny per ton for 16 miles, or .0906 (about one-eleventh) of a penny per ton per mile—being a saving of not far short of two-thirds as compared with the haulage by horses. In consequence of a larger and more regular trade in the six months ending the 25th September, 1865, the cost during that period did not exceed one thirteenth of a penny per ton per mile. Applied to the goods conveyed in the vessels in the four years, the result was .0865 of a penny per ton per mile. The vessels were towed either singly, or in a train, according to circumstances. Sometimes as many as nine, ten, and even thirteen laden vessels had been taken by one tug at the rate of from 3 miles to 3½ miles an hour. The heaviest load after any one tug had been 1,690 tons of goods, in three vessels, which were towed along the whole length of the canal at a speed of 2 miles an hour. For the smaller class of vessels, the speed, as a rule, was restricted to 4 miles an hour. The employment of steam as a towing power had been found in nearly every way advantageous. The work was greatly economised. The vessels rubbed much less against the sides of the banks, the towing power being right ahead, and not on one side, as with horses. The wear to the ropes used in tracking was reduced; and vessels could be moved along the canal in weather which would have prevented horses doing the work. The speed also was increased; and owing to this, there was now no deposit on the sides of the canal, which formerly took place, and was difficult to remove. At present the deposit was entirely at the bottom, whence it could readily be taken out by dredging. The only disadvantage of this system, in a canal the sides of which at the water's edge was unprotected, was the additional wear at that part, caused by the constant passage of the tugs, and by the "run" of the water between the sides of the larger vessels and the banks. This action upon the banks was confined to a space of about 18 inches only, one-half of which was below and the other half above the water line. On this canal, a band of good weatherstone pitching, 2 feet wide, had completely prevented the injury, presenting a face along which the water ran harmlessly. It cost about £180 per mile; but as a set-off to this expense, there was the diminished wear of the towing path by the horses, which was considerable.

The second paper read was "On the employment of steam power upon the Grand Canal, Ireland," by Mr. S. Healy. It was remarked that on this system of navigation, which was 160 miles in length, the locks were 60 feet long and 13 feet 6 inches wide; a depth of 5 feet 2 inches of water being maintained upon the cills, but the trading depth of the boats was limited to 4 feet 3 inches. The width of the canal varied from 60 feet to 80 feet, shallowing at each side, so as to admit of about 30 feet of navigable breadth in the centre. Upwards of 300,000 tons of goods are carried annually over this system, in and out of Dublin. It was observed that, steam power was applicable to canal navigation in either of two ways, and both had been attempted on the Grand Canal. First, by placing the machinery in the boats with the cargo; and secondly, by employing steam power merely for towing boats or barges in trains. Trials had also been made with both a single and a double screw, but the latter was deemed to be unsuitable for canal purposes. In the first effort to introduce steam power, a vessel was designed to carry cargo as well as the machinery; but her carrying capacity was found to be so reduced, as to render the speculation unremunerative. Within the last two years, however, a system of hauling boats in trains, by small but powerful steamers, had been successfully brought into use on a long level of the canal, 25½ miles. The screw which had been proved to be the best, had a width of blade at the circumference of 32 inches, cut away at the base to the extent that was consistent with strength; the pitch was an increasing one, varying from 5 feet 8 inches to 7 feet 9 inches. One of these steamers towed three laden boats, each carrying 40 tons of cargo, at the rate of 2½ miles an hour; the pressure on the boiler being 60 lbs. per square inch, the number of revolutions 75 to 80 per minute, and the consumption of fuel, which was one part coal to three parts of slack, being 112 lbs. per mile. The boats were 60 feet long, and 13 feet beam, drawing when laden 4 feet of water. On that portion of the canal upon which steam power had been applied, horses had now been entirely withdrawn, and two steamers regularly performed a daily service both ways. On the River Shannon, the steamers designed to carry their own cargo had to pass through locks, which limited their length to 72 feet and beam to 13 feet 3 inches. They carried 50 tons, with a draft of water of 4 feet 8 inches, and had been most successful.

In the course of the discussion it was observed that a fourth steam tug was now at work on the Gloucester and Berkeley Canal, and that in three weeks during the month of September last, four tugs had moved 35,280 tons 16 miles at a total cost of £145 8s., being not quite one-sixteenth of a penny per ton per mile. On the Forth and Clyde and the Monkland canals, in the year 1856, a lighter, capable of carrying 80 tons of cargo, was fitted with small high pressure engines, placed as close to the stern as possible, and a screw propeller. Having proved successful, engines were subsequently applied to a luggage boat carrying 35 tons, to one of the canal ice breakers, to masted lighters, for canal and coasting trade, carrying 120 tons, and to a mineral barge conveying 60 tons on the Monkland Canal, and 75 tons on the Forth and Clyde Canal. All of these had answered satisfactorily, and had been precursors of seventy steamers now at work on the Forth and Clyde navigation, and from the canal to the contiguous sea coasts. In reference to the screw tug boat, Birmingham, which had been employed, from 1855 to 1865, in hauling the barge traffic upon the summit level of the Regent's Canal—where the sectional area of the waterway traversed as compared with that of the vessels navigating the canal was about 4 to 1, except through the Maida Hill tunnel, for a length of 270 yards, where these proportions were 2 to 1—it was stated that the cost of working that vessel for the eight months ending 31st May, 1865, was £344 2s. The distance traversed was 3,519 miles, the number of barges hauled 2,023, the gross amount of cargo conveyed 59,738 tons, or with the weight of the barges 90,083 tons. The cost, including all charges, had been 1.96 shilling per train mile, 1.38 penny per ton of cargo, and .916 of a penny per ton gross weight. On the River Severn steam tugs had been used for ten years; but now the most efficient plan was considered to be, that by which small direct acting engines were fitted in a barge capable of taking 40 tons of cargo, and of towing one, two, or three canal boats after her, according to the strength of the stream against which they had to contend. On the Weaver navigation, a canalised river, partly river and partly canal, the employment of steam power had been so profitable, that all sailing vessels and hauling by horses were being rapidly abandoned, when dependence would be placed upon steam barges alone. A series of experiments had been made on the Ashby-de-la-Zouch canal, for the purpose of determining whether the application of steam power would be injurious to the canal, particularly to the banks, when it was found that no prejudicial action took place, so long as the speed was limited to 3 miles or 3½ miles an hour.

☞ We learn from the Frankfort *Commonwealth* that the Quartermaster General of Kentucky has been notified by the proper national authorities that $700,000 has been made subject to the draft of the State government of Kentucky. We also learn that within a few weeks between $1,000,000 and $2,000,000 will be placed to the credit of the State. The State Treasury is now in funds, and probably by the end of another month will contain between $4,000,000 and $5,000,000. The State debt is between $5,000,000 and $6,000,000.

American Railroad Journal.

Saturday, December 29, 1866.

Stock Exchange and Money Market.

The business of the week has been unusually restricted in all the leading lines of traffic. In the Gold Room, and at the Stock Boards, the dealings have all been against values, and buoyancy in the market, necessitating the employment of more than the average amount of capital to carry speculative investments over the dull period to the anticipated one of renewed activity and firmness. Hence, there has been a decided increase in the demand for call loans, the rates for which have advanced 6@7 per cent. on Government securities, and full 7 per cent. on the most unexceptionable of other stock collaterals. Discounts have exhibited but little animation. There has been some inquiry for strictly prime short date commercial paper at 6½@7 per cent., and for very good do., at 7@8 per cent. per annum. Other grades have been discriminated against very sharply, and have no quotable market value. There have been some additional remittances of currency, chiefly legal tender notes, to the South, but these have been more than compensated for by the receipts of legal tender and National bank notes from the West and Northwest, as shown by the last bank statement. There has been some accumulation of currency in the U. S. Sub-Treasury here, attributed, in part, to the marketing of Government gold, and gold bearing bonds, through private agencies, and to the detriment of the market values of the National funded obligations. It is not, however, reliably known that any such private negotiations on the Treasury account have taken place, and it is probable that if anything of the kind has occurred, its magnitude has been grossly exaggerated, to promote the interest of the *bear* element in financial circles. The last local bank statement was rather favorable than otherwise. It indicated a decrease of $196,816 in the items of loans, $757,283 in the specie reserve, and apparently of $4,428,194 in the deposits, with an increase of $822,653 in the legal tender reserve, and $635,774 in the circulation. The large apparent decrease in deposits is due mainly to the correction of an error of three millions made in the details and footings of the preceding week, one of the leading National Banks having returned its gross, instead of its net deposits, prior to the preparation of the statement for the week ending Dec. 15. The specie reserve of the banks is now $13,231,917, against $16,055,037 same time last year. The city bank deposits are now $202,029,877, against $298,484,370 week ending Oct. 6, 1866, and $183,021,870 week ending Dec. 23, 1865. Their legal tender reserve amounts to $64,816,962, against $53,891,620 same time last year. Their circulation now stands at $32,48[illegible]420, against $17,629,125 same time last year. The loans are now $258,255,514, against $279,135,790 eight weeks ago, and $228,572,034 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $97,917,464 a day, against a daily average of $9[illegible]139 the preceding week; and $107,885,977 the week ending with Dec. 9. The current week's exchanges average about $126,800,000 a day.

National Bank notes to the amount of $199,630, were issued last week, making the total issue to 1,663 banks thus far $300,431,000, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $2,123,432, leaving, with the existing 1,649 banks, an actual circulation at this date, of $298,307,569. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $343,256,650; and for the public deposits, $38,933,950—making a total of $382,190,600. The Treasury Department, last week, redeemed and destroyed $549,000 of worn and mutilated fractional currency, and issued $428,000 worth of new.

The U. S. Sub-Treasury receipts, week ending with Dec. 22, were $12,793,157, including $1,057,950 from customs duties; payments, $10,525,233; balance at the close of the week, $114,079,126, against $108,689,405 at the close of the preceding week. The business of the Office during the opening day of the current week, was as follows: Receipts, $5,562,365, and payments, $8,626,010. The balance at the close of business on Monday stood at $111,015,481, against $108,727,058 a week ago. Tuesday was observed as a close holiday. The cash balance in the U. S. Sub-Treasury at Boston, at the close of last week, was $13,002,960, including $10,700,364 in coin, an increase during the week, of $116,671.

Government revenue were extremely moderate, during the past week, which in general business, was, by all odds, the dullest of the season. Excises yielded, $2,936,214, against $4,500,000, the preceding week; customs at the port of New York, $1,057,950, and at the outports, about $350,000 (in coin) more, making the grand total income for the week equal to about $4,836,946 in currency, against disbursements of $2,780,000 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $163,000,000.

Gold has suffered a further severe depression since our last, from the operations of the *bears* in the Gold Room, who have added largely to their *short* contracts on a declining market, in anticipation of the coin interest disbursements (about ten millions, all told,) of the Government about Jan. 1, and of the probable compulsory marketing of a large part of the Treasury coin reserve, under impending legislstive authorization. The decline of the week has been within a fraction of six per cent., or from 137@137¼ on Wednesday of last week to 131½@131¾ on Wednesday of the current week. The closing rate on Wednesday last was 131⅞, on a very weak market. There is no demand of moment to sustain the premium. The customs and export calls are usually limited. The specie exports from the port amounted to only $262,921 last week, and $389,656 on Wednesday. Apart from the export demand, the main legitimate inquiry at present is from importers, for custom house purposes. This inquiry, however, continues on a very limited scale, as usual at this season of the year. The total imports of specie from Europe, and other ports since January 1, have been $9,579,390. The customs demand for Gold last week, averaged only $176,325 a day; thus far, this week, it has been equal to $226,877 a day, or equal to a weekly aggregate of $1,361,262. The arrivals of specie from Europe, Havana and other foreign ports, during the week, reached $26,685, and from California, $1,416,492. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $128,558,017, against $101,145,980 same time last year. The total receipts of California gold at this port since Jan. 1, have been $42,110,796, against $20,680,164 same time last year, showing an increase, in 1866, of $21,430,632. The exports of specie from this port, last week, were as stated above, $262,921, making the total outflow of specie from the port, since Jan. 1, $60,760,528, against $29,689,842 same time last year, $49,112,955 same time in 1864, and $69,305,165 same time in 1859. Government disbursed last week through the U. S. Sub-Treasury here, on account of the November coin interest on the public debt, chiefly on the Five-Twenty Loan, $301,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1866, $48,207,371, against $98,063,787 same time last year. The specie exports from San Francisco from Jan. 1, to Nov. 28, reached $40,369,953, against $40,867,088 same time last year.

In Foreign Exchanges, there has been a restricted movement and much depression, resulting from the augumented offerings of sterling bills, chiefly drawn against produce (including Southern cotton) exports. After the closing of business on Monday for Wednesday's outgoing steamers (Tuesday having been a close holiday) the market closed quite flat and nominal. Bankers' 60 day bills on London closed at heavily 108@109¼, and on Paris to 5.17½@5.15; sight bills on London to 109⅞@110⅛; and on Paris to 5.15@5.15½. The offerings of produce bills have been quite liberal, since our last, owing, mainly to the increased cotton exports from the Southern ports. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,234,610, making the exports since January 1, $185,815,620, against $176,683,521 same time time last year.

Government securities have been in very moderate demand since our last; and, in sympathy with the decline of six per cent. in gold, the coin bearing bonds have receded about two per cent., the Seven-thirties having been relatively firmer. The closing business was very light and against the market. U. S. sixes of 1867 closed here on Wednesday nominally at 125; U. S. sixes of 1868, at 122; U. S. sixes of 1881, 110¼@110⅛; U. S. Five-twenties of 1862 at 105¼@105½; U. S. Five-twenties of 1865 at 104¼@104½; U. S. Five-twenties of 1865, consolidated, 107¼@107½; U. S. Ten-forties at 99@99¼, and U.S. Seven-thirties at 104⅜@103¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	116¼	May, 1865	111¼
July, 1864	115¾	August, 1865	110½
August, 1864	115¼	September, 1865	110¼
October, 1864	114¼	October, 1865	109¾
December, 1864	113¼		

Railway and miscellaneous stocks have been seriously depressed, chiefly by forced realizations on speculative account, in view of the increased firmness in money, and the uncertainties of the immediate future. The dealings have been of average magnitude, but generally at declining price, the closing operations indicating a lack of confidence in a speedy rally.

The Stock Exchange has returned to the old system of two business sessions a day, the first from 10 a. m. to 1 p. m.; and the second from 2 to 4 p. m.; the arrangement, referred to in our last, having proved, as we anticipated, wholly impracticable and embarrassing to the brokers.

General business has been unusually prostrate since our last. Operations in all kinds of breadstuffs, provisions, and other domestic produce, as well as in foreign merchandise have been quite limited. There has been, however, remarkably little variation in prices, considering the severe fall in gold. Holders of Cotton have yielded a trifle, on a moderate call. Middling grades of Cotton closed heavily at 32½@35 per lb. The stock of cotton now here is estimated at about 160,000 bales. The receipts at the port this week, have averaged nearly 3,800 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 235,000 bales, against exports of 100,328 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 603,000 bales against 768,283 bales same time last year; exports, 224,000 bales, against 382,200 bales same time last year, estimated stock at latest dates, 470,000 bales, against 421,500 bales same time last year. In foreign merchandise, the main business has been in seasonable dry goods, which in the instance of domestic fabrics, have held there own with much steadiness. The total imports of foreign dry goods, last week, were $1,482,880, and the total amount marketed $1,124,296. The value of foreign merchandise imported last week, was $3,949,693—making the grand total specie value of last week's imports of dry goods and merchandise, $6,224,708, and since January 1, $289,821,758, against $205,626,631 same time last year. The ocean freight market is less active and heavy with 551 vessels of all classes in port. For Liverpool we quote flour at 1s. 9d.@2s. per bbl.; grain at 3½@4d. per bushel; cotton at ¼@9.32d. per lb.; and heavy goods at 10s.@12s. 6d. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 12.	Dec. 19.	Dec. 22.
Consols	—88¼	89⅝	89¾
U. S. 5-20's of 1862	—71	71½	72¼
U. S. 5-20's of 1865	——	70¼	71
Erie	—47½	46¾	46¾
Ill. Central	—77½	77½	79

The New York exports, exclusive of specie, for the week ending Dec. 25, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$5,449,445	$3,284,610
Prev. reported	171,234,076	182,681,010
Since January 1	$176,683,521	$185,815,620

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$2,877,548	$2,275,015
Gen. merchandise	3,866,709	3,949,693
Total for the week	$6,744,248	$6,224,708
Prev. reported	198,882,383	283,597,050
Since January 1	$205,626,631	$289,821,758

The balance in the Sub-Treasury on Wednesday was $111,257,710 68.

Bessemer Steel Rails.

It will be remembered that Mr. Moon stated at the last London and North Western meeting, in reply to a shareholder, that experiments were being made with a view to having rails with steel at the top and bottom of the rails, but iron in their body, which would effect a further large economy in the use of steel rails. They would have that part of the rail exposed to wear, of steel, and that which is not subject to wear (for practically a rail is not worn down below a certain point) of iron. But this difficulty arose in carrying out the plan—the steel could not be throughly welded to the iron in the process of rolling, or so thoroughly that it would not loosen itself, when of course it was useless for train running. Success, however, has since attended the plan by adopting another method of connecting the steel with the iron. Instead of placing a plate of steel at the top and bottom of the pile to be rolled into a rail, there is now a connecting plate of steel between the top and bottom steel plates, the connecting plate running down between the iron. The rail is steel above, and steel below, with the body of iron, excepting the plate of steel passing through the body of iron from the top to the bottom face of the rail. The steel is thus firmly connected with the iron. It answers, we understand, perfectly, and its importance to railway companies may be estimated when we say that steel rail (of this make) will cost only £9 10s. to £10 per ton, or but £2 more than iron. Great economy will therefore be effected in the future working of railways with large traffics, where good iron rails used to be worn or knocked out in three or four months. Extending the life of the rail, as the steel rail does greatly, also means economy in the consumption of coal, and should be another warning to the croakers.—*Herapath's Journal.*

☞ In future, trains on the Eastern Shore railroad will make close connection with the trains on the Philadelphia, Wilmington and Baltimore railroad from both Philadelphia and Baltimore, thus accommodating both interests.

☞ The Iowa extension of the Chicago and Northwestern railroad was completed to within 15 miles of Omaha on the 14th inst. This adds 24 miles west of Woodbine to which the cars were previously running.

☞ The bridge over Baker's Creek, between Jackson and Vicksburg, has been rebuilt, and trains have resumed running. This bridge is one of the most important on the road.

Public Debt of Austria.

The Austria Public Debt Commissioners have published in the Vienna *Gazette* a statement of the total debt of the empire on the 30th June, 1866. The figures show it to amount to 2,831,211,195 florins. The portion reimbursable and bearing interest is represented by 720,787,485 florins; not bearing interest, 318,334,643 florins; and the portion not repayable and bearing interest, 1,797,060,043 florins; and bearing no interest, 29,022 florins. A sum of 125,478,744 florins is required to pay the annual interest on the public debt, which has increased, since the end of December, 1865, by 234,831,693 florins.

☞ The extension of the Chenango Canal is rapidly approaching completion. When finished this will connect New York with the coal regions of Pennsylvania. The following canal enterprises are talked of: the Niagara Ship Canal; the Huron and Ontario Ship Canal; an enlargement of the Illinois and Michigan Canal; so as to admit the passages of first-class steamboats; a canal from the Hudson to Champlain, and an extension of the James River and Kanawha Canal to the Ohio.

☞ The North Shore (L. I.) railroad—an extension of the Flushing railroad—is now complete and running from Flushing to Great Neck, a distance of about 6½ miles. The amount of stock issued is $200,000, all paid in. Bonds $100,000, bearing 7 per cent. interest. The road will eventually be extended to Huntington, a farther distance of about 10½ miles. It will pass near the villages of Glen Cove, Oyster Bay and Cold Spring.

☞ The surveying party on the Tennessee and Pacific Railroad, engaged in running the line between Nashville and Knoxville, have reached Lebanon, Tenn., and are rapidly approaching Caney Fork. Thus far the route has been found thoroughly practicable. The distance from Lebanon to Nashville is twenty-six miles. The grades are very light and the cost attending the construction of the road astonishingly small.

☞ The Vicksburg *Herald* says: We learn that Hon. Wm. M. Gwin has accepted the Presidency of the Vicksburg, Shreveport and Texas Railroad. We hear that this road and the Southern Pacific Railroad of Texas have been consolidated, and that Dr. Gwin's Presidency embraces the entire line. Better still, it is said ample arrangements have been made for the speedy completion of our Western extensions.

☞ The La Crosse *Republican* says the Southern Minnesota Railroad is daily extending its iron arms out into the counties west of La Crosse; and will, as soon as the ice will bear loaded teams, send in for shipment eastward, pork and wheat by the wholesale.

☞ The branch railroad from Perryville to Port Deposit was opened to travel on the 17th inst., the first passenger train running over the road on the 15th. Two trains run each way daily.

☞ Mexican advices report that the works on the Imperial Railway between Vera Cruz and the city of Mexico would be recommenced at an early day.

☞ The additions to the Union Depot at Indianapolis were completed and opened for use on the 17th inst.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Dec. 15th, 1866, were $127,838 00
Corresponding week of previous year.. 128,714 00

Decrease $876 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Dec. 1866, were $83,512 00
Corresponding week of 1865 ..... 78,967 00

Increase $4,545 00

The earnings of the Chicago and Northwestern Railway for the third week in Dec., 1866, were $161,359 20
Corresponding week of previous year,. 136,609 71

Increase $24,749 49

The earnings of the Detroit and Milwaukee Railroad for the week ending Dec. 20th, 1866, were $23,494 00
Corresponding week of 1865 ..... 23,564 00

Decrease $70 00

The earnings of the Michigan Central Railroad for the 2d week in Dec., 1866, were... $55,252 00
Corresponding week of previous year.. 76,407 00

Decrease $21,155 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Dec., 1866 ... $25,901 00
Corresponding week previous year 25,659 75

Increase $241 25

The earnings of the Western Union Railroad for the week ending Dec. 21, 1866 . .. $9,382 42
Corresponding week previous year 7,179 53

Increase $2,202 89

Law of Insurance.—Election to Rebuild.

The case of Morrell *vs.* The Irving Fire Insurance Company, lately decided by the Court of Appeals of this State, involves the discussion of an interesting question of Insurance law.

The facts are fully stated in the opinion of the court which was written by

Davies, J.—This action was brought to recover the amount of a policy issued by defendants upon certain promises of the plaintiff, whereby the defendants insured him against loss or damage by fire to the extent of $3,000. The building insured was destroyed by fire in January, 1857.

At the time of the fire the plaintiff had another policy of insurance for $2,000 upon the same building, issued by the Excelsior Fire Insurance Company.

Each policy contained the usual clauses limiting the liability of the insurer "to such ratable proportions of the loss or damage happening to the subject insured as the amount insured by this company shall bear to the whole amount insured thereon," and making it optional with the company to rebuild or to repair the building within a reasonable time, giving notice of their intention to do so within 20 days after having received the preliminary proofs of loss, &c." The two companies, on the happening of the loss, united in a notice to the plaintiff stating "that we are prepared to rebuild the said building, and you are requested to furnish us with the plans and specifications of the same."

In pursuance of this notice, the companies proceeded to erect and repair the building, in accordance with the plans and specifications furnished, and claimed to have the same completed in conformity therewith. The plaintiff insisted that the building was not thus completed, and on the 4th of November, 1857, he commenced this action upon the said policy of insurance, and claimed to recover the full amount thereof. On the trial the plaintiff had a verdict for the full amount of the policy and the interest thereon, and judgment thereon was affirmed at the General Term of the Supreme Court. On appeal to this court, the judgment was reversed and a new trial ordered. This court held that the election to rebuild formed a new contract or agreement to build, according to the plans, and that such contract could be enforced as a building contract, without reference to the amount named in the policy, and that, if the insurer has not replaced the article or rebuilt the building in the manner agreed upon, the insured will be entitled to recover the damages which he has sustained by a breach of the contract or agreement, as in other cases of the breach by the builder of his agreement to build; that the action on this agreement to rebuild, could properly have been against both companies; that where they jointly elected to rebuild, they jointly agreed to rebuild, and were jointly liable in an action for a breach of the agreement. This court also held, that the plaintiff might, at his election, treat the contract to rebuild as that of each insurer, and for a breach of the building agreement, maintain his action against either company, and recover full damages; that if the party undertaking to rebuild should fail to perform the contract, and the insured should recover and collect damages for the breach of the agreement, such party could recover of the other insurer a rateable proportion of the loss. Such insurer would, by the payment of the damages received by the insured, have satisfied the demand for the loss; the insured would have been fully indemnified; and the insurer, who paid nothing and did nothing would be liable for contribution.

In his charge to the jury, the learned judge who tried the action correctly stated the rule as established by this court to be, that the jury were to ascertain the difference in value between the building as it existed on the day it was destroyed by fire and the building which the insurance company furnished and delivered over to the plaintiff after this notice, and that such amount would be the damages which the plaintiff is entitled to recover. And the court further charged, that the plaintiff is entitled to interest from the time possession of the new building was delivered over to him. No exception was taken to the charge, or to any part thereof.

The counsel for the defendants requested the court to charge the jury that the Excelsior Fire Insurance Company, at the time of the fire, had a policy of insurance upon the building destroyed for $2,000, and the defendants a policy for $3,000, and by the fifth sub-division annexed to defendants' policy the defendants can be made liable only for three-fifths of the amount of plaintiff's damages. The court declined so to charge, and the defendants' counsel excepted.

The counsel for defendants also requested the judge to charge that it was the duty of the jury to ascertain the whole amount of the plaintiff's damages, and after having done so, to render a verdict for three-fifths of that amount. The court declined so to charge, and the defendants' counsel excepted.

For the reasons already suggested, the requests to charge were properly refused. The defendants were liable on their contract to rebuild for the whole amount of damages sustained by the plaintiff by reason of the non-performance of their contract. They were entitled to no deduction from that sum, because another party was also liable to pay a portion of it. That other party was liable to contribute its share or portion, as this court held on the former argument, and it also held that these defendants were primarily liable to pay the whole amount of damage. The proof offered of the policy of the Excelsior Fire Insurance Company having been excluded, and properly so, there was no foundation for these requests to charge. The Jury, under the charge of the court, found the whole amount of the damage sustained by the plaintiff, by reason of the breach of the agreement to rebuild, at the sum of $2,300 and the interest thereon, for which sum judgment was perfected.

The remaining question to be considered is, whether the order of the General Term, affirming that of the Special Term, refusing leave to the defendants to put in a suplemental answer, is reviewable in this court. It is claimed that it is under the last clause of sub-division first of section eleven of the code, which declares that upon the appeal from the judgment in the action, the court shall have power to review any intermediate order involving the merits and necessarily affecting the judgment.

If the order were reviewable in this court, I should not concur with the Supreme Court in its refusal to permit the defendants to file a supplemental answer, setting up what clearly they had a right to do, namely the extinguishment and payment of two-fifths of the plaintiff's claim. If the defendants had based their application on this ground, I think it should have been granted. But the discussion of this question is now of no practical moment, as the General Term of the Supreme Court have given to the defendants all the benefit they could legally have derived if they had filed their supplemental answer, and had given the evidence offered by them, by confining the recovery of the plaintiff in the action to the remaining three-fifths of his claim. In relation to this, there is no pretense that it has ever been paid or extinguished except by the ground assumed, that the recovery of the judgment by this plaintiff against the Excelsior Company extinguished also his claim against these defendants for the remaining three-fifths. That proposition cannot be maintained; and the results, which will be attained are such as equitably attached to each of these companies. These present defendants were liable to pay and contribute three-fifths of the damage which the plaintiff sustained by the non-performance of their contract to re-build. In the present action the jury, under an unexceptionable charge, have found such damage to be the sum of $2,300. We must assume this to be its extent; and the defendants being clearly bound to pay and contribute that sum, they have no just cause of complaint with the judgment appealed firm, as modified and finally adjusted by the General Term of the Supreme Court. Their legal liability is not affected by the circumstance that the other com-

pany has extinguished its liability to pay two-fifths of the damage by the payment to this plaintiff of a less sum than its proper proportion. These defendants are not called upon to pay more than their proper portion of the damage as ascertained by the Jury; and if they have any remedy, it is by a call on the Excelsior Company for contribution.

The judgment appealed from should be affirmed, with costs.

Railway Enterprise and its Results.

An excellent paper on this subject was read at the meeting of the London Statistical Society on 20th ult., by Mr. R. Dudley Baxter, an authority of no little eminence on the subject. The treatise divides this marvellous branch of the history of the present century into five periods—viz., that of *experiment*, from 1820 to 1830; second, from *infancy to puberty*, from 1830 to 1845; third, *the mania*, from 1845 to 1848; fourth, *the era of competition*, from 1848 to 1859; and, lastly, that of *speculation*, from 1859 to 1865. A rapid summary of the interesting paper, taken from the London *Railway Times*, sets forth that after the bigoted opposition that characterized the period of infancy, the facts that most of the great lines in 1845 were paying dividends ranging from 10 to 15 per cent., and that shares were on an average 100 per cent. premium, led to the mania which by 1850 had brought the net returns down to an average of 3⅓ per cent., leaving scarcely anything for ordinary shareholders. Then came the amalgamation system, which by 1860 raised the percentage of profits from 3⅓ per cent. to 4⅓ per cent., and lastly we have had the rage for contractors' lines, which, stimulated by the finance companies, has just been brought to a conclusion. In the year 1834 only 200 miles were open. Last year the total was 13,100. Between 1830 and 1840 the rate of increase per annum was only 133 miles. Between 1860 and 1865 it was 533 miles. During the last six years the number of miles authorized by Parliament has been 7,323, or at the rate of 1,220 miles per annum. Of these there must be about 3,500 miles, or nearly one-half, not begun or not completed—a number sufficient to occupy us for fully seven years at our present rate of construction.

Owing to the tardy publication of the returns of the Board of Trade, some of the most important particulars concerning them are limited to the end of the year 1864. At that date, out of 12,789 miles open, 8,890 were in England, 2,105 in Scotland, and 1,794 in Ireland. England and and Wales have a mile of railway for every 6½ square miles of country, being the highest proportion in the world, while Scotland has less than half that accommodation, and Ireland little more than one-third. As regards the proportion of mileage to population, England has one mile of railway to 2,275 persons, Scotland one mile to every 1,470, and Ireland one mile to every 3,260, so that Scotland, a thinly inhabited country, has the greatest railway mileage in proportion to her population, and, indeed, in that respect, stands at the head of all European countries.

In 1865 the gross receipts for the United Kingdom were 8.57 per cent., of which 4.46 was profit, and the average of dividends paid was 4.64 per cent., the proportions being 4.65 per cent. by English lines, 5.70 by Scotch, and 3.56 by Irish. Up to the end of 1864 the total capital authorized was 520,522,000*l.*, while the sum expended was 426,482,000*l.* Of this the debenture and preference capital amounted to nearly one-half. The preference capital has been for some time steadily increasing, while the ordinary remains almost stationary. As the old companies almost always increase their capital by preference stock, it is believed that in seven or eight years the debenture and preference capital will have risen to two-thirds of the amount expended.

As regards the effect of railways in cheapening the cost of transport, it is stated that had the traffic of 1864 been conveyed by canal and road at the pre-railway rates it would have cost 108,000,000*l.*, instead of 36,000,000*l.* Hence there is a saving of 72,000,000*l.* a year, or more than the whole taxation of the United Kingdom. Commerce has increased in proportion, and the total value of our exports and imports, which in 1838 was 85,500,000*l.*, was last year 490,000,000*l.*

With respect to the systems of other countries, those of France and the United States are the most important. Up to the end of last year the lines constructed in France were 8,134 miles, or about the same length as the lines which existed in England at the end of 1855. Hence, notwithstanding the vigorous impulse given by the Emperor Napoleon, France is ten years behind England in actual length of railways constructed, and at least fifteen years behind if her larger territory and population are taken into account. In the United States the total mileage at the end of 1864 was 33,860 miles—four times that of France, two and a half times that of England, and nearly as large as the total mileage of the United Kingdom and Europe, which is about 42,000 miles. Moreover, the lines in construction, but not yet completed, are stated to be above 15,000 miles in length, including the Great Pacific, which receives from the Government subsidies of 3,300*l.*, 6,600*l.*, or 9,900*l.* per mile, according to the difficulty of the ground, besides enormous grants of land, and which, when completed, will reduce the journey from Hong Kong to England from its present time of forty-two days to thirty-three days. Nearly all the American lines are crowded with traffic, and, according to the sanguine anticipations of Mr. Baxter, "the trade which must ultimately pass over them will far exceed in extent anything that has hitherto been known in the history of the world."

Finally, Mr. Baxter devotes some space to the question of railway sinking funds for the reduction of national debts, and to the mode in which extensions should be promoted for the future, his view in the latter respect being that in country districts where the great profit of the work would come in the shape not of earnings upon outlay, but of enhanced value to the land and trade of the population, the municipal system should be introduced, so that parishes and boroughs might rate themselves to raise money for the purpose. With regard to railway sinking funds—a policy in which he considers other nations have made a great start—he points out that Belgium will, in 1884, have extinguished the whole cost of her State lines, 352 miles in length, the entire profits of which will then become part of the revenue of the nation, and adds—

"But the most remarkable example is France; and I will endeavor to explain as briefly as possible the working of the French system. In France the railways are conceded for ninety-nine years, but it is one of the conditions of the grant that all the capital, whether in shares or debentures, shall be paid off within that term by an annual *amortissement*, or sinking fund. The small amount of this annual payment is extraordinary. The French rate of interest is 5 per cent., and the annual sinking fund necessary to pay off 100f. in ninety-nine years is as nearly as possible .04. Put into the English form, for the sake of clearness, this means that the annual sinking fund necessary at 5 per cent. to redeem 100*l.* in ninety-nine years is only 1s. per annum. As debentures are issued in France for less than ninety-nine years when part of the concession is run out, the amount of the sinking fund varies, but it is usually said to amount on the average to ⅛ per cent. As the whole expended capital of French railways represented by shares and debentures is 233,000,000*l.*, it follows that the total annual sinking fund paid by the French companies for the redemption of that sum is less than 300,000*l.* The result is marvellous, that for 300,000*l.* the French nation will acquire, in less than ninety-nine years, an unencumbered property of 233,000,000*l.* sterling; but this is not all. The railways represented by that 233,000,000*l.* sterling produced in 1865 a net revenue of about 12,500,000*l.* Before 1872 further railways will have been completed, which will be amortised at the same date as their parent lines, and will produce before many years a net income of 4,000,000*l.*, making the total net income of the French system 16,500,000*l.* But the total charge of the French National Debt in 1865 was only 16,000,000*l.* So that France has now a system in operation which, in less than ninety years from the present time, will relieve the country from the whole burden of her national debt of nearly 540,000,000*l.*

"Is it allowable in me to ask why are we doing nothing of the sort? When so many other nations are paying off by means of their railways a portion or the whole of their national debts, why are we, with all our wealth and resources, to do nothing? A scheme of amortisation suited to the habits of the English people is perfectly possible, and the peculiar position of companies at the present moment renders it easy to carry out. I will say nothing about debentures, because a plan is now before the Government dealing with them. But I say, respecting share capital, that it would be perfectly practicable for the State to become the possessor of a large proportion of this stock in a comparatively short time, and at no great expense. An annual sinking fund of 5s. per cent. will pay off 100*l.* in seventy-two years, reckoning only 4 per cent. interest. Hence in seventy-two years an annual sinking fund of 560,000*l.* a year will pay off 200,000,000*l.* The Government duty on railways amounts to 450,000*l.* a year, and will soon reach 500,000*l.* My proposal would be to make this a sinking fund towards purchasing 200,000,000*l.* of preference and other stock, and let it be invested annually by the Board of Trade, or by commissioners appointed for the purpose, like those appointed for the National Debt. Instead of cancelling each share as it is purchased, let it be held in trust for the nation, and the dividends applied every year in augmentation of the sinking fund. In this manner, at the end of about seventy-two years, 200,000,000*l.* of preference and ordinary share capital would become the property of the nation, and its dividends become applicable to the interest of the National Debt. As dividends average 4 to 4½ per cent., the dividends on the redeemed capital would pay the interest on more than 250,000,000*l.* Consols, and be equivalent to the redemption of that amount of our National Debt. I believe that this is a practical scheme. In a slightly different form it is now being carried out in France, Belgium, and other Continental States. I trust that before long we shall cease to be almost the only nation in Europe which does not act on the principle 'that railways are the true sinking fund for the payment of the National Debt.'"

☞ A complementary banquet to the delegates of the Board of Trade of Milwaukie, Chicago and Oswego, was given at Toronto on the 19th. The chief subject of interest was the new scheme of joining Lakes Huron and Ontario by a ship canal, a Canadian enterprise in which the Northwest is much interested.

☞ The shareholders of the Buffalo and Lake Huron railway, at a meeting in London, England, have approved and accepted the act to consolidate that road.

Railways in Italy.

As early as the second week in December several new and important lines were to have been opened through Pavia, Cremona, and Brescia, and others between Catania and Messina, and also those between Florence, Rome, and Naples, *via* Arezzo and Foligno. These various works were being carried on with energy. Thus Italy will be intersected throughout her principal provinces by a continuous line of railway communication. Direct and rapid communication will be possible between Udine and Salerno on the one hand; and on the other between Mont Cenis and Otranto. The journey from Florence to Turin will be performed in twelve hours; to Milan in ten hours from the same capital. Venice and Florence will be within eleven hours' reach of each other; while Rome and Naples may be reached from Florence—the former in twelve, the latter in eighteen hours. Permission has been granted by the Italian Government to the English Government for the establishment of a line of communication through that country for the future passage of the Indian mail, as proposed by Captain Tyler. This line will be set on foot, it is hoped, in about six months' time.

Huntingdon & Broad Top Mountain R. R.

This road is 44 miles in length, extending from Huntingdon to Mount Dallas. At Huntingdon it connects with the Pennsylvania Railroad. The gauge of the road is 4 feet 8½ inches. It has 11¾ miles of sidings, and 14½ miles of branch roads, viz: Shoups Run, 9¼; Six Mile Run, 4¼; and Sandy Run, 1 mile. The weight of rail per yard on main track is from 45 to 60 lbs. The equipment of the road consists of 16 locomotives, 2 first class passenger, 4 baggage, mail and express, 3 freight, and 126 coal cars. The amount of capital stock authorized by law is $800,000; preferred $300,000; and by merger of the Bedford Railroad, $250,000 additional. The amount of stock subscribed is 12,352 shares common, and 3,815 preferred. The amount paid in of each is given in the annexed statement of "Stock and Debt." The floating debt does not include unpaid coupons. The rate per annum of interest on bonds is 7 per cent.; on funded coupons, 6 per cent. Par value of stock, $50.

The receipts from operations of this road for the fiscal years ending October 31, 1864 and 1865, have been as follows:

	1864.	1865.
From passengers	$29,115 92	$40,227 70
" freight	295,972 47	296,907 99

Debt of Michigan.

The funded and fundable debt of this State, according to the recent report of the State Treasurer, is as follows:

Sault Canal bonds, 6s, due Jan. 1, 1878	$100,000 00
Renewal loan bonds, 6s, due Jan. 1, 1878	216,000 00
Two million loan bonds, 6s, due Jan. 1, 1868	250,000 00
Two million loan bonds, 6s, due Jan. 1, 1873	500,000 00
Two million loan bonds, 6s, due Jan. 1, 1878	500,000 00
Two million loan bonds, 6s, due Jan. 1, 1883	750,000 00
War loan bonds, 7s, due Jan. 1, 1866	1,111,500 00
War bounty bonds, 7s, due May 1, 1890	463,000 00
Adjusted bonds, past due	4,000 00
Full paid five million loan, past due	12,000 00
War loan bonds, called in Jan. 1, '66	1,100 00
One hundred and twenty-five thousand dollars of unrecognized five million loan bonds, past due, and unadjustable at	72,321 25
Total bonded debt	$3,979,921 25
Deduct debt of Jan. 1, 1661	2,388,842 79
Showing net increase of bonded debt, during past six years	$1,591,078 46

If the present policy of investing the receipts of the educational funds in State bonds is continued, the amount thus received, added to the annual levy of 3-16 of a mill for the sinking fund, will probably be sufficient to pay the State debt as fast as it matures.

Interest and Dividends.

The Hartford and New Haven Railroad Company have declared a dividend of $8 per share, free of Government tax, payable at the Union National Bank, January 2, 1867.

The Norwich and Worcester Railroad Company have declared a dividend of four per cent., free of Government tax, payable January 10, 1867, at the office of the Farmers' Loan and Trust Co.
